They have significantly overhauled the scope on A21-012 and A21-014. The purpose is still the same, however, so Anchu agreed that it did not change their ranking for funding. Rather than go in on one or the other and change the profile, they would like to open up A15-026 and modify the project to include a Phase 2 that will essentially be the new scope. Then they would decline the two A21 projects, but the money would be added as an increase on A15-026.

Smithland currently is under a state injunction for the seepage occurring at their sewer lagoon levee. The City installed a new UV treatment system due to a lightning strike taking out their old one. They thought this would help solve their problem temporarily with the hopes of being able to discharge more and keep the freeboard they need in the lagoon to limit seepage. Since then, their problems have only gotten worse. The state still will not let them discharge more than 70,000 GPD of treated sewer. The City needs the lagoon levee grouted and the gravity sewer system needs rehabilitated. However, the population of the town is 240 according to the 2020 decennial census thus making it very difficult to take out a loan for such a substantial project. Having enough money to do the lagoon rehab would be a tremendous help to get them into compliance and would be greatly appreciated.

GRANTEE	WEST LIBERTY, CITY OF MORGAN COUNTY
---------	--

BRIEF DESCRIPTION

The City of West Liberty proposes to CCTV the entire gravity sewer system and to repair the most dilapidated lines and manholes to reduce inflow and infiltration. Approximately 5900 Linear Feet of sewer line will be replaced. The I&I Study will include manhole inspection, TV line inspection, smoke testing, etc. The 5900 LF includes: 1500 LF of gravity sewer will be lined with cured-in-place-pipe, 20 manholes will be replaced 10 manholes will be lined. Approximately 2000 LF of 8 inch clay tile line from Branch Street to Henry Street, which was installed during the 1960s, is a suspected source of a large portion of the I&I issues experienced in the cities sewer system. Branch Street Manhole is also the only location of a bypass during heavy rain. Branch Street is the only known bypass in the West Liberty System. Other problem areas include: Riverside Drive, Peddler Street, Bellamy Court, Trimble Street, Court Street, Glenn Avenue, and Broadway

GRANTEE	HARRODSBURG, CITY OF MERCER COUNTY
---------	---------------------------------------

BRIEF DESCRIPTION

This project will construct a new pump station and force main on the east side town along the Harrodsburg Bypass (BYP 127). This will achieve several critical goals for the City's wastewater collection system. First, the City's collection system unfortunately funnels through a pinch point in the downtown area. As the community has grown, Harrodsburg's sanitary sewer system in the downtown area has become badly overloaded, even in dry weather conditions. The downtown sanitary sewer lines are significantly undersized to do the job necessary to service all City customers at present, certainly leaving no capacity for growth. The fact that the downtown area's sewer system is aging and at least some I&I inevitably occurs only makes the situation worse during wet weather. The new pump station and forcemain will direct flow that is currently being forced through the middle of town to a large diameter collector sewer, bypassing the old downtown collection system which is not sized to handle any significant additional flow.

GRANTEE EAST LOGAN WATER DISTRICT
 LOGAN COUNTY

BRIEF DESCRIPTION

The proposed project involves replacement of all meters, setters, boxes and service tubing within one of their SCADA zone areas near the intersection of KY Highway 79 and the Russellville Bypass. This area is commonly called the 'KY Highway 79 Master Meter Area'. This zone consists of approximately 180 active meter sets with many being some of the original customers from the District's formation. The District's operators have identified aging and leaking service tubing to be a significant source to the District's water loss issue, which measured at 25.3% in 2020. This initial meter replacement project has an estimated cost of \$295,000, and it is expected to take 3 months to complete.

GRANTEE POWELL'S VALLEY WATER DISTRICT
 POWELL COUNTY

BRIEF DESCRIPTION

The Kentucky Parks Department has requested sewer service from their Natural Bridge State Park facilities. Their existing wastewater treatment plant will be abandoned and the effluent will be transported to the Powells Valley Water and Sewer District wastewater plant. The project includes improvements to the collection system from the Park to the wastewater treatment plant as well as expansion of the plant capacity to accommodate the additional flows. Eliminating the State Park's treatment plant will help to lower maintenance costs for the State.

<p>This project includes the replacement of the paint creek tank and pump station. The existing tank is aging and in need of replacement in order to meet and maintain requirements of the Safe Drinking Water Act. This will create a higher pressure zone within the service area. Higher elevations currently have lower pressure and this project will help correct that. The pump station will be more energy efficient and will use VFD's for pump control. These improvements will help the city improve the water distribution of their system.</p>

 POWELL COUNTY

BRIEF DESCRIPTION

This project will upgrade existing pumps stations and tanks and install water mains to replace undersized mains and connect mains to eliminate dead ends. The tanks include Furnace Mountain Tank and the Mulch Plant Tank. The Black Creek Road booster pump station will be replaced and telemetry will be installed to improve monitoring and control. The project also includes replacing the water district office and adding radio read capabilities to existing water meters. This project is part of an effort to improve the overall water distribution throughout the system.

BRIEF DESCRIPTION			
<p>This project will install approximately 17,000 linear feet of 36" Ductile Iron Water Main from Clermont Tank to Belmont booster pump station (BPS). Construct new Salt River BPS. The southern portion of Louisville Water's service area is experiencing significant growth driven by major economic development projects, such as the Ford SK Battery Plant in Glendale, Kentucky. Louisville Water's I-65 Transmission Corridor supplies wholesale customers Hardin County Water District No. 2, Lebanon Junction, and North Nelson Water District, as well as Louisville Water's retail service area in Bullitt County. This project is necessary to increase transmission capacity throughout this corridor to support the continued growth of both the retail service area and wholesale customers further to the south.</p>
