

All Payer Claims Database

-
- ❖ The Kentucky Primary Care Association has an existing partnership with the Kentucky Health Information Exchange and when actively engaged has the ability to impact cost and care.
 - ❖ Primary Care providers are the hub of healthcare. It is there that a patient's care begins, ends and services are coordinated.

Four Pillars of an APCD

❖ Transparency

❖ Utility

❖ Accountability

❖ Quality

Transparency

- ❖ ACPDs allow for provider comparisons, pricing comparisons, exposes emerging trends and creates more informed consumer choice.

Accountability

- ❖ Equitable Metrics through a Common Data Layout.
- ❖ Common Data Layouts harmonize collection efforts across the state and reduce the burden of data submission.
- ❖ Compare performance, cost, and quality.

Utility

- ❖ ACPDs allow users to analyze data and inform decisions regarding cost, utilization and quality.
- ❖ Research of unidentifiable data drives innovation and improvement.

Quality

- ❖ ACPDs provide a full spectrum of data that close gaps that are present and material when only viewing data from one payer source.
- ❖ Patients receive better treatment with a complete history of treatment.

Mission Driven

- ❖ Ultimately ACPDs are about putting health before healthcare.
- ❖ It is a tool for legislators, payers, providers, healthcare organizations and academia to use in order to make more informed decisions about the population health and quality of healthcare in Kentucky.
