

How far we've come: Courts expand access to treatment through SB 90

Debra Hembree Lambert

Chief Justice of the Commonwealth

Since its creation by the General Assembly, the Behavioral Health Conditional Dismissal Program has reflected the Judicial Branch's commitment to accountability paired with opportunity.

The program recognizes that many people who enter the justice system face significant behavioral health challenges. By connecting eligible participants with treatment, supervision and support, the courts are helping them address underlying issues while promoting public safety.

The program's growth in just three years shows both its need and its promise. It launched in Letcher County on Jan. 1, 2023, with one participant soon after. By the end of 2025, the program was operating in 18 counties, serving more than 1,500 participants and had additional jurisdictions preparing to join.

Participant stories and feedback from court partners included in this report show meaningful progress. More than 500 participants have successfully completed the program, with completion rates holding at about two-thirds. Early recidivism data at six, 12 and 24 months after completion are encouraging and show the program's potential to reduce future contact with the justice system.

Together, these results show how far we have come since Senate Bill 90 was signed into law and the promise this program holds as it continues to expand across the commonwealth.

Growth and collaboration drive SB 90 program's statewide impact

Zach Ramsey

Director, Administrative Office of the Courts

The Behavioral Health Conditional Dismissal Program has seen rapid growth since its launch, both in the number of counties involved and in the number of people served.

From one county and one early participant in 2023, the program now operates in 18 counties and had served more than 1,500 participants by the end of 2025. In several jurisdictions, participation has doubled, tripled or even quadrupled as courts and partners have gained experience with the program.

This growth has been possible because of strong collaboration among state agencies and local partners. The Administrative Office of the Courts has worked closely with agencies including the Department for Behavioral Health, Developmental, and Intellectual Disabilities and Kentucky Adult Education to support treatment, education and workforce opportunities for participants. These collaborations have also led to broader training opportunities for court employees, including statewide Mental Health First Aid training.

The program's success is reflected in its outcomes. More than 500 participants have completed the program, avoiding a criminal conviction while receiving treatment and support. Completion rates remain high, and early recidivism data show promising results.

Looking ahead, the AOC remains committed to responsible expansion. Additional communities, including Powell County beginning in January 2026, are preparing to participate, allowing the program to reach more Kentuckians and continue building on the progress outlined in this report.

SB 90: Implementation to Expansion: A Three Year Journey into the Development of the Behavioral Health Conditional Dismissal Program

Senate Bill 90 was introduced by Senators Whitney Westerfield (retired), Brandon Storm, and Robert Stivers and signed into law by Governor Andy Beshear in April 2022. The bill created the Behavioral Health Conditional Dismissal Program (BHCDP), a program designed to identify low level offenders who have behavioral health disorders and divert them from court and provide them with medically necessary behavioral health treatment supported by an array of wraparound services. SB 90's Journey to Implementation is chronicled in its annual reports which are available upon request.

Eleven pilot counties were selected for the initial implementation of SB 90. BHCDP officially launched in Letcher County on January 1, 2023 and the first participant's agreement was signed on February 1, 2023. Over the past three years, BHCDP has steadily expanded into eight additional counties—Henry, Lewis, Russell, Wayne, Warren, Johnson, Pike, and Powell. Participation has grown significantly, increasing from a single participant at the beginning of 2023 to over 1,500 participants by the end of 2025.

Expansion efforts extended beyond simply adding new counties. Streamlined processes began with a partnership with YourPath Inc, a third-party assessor firm, that allows potential participants to be quickly assessed for behavioral health issues. The speed and growth of SB 90's participants showed a need for additional quality treatment providers, which were added to the approved provider list by the Department of Behavior Health, Developmental and Intellectual Disabilities (BHDID) after a thorough application processes. Onboarding and continuous trainings are offered by BHDID's contracted facilitator, the Fletcher Group Inc (FGI). Finally, a major achievement that occurred in Dec 2023 was FGI's launch of Digital

Data Organization Repository (DDOR) a web-based data system for treatment providers to quickly and accurately record statutorily required participants' data.

Wraparound services offered to participants by BHDID and Kentucky Adult Education (KYAE) also grew exponentially. In April 2024, BHDID in conjunction with the Eastern Kentucky Concentrated Employment Program (EKCEP) established a barrier relief fund to assist participants in overcoming obstacles in their treatment paths. Similarly, KYAE began offering their own assistance program to eliminate any barriers participants face for employment. Participants can and have asked for relief with the costs of education, job/safety equipment, and transportation. Employment barrier relief can extend beyond the length of the program. The Department of Medicaid Services in partnership with FGI also launched the Recovery Residence Service Support (RRSS), an initiative that provides housing assistance for participants living in recovery housing.

The collaboration between state agencies (AOC, KYAE, and BHDID) fostered by SB 90 has impacted thousands of lives in Kentucky. The data from SB 90 Annual Reports demonstrate that this early and encompassing intervention of treating behavioral health disorders can be effective at limiting future involvement with the court system. A key to SB 90's success is from true partnerships at the local level among the judiciary, prosecutors, defense counsel, case navigators, treatment providers, college career navigators, and community partners. Together communities are assisting some of their most vulnerable citizens with a path of recovery and support. 2026 will further showcase what SB 90 can accomplish for participants and communities.

Overview of 2025

Numbers

Growth continued to characterize BHCDP in 2025. At the end of 2025, over 1400 participants entered BHCDP. There was an increase in agreement numbers in almost all participating pilot counties. Some counties experience saw steady and consistent growth throughout 2023-2025, others including Clark, Hopkins, Kenton, saw their agreements double and even triple compared to the previous year. The county snapshots (Pg. 15-18) offer more details on agreement and participant numbers by county.

Expansion

Expansion efforts continued in several interested communities throughout 2025. Pike County officially launched BHCDP in November 2025. Powell County also formally expressed its interest in joining the BHCDP with a case navigator scheduled to start in January of 2026. Experience has demonstrated that the case navigator role is essential for the success and sustainability of the program within each community. In anticipation of future expansion, ten additional case navigators will be added to the program in 2026 to assist the new counties with the implementation of BHCDP.

Successes

Since its launch in 2023, BHCDP has positively impacted numerous lives. Over 500 participants successfully completed BHCDP by the end of 2025. Individuals received treatment for behavioral health issues, had access to barrier relief and educational/vocational services, and their charges were dismissed. BHCDP completion rates still remain high at 67%. KYAE saw notable success in offering follow-up services to interested participants, supporting successful transitions into employment and educational opportunities. For the first time, BHCDP is able to report participant recidivism rates at the 6-month, 12-month, and 24-month mark, which further demonstrates the BHCDP's positive impact on long-term outcomes for the participants.

Collaboration/Future

As BHCDP continues into the next chapter, partners are focusing on efforts that extend beyond its expansion. In early 2025, BHDID contracted with the University of Kentucky's Center for Drug and Alcohol Research (CDAR) to do an evaluation of the program's effectiveness and develop recommendations for BHCDP's future. The report is anticipated to be published in early 2026 and will be shared on BHDID's website. CDAR's recommendations and findings will help inform future policies and procedures. BHCDP partners are optimistic that further evaluation of BCHDP will demonstrate cost savings to taxpayers through a reduction in incarceration and recidivism. Education and collaboration will remain a priority as stakeholders work to expand BHCDP into additional interested communities across Kentucky.

Acronyms

AOC: Administrative Office of the Courts

BHCDP: Behavioral Health Conditional Dismissal Program

RES: Reentry Employment Services

RRSS: Recovery Residence Support Services

SB 90: Senate Bill 90

SUD: Substance Use Disorder

Van Ingram
*Executive Director,
Office of Drug Control Policy*

Since day one, the Beshear-Coleman administration has been dedicated to fighting addiction, supporting mental health and reducing recidivism in the commonwealth. Together, Team Kentucky has made important progress on each of these fronts, and we will continue finding innovative ways to support our families and build a safer New Kentucky Home.

In 2022, Governor Beshear signed Senate Bill 90 which created a pilot program to provide alternative forms of sentencing to individuals who suffer from addiction and other behavioral health issues. A defendant in the program has the opportunity to participate in a behavioral health conditional release program as an alternative to incarceration. As chair of the SB 90 Behavioral Health Conditional Dismissal Program (BHCDP) Advisory Council, I get to work with the dedicated state and local leaders who believe in this program and want to make lives easier for those struggling and their families. BHCDP allows us to address root causes and divert individuals away from the criminal justice system, putting them on a path for a safer, healthier life.

SB 90 is one of many ways we are addressing addiction in our communities. Since December 2019, Kentucky has increased the number of treatment beds available and designated 35 counties as Recovery Ready Communities, guaranteeing accessible addiction treatment to over 1.9 million Kentuckians. The Office of Drug Control Policy also continues to award nearly \$6 million annually to assist pregnant and parenting women fighting addiction while increasing the amount of Narcan distributed in Kentucky. By working with stakeholders, we are saving lives while boosting workforce participation, reducing crime and keeping Kentucky families together.

While we have achieved three consecutive years of declines in overdose deaths, we continue to lose too many of our own to drug overdoses, and we are committed to lowering that number. BHCDP is an important part of this work, and I look forward to the continued good it will do for Kentuckians.

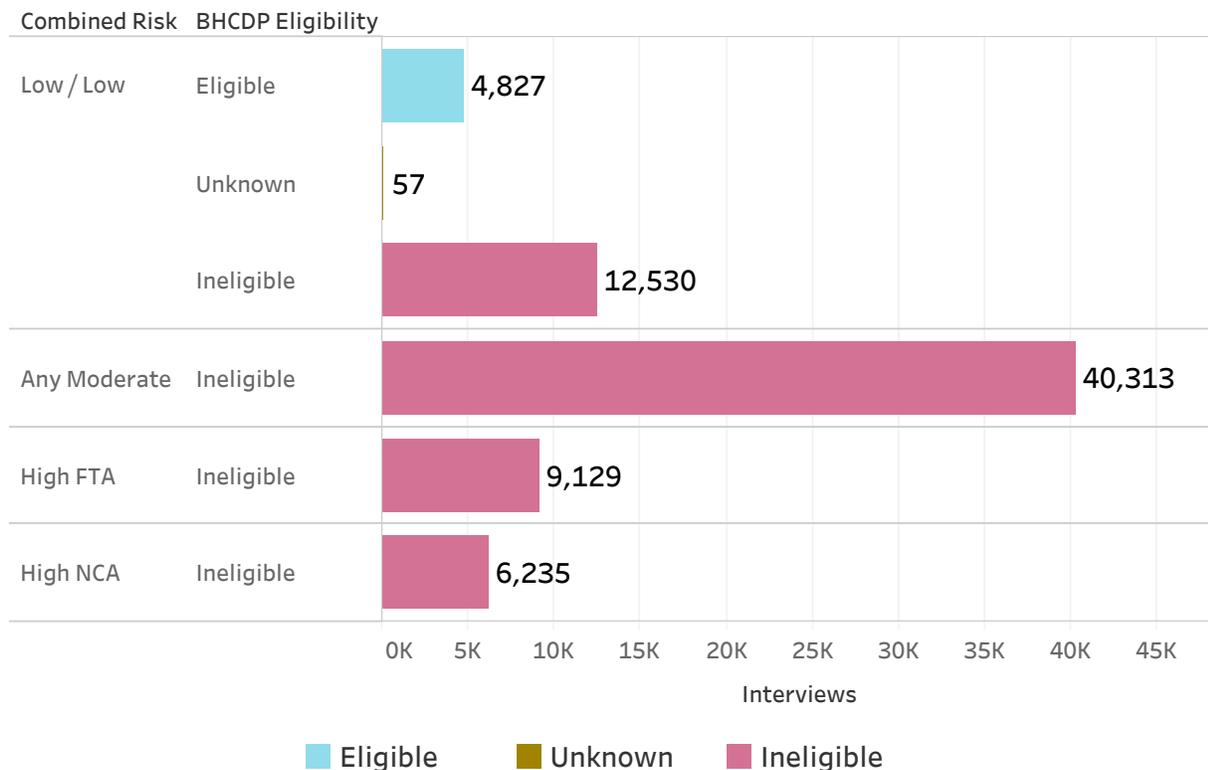

Behavioral Health Conditional Dismissal Program Eligibility by the Numbers

Information in this report is from data collected throughout 2023-2025. The Administrative Office of the Courts (AOC) is tasked with the collection and compilation of all the data submitted by the providers and the Commonwealth and County Attorneys, and to submit an annual report each year. In addition to the data reported by the providers and Commonwealth and County Attorneys, this report will also include the number of defendants assessed for eligibility, the specific offenses charged, and the success rates of program participants. This report will also highlight the percentage of defendants who successfully complete the program, those discharged for noncompliance, and the rates of arrest, conviction, and incarceration within six months, one year, and two years after completing the program.

