Health Center

**Innovative Transformational Ai Care Model**

# Does Kentucky Want To Transform Rural Health like Other States?

Transformational Health Opportunity for Kentucky (2026).

Kentucky could leverage Rural Health Kentucky hospitals and rural clinics can now increase rural healthcare service availability while improving outcomes like another state is proposing below. This remote healthcare prevention and wellness platform offers Ai workforce assistance and provides seamless telemedicine escalation options. Avatar-based rural healthcare innovations helps clinicians use their time for serious priorities while automation assists in reducing initial patient healthcare costs.

- **Why it fits RHT goals.**
- Advances consumer-facing innovation and rural Ai workforce assistance
- Protects local access by keeping guidance and referrals anchored to community hospitals or rural clinics through innovative healthcare.
- Establishes measurable pathways (prevention, chronic disease, maternal and behavioral health) that states can report and refine over time.
- Provides for true Rural Healthcare Transformation.

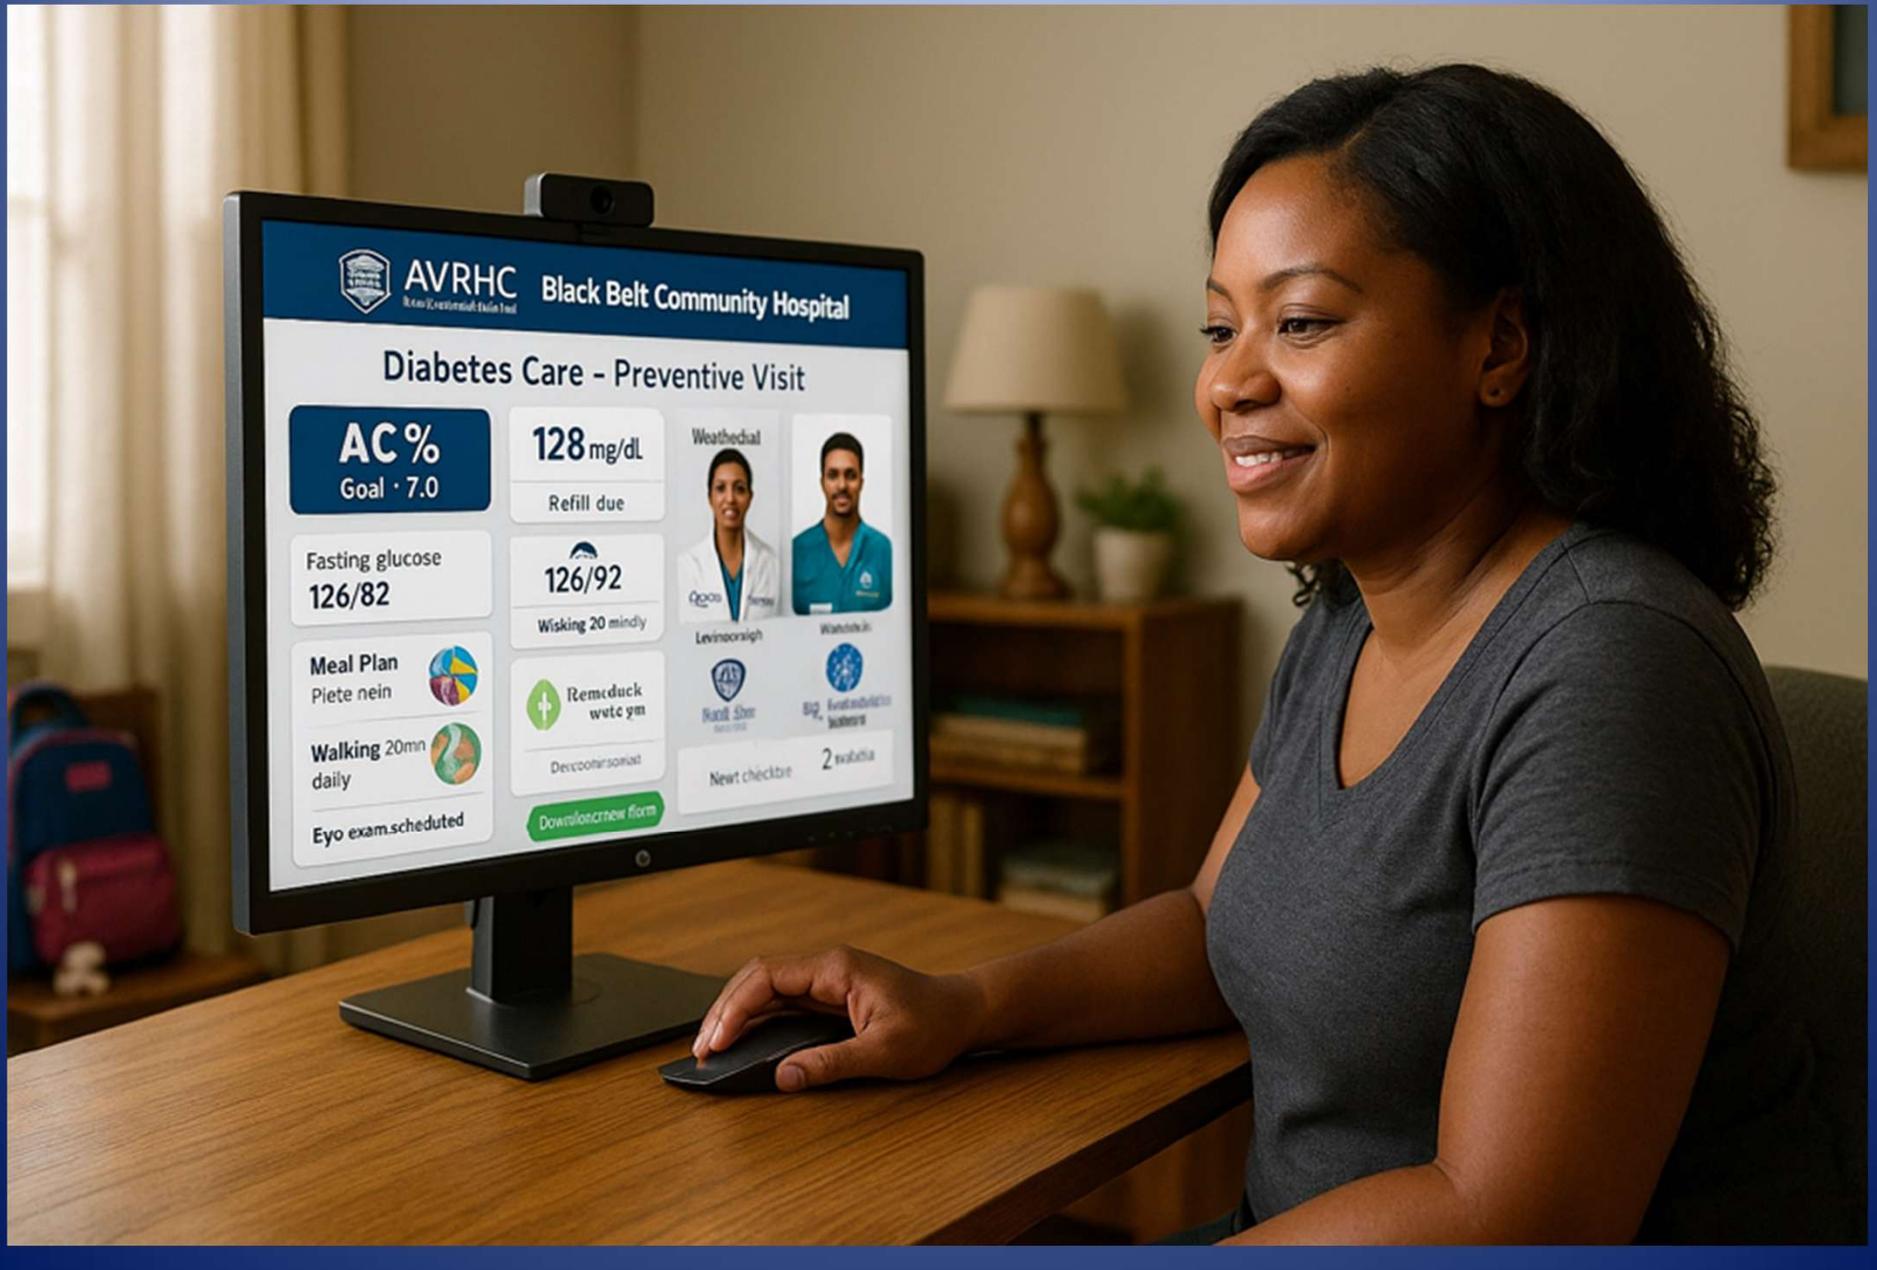

## Alabama Applies RHT Funds For Ai Tranformational Health

# Alabama Improves