<b>BRIEF DESCRIPTION</b>			
<p>The City of Milton's WWTP is due for replacement and the logical step would be to evaluate regionalization and relocation options. This project will complete a preliminary engineering report (PER) to evaluate three identified alternatives: 1. Replace the WWTP near the current location but outside of the floodplain, 2. Relocate the WWTP to a new location to the south, and 3. Decommission the WWTP and pump to Carrolton Utilities for treatment. The PER will evaluate the capital, operational, and maintenance costs to develop full life-cycles costs. Other factors such as constructability, permit compliance, future regulatory issues, and community concerns will also be assessed. This will allow the City of Milton to make the most informed decision possible. The intention of this project is to be the first phase of a multi-phase design and construction project. Investing in good planning now will make sure that community funds are invested in solutions that return the most value over the life of the assets.</p>

The proposed project offers a solution for enhancing the District's ability to read and monitor all water meters by installing cellular endpoints to their existing inventory of water meters. With this upgrade, water meters can be monitored on a daily basis to quickly alert their maintenance staff of an issue plus give the customer an early warning. Additionally, the improvement will give all customers access to an iCloud based portal to self-monitor consumption., similar to features provided by other utilities (power, phone, etc.) The work would be self-performed by utility staff.

**BRIEF DESCRIPTION**  
 The unserved portion of this project includes 3.83 miles of waterline extension to serve 56 households in rural areas at a project cost of \$2,600,000. The average number of households served per mile for this project is 14.62 per mile. The following streets are part of this project: Tower Hill Rd., Blangey Rd., Upper Lick Branch Rd., Enzweiler Rd., Oneonta Rd., Pond Creek Rd., Gunkle Rd., & Poplar Thicket Rd. If customer interest in connecting to the water system is not sufficient, other streets may be selected. Completion of this project will provide a reliable, safe supply of water to households that currently use cisterns to collect rain water or that haul water to fill them. Design will commence upon receiving notification of the requested Grant funding and can proceed quickly to facilitate bidding the project. Construction of the project is anticipated to be completed by December 2024.

**BRIEF DESCRIPTION**  
This is a study of the feasibility and estimated cost of an extension of the Greenup Water system to the Lower White Oak area. The proposed 4 inch waterline would connect to an existing 4 inch line along Sheep Hollow Rd and travel across country to Lower White Oak Road then travel along Lower White Oak and branching off to supply Little Kellen Hollow Road and Pruit Hollow Road then approximately one mile along Buck Hollow Road. A 50,000 gallon storage tank will be needed to supply sufficient pressure and flow to the entire area serviced by the proposed line. A 50 gmp pump station would also be needed near the connection with the existing 4 inch waterline to fill the proposed storage tank. Two directional creek crossings will also be needed to cross Lower White Oak Creek. This extension will provide service to about 65 unserved households for an estimated cost of \$521,000.

BRIEF DESCRIPTION				
<p>This project will serve approximately 30 new customers who are currently unserved with the construction of 28,673' of 4" PVC line. The area includes: Scaffold Lick, and various streets in Firebrick. The project will replace approximately 12,792' of 4" PVC with 6" line that is undersized. In addition, pressure problems for approximately 200 households will be alleviated through acquisition and upgrading of 24,441' of lines in the Fire Brick area. An interconnection will be constructed at the end of the proposed line between South Shore and Garrison. An existing interconnect will be removed at the point where the systems currently connect.</p>