A referral can be made when an individual is arrested or appears in court. An individual can have one or more cases, which can include multiple referrals. A count of referrals does not equate to a count of individuals, as an individual can have multiple referrals over the course of the program.

FTA Risk Level of Participants Referred During CY 2025 by Referral Source

Failure to appear risk is calculated through Pretrial's PSA. Prosecutors can refer higher risk levels to the program. Risk levels are determined in real time and may change as more information is gathered. Some participants may have had referred cases with charges that were amended or added after the referral date. Participants with both a pretrial and a prosecutor referral are counted in both groups.

NCA Risk Level of Participants Referred During CY 2025 by Referral Source

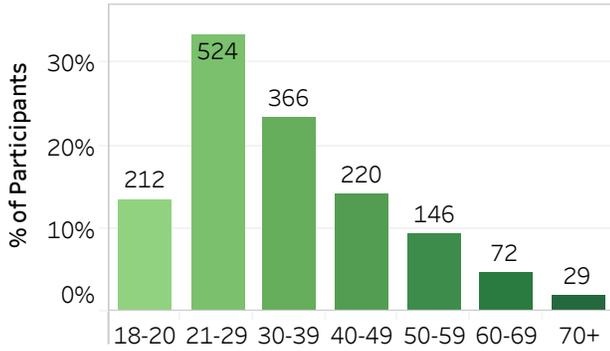

New criminal activity risk is calculated through Pretrial's PSA. Prosecutors can refer higher risk levels to the program. Risk levels are determined in real time and may change as more information is gathered. Some participants may have had referred cases with charges that were amended or added after the referral date. Participants with both a pretrial and a prosecutor referral are counted in both groups.

Grand Total		504

Qualified Assessors from participating BHCDP Pilot Counties submit Clinical Assessment Results to Pretrial Services in accordance with reporting requirements outlined in KRS 533.276. The contents of these reports were compiled into a spreadsheet for purposes of fulfilling the Administrative Office of the Courts' reporting requirements outlined in KRS 533.272(6). The assessor will commonly list only the treatment recommendation for the most dominant disorder if an individual is determined to have co-occurring disorders, and thus, many assessments will only have one treatment recommendation listed rather than two.

Snapshot of Counties

BHCDP is required to be established in no less than 10 counties by statute. Counties must have access to MAT, Recovery Services, and sufficient educational/vocational resources. Program is currently operating in Letcher, Madison, Clark, Pulaski, Hopkins, Christian, Oldham, McCracken, Daviess, Greenup, Kenton, Henry, Lewis, Wayne, Warren, Johnson, Russell, and Pike counties.

County	Implementation Date	Pretrial Eligible Defendants 2025	Participants in 2025	Total Participants	Total Successful Participant Completions	Total Participants Discharged for Non-compliance	Total Participants Voluntarily Withdrawn	Total Deaths of Active Participants
Christian	9.1.23	187	45	139	65	29	3	0
Clark	7.16.23	60	69	114	38	7	7	0

* District Court only - Commonwealth opted out (misdemeanors and violations only, no felonies)

I am the Letcher County case navigator and I had the honor of being the 1st case navigator. This has given me the opportunity to be a part of the SB90 from the beginning. I have watched this program grow into the most successful program I have seen in the court system. Having spent several years working in the court system, I have seen this program work for defendants when nothing else has been able to. I have witnessed many lives change. Getting to be part of someone's healing journey is a true blessing. I can tell you wonderful stories of the successes in the program, but the numbers show that. Unfortunately, while not everyone completes and participants go back to court for non compliance, it is important to remember that should not always be counted as failure. We can still plant seeds for every participant. I have seen many of those who were discharged come back and ask for help when they were ready. I have seen participants back in jail telling others how great the program is, and it will change their life if they work it. I feel that this speaks volumes for the program and this is one of the "silent" successes of the program. The success of this program is bolstered by offering these participants a team of people to support them through their journey. Many of our participants have no one. Having all the extra support in place helps them conquer fears and gives them motivation to accomplish their goals.

– Kristi Williams, Case Navigator

BHCDP is a voluntary program. This chart indicates the number of referrals and referred individuals who were accepted into BHCDP by Referral Source and County. A count of referrals does not equate to a count of individuals, as an individual can have multiple referrals over the course of the program. Individuals with both a pretrial and a prosecutor referral are included in individual counts for both referral sources.

BHCDP Referral Acceptance Into Program

By Acceptance Status and Referral Source

Accepted Into Program Statuses:

- *Awaiting Prosecutor Approval - Assessment has been completed and the referred individual is eligible to participate in the program pending Prosecutor Approval.*
- *Case Disposed - The case reached final disposition prior to the referred individual agreeing to enter the program.*
- *Deceased - The referred individual passed away prior to agreeing to enter the program.*
- *Declined Assessment - The referred individual declined to complete the required initial clinical assessment to determine if referred individual has an eligible condition.*
- *Declined to Participate - The referred individual is eligible, but declined to participate in the program.*
- *Ineligible - The referred individual did not meet criteria for the program and was ineligible to participate.*
- *Offer Rescinded - Prosecutor rescinded their offer for the referred individual to participate prior to agreement being signed.*
- *Prosecutor Override - Referred individual is eligible to participate based on Pretrial Services Criteria, but Prosecutor did not agree to the referred individuals' participation in the program.*
- *Yes - Referred individual was accepted into the program.*

