Issues that have not been given adequate consideration in redesign: *Services available in other states' 1915c programs that KY has opted not to offer. *Services in our waiver that have low usage because of interpretation. *Bias toward congregated, segregated services built in the design of KY's waivers that result in few providers operating in the spirit/law of the CMS Final Settings Rule. *Poor outcome data reflecting the quality of KY's HCBS services & ideas about how to improve outcomes.
