

#### **Ballot Verifier is** enabled for you

Ballot Verifier integrates with all major voting system vendors: Dominion, Hart, and ES&S. Our publishing workflow is seamless. You transfer your ballots and/or CVRs to us once, and we handle the rest.

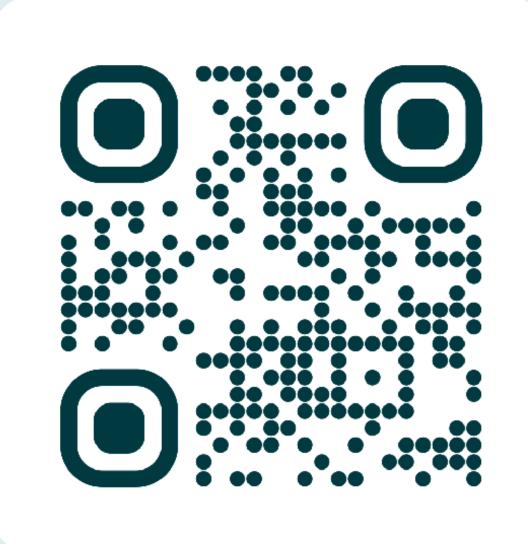

### **Ballot Verifier features a secure and** scalable infrastructure

We process millions of ballot images and CVRs rapidly and achieve a **24-hour turnaround time** from county canvass to web publication. This process is safe and secure.

Ballot Verifier protects voter privacy. Our Voter Privacy Masking feature ensures that ballots and cast vote records from low-turnout geographies and filter combinations are redacted and inaccessible, to ensure all ballots and CVRs remain fully anonymous and voters' right to a secret ballot is fully maintained.

#### **State Secretaries and Boards of Elections** trust Civera

Our flagship product, ElectionStats, is used by **10** state election authorities, and dozens of county and city election offices.