Grand Total			137

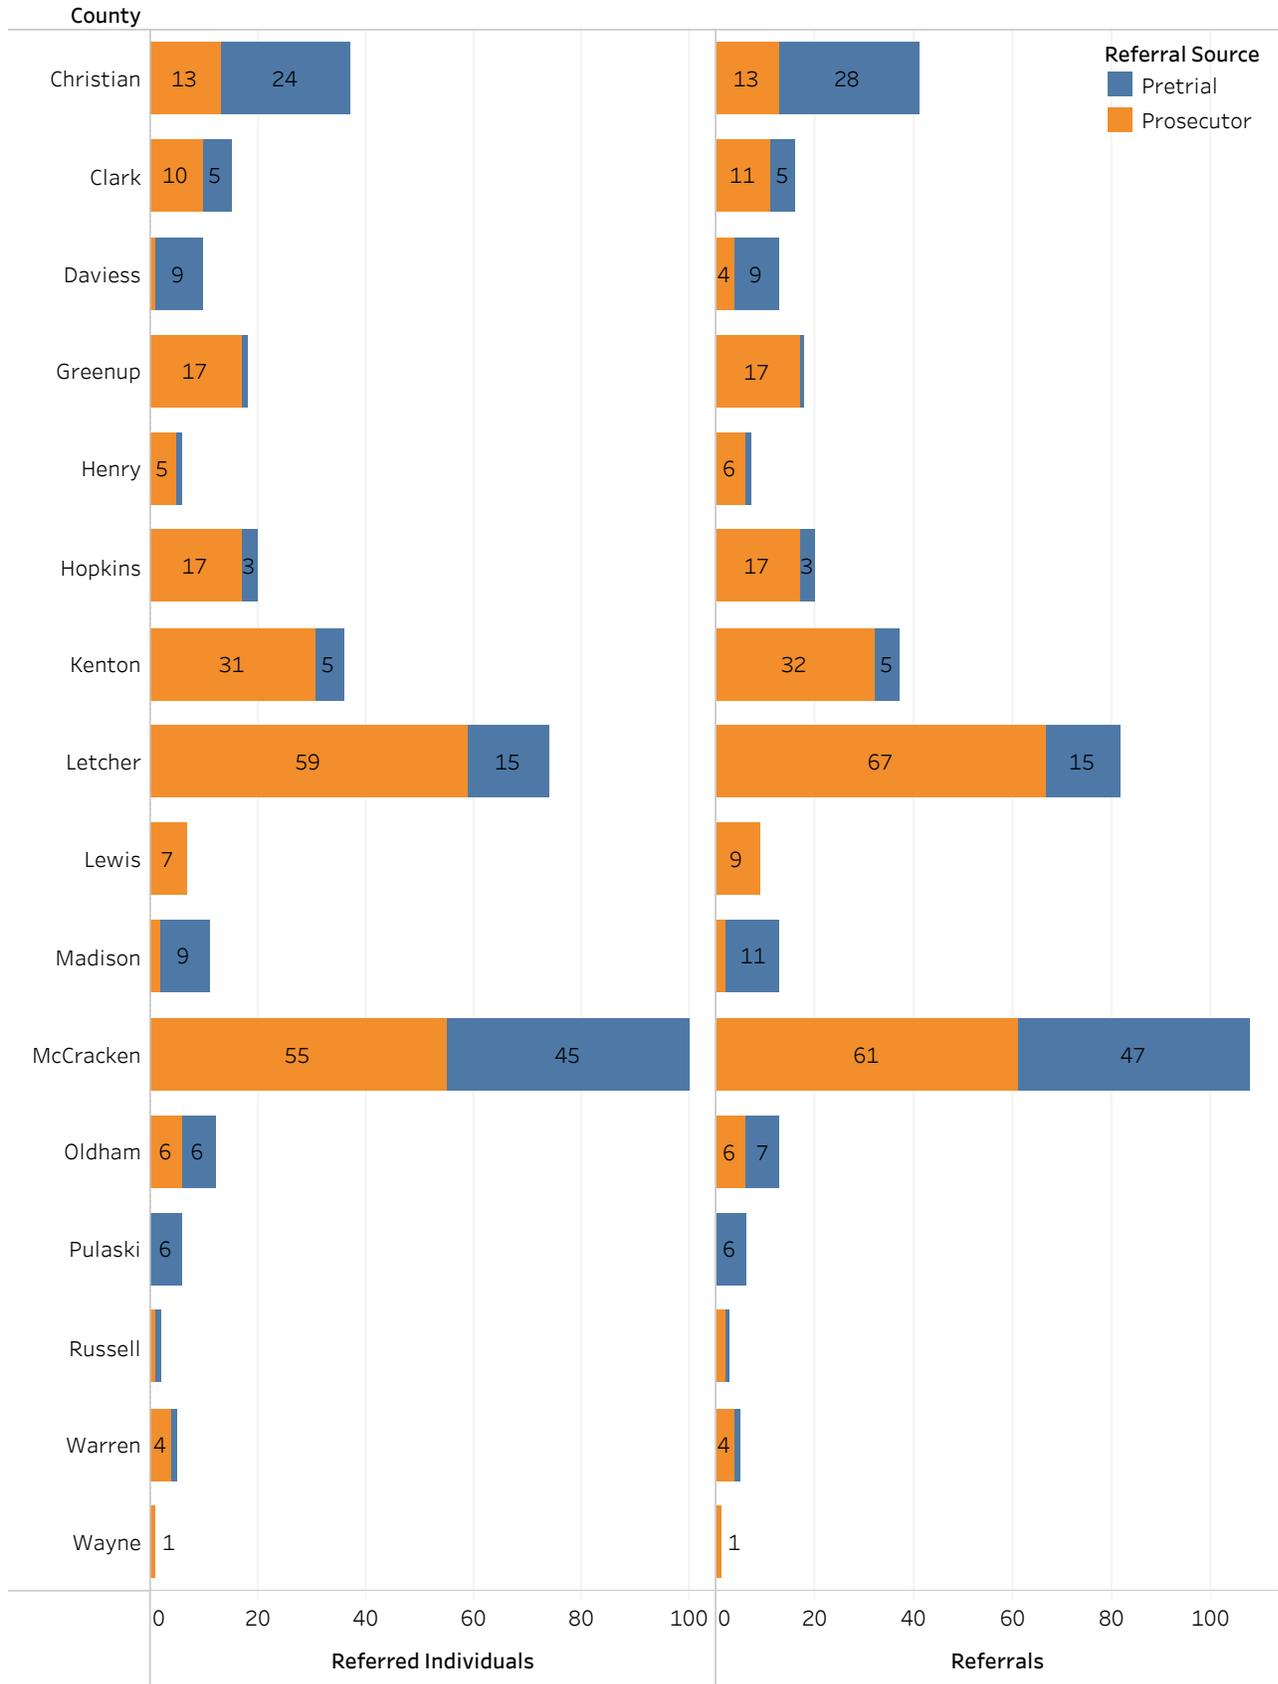

I was arrested in June 2025 for public intoxication excluding alcohol. I was diagnosed by my doctor after my arrest with bipolar disorder. At the time of my arrest I was unaware that I had a mood disorder. When I went to court I was told since I had no previous record I was able to qualify for a program called SB90. In return for working the steps of the program upon successful completion my charges would not no longer show up on my record and I would be able to get mental health help for my disorder. I also would be able to go back to school if I wanted to further my education. During the process SB90 helped me with some housing expenses I wasn't able to take care of myself, the program also helped me to be able to understand my medical diagnosis as well as get the proper medication needed to treat my mood disorder. I did end up choosing to take advantage of going back to school as I was in a position now in my life my children we're grown where I could focus on school for a period of time without the worries of having to take care of a family at the same time. I enrolled in a local community technical college to obtain my CDL which was at no cost to me had it have been I wouldn't have been in a financial position to be able to do that on my own. I'm happy to report I successfully completed SB90, my mental health is now manageable, I was able to start school get my permit for my CDL and I'm set to take my state exam for my CDL next week. Although I started SB90 with a lot of problems SB90 has helped turn my mental health and career around for the better.

Thank you!

– J. B., Participant

BHCDP Participants who Successfully Completed Program During CY 2025

By County and Referral Source

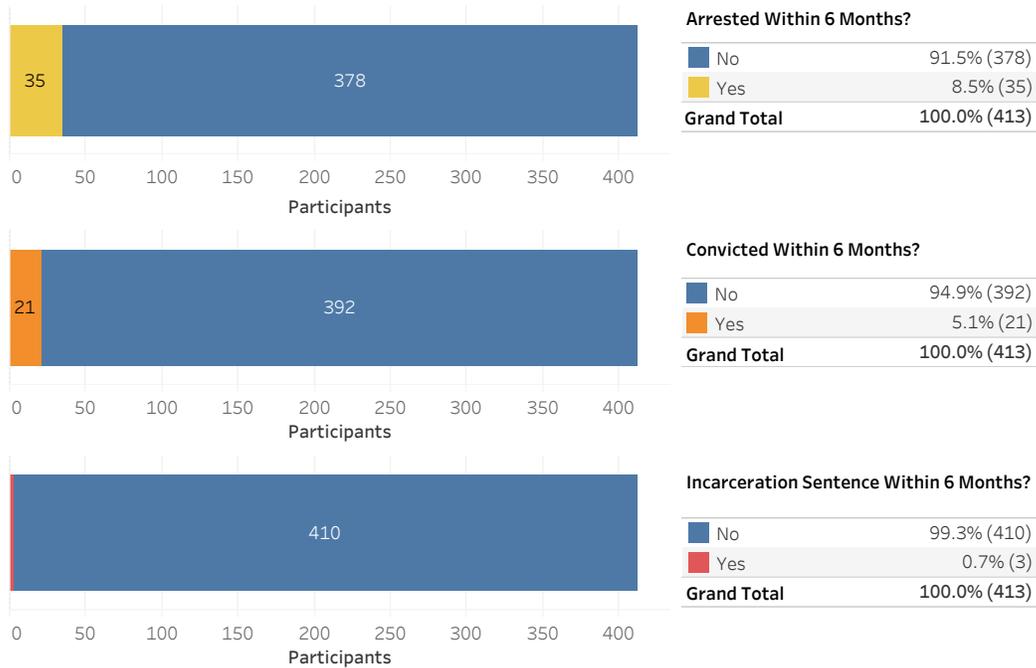

A count of referrals does not equate to a count of individuals, as an individual can have multiple referrals over the course of the program. Individuals with both a pretrial and a prosecutor referral are included in individual counts for both referral sources.

Data is as of 1/15/2026. Participants who successfully completed the program less than 6 months ago are not included. Participants can be referred to the program more than once, but are only counted by their least successful recidivism outcome. An arrest is indicated if a participant has a case that subsequently appears in Pretrial Services' case management system (PRIM). A sentence of incarceration is any charge that, when sentenced, results in further incarceration for the participant. This means charges with a jail or prison sentence that was not suspended and/or conditionally discharged in full.

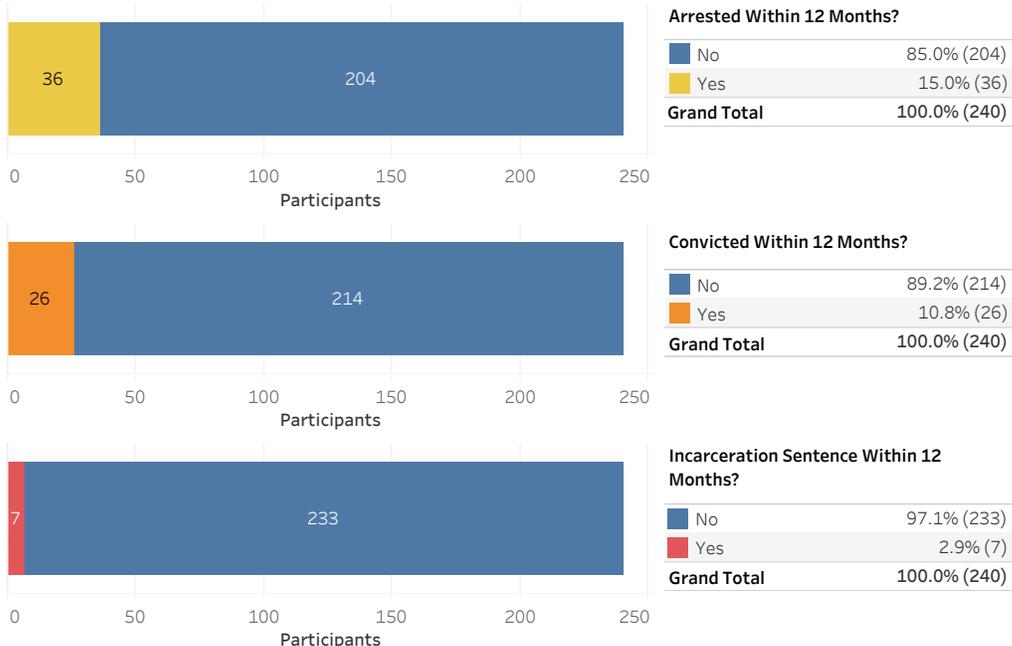

Subsequent Arrest, Conviction, and Sentence of Incarceration Status of Participants Six Months after Successful Completion

Among Successful Participants Referred During CY 2023 through 2025

Subsequent Arrest, Conviction, and Sentence of Incarceration Status of Participants Twelve Months after Successful Completion

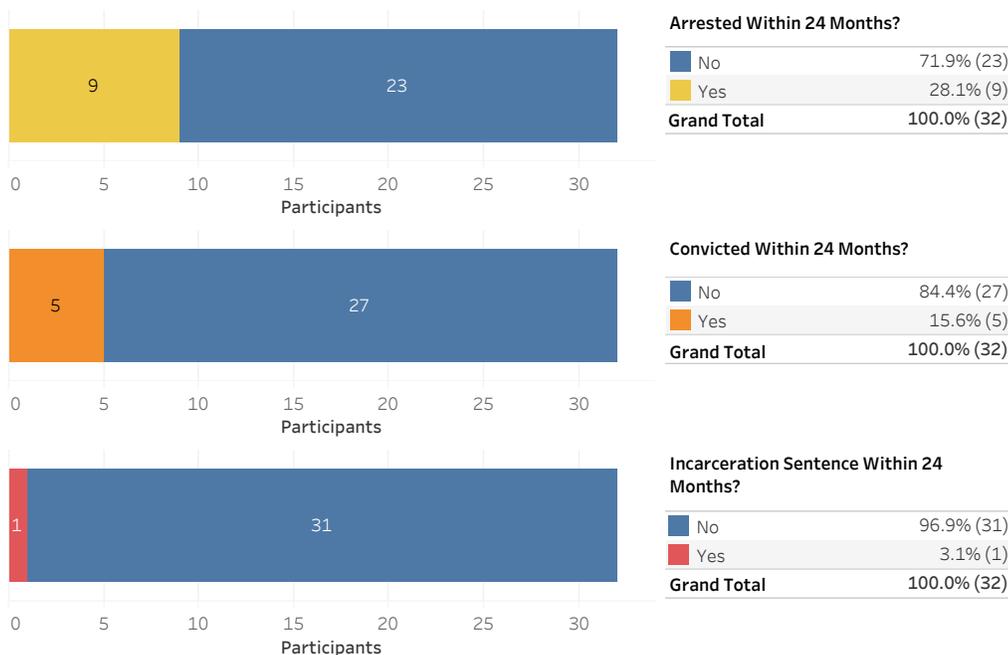

Among Successful Participants Referred During CY 2023 through 2025

Data is as of 1/15/2026. Participants who successfully completed the program less than 6 months ago are not included. Participants can be referred to the program more than once, but are only counted by their least successful recidivism outcome. An arrest is indicated if a participant has a case that subsequently appears in Pretrial Services' case management system (PRIM). A sentence of incarceration is any charge that, when sentenced, results in further incarceration for the participant. This means charges with a jail or prison sentence that was not suspended and/or conditionally discharged in full.