Health Outcomes By Sanctioning Hospital Ai Agents

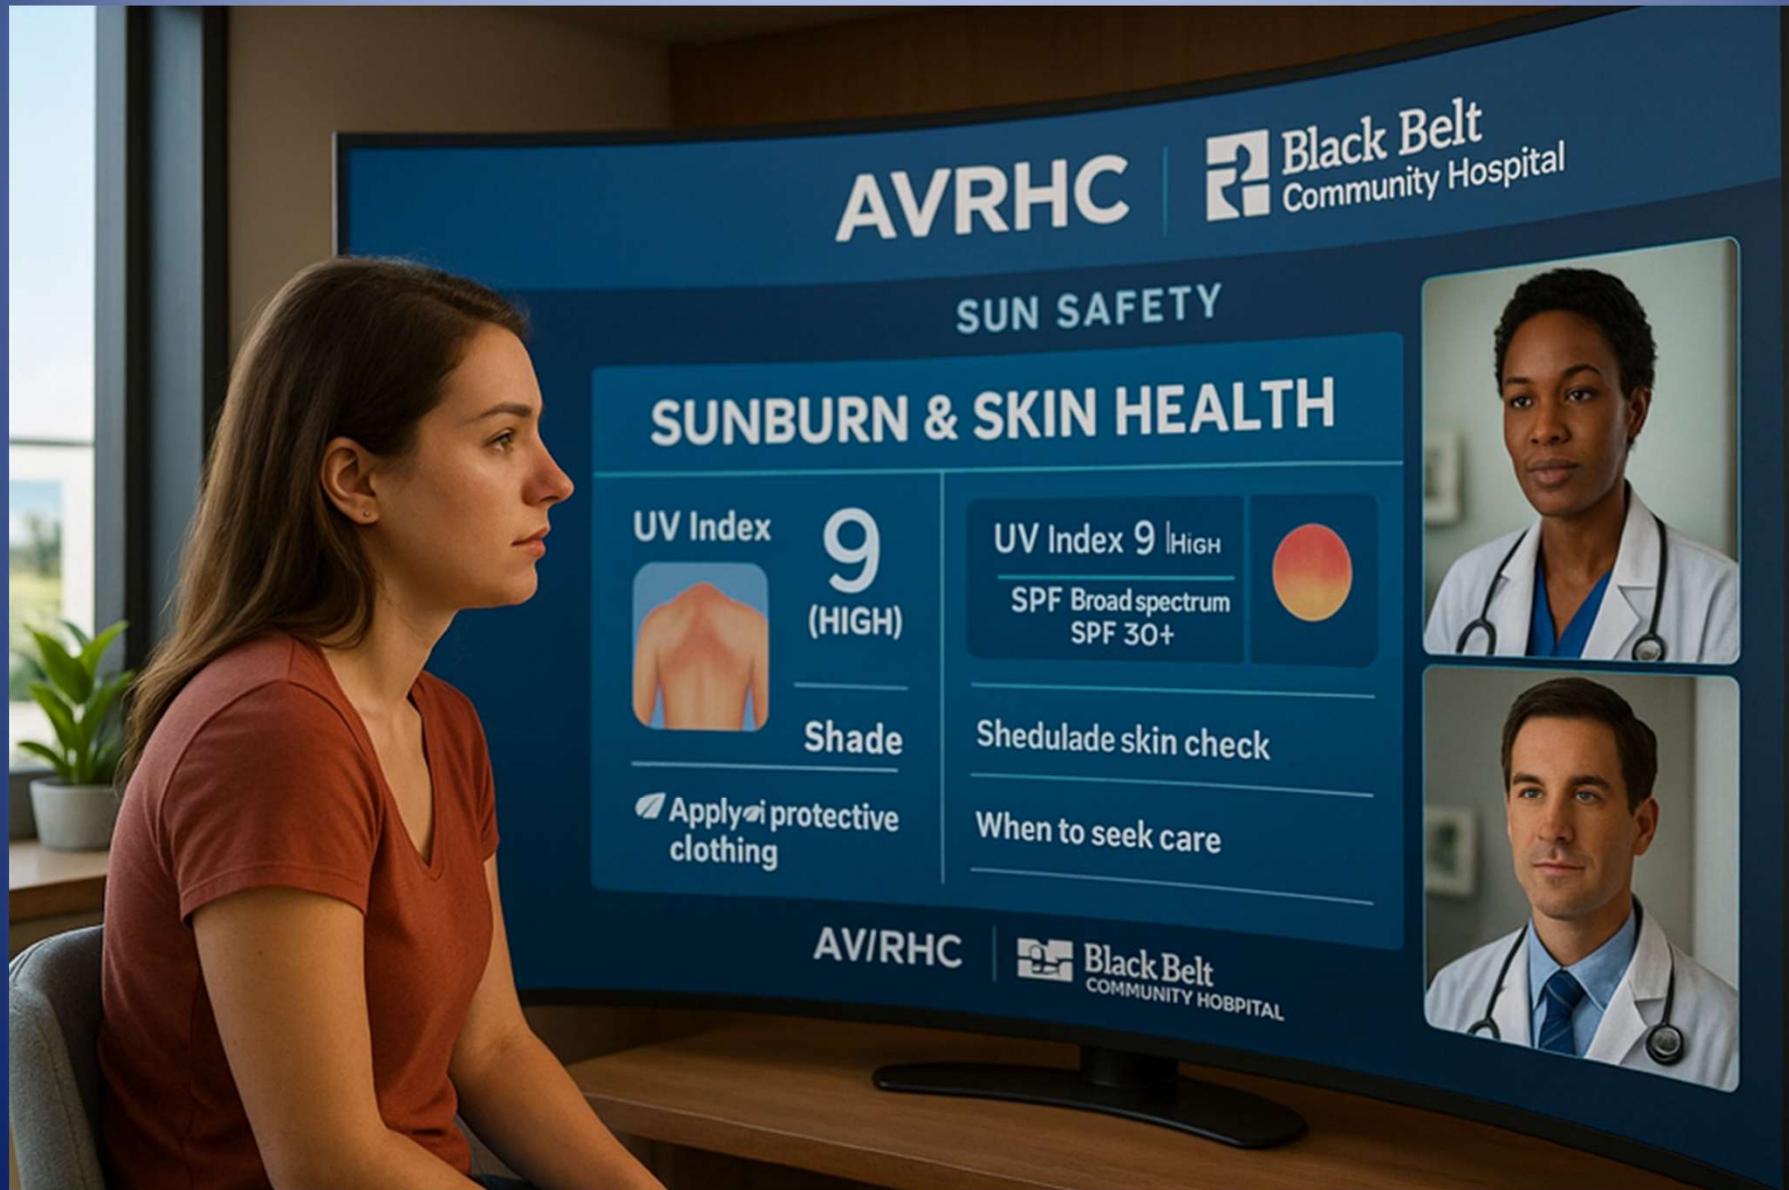

# States Coordinates the Access Platform To Reach Hospital Ai Agents

# Ai Now Provides Rural Health Access To Patients Through AVRHC

# Ai Agents React to Rural Patient Inquiry and Respond With Options

# Medical Avatars Guide Patients Remotely Toward Healthcare Choices

# ACCESS ANYWHERE: AVRHC FOR EVERY ALABAMA RESIDENT
