

Job Review Project Report

Definition of Report Terms

The attached report contains columns of information pertaining to the review of each job specification classification. See below for a detailed explanation of the information contained in each column.

General Assembly Action Needed for Implementation - Requires that funding be allocated to effectuate changes resulting from the job classification assessment.

Job Consolidated - Following an assessment, the job duties represented by the job classification were consolidated into a single job or resulted in the establishment of a new job classification. This often occurs in a job series with multiple levels.

Job Abolished - Following an assessment of the job classification, it was determined that the job and functions were no longer needed, and the job classification was abolished. This often occurs when agency missions and/or program functions change.

Job Established - Following an assessment of job functions performed and agency needs across the state government enterprise, it was determined that a new job classification was necessary and has been subsequently established.

Job Revised - Following an assessment of the job classification, it was determined that changes were appropriate for one or more attributes of the job classification specification. This may include revisions to one or more of the following: job title, pay grade, characteristics of the job minimum requirements, examples of duties, unique physical requirements, typical working conditions, or additional requirements.

Pay Grade Change - Following an assessment of the job classification and application of the Korn Ferry point factoring methodology, it was determined that a different pay grade should be assigned to the job classification. All employees in the job classification received or will receive a salary adjustment in compliance with 101 KAR 2:034 and 101 KAR 3:045.

Market Data - Data collected from Payscale, the leading provider of compensation data for national and state government markets, to include Kentucky, used for comparison of executive branch job classifications. Job matches are identified through the analysis of Payscale's jobs (represented by corporate, independent, and government employers) that most closely align with Kentucky's job tasks and minimum education, experience, licensure, and certification requirements.

Special Entrance Rate (SER) - A rate of pay set above the pay grade minimum, assigned to a job classification, to address recruitment difficulties.

Locality Premium - An additional rate of pay authorized by 101 KAR 2:034 and 101 KAR 3:045 for a specific job classification, work county, and organizational unit where the agency can demonstrate sustained recruitment and retention issues impacting the mission of the agency.

Salary Increase per 101 KAR 2:034/101 KAR 3:045 - Other salary increases applied to employees in a specific job classification, in accordance with the classified and unclassified compensation regulations, to address recruitment and retention. Percentage listed represents range of increase provided to employees.

Job Review Complete/Actions Pending – The job classification assessment is complete. The Personnel Cabinet is working with all agencies who utilize the job to implement all changes resulting from the assessment.

No Change - Following an assessment, it was determined that no change to the job classification specification was necessary. All attributes of the job classification specification (job title, characteristics of the job, minimum requirements, example of duties, unique physical requirements, typical working conditions, additional requirements) are current, accurate, and meet the needs of the user agencies. Factoring of the job did not result in a change in the assigned pay grade.