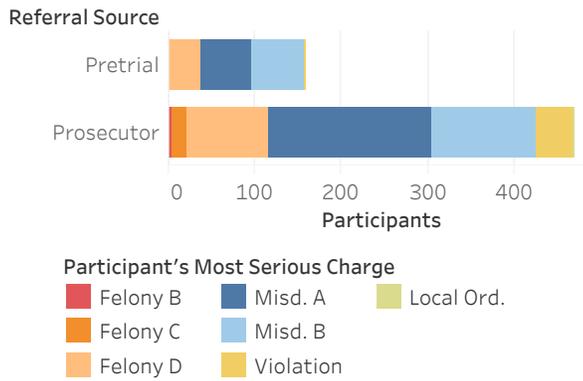

Subsequent Arrest, Conviction, and Sentence of Incarceration Status of Participants Twenty-four Months after Successful Completion

Among Successful Participants Referred During CY 2023 through 2025

Participants Accepted into BHCDP by Referral Source and Most Serious Prior Conviction

Does not include participants without prior convictions. Participants with both a pretrial and a prosecutor referral are counted in both referral source groups.

Treatment Provider 14- and 42-day Reports

Behavioral health providers in the program are required to collect data on participants to track the program's effectiveness. The data collection requirements for these providers are as follows:

1. 14-day report: provider must make a report on each participant within 14 days of initiation of treatment including information regarding participant's age, gender, race or ethnicity, housing, educational, and employment history, any past involvement in substance use or mental health disorder treatment, and criminal history.
2. 42-day report-provides the participant's progress in the program, including whether the participant is still enrolled in the program, treatment information, job or education status, housing, and any additional details that may assist in evaluation of the program. If a participant is no longer enrolled in the program, then the provider shall note the specific reason for discharge.
3. Quarterly reports- required on a quarterly basis and shall include the data required in the 14-day and 42-day report, as well as the number of total participants who are: compliant; discharged; participating in medication-assisted treatment; job skills or training; or educational component of the program.
4. Final report-completed within 30 days of discharge of program. If participant is discharged for noncompliance, then report shall detail reason for discharge, length of time in program, goals met, barriers to completion and any recommended adjustments to the program. If the participant completed the program successfully, the report will summarize their progress, any further treatment needed, and recommendations for improving the program for others.

Behavior health providers' participant information is gathered through FGI's data platform, DDOR. All approved providers and case navigators are given training and technical support on DDOR. FGI supplies the Administrative Office of the Courts with treatment provider data quarterly or upon request.

Katherine R. Marks, Ph.D.
*Commissioner,
Department for Behavioral
Health, Developmental and
Intellectual Disabilities*

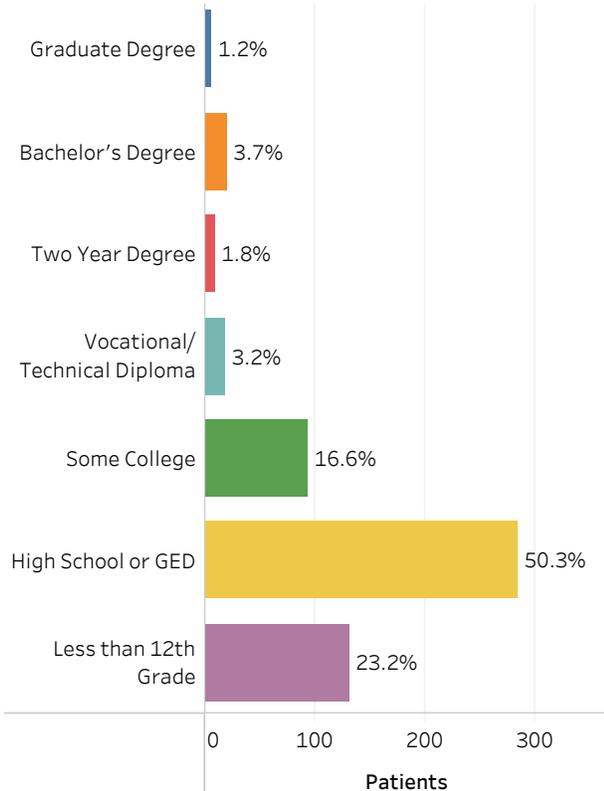

The Department for Behavioral Health, Developmental and Intellectual Disabilities is proud to continue its leadership role in the Behavioral Health Conditional Dismissal Program. Together, through a unique partnership across Cabinets, Departments, and treatment providers, we are transforming systems to transform lives. At the heart of the program is the commitment to addressing root causes that perpetuate cycles of incarceration – mental health disorders and addiction, system navigation challenges, and barriers to community and stability including transportation, employment, and housing. By focusing on these underlying behavioral health treatment needs, the program creates meaningful pathways to recovery and long-term stability. The outcomes of this program send a powerful message – treatment works, and recovery is possible.

The Behavioral Health Conditional Dismissal Program reflects Team Kentucky's belief that when we provide every Kentuckian with the resources they need to succeed, we all succeed. Our mission is to ensure that every Kentuckian has access to the services and supports they need—and more than one opportunity to change their life.

The Department extends its sincere gratitude to the state and local leaders, justice partners, and treatment providers who are bringing this innovative model to life in their communities. Most importantly, we celebrate every individual who has embraced recovery through this program. Their courage and success continue to inspire and guide our work.

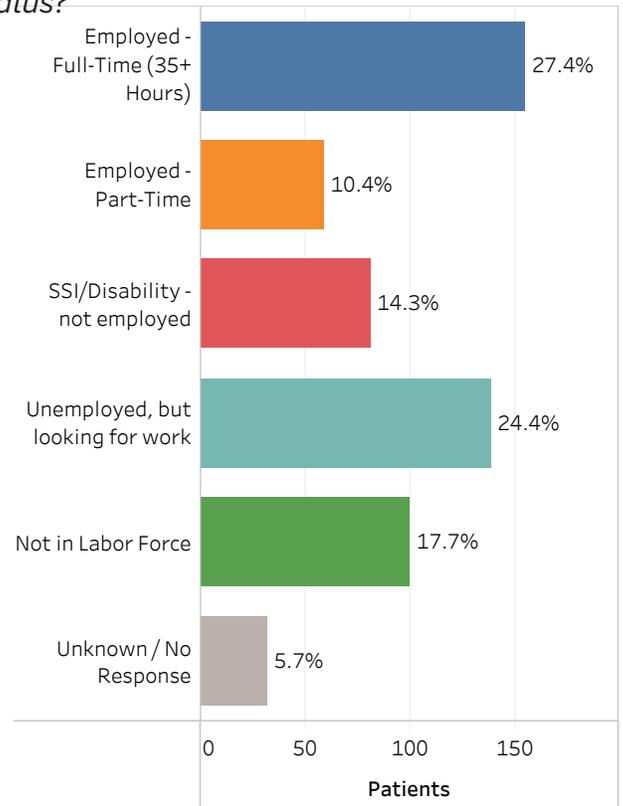

Responses to Questions from 14-Day Status Reports Entered During CY 2025

Has the Participant in the Last Year Been Treated for Mental Health Conditions or Substance Use Disorder?

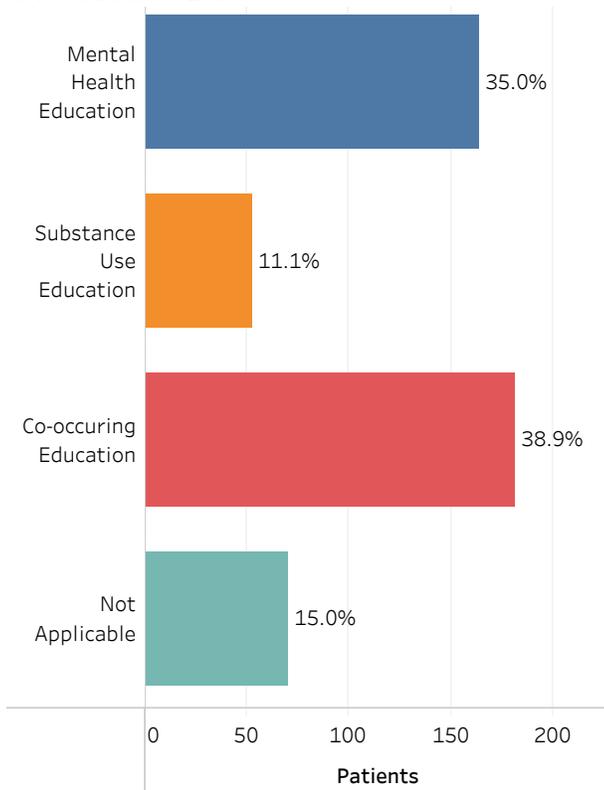

The Hopkins County SB 90 program was implemented September 1, 2023. Since its implementation, 79 agreements have been signed providing needed mental health and substance abuse assistance for qualifying participants without cost to them. SB 90 has been instrumental in helping divert misdemeanor charges for those who qualify while providing needed treatment that the participants may not have otherwise received. Our program [case] navigator and Regional Supervisor work very hard to go over the contract with our participants, making sure they understand their responsibilities, and to follow up on the participants' compliance. The SB 90 program in Hopkins County has provided an option to the court to address underlying root issues driving the participants' criminality while alleviating the cost of incarceration and the financial burden that fines impose. As District Court Judge, I consider the SB 90 program to be a success in Hopkins County in that it provides a meaningful alternative to jail and/or fines and is accomplishing the purpose for which it was created.

– Judge Kimberly Gilliam

Treatment Provider Quarterly Reports

Qualified treatment providers from participating BHCDP pilot counties submit quarterly reports to Fletcher Group Inc., who submits them to Pretrial Services in accordance with reporting requirements outlined in KRS 533.272(3(e)). The contents of these reports were compiled into tables for purposes of fulfilling the Administrative Office of the Courts' reporting requirements outlined in KRS 533.272(6). These nine pages detail the contents of those reports grouped by provider and reporting quarter.

Final Reports

There were 25 participants who successfully completed BHCDP in 2023. In 2024, that number has increased significantly to 215. In 2025, that number increased to 591. The average length of agreement for the successful participants is nine months. During the length of the agreement, participants worked towards their individualized goals while navigating a variety of barriers.

There have been 287 participants who were released from BHCDP. Forty-six withdrew from the program voluntarily, 241 were discharged due to non-compliance with treatment, restitution requirements, or incarcerated, and 3 were deceased. The average length of time these participants were in BHCDP before being released was 6.8 months.

