BRIEF DESCRIPTION					
The Regional Water Resource Agency (RWRA) is requesting a Fund A loan in the amount of \$20,000,000 to fund the Locust Force Main Replacement/Rehabilitation project. This project will replace or rehabilitate 11,000 linear feet (LF) of 30-inch force main connecting the Locust and Dublin Pump Stations to the Max Rhoads Wastewater Treatment Plant, serving 6,374 residential, commercial, and industrial parcels. As part of a combined sewer system, it also conveys stormwater runoff from 1,544 acres. The existing infrastructure was installed in 1955 and has exceeded its lifespan, causing infiltration and inflow and long-term maintenance issues.					
The project will include environmentally and energy-efficient methods, including tree planting along the project path to restore the urban canopy and improve permeability, reducing stormwater runoff. An energy audit will assess lighting and pumps, with potential upgrades to high-efficiency pumps to cut electricity use and maximize treatment plant capacity, reducing combined sewer outflows (CSOs). The new force main is designed to handle increased flow from severe storms, minimizing CSOs into the Ohio River.

Based on current Census data from the American Community Survey 5-Year Estimate 2018-2022, the Utility's service area population is 79,747 with a Median Household Income (MHI) of \$58,819. The MHI for the Commonwealth is \$60,183. The loan will qualify for a 1.25% interest rate.

VIII. 2024 CAPITALIZATION GRANT EQUIVALENCIES

- 1) Green Project Reserve - This project qualifies for Green Project Reserve funding for \$6,500,000.
- 2) Additional Subsidization – This project qualifies for additional subsidization. Principal forgiveness of 20.4% of the assistance amount – not to exceed \$4,074,344 – will be credited to the loan balance.

IX. FINANCIAL ANALYSIS

Financial information was obtained from the audited financial statements for the years ended June 30, 2022, through June 30, 2024. The non-cash impacts of GASB 68 – Accounting and Financial Reporting for Pensions and GASB 75 – Accounting and Financial Reporting for Other Postemployment Benefit have been removed from the operating expenses. Percentage references in the History section below are based on whole dollar amounts and not the rounded amounts presented.

HISTORY

Operating revenues increased 23 percent from \$26.55 million in 2022 to \$32.62 million in 2024, outpacing operating expenses which increased 13 percent over the same period. Revenue growth was primarily driven by the addition of a Facilities/Compliance Plan (FCP) fee in July of 2023 to finance upgrades to the agency's two wastewater treatment plans. Operating expenses – less depreciation and other non-cash items – increased six percent in both 2023 and 2024 due to increases in employee wages/benefits and maintenance costs. While operating expenses have increased in the aggregate, the percentage of operating expenses to total revenues decreased from 63.2 percent in 2022 to 61.4 and 58 percent in 2023 and 2024, respectively. The agency's existing debt consists primarily of revenue bonds totaling \$82.7 million and 14 KIA loans totaling \$23.78 million. All KIA loans have been fully drawn with ongoing principal and interest payments. The debt service coverage ratio was 2.3, 1.7, and 3.0 in 2022, 2023, and 2024, respectively.

The balance sheet reflects a current ratio of 6.5, a debt-to-equity ratio of 1.4, 19.3 days of sales in accounts receivable, and 45.6 months of operating expenses in unrestricted cash/equity in external investment pool.

PROJECTIONS

Projections are based on the following assumptions:

- 1) Sewer service revenues will increase 8 percent in FY 2025, 5 percent in FYs 2026 and 2027, and 3 percent in 2028 due to scheduled rate increases.
- 2) Sewer service revenues in FY 2029 will remain unchanged from the prior year due to there being no rate adjustments currently scheduled for FY 2029.
- 3) Operating expenses will increase 3 percent annually due to inflation and general expense increases.
- 4) The debt service coverage ratio is 2.3 in 2028 when principal and interest repayments commence.

Based on the pro forma assumptions, the utility shows adequate cash flow to repay the KIA Fund A loan.

REPLACEMENT RESERVE

The current replacement reserve account of \$2,500,000 is adequate to cover reserves for all KIA loans. No additional reserves will be required as a result of this loan.