#### **About Civera**

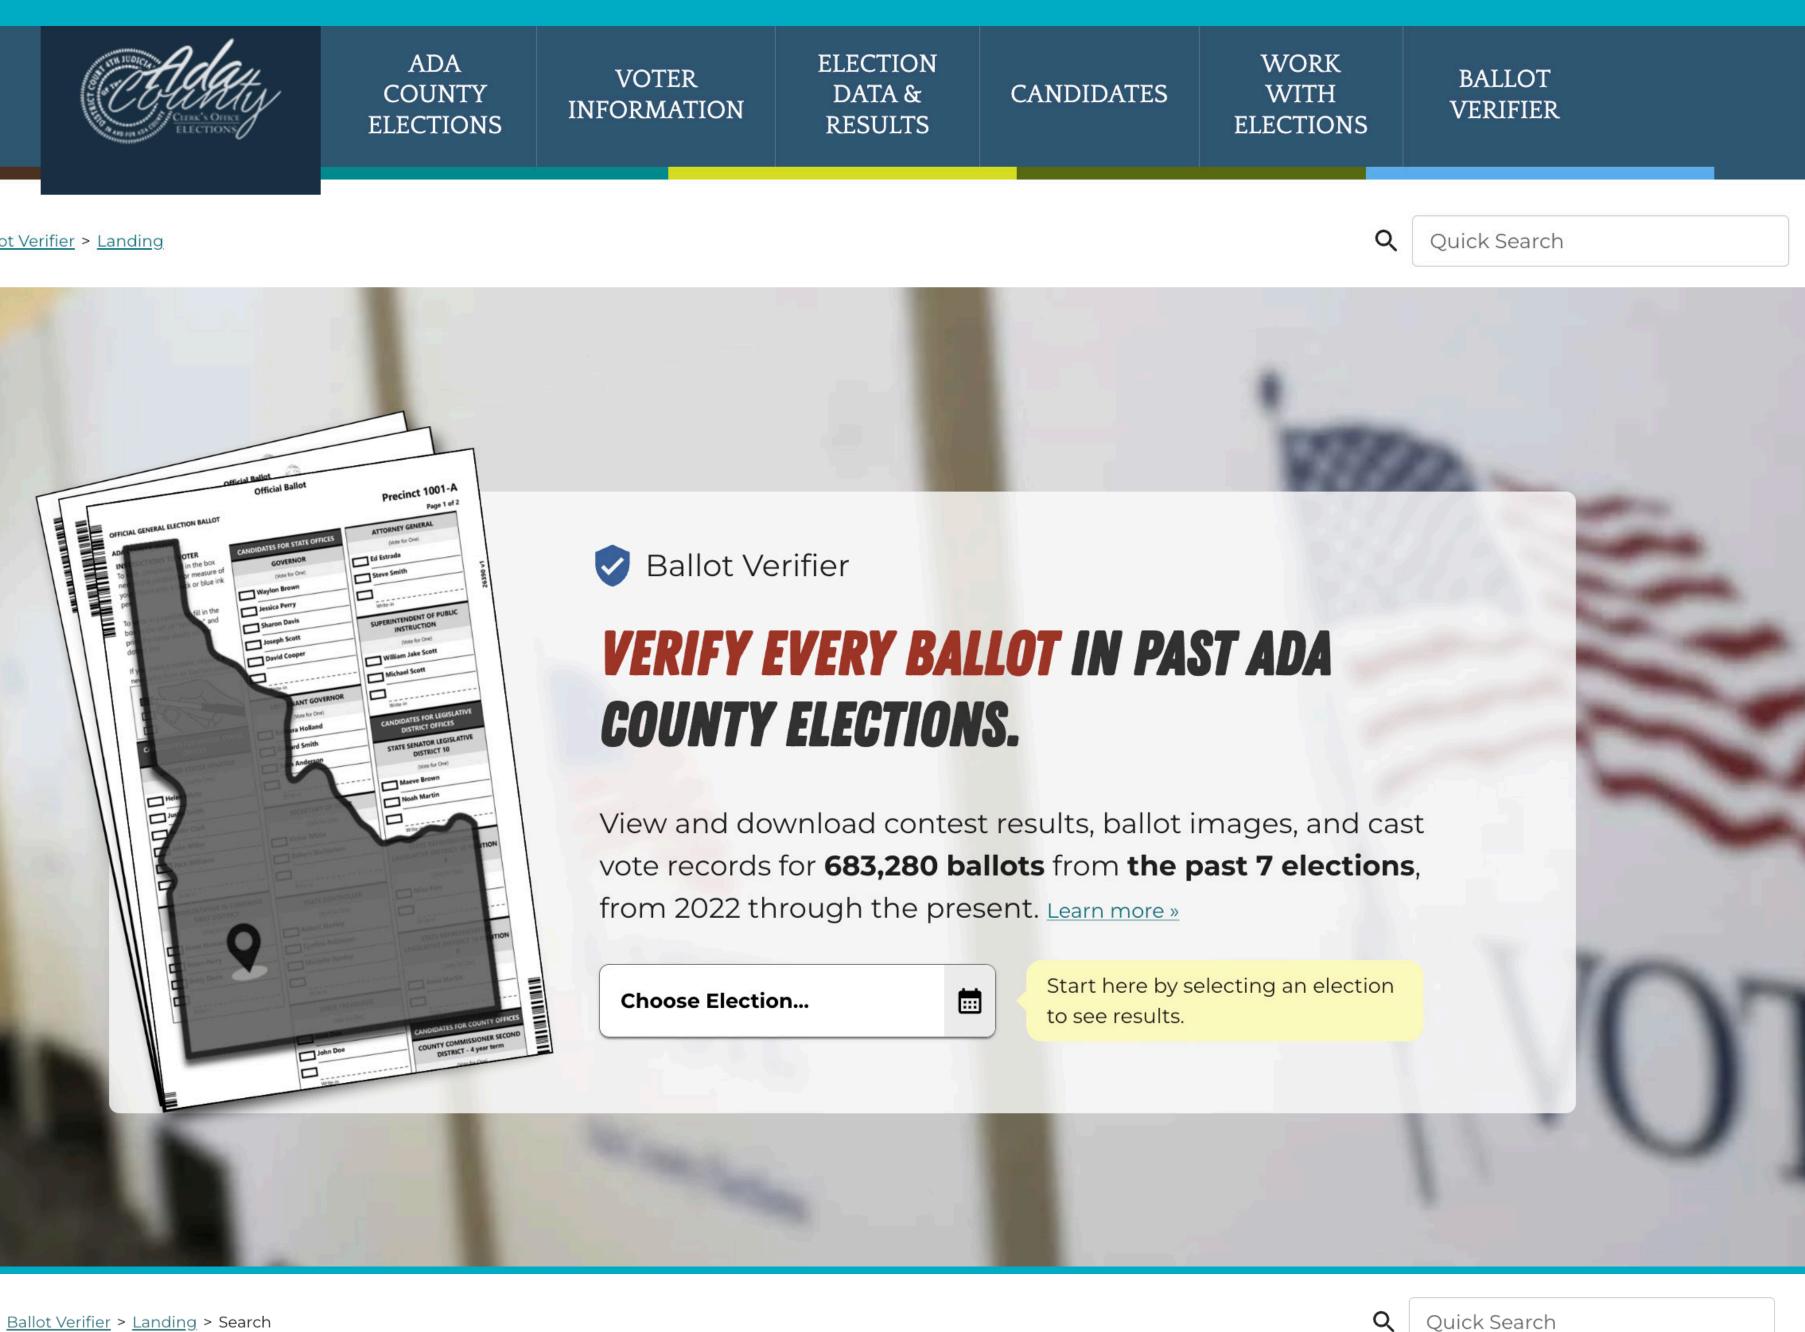

Civera makes software for the public good. Our passion is to liberate civic data and make it easy for everyday citizens to access and use it. Our flagship product, ElectionStats, represents the new standard for public access to a comprehensive history of election results. Our Ballot Verifier adapts our universal search and filtering technology to allow anyone to see the ballots and cast vote records connected to their past election results search.