Top listed barriers for Participants

1. Economic instability
2. Transportation
3. Medical issues
4. Family obligations
5. Childcare

Top listed goals completed during BHCDP

1. Address mental health issues
2. Develop healthy stress management techniques
3. Connections with support networks
4. Abstinence/reduction from substance use
5. Completion of SB 90 program/dismissal of charges

Top listed recommendations for BHCDP participants from providers

1. Continuing therapy
2. Continuing treatment
3. Continue job skills and education

End of Year Comparison

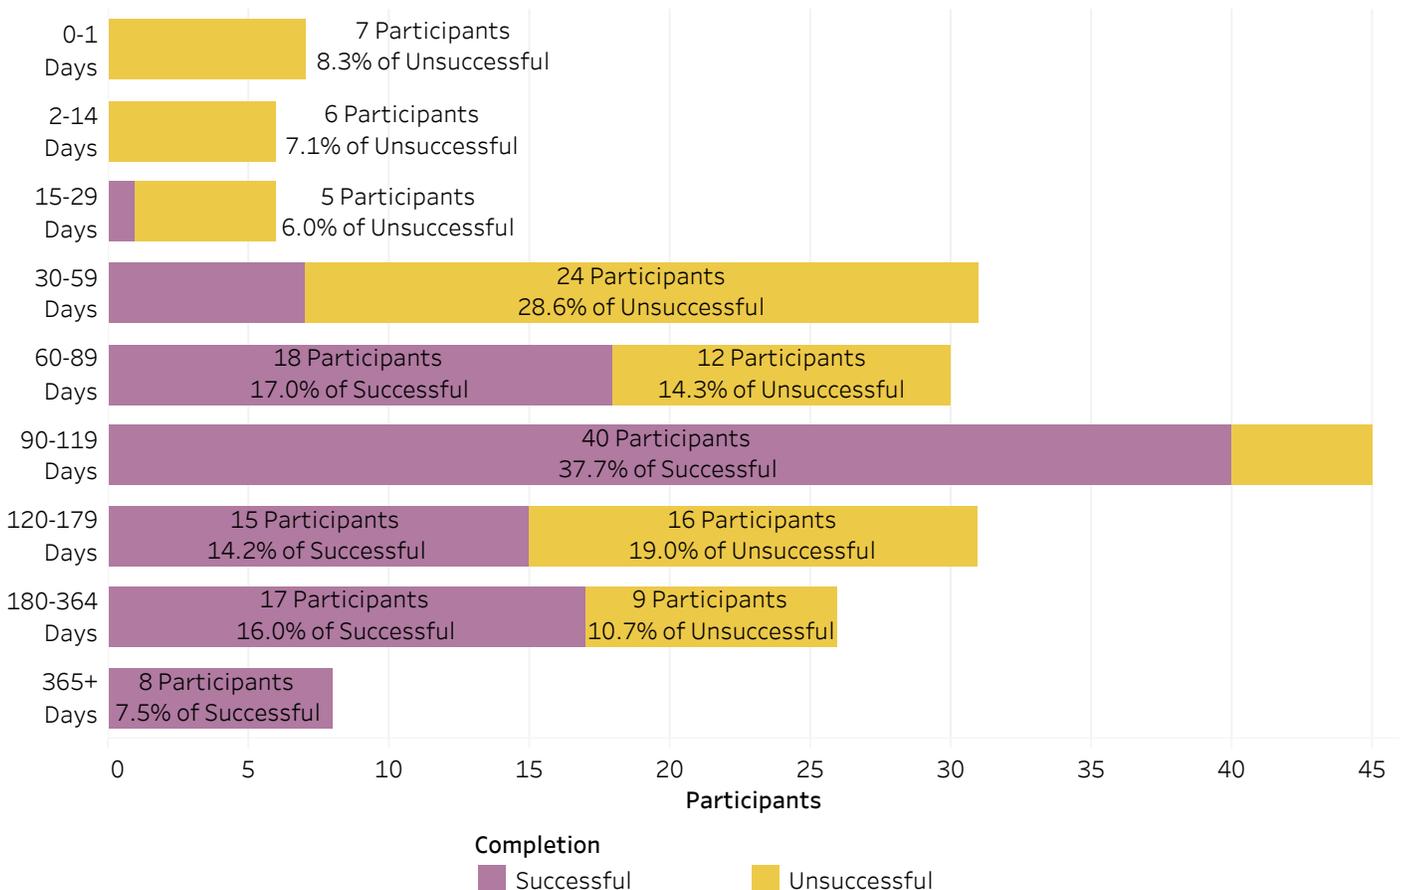

Year	Number of Active Counties	Pretrial Eligible Participants	Participants	Successful Completions	Participants discharged for non-compliance	Participants who voluntarily withdrew	Death of Active Participants
End of 2023	8	1,626	189	25	11	2	0
End of 2024	17	1,726	790	215	85	16	2
End of 2025	18	1,701	1,439	591	241	46	3

**Snapshot taken at the time of publishing of each yearly report*

Currently, SB 90's rate of successful completion is 67.1% and it's rate of discharge due to non-compliance is 27.3%.

BHCDP Participants with a Final Report by Time in Program and Completion Status

Among Participants with a Final Report From CY 2025

Kentucky Adult Education

The Office of Adult Education screens participants to assess their education, work history, military experience (if applicable), strengths and limitations, and skills. Based on this, a tailored educational and job training plan may be developed if the participant chooses to pursue these opportunities. The plan includes educational goals, job training specifics, sector-focused skills, hours of study, support services, progress tracking, and job placement assistance. The office also helps participants access scholarships or grants for educational or training costs.

The measurable outcomes continue to increase, and the collective success stories reflect participant's dedication and the collaborative efforts of the BHCDP community. Each participant's journey is unique, with some using the free GED promotion the Beshear Administration implemented to assist Kentuckians pursuing their High School Equivalency (HSE)/GED, and some taking advantage of postsecondary educational and job training opportunities that lead to employment in one of the five high demand sectors the Kentucky Workforce Innovation Board (KWIB) has designated.

The RES Branch has leveraged partnerships with the Administrative Office of the Courts and other BHCDP partners to enhance the service delivery model for participants. The success and growth of this program is symbolic of the coordination and strategic partnerships across the BHCDP network.

From its inception, the OAE and ELC have taken deliberate steps to increase access to education, training, and workforce opportunities for all Kentuckians. The BHCDP continues to demonstrate what is possible when priorities are aligned across the

judicial, treatment, and education systems in support of a shared vision.

The continued growth and success of the BHCDP will further contribute to the educational and skills development of working-age Kentuckians, creating the conditions for individuals to reach their goals, achieve stability, and move toward self-sufficiency.

The Adult Education Local Provider Network, supported by the OAE, remains committed to changing lives through accessible, achievable, and individualized support. By using the BHCDP Trust Fund to remove barriers to employment and education and training, and by aligning financial support with hands-on guidance, participants can build a strong foundation for long-term success.

The progress highlights the value of collaboration, continuous improvement, and the commitment of the participants to obtain the skills required for career advancement and sustainable success. The OAE and partner offices look forward to impacting the lives of future participants as the BHCDP expands to additional counties.

In 2025, KYAE received 534 referrals from treatment providers on behalf of the BHCDP. Of those referrals,

76.59% (409) completed the statutorily required educational/vocational assessment administered by the KYAE Local Provider Network.

BHCDP Trust Utilization

In 2025, 160 requests were submitted to utilize BHCDP Trust funding for education and training for participants to remove barriers to them entering the workforce. There were 120 requests for workforce supportive services and 40 requests for education, training, and certification or licensure pursuits. Notably, nine participants are continuing their educational journey into academic year 2025-2026.

In total, \$75,079 was disbursed to support BHCDP participants. KYAE, in conjunction with other partners, assisted BHCDP participants in obtaining \$14,284.53 of financial aid and scholarships in support of their educational and employment goals.

KYAE established new and sustained existing partnerships with higher education institutions such as the Kentucky Community and Technical College System, Western Kentucky University, Eastern Kentucky University, Brescia University, and Liberty University as well as with private training institutions.

Damon L. Preston
Public Advocate

It is hard to believe that it has been four years since the passage of SB 90 and the creation of the BHCDP. The Department of Public Advocacy (“DPA”) was an early supporter of SB 90 and has been committed to the successful implementation of the BHCDP since day one. Where it is active, the BHCDP is a vitally important program advancing Kentucky’s effort to improve the safety and vitality of communities. DPA supports, both in policy and through our local personnel, the expansion of the BHCDP to more counties with an eventual goal that every community and justice system will implement this valuable program that breaks the cycle of relapse and incarceration. The BHCDP provides real solutions that improve lives and keep communities safe while still holding individuals accountable. DPA remains an enthusiastic supporter of the Behavioral Health Conditional Dismissal Program.

Annual Report 2025

Since the passage of Senate Bill 90 in 2022, which Governor Beshear signed into law, the Behavioral Health Conditional Dismissal Program (BHCDP) has become a key behavioral health and justice initiative in Kentucky. The program diverts eligible individuals with mental health and/or addiction issues from incarceration into community-based care and supports. Early outcomes show promising reductions in recidivism, stronger recovery pathways, and improved stability for people involved in the justice system.

Growth and Program Evolution

Participants continue to describe the program as life-changing—offering hope, support, and access to resources that help them rebuild their lives. Many individuals report achieving recovery, securing stable housing, returning to work, and pursuing educational goals. These personal successes contribute to broader community benefits, including stronger families and reduced reliance on incarceration.

Primary Services	January-December 2025
Basic needs/Birth certificate/ID	\$262,028
Transportation	\$148,218
Housing/Utility	\$128,672
Emergency Shelter (hotel rooms, etc.)	\$43,633
Total Spent in 2025	\$582,551

Cross-agency coordination remains essential. The Department for Behavioral Health, Developmental and Intellectual Disabilities, the Administrative Office of the Courts, Kentucky Adult Education, and treatment providers across the commonwealth have developed a seamless approach to timely assessments, service linkage, and ongoing support.

In 2025, Emergency Barrier Relief Funds—administered by the Eastern Kentucky Concentrated Employment Program—further strengthened the program by helping participants address pressing needs such

as housing, utilities, transportation, and employment supports. Below are the largest spending categories for barrier relief, as well as the total expended for barrier relief in 2025.

Goals for the Future

The BHCDP Strategic Implementation Plan identified the following priorities for 2026 and beyond:

1. **Expansion and Sustainability:** Continue to expand the program, increase staff capacity, and strengthen the statewide clinical assessment system to support long-term sustainability.
2. **Professional Development:** Deliver ongoing, high-quality training for navigators, behavioral health providers, educators, and legal partners to ensure consistent and effective service delivery.
3. **Data and Evaluation Enhancement:** Strengthen data systems, monitor key performance indicators such as recidivism and treatment retention, and deepen evaluation partnerships to inform continuous improvement.
4. **Strengthening Recovery Supports:** Expand access to peer support, vocational services, and other long-term recovery resources that promote sustained recovery.
5. **Community Engagement:** Increase public awareness, host statewide learning opportunities, and cultivate program champions in each county to support broad engagement and adoption.

BHCDP’s early years demonstrate the impact of coordinated, person-centered intervention for individuals with behavioral health needs. As implementation deepens, the program will continue promoting recovery and advancing a compassionate and effective justice system in Kentucky.

Recovery Residence Support Services (RRSS)

Dr. Leslie Hoffmann
*Deputy Commissioner, Kentucky
Department for Medicaid
Services*

As a component of the Behavioral Health Conditional Dismissal Program (BHCDP), the Department for Medicaid Services (DMS) was tasked to develop a qualified recovery housing provider network and a reimbursement mechanism for services provided by recovery residences.

