VII. DEMOGRAPHICS

Based on current Census data from the American Community Survey 5-Year Estimate 2018-2022, the Utility's service area population is 6,137 with a Median Household Income (MHI) of \$42,840. The MHI for the Commonwealth is \$60,183. The loan will qualify for a 1.00% interest rate.

VIII. 2024 CAPITALIZATION GRANT EQUIVALENCIES

- 1) Green Project Reserve - This project does not qualify for Green Project Reserve funding.
- 2) Additional Subsidization – This project qualifies for additional subsidization. Principal forgiveness of 41.8% of the assistance amount, not to exceed \$3,662,784, will be credited to the loan balance.

IX. FINANCIAL ANALYSIS

Financial information was obtained from the audited financial statements for the years ended June 30, 2022, through June 30, 2023. Financial information for the year ended June 30, 2024, was obtained from an unaudited financial statement. The non-cash impacts of GASB 68 – Accounting and Financial Reporting for Pensions and GASB 75 – Accounting and Financial Reporting for Other Postemployment Benefit have been removed from the operating expenses. Percentage references in the History section below are based on whole dollar amounts and not the rounded amounts presented.

HISTORY

The combined operating revenues of the sewer and water systems increased 13.5 percent from \$4.99 million in 2022 to \$5.66 million in 2024. The increase in revenues over the period was largely due to an increase in metered and wholesale water rates that took effect in November 2023 resulting in a 14 percent increase in water revenues in fiscal year (FY) 2024. Sewer revenues were steady in 2022 and 2023 before decreasing by 5 percent, or nearly \$45,000, in 2024. Combined operating expenses for the sewer and water systems kept pace with revenues, increasing nearly 14 percent from FY 2022 through FY 2024; however, the increased costs over the period can mostly be attributed to increased employee wages and repair costs incurred in 2023. Operating expenses increased by just 1 percent in 2024. The City's utility debt consists of revenues bonds with a total balance of approximately \$15.45 million and three equipment loans totaling less than \$300,000. The City has one loan with KIA (F22-005) in the amount of \$2,340,250 that has yet to be drawn upon as of August 2025. The City anticipates that draws will begin on this loan in January of 2026. The debt service coverage ratio was 1.4, 0.9, and 1.6 in 2022, 2023, and 2024, respectively.

The City raised its water and sewer rates by 19.8 percent and 59.5 percent, respectively, effectively July 2024 (the start of FY 2025). This is the first sewer rate increase since 2016. The July 2024 rate adjustment did not include a wholesale water rate increase.

The balance sheet reflects a current ratio of 0.9, a debt-to-equity ratio of 1.0, 13.5 days of sales in accounts receivable, and 0.3 months of operating expenses in unrestricted cash.

PROJECTIONS

Projections are based on the following assumptions:

- 1) Sewer revenues will increase 59.5 percent in FY 2025 due to the July 2024 rate increase.
- 2) Sewer revenues will increase an additional 4 percent in FY 2028 following the completion of this project and the addition of approximately 85 new customers.
- 3) Water revenues will increase 25 percent in FY 2025 due to the combined impact of the November 2023 and July 2024 rate increases.
- 4) Water revenues will remain unchanged for FYs 2026-2029 due to there being no rate adjustments scheduled.
- 5) Operating expenses will increase 15.5 percent in FY 2025 due to the addition of rental expenses paid by the Utility Commission to the City for the use of City-owned property and for inflation-related cost increases.
- 6) Operating expenses will increase 2 percent annually in FYs 2026-2029 due to inflation and general expense increases.
- 7) Debt service coverage is 1.7 in FY 2028 when principal and interest repayments begin.

Based on the pro forma assumptions, the utility shows adequate cash flow to repay the KIA Fund A loan.

REPLACEMENT RESERVE

The replacement reserve will be 5% (\$438,000 total) of the final amount borrowed (prior to principal forgiveness) to be funded annually (\$21,900 yearly) each December 1 for 20 years and maintained for the life of the loan.

BRIEF DESCRIPTION The project will include the rehabilitation of 6 existing lift stations owned and operated by the PCSD#1 in the Hazard area. Each pump station will require a new pump, controls, floats, rails and junction boxes. Several lift stations will also need to have the raised platforms (towers) for the control panel rebuilt. One of the stations will include lining of the wet well. The two smaller pump station pumps will be replaced with a chopper type impeller to better handle rags in the wastewater.

BRIEF DESCRIPTION This project will construct a new flood pumping station that shall provide a total estimated pumping capacity of 1,900 MGD. The project will include six new flood pumps, motors, trash rack, and discharge pipes (3,062 LF of 90-in PVC) . This project will also install all necessary SCADA, electrical, and mechanical components to operate the new flood pumps, in addition to the required aesthetic, plumbing, and HVAC equipment. This project is currently planned to be completed using a progressive design-build project delivery approach. This project will also be multi-year, with an anticipated completion date in December 2026. The existing FPS will be decommissioned, and the new pump station will incorporate new energy efficient pumps and motors, lighting, VFD controllers, and a SCADA system. It was assumed that the power and energy savings would be seen over a 20-year timeframe and the total energy saved by implementing energy efficient motors and pumps, SCADA systems, and VFD controllers would be 15%. This project has received \$13 million in Cleaner Waters Grants and has also been selected to receive \$1.19 million dollars in emerging contaminants forgivable loan dollars in the FY23 SRF intended use plan. The emerging contaminants that this project will help to prevent is PFAS. With the protection of a site known as Rubbertown because of the many major industrial plants in the area including Borden Chemical, DuPont Dow Eastomers, Noveon, DowChemical, and Zeon Chemicals, these volatile chemicals will be protected from contaminating the Ohio River. The attached environmental impact memo describes how this project meets the emerging contaminants requirements. Louisville MSD's cybersecurity program is comprehensive and covers many different aspects including network boundary protection, endpoint protection, firewalls, intrusion detection/prevention, access control, training and awareness, and other information security measures. This level of protection is critical to protect MSD's cyber infrastructure involved in this project, such as the implementation of SCADA systems and VFD controllers.

BRIEF DESCRIPTION The project includes the construction of an earthen embankment adjacent to and upstream of an existing BIOLAC Treatment Systems retention skirting (curtain). Once the embankment is in place, the skirt will be removed in its entirety. Furthermore, the embankment will serve to create a Wet Weather Retention Basin to be developed in later phases. The improvements included in this project represent the initial phase of a larger project (SX21169017).
