Enrollment Summary

- Total enrollment peaked at 1.58M members in May 2023 prior to the resumption of redeterminations.
- Since then, enrollment has decreased to 1.34M in June 2024 (a decrease of 15.3% from May 2023).
- F&C Children redeterminations have been paused and a further waiver to delay redeterminations has been requested from CMS.

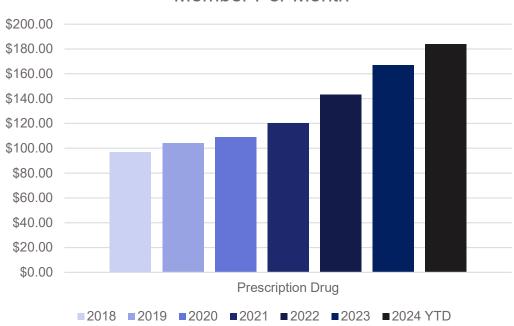

Population Acuity Impact from Enrollment Changes

- As a result of the pause in redeterminations, the Medicaid population increased by more than 25% between March 2020 and May 2023.
- The members retained by the program during this time were disproportionately lower in cost to the program.
- With the resumption of redeterminations in June of 2023, these low-cost members are being removed from the program resulting in an increase in the average costs of remaining members.

Pharmacy Summary

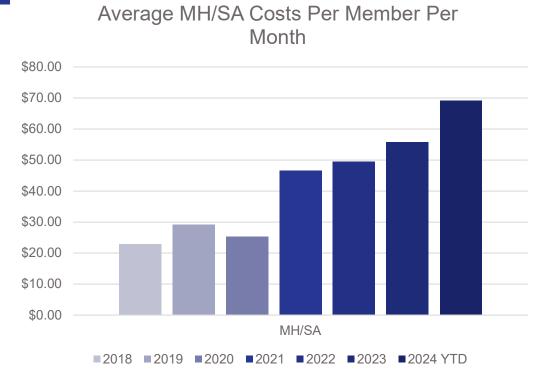

Generic Dispensing Rate							
	Year						
Region	2019	2020	2021	2022	2023		
Α	90.1%	90.5%	85.3%	84.5%	84.6%		
В	90.7%	91.5%	87.1%	86.2%	86.5%		
All	90.6%	91.4%	86.9%	85.9%	86.2%		

- An analysis by Wakely found the generic dispensing rate decreased by 4.5% when the single PDL was implemented in 2021 leading to higher reliance on more expensive brand drugs.
- Prescription Drugs (12.3% annualized per member per month trend).
 - The single preferred drug list was implemented Jan 2021; the single pharmacy benefits manager implemented July 2021.
 - Prescription drug costs were not adjusted for rebates.
 - Prescription drug trends since 2021 have been disproportionately driven by double digit unit costs (in the range of 15.7%-19.2%).

Total	6,730,879	9,076,770	11,313,712	68.10%

- MH/SA: 22.2% annualized per member per month trend
 - The Medicaid health plans identified removal of prior authorization as a driver of increased MH/SA trends.
 - Procedure level data indicates this trend is driven by significant increases in utilization in certain codes.

DISCLOSURES AND LIMITATIONS

Responsible Actuary We, Taylor Pruisner (FSA) and Andrew Schwarze (ASA) are the actuaries responsible for this communication. We are Members of the American Academy of Actuaries and a Fellow and Associate of the Society of Actuaries, respectively. We meet the Qualification Standards of the American Academy of Actuaries to issue this analysis.

Intended Users This information has been prepared for KAHP and cannot be distributed to or relied on by any third party without the prior written permission of Wakely. We do not intend this information to benefit any third party nor create a reliance by any third party on Wakely.

Risks and Uncertainties The assumptions and resulting estimates included in this analysis are inherently uncertain. Users of the results should be qualified to use it and understand the results and the inherent uncertainty. Wakely does not warrant or guarantee the projected values included in the analysis. It is the responsibility of the organization receiving this output to review the assumptions carefully and notify Wakely of any potential concerns.

Conflict of Interest Wakely provides actuarial services to a variety of clients throughout the health industry. Our clients include commercial, Medicare, and Medicaid health plans, the federal government and state governments, medical providers, and other entities that operate in the domestic and international health insurance markets. Wakely has implemented various internal practices to reduce or eliminate conflict of interest risk in serving our various clients. Except as noted here, I am financially independent and free from conflict concerning all matters related to performing the actuarial services underlying this analysis. In addition, Wakely is organizationally and financially independent from KAHP and its member health plans.

Deviations from ASOPS Wakely completed the analysis using sound actuarial practice. To the best of my knowledge, this communication and the methods used in the analysis are in compliance with the appropriate Actuarial Standards of Practice (ASOP) with no known deviations.