DMS, in partnership with the Department for Behavioral Health, Developmental and Intellectual Disabilities (DBHDID), developed the recovery residence support services (RRSS), which are non-clinical activities necessary to support beneficiaries recovering from addiction to support their independence through skills training and coaching. Additionally, recovery residence providers support with navigating barriers to accessing healthcare and employment while providing continued support during the addiction recovery process. RRSS can be provided by recovery residence providers who meet criteria based on specific program certification and the Medicaid enrollment process. Providers participating in the RRSS program must be a certified National Association of Recovery Residences (NARR) Level 2 or 3 recovery residence in accordance with the Kentucky Recovery Housing Network (KRHN) standards.

The Fletcher Group (FGI) serves as administrator for RRSS funds and oversees collection of data to evaluate outcomes of the service pilot. In addition, FGI provides implementation and data collection training and ongoing technical assistance to participating pilot providers.

Updates on Implementation of the Recovery Residence Support Service

Over the past year, DMS has continued to develop the RRSS pilot project in collaboration with FGI and DBHDID. To date, there have been 9 residences approved to provide RRSS, and 17 participants have entered the program. The Department continues to explore opportunities to expand the provider network.

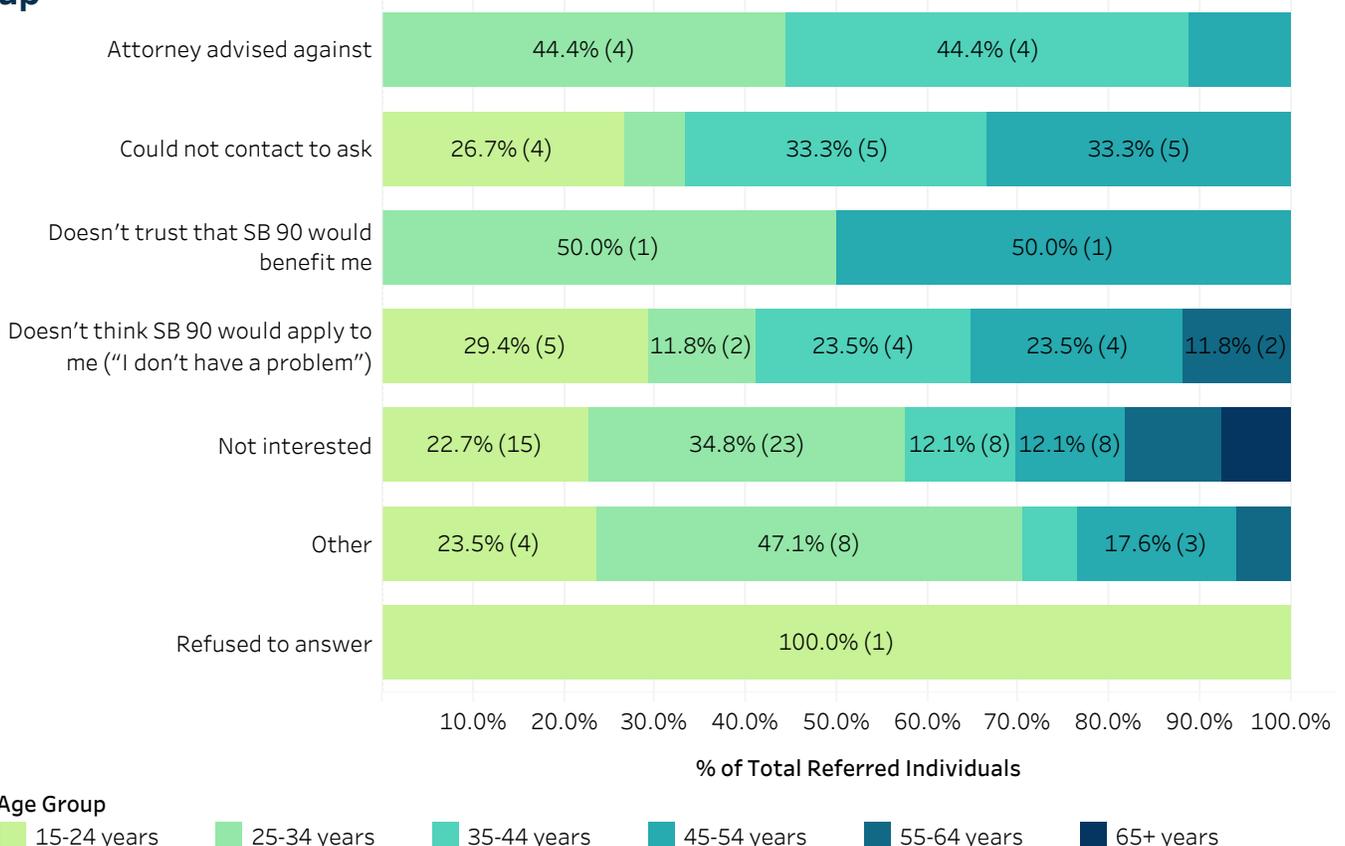

During this time, DMS received approval from the Centers for Medicare and Medicaid Services (CMS) under KY's TEAMKY Section 1115 Demonstration authority to reimburse for RRSS up to 90 days per rolling year for individuals participating in BHCDP who meet eligibility criteria. Throughout this year, DMS began planning to transition RRSS from pilot to Medicaid covered services under the TEAMKY 1115 Demonstration, with implementation expected in Spring of 2026.

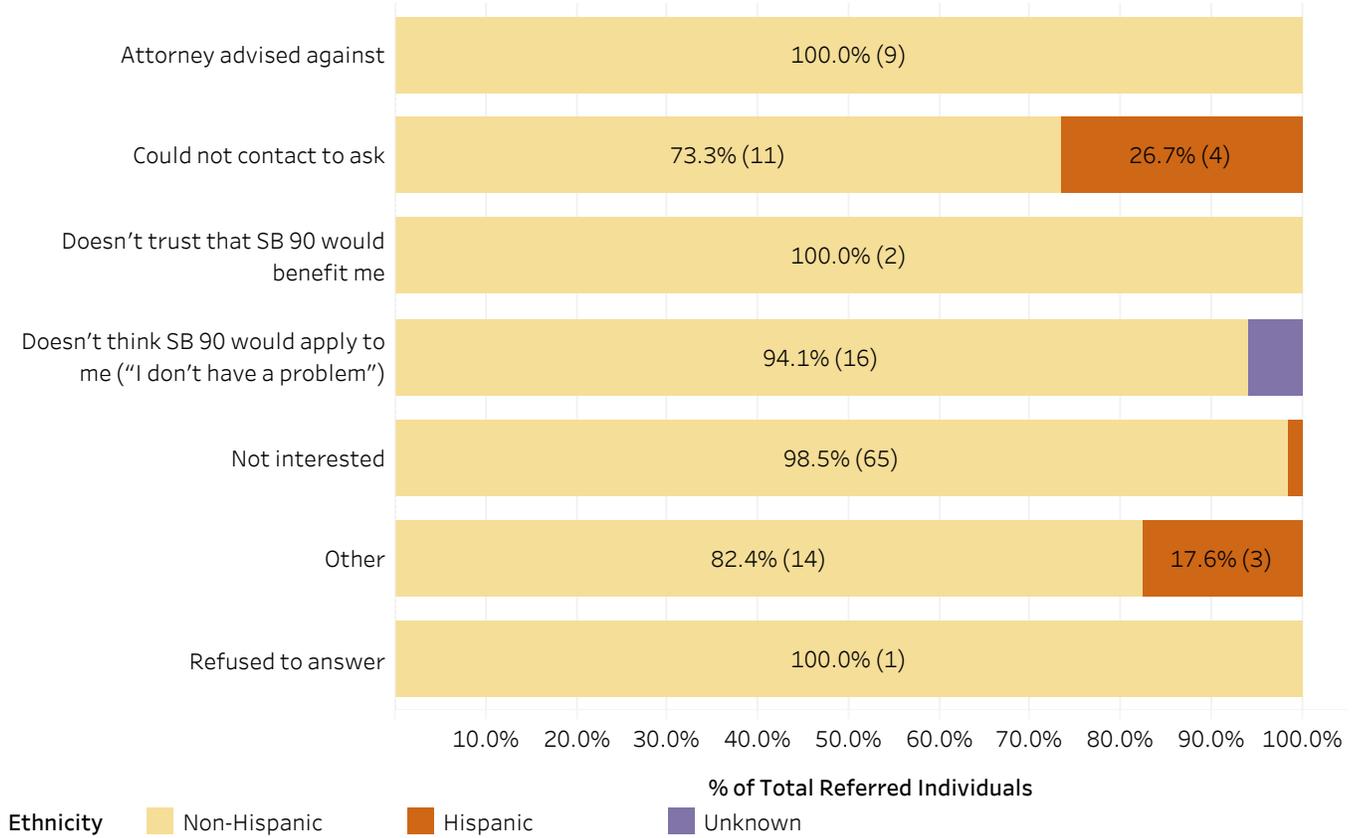

Although KRS 533.272 does not require data reporting on potentially eligible participants who decline either the initial assessment or to enter the program, the AOC realized that this was a valuable data point to capture. Starting in April of 2024, case navigators began tracking the reasons behind why these individuals declined the assessment or to enter the program.

This voluntary survey is administered to potentially eligible individuals who decline to complete the initial clinical assessment or who decline to participate in BHCDP.

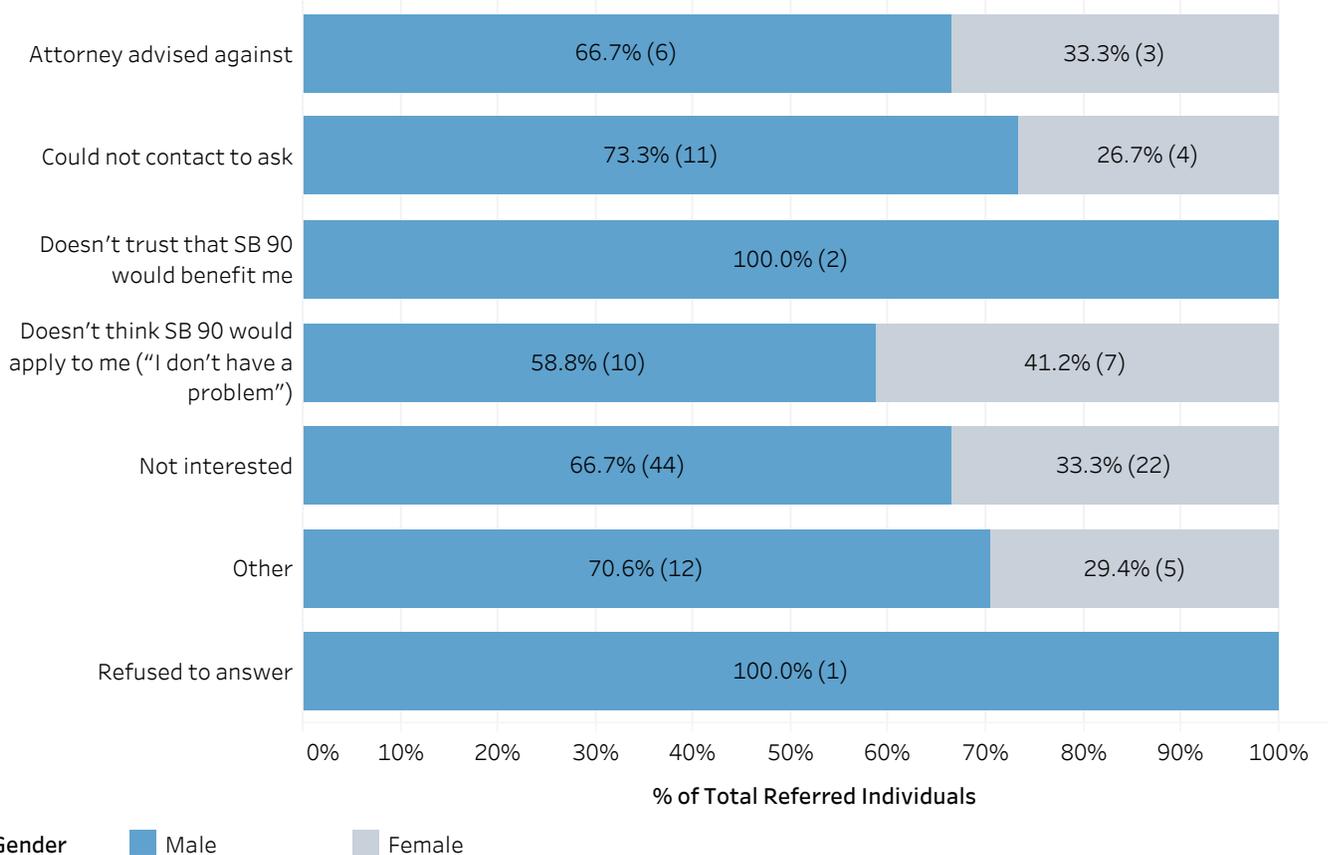

Reason Given by Referred Individuals for Declining Initial Clinical Assessment by Age Group

