<b>DRINKING WATER AND WASTEWATER GRANT PROGRAM</b>		KIA Grant Number	21CWS077
<b>CLEANER WATER PROGRAM GRANT</b>		WRIS Number	SX21157034
GRANTEE	HARDIN, CITY OF MARSHALL COUNTY		
BRIEF DESCRIPTION			
<p>This will be the third phase of the City of Hardin wastewater rehabilitation project. Phases one and two were completed in 2007 and 2012, respectively. These projects were budget-driven and addressed some mainline sewer issues and significant manhole rehabilitation. Unfortunately, funding has historically not been sufficient to perform comprehensive rehabilitation of the City's sewer main and lateral network. Phase III will continue with these efforts, while focusing on wet-weather surveys, addressing previously identified smoke testing defects, performance of mainline CCTV work, and performance of lateral CCTV work. The results of these SSES efforts will be evaluated for the preparation and implementation of a Phase III rehabilitation construction project to remove excess levels of infiltration and inflow, which are overloading the City's WWTP.</p>

<b>DRINKING WATER AND WASTEWATER GRANT PROGRAM</b>		KIA Grant Number	21CWS138
<b>CLEANER WATER PROGRAM GRANT</b>		WRIS Number	SX21225044
GRANTEE	STURGIS, CITY OF UNION COUNTY		
BRIEF DESCRIPTION			
<p>The City of Sturgis has applied for SRF funding to rehabilitate their WWTP to comply with an Agreed Order under project profile SX21225012. Separate from the Scope of Work included in that profile are 3 items required at the plant now that will address immediate needs and result in significant cost savings for the City. Those items are listed below: 1. Peracetic Acid Tank 2. Replacement of 4 Air Release Valves 3. Replacement of Disc Aerator Switching from Cl2 gas to peracetic acid tank will allow the city to save \$69,000 annually in chemical costs. Sturgis now purchases water from the Union County Water District and the purchase of 300,000 gallons of water as a carrier for the gas is cost prohibitive. The 4 Air Release Valves have failed and must be replaced immediately. 1 of the disc aerators at the WWTP has failed and a replacement is needed immediately.</p>

GRANTEE	SHARPSBURG WATER DISTRICT BATH COUNTY		
BRIEF DESCRIPTION			
<p>Sharpsburg Water District proposes a project which would rehabilitate and refurbish the 119000 Gallon Sharpsburg Tank located within the system. The Sharpsburg Water District has a directly serviceable population of approximately 3269, or 1466 households, with serviceable connections in both Bath and Nicholas counties. The proposed refurbishments would include painting, sand blasting, and recoating the interior of the Sharpsburg Tank. The proposed project would also see the installation of new equipment on the tank to improve water turnover quality to reduce public health risk of consuming and using stale water. The exterior coating of the Sharpsburg Tank would be pressure washed with biodegradable detergent (max 3,500psi) then remove loose rust and scale the exterior with wire brushes and hand scrapers in accordance with SSPC#2 (hand too cleaning). The exterior of the tank will then be spot primed and and two (2) finished coats of Sherwin Williams acrylic will be applied. The interior coating of the Sharpsburg Tank will have all rust sandblasted and abraded areas of the tank will be restored to an SSPC #10 (near white blast) condition. All remaining areas will be brush blasted, with stripe coating applied on all seams and welds. Two (2) complete coats of epoxy with then be applied to complete the the interior. The interior coating will be Sherwin Williams Dura-Plate 325. A (1) 6 inch round 1/4 inch thick patch plate will be installed over a deteriorated area of the tank . The proposed project area would improve water quality for currently 1451 underserved households within the systems serviceable area, which is approximately 98.9% of the systems serviceable households.</p>

 BULLITT COUNTY

**BRIEF DESCRIPTION**

This project will extend water mains along three roads in Bullitt County. The roads to be served are Rummage Road, Grisby Road, and Vaughn Road. An estimated 40,400 linear feet of water main will be installed along with a directional bored creek crossing. It is estimated that 25 homes will be served with water.