VII. DEMOGRAPHICS

Based on current Census data from the American Community Survey 5-Year Estimate 2018-2022, the Utility's service area population is 18,522 with a Median Household Income (MHI) of \$52,344. The MHI for the Commonwealth is \$60,183. The loan will qualify for a 1.25% interest rate.

VIII. FINANCIAL ANALYSIS

Financial information was obtained from the audited financial statements for the years ended June 30, 2022, through June 30, 2024. The non-cash impacts of GASB 68 – Accounting and Financial Reporting for Pensions and GASB 75 – Accounting and Financial Reporting for Other Postemployment Benefit have been removed from the operating expenses. Percentage references in the History section below are based on whole dollar amounts and not the rounded amounts presented.

HISTORY

Total sewer revenues increased 23.6% from \$5.97 million in 2022 to \$7.37 million in 2024 due to rate increases and capital capacity charges for the Town Creek Treatment facility improvements. Operating expenses increased 35.5% from \$2.56 million to \$3.46 million during the same period primarily due to salaries and related benefits, chemicals, and vehicle leases. The debt coverage ratio was 11.5, 5.9, and 7.5 in 2022, 2023, and 2024.

The balance sheet reflects a current ratio of 2.0, a debt-to-equity ratio of 0.5, 28.2 days of sales in accounts receivable, and 0.5 months of operating expenses in unrestricted cash.

PROJECTIONS

Projections are based on the following assumptions:

- 1) Sewer revenues will increase 3.3% in FY25 due to approved rate increases with annual CPI increases.
- 2) Operating expenses will increase 2% annually due to inflation and general expense increases.
- 3) Debt service coverage is 4.5 in 2027 when principal and interest repayments begin.

Based on the pro forma assumptions, the utility shows adequate cash flow to repay the KIA Fund B loan.

REPLACEMENT RESERVE

The replacement reserve will be 5% (\$160,000 total) of the final amount borrowed to be funded annually (\$8,000 yearly) each December 1 for 20 years and maintained for the life of the loan.

BRIEF DESCRIPTION				
The City of Jamestown is requesting a Fund F loan in the amount of \$182,255 for the Lead Service Line Inventory project. The project consists of a comprehensive inventory of each service connection within the system to determine the service line material on both sides of the meter. To accomplish this, the City first sent out a survey and informational brochure to their 3,956 customers, from which they were able to obtain pipe identification information. For those who didn't respond to the survey, city employees visited the customer meters and identified pipes through the use of a vac trailer, which employs the use of water power and a vacuum system to basically wet and then suction out the dirt through a hole about the size of a basketball. The project work takes place at the water meter on customer property. Once the identification has been made, the small holes are filled back in with a mixture of soil and sand, and returned to their pre-project condition. The City will utilize ARC GIS Online asset management tools and dashboards to assist with inventory development, record-keeping, and required documentation submissions to regulatory agencies.

BRIEF DESCRIPTION The City of Lewisburg's wastewater treatment plant is about 50 years old and is in serious disrepair. The proposed wastewater treatment plant replacement would include construction of a new influent pumping station, bypass and return system (allowing the existing lagoons to serve as influent surge basins), a new packaged treatment system, conversion of the existing plant clarifier to sludge holding, as well as improvements to the general site, electrical components, and SCADA system.

GRANTEE		SPRINGFIELD WATER AND SEWER COMMISSION WASHINGTON COUNTY			
BRIEF DESCRIPTION The proposed project will expand the Springfield WWTP by adding a planned Sequencing Batch Reactor (SBR). The community needs to expand capacity more quickly than planned due to recent industrial and residential development. The Project will allow the plant to increase its capacity from 1.3 mgd up to 1.7 million gallons per day and meet peak flow demands. Additionally, the applicant will seek to rehab approximately 4,500 l.f. of 8" collection lines in the Maplewood Ave. area to eliminate known sources of I&I contributing to excess treatment. The addition of the influent and fine bubbler diffusion grid on the existing 3 basins will allow expanded treatment of the existing, in-place infrastructure. The addition of this will prepare Springfield for the growing demand for wastewater treatment due to the increasing industrial interest in the area and, put the current Sequencing Batch Reactors 90% of the way to the latest technology of treatment via the TruDense system for the future.