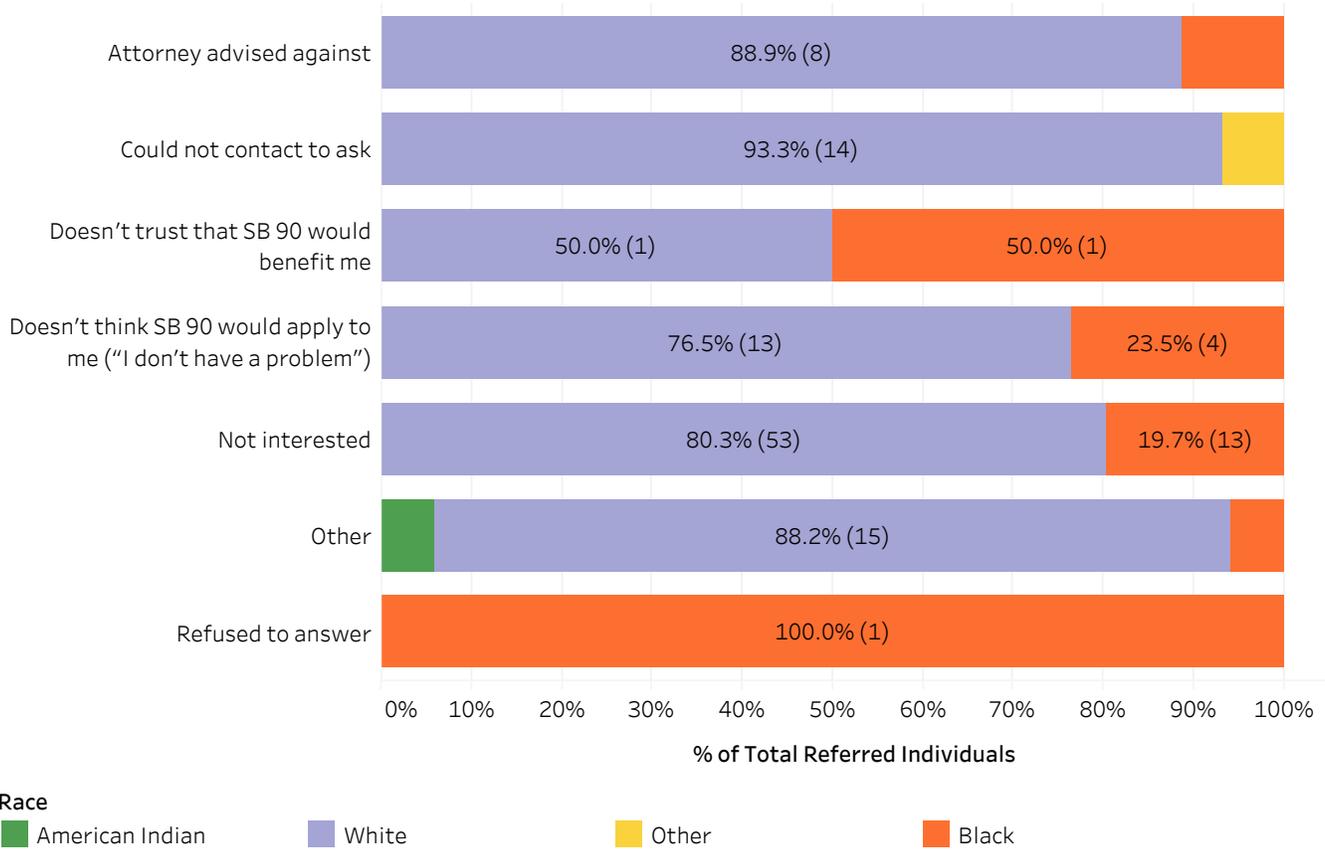

Reason for Declining Initial Clinical Assessment by Ethnicity

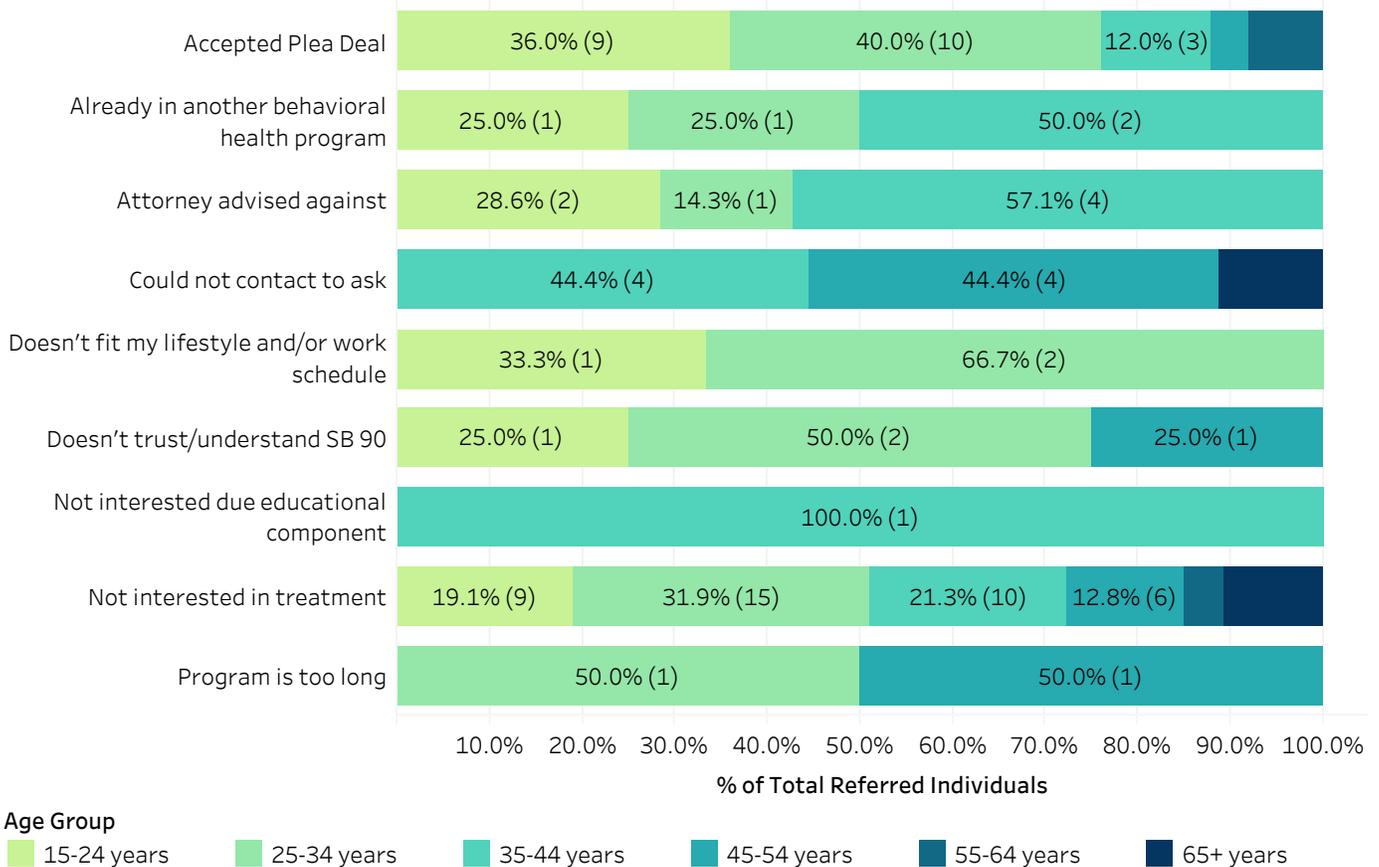

Reason Given by Referred Individuals for Declining Initial Clinical Assessment by Gender

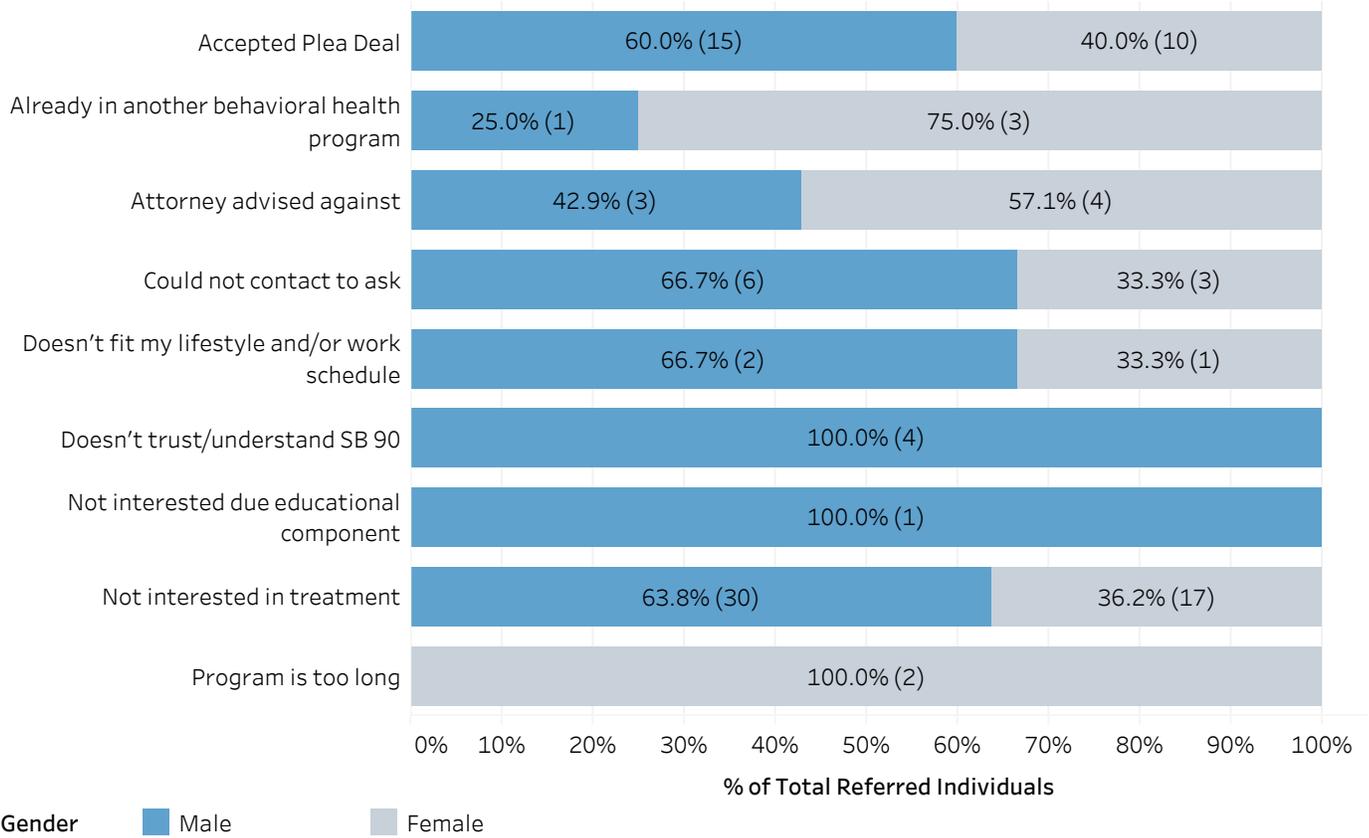

Reason Given by Referred Individuals for Declining Initial Clinical Assessment by Race