## As seen in WIRED

**Trent Tripple** 

Start on an attractive landing page

**Search all past elections** with our universal search and filtering technology

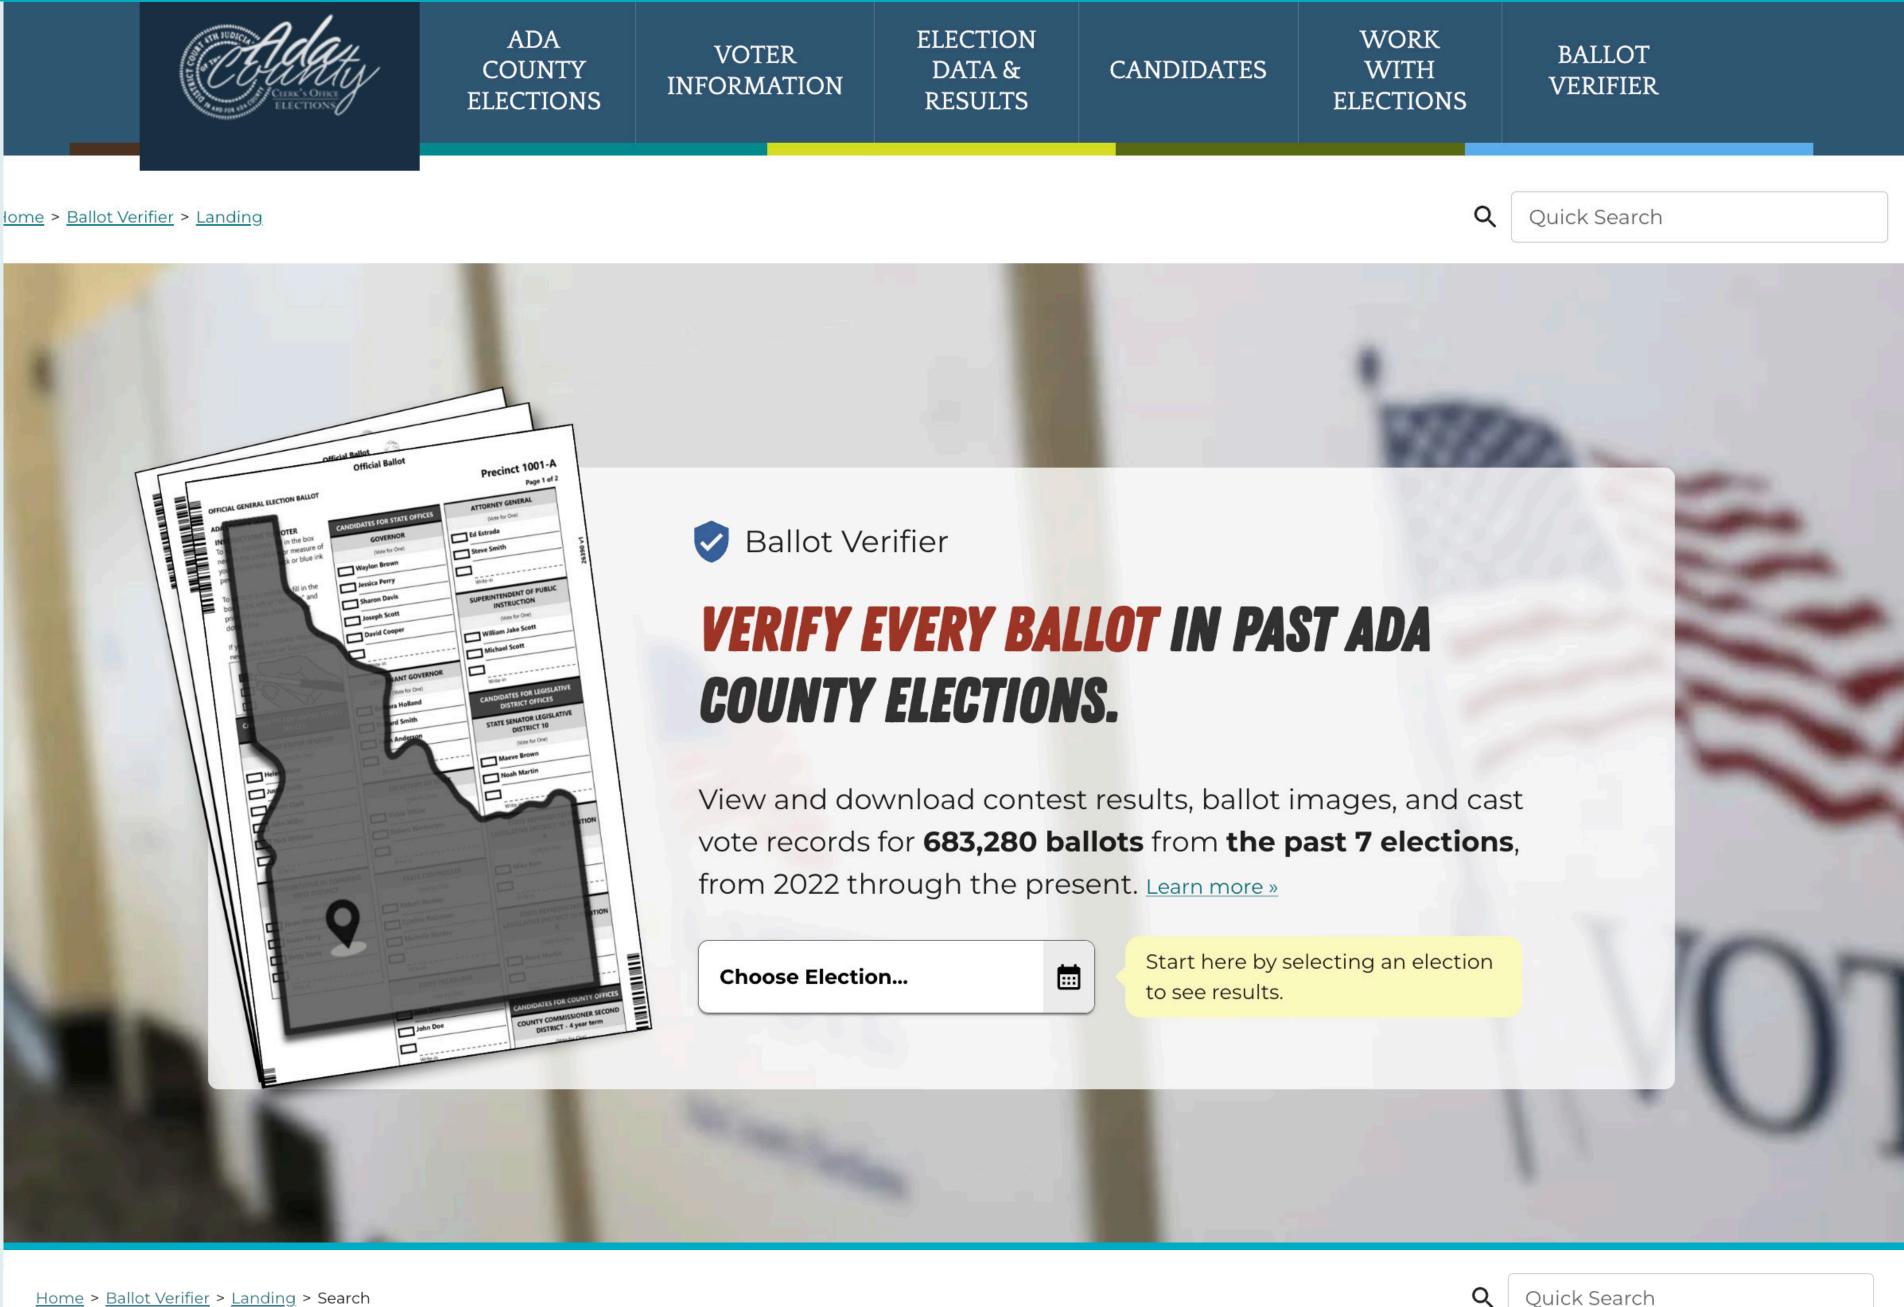