GRANTEE	LOUISVILLE WATER COMPANY JEFFERSON COUNTY
---------	--

**BRIEF DESCRIPTION**

This main was installed in the 1890's and is composed of cast iron pipe with leadite joints. In recent years Louisville Water has experienced a failure of this main and as a result, the company has initiated a project to rehabilitate this main in a phased approach. Phase 1 will begin at Dumesnil St east of S 12th Street heading northeast and terminating at the CSX railway crossing. The project then resumes at W Oak St just east of S 7th Street and terminating on W Oak St at S Brook St. The scope for this phase includes the rehabilitation of the existing 48-inch cast iron (4,300 LF) by sliplining and open trench installation methods. The new pipeline installation includes: sliplining 3,800+/- lineal feet of 42-inch OD welded steel pipe and open cut 500+/- lineal feet of 42-inch OD welded steel pipe and appurtenances along the existing route. Also included in this project are eight (8) distribution tie-in connections to the proposed 42" water main, three (3) drain valve assemblies, four (4) 42-inch gate valves and the replacement of one (1) 48-inch gate valve.

GRANTEE	REID VILLAGE WATER DISTRICT MONTGOMERY COUNTY		
BRIEF DESCRIPTION			
<p>Reid Village Water District proposes the following project to remove the existing 2 pumps located at the Devonne Pump Station and install 2 new 10 HP, 300 GPM, 94 FT TDH end-suction type pumps. In addition Reid Village Water District proposes the replacement of all meters within the distribution system with radio read meters. The Devonne Pump Station is located off of Devonne Drive South West, of Mt Sterling, Ky. The Devonne Pump Station come on-line approximately 20 years ago, the motors are losing efficiency. There are currently two tanks located at the Devonne site. The current pumps installed at the Devonne pump station are only providing the necessary discharge head to fill Devonne Tank#1 when the level in Devonne #2 is nearly full. With newly installed larger 10 HP pumps, flows to fill the Devonne #1 tank would be more readily available over a larger range of available suction head. The current pumps in place are 300 gpm @ 70ft TDH, new suggested pumps would be 300 gpm @ 94ft TDH. The proposed pumps would provide the 300 gpm design flowrate to the overflow elevation of Devonne #1 when the level in the Devonne #2 tank is as low as 1080 ft (25% full). In the coming years, this project will also replace and test all meters on an as need basis throughout the current distribution system. The installation of radio read meters would greatly increase the accuracy of meter reading while reducing human error on manual read meters. The installation of radio read meters would also decrease water loss by increase effectiveness of water leak discovery. Reid Village Water District has a directly serviceable population of approximately 2,547 or 1,082 households, while provide serviceable connection in both Clark and Montgomery Counties.</p>

GRANTEE	HARDIN, CITY OF MARSHALL COUNTY		
BRIEF DESCRIPTION			
<p>This will be the third phase of the City of Hardin wastewater rehabilitation project. Phases one and two were completed in 2007 and 2012, respectively. These projects were budget-driven and addressed some mainline sewer issues and significant manhole rehabilitation. Unfortunately, funding has historically not been sufficient to perform comprehensive rehabilitation of the City's sewer main and lateral network. Phase III will continue with these efforts, while focusing on wet-weather surveys, addressing previously identified smoke testing defects, performance of mainline CCTV work, and performance of lateral CCTV work. The results of these SSES efforts will be evaluated for the preparation and implementation of a Phase III rehabilitation construction project to remove excess levels of infiltration and inflow, which are overloading the City's WWTP.</p>

BRIEF DESCRIPTION					
This project involves rehabilitating existing vitrified clay pipe (VCP) sanitary sewer lines and associated manholes in Corbin's sanitary sewer collection system in Whitley County. The project proposes to line VCP sewer lines with a trenchless technology or replace the lines with PVC pipe, whichever method is most cost efficient. Manholes that are leaking groundwater will be lined with an epoxy system.

