

Linking Agriculture For Networking and Development (LAND) Forums To Be Held This Summer

The Kentucky Department of Agriculture and the Kentucky Association of Manufacturers have partnered to connect the Commonwealth's agricultural resources with the state's robust manufacturing industry. These forums are intended to bolster existing collaboration between the two sectors to develop and expand upon the existing supply chain for agricultural products to the manufacturing sector. These opportunities will be highlighted in a series of regional meetings strategically selected to focus on the ability to best blend synergies within each region. The LAND forums are intended for manufacturers, agricultural leaders, economic development professionals, local and state officials, academia, and other stakeholders.
