Grant Period: \_\_\_1 year\_\_\_ Months/years Years covered by Grant: \_\_\_10/1/24-9/30/25\_\_\_\_\_

Grant Submission Date: \_\_\_July 1, 2024\_\_\_\_\_

### Grant Objectives/Requirements (Brief Summary of Proposal):

The PHHS Block Grant supports *Healthy People 2030* priorities and is used to address emerging health needs and funding gaps specific to our state. Topic areas for this workplan include: Education and Workforce Development, Office of Performance Improvement and Accreditation, Kentucky Asthma Management Program, Chronic Obstructive Pulmonary Disease, Community Health Action Teams, Kentucky Office of Community Health Workers, Health Care Access – Prescription Medications, and Sexual Assault Prevention. The block grant monies fund state program staff, service contracts, and help support local health initiatives statewide. These funds are allocated annually, based on the appropriations table, after submission of a workplan (July 1 deadline). Reports are submitted biannually (February and December) via the BGIS reporting system, and evaluation and compliance reviews occur regularly. Legislation requires this grant to have an Advisory Committee, which meets a minimum of twice annually, as well as an annual Public Hearing of the workplan. PHHSBG US Legislation: <https://www.law.cornell.edu/uscode/text/42/chapter-6A/subchapter-XVII/part-A>

### What are the consequences of not pursuing this funding opportunity?

The PHHS Block Grant is in federal statute for each state and is used to support a wide variety of objectives nationwide – block grant monies are awarded to the 50 states, District of Columbia, 2 American Indian Tribes, 5 US territories, and 3 freely associated states to address their own unique public health needs and challenges. This funding has been in US Legislation since the early 1980s; the grant application is essentially a workplan for how the annual allocation will be utilized. States can only apply when notified and the appropriations table has been approved by Congress and the CDC;

notification occurred April 28, 2024. In Kentucky, the block grant helps support existing programs, implementation of new programs, addresses emerging public health issues, and minimizes gaps in public health programs with limited or no state funding available. If this funding opportunity was not pursued annually, it would be to the detriment of the citizens of Kentucky. We will receive a non-compliance letter from the CDC if a workplan is not submitted by the July 1 deadline.