GRANTEE	LAKE VILLAGE WATER ASSOCIATION INC MERCER COUNTY		
BRIEF DESCRIPTION			
<p>The project includes the replacement of the remaining water mains constructed in Contract 1 during the 1970's. For decades, the water mains included in the project have resulted in increased maintenance costs due to main breaks and service line leaks and have also contributed to water loss. The project includes the replacement of 19,590 LF of 8" water main along Bellows Mill Road and Montgomery Lane, 6,000 LF of 4" water main along Burgin Road, 14,500 LF of 6" water main along US 127 South, 3,600 LF of 4" water main along South Buster Pike, the replacement of a 300 LF 4" directional bore along Palisades Road and the relocation of 12 water service taps along Moores Lane. The actual number of connections on the mains included in the project is around 150. With that said, nearly half the system will benefit because a large portion of the mains we are replacing are transmission mains that deliver water from Harrodsburg and Danville to many areas of the system.</p>

GRANTEE FARMDALE WATER DISTRICT  
 FRANKLIN COUNTY

**BRIEF DESCRIPTION**

Farmdale Water District proposes to purchase a maintenance truck and trailer. Currently, the District does not have a truck and trailer to haul their mini trackhoe. Therefore, they are having to pay each time to have it moved. Farmdale would also like to purchase additional water meters to replace the bad ones. The district is in need of upgrading undersized lines to improve flow and pressure. They also have leaks and old asbestos pipe that will be eliminated by this project. There is an existing 3" water line that is in bad shape and a newer existing 6" water line. We are just switching the existing customers on the 3" to the 6" water line. This will allow them to abandon the 3" water line. This should have been done when they originally installed the 6" water line, but they wanted to save money. We are not actually rehabbing or replacing any water lines.

BRIEF DESCRIPTION					
<p>This project includes 2,100 feet of 12" water main extension to serve 3 undeveloped parcels along Gloria Terrell Drive in the City of Wilder. Currently there is no waterline to serve this approximately 30 acres of industrial land. The purpose of this water main extension project is to attract new business and promote economic development within the City. The current owner plans to construct two Class A industrial buildings of approximately 350,000 square feet. The owner anticipates the development of the two buildings will create between 50 and 200 permanent full time jobs depending on end users. The anticipated payroll generated with an average salary of \$50,000 will be between \$2.5 and \$10 million. Design will commence upon receiving notification of the requested Grant funding and can proceed quickly to facilitate bidding the project.</p>

	SX21067041	IGADD	Fayette	Lexington-Fayette Urban County Government	2023	LFUGC - Town Branch WWTP Flow Equalization Storage Tanks - Phase 1 LAND PHASE 2	Yes	\$46,551,000	\$1,165,178	\$1,165,178	\$41,960,970	\$13,582,028	\$4,990,030		phase 2 being completed with 1,167,972 of CWP round 2 funds
	SX21067063	IGADD	Jessamine	Lexington-Fayette Urban County Government	2023	West Hickman WWTP Wet Weather Storage Tanks - Phase 2	No	\$20,926,000	\$1,167,972		-	\$500,000	\$20,926,000		A15-026 is currently under construction with the LFUGC. They have significantly overhauled the scope on A21-012 and A21-014. The purpose is still the same, however, so Amshu agreed that it did not change their ranking for funding. Rather than go in on one or the other and change the profile, they would like to open up A15-026 and modify the project to include a Phase 2 that will essentially be the new scope. Then they would decline the two A21 projects, but the money would be added as an increase on A15-026.

Livingston	SX21139014	PEADD	Livingston	Smithland, City of	2023	Smithland Lagoon Rehabilitation Project	No	\$1,203,000	\$114,000	\$114,000	-	\$2,406,000	\$1,203,000		The City of Smithland plans to use \$187,330 in CWP funds out of the Livingston County Allocation and desperately need additional funds out of the \$49.9 million for costs greater than the county's allocation. Smithland currently is under a state injunction for the seepage occurring at their sewer lagoon levee. The City installed a new UV treatment system due to a lightning strike taking out their old one. They thought this would help solve their problem temporarily with the hopes of being able to discharge more and keep the freeboard they need in the lagoon to limit seepage. Since then, their problems have only gotten worse. The state still will not let them discharge more than 70,000 GPD of treated sewer. The City needs the lagoon levee groined and the gravity sewer system needs rehabilitated. However, the population of the town is 240 according to the 2020 decennial census thus making it very difficult to take out a loan for such a substantial project. Having enough money to do the lagoon rehab would be a tremendous help to get them into compliance and would be greatly appreciated.