**Browse the exact CVRs** and ballot images linked to the contests in your search results

Page through the gallery and download all CVRs and ballots as a unique ZIP file

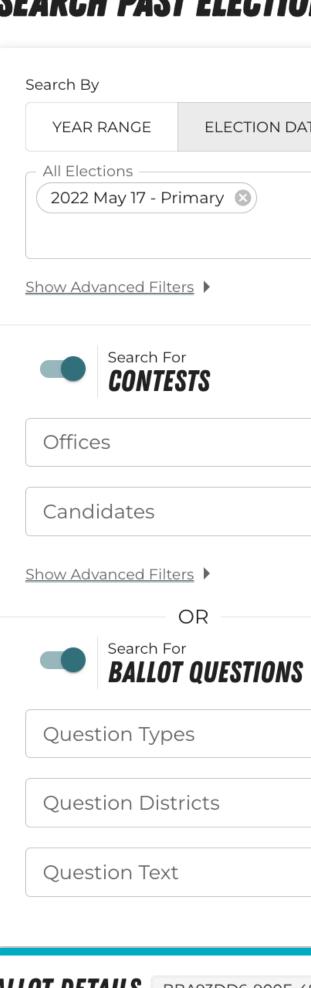

### Zoom in to view and compare each CVR and ballot image side-by-side

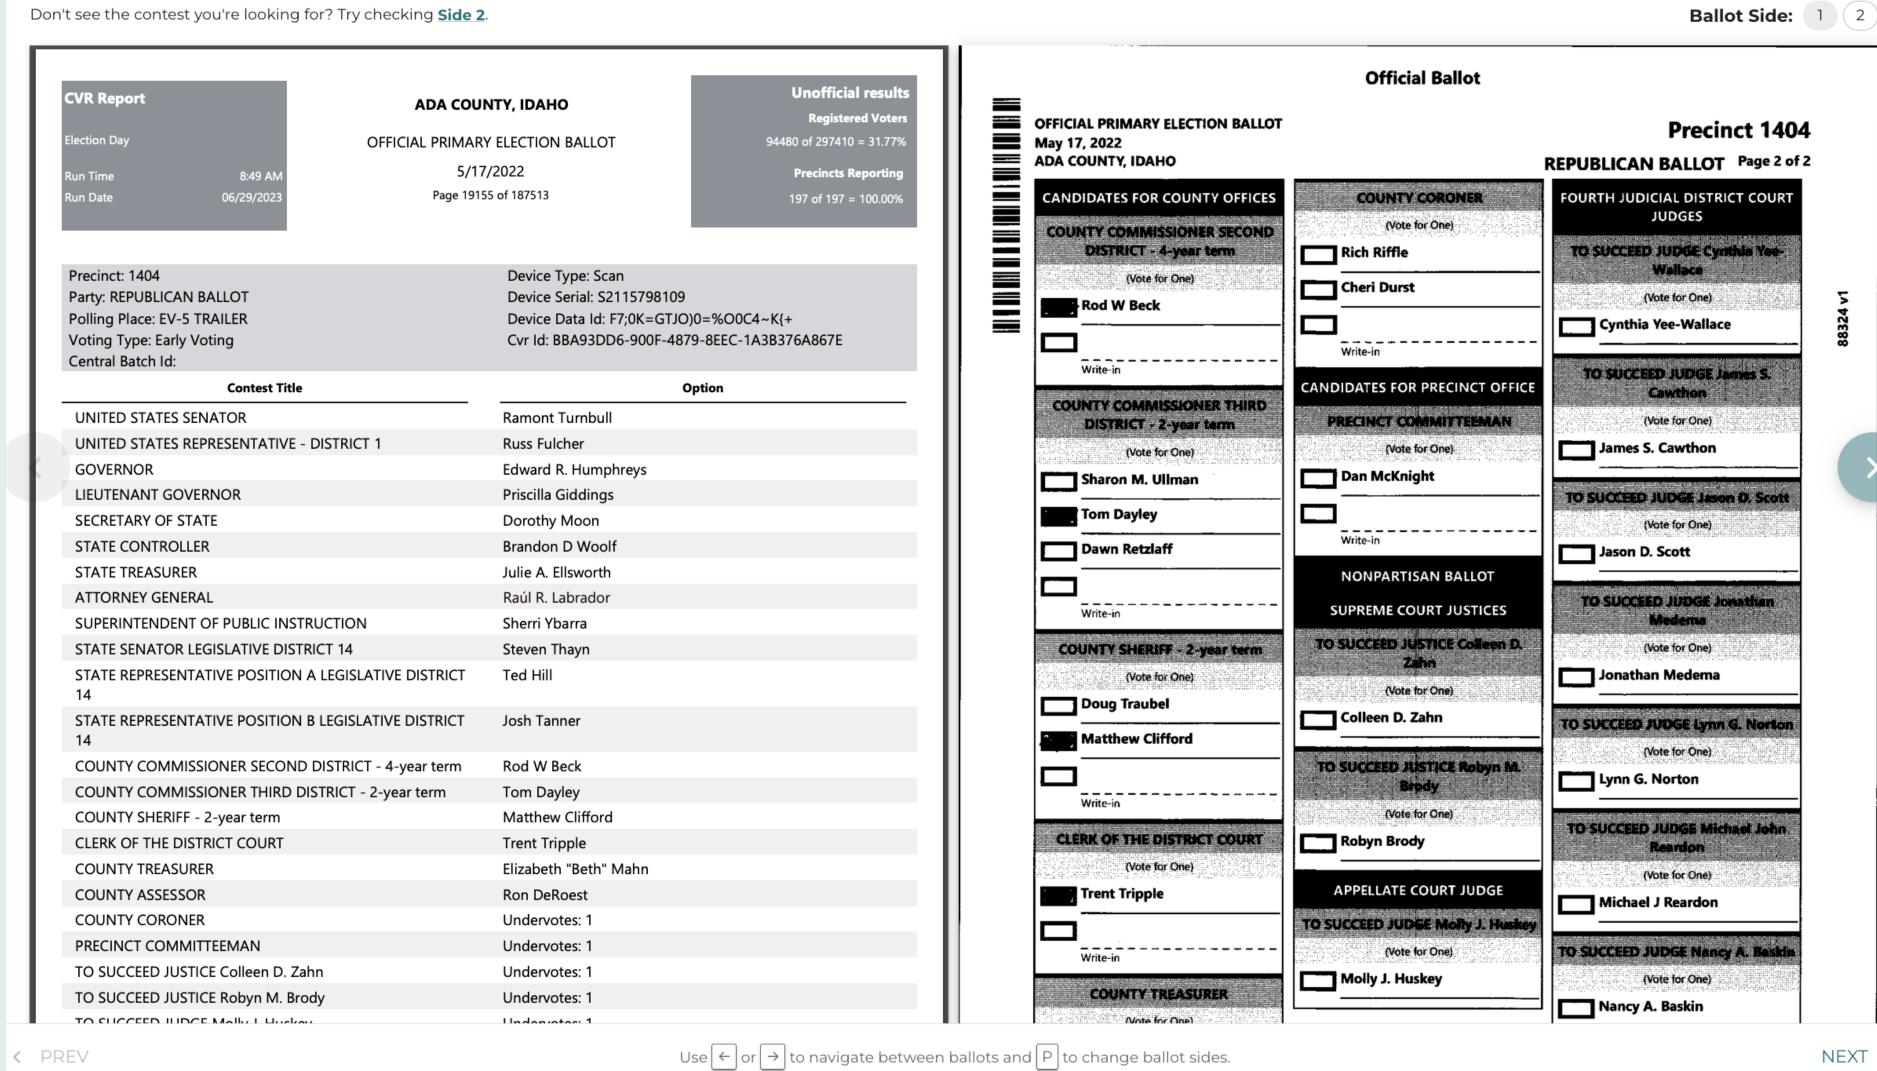

Also can be viewed as CVR-only, with no ballot images
