Modified Adjusted Gross Income (MAGI): A measure of income used to determine eligibility for certain programs like Medicaid and Qualified Health Plan subsidies. It includes adjusted gross income (AGI) plus specific additions, such as tax-exempt interest and foreign earned income.

Non-Modified Adjusted Gross Income (Non-MAGI): Refers to Medicaid eligibility groups that do not use MAGI-based rules. These include individuals who are aged, blind, or disabled; those receiving Supplemental Security Income (SSI); individuals in long-term care; foster care and former foster care youth.

Medicare Savings Program (MSP): A Medicaid program that helps low-income individuals pay for Medicare costs, including premiums, and in some cases, deductibles and coinsurance. Types of MSP include Qualified Medicare Beneficiary (QMB), Specified Low-Income Medicare Beneficiary (SLMB), and Qualifying Individual (QI).