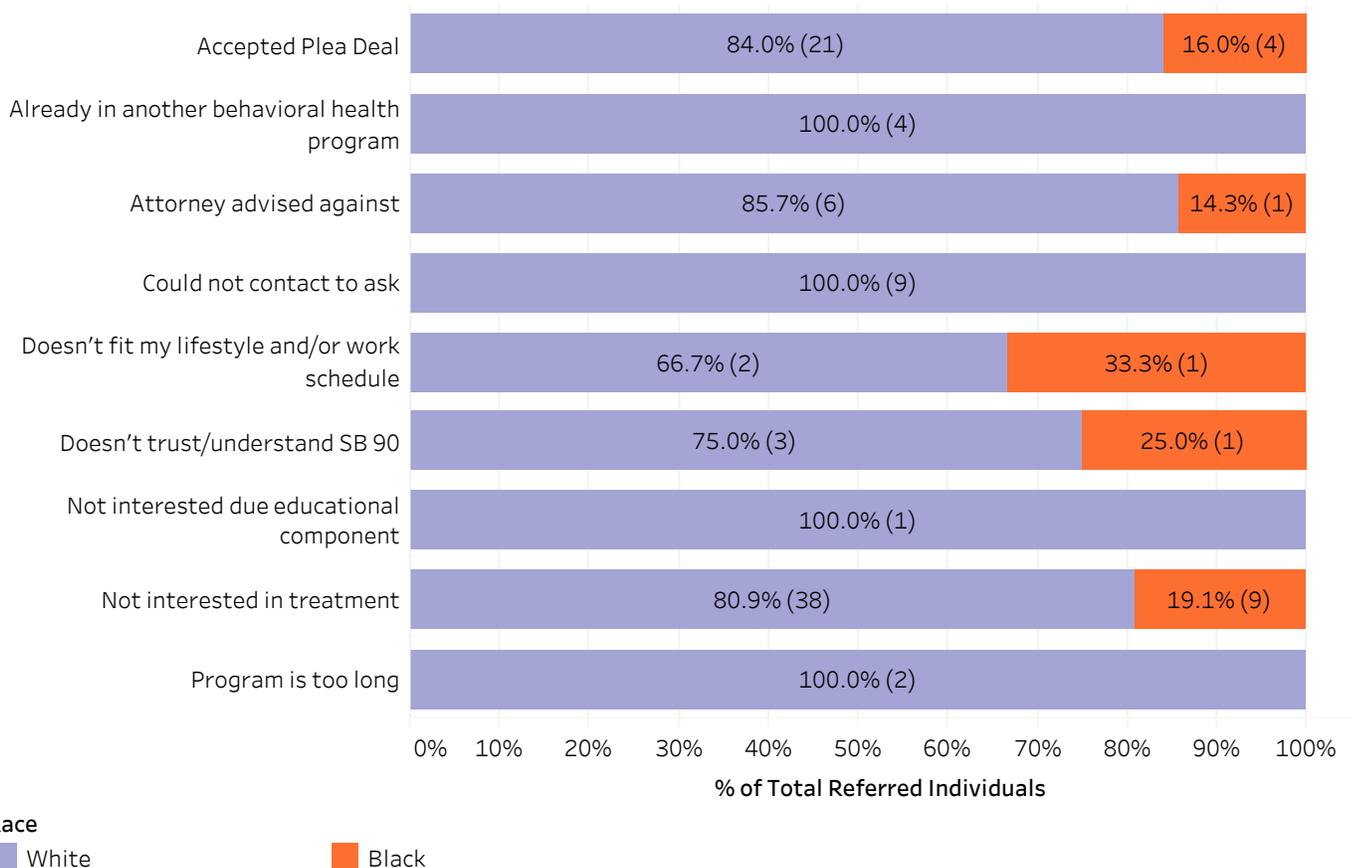

Reason Given by Eligible Individuals for Declining to Participate in BHCDP by Age

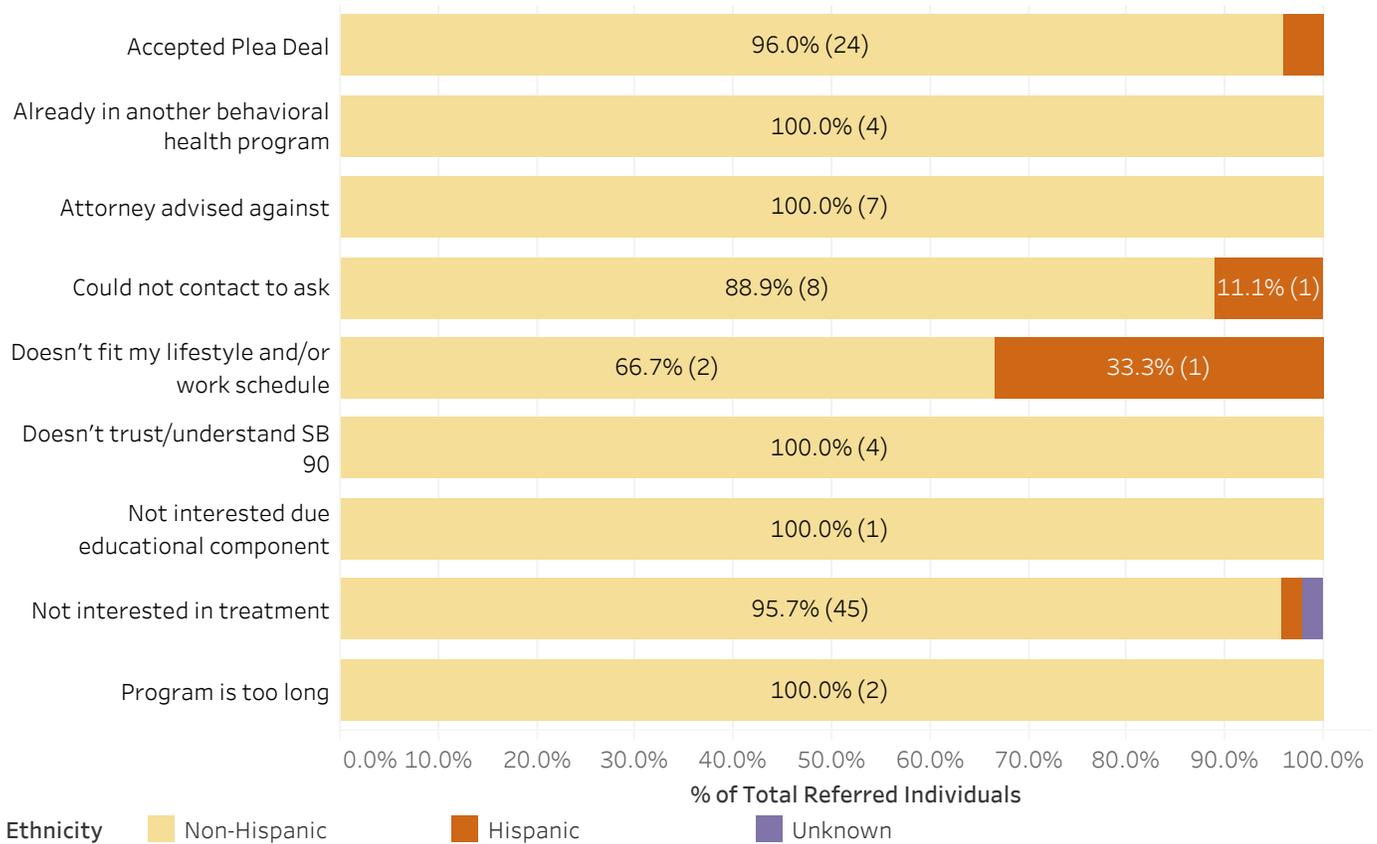

Reason Given by Eligible Individuals for Declining to Participate in BHCDP by Gender

Reason Given by Eligible Individuals for Declining to Participate in BHCDP by Race

Reason Given by Eligible Individuals for Declining to Participate in BHCDP by Ethnicity

The programs stemming from the passage of SB90 has provided our jurisdiction with an alternative pathway which includes structured supervision, treatment coordination, and individualized support for participants. Over the past year, we've seen increased treatment compliance and fewer law-enforcement encounters compared to traditional pathways. The program's multidisciplinary approach combining judicial oversight, case management, and therapeutic engagement has improved outcomes for individuals with serious mental illness while also reducing the strain on our jail, hospitals, and emergency services. The Kenton County BHCD Program model is emerging as a blueprint for sustainable, recovery-oriented behavioral health diversion statewide.

– Drew Harris, Kenton County Assistant County Attorney

Prosecutor Quarterly Data

Prosecutors from participating BHCDP Pilot Counties submit quarterly reports to Pretrial Services in accordance with reporting requirements outlined in KRS 533.272(4) and (5). The contents of these reports were compiled into a spreadsheet for purposes of fulfilling the Administrative Office of the Courts' (AOC) reporting requirements outlined in KRS 533.272(6). The following 18 pages detail the contents of those reports grouped by Pilot County, Prosecutor, and Reporting Quarter.

All prosecutor reports are included to fulfill AOC reporting requirements. As of the date this report was compiled (1/29/2026), the following reports from the final quarter of 2025 had not received signatures of approval from the associated prosecutor: Madison County Attorney, McCracken Commonwealth's Attorney, McCracken County Attorney, and Warren County Attorney. These reports are delineated with an asterisk.

Glossary

Approved Treatment Providers

Approved assessors for each county participating in the pilot program established under Section 1 of this Act by Department of Behavior Health, Developmental and Intellectual Disabilities (BHDID).

Agreement to Participate

Agreement to participate in BHCDP. Outlines provider chosen and length of the program.

Behavioral Health Disorder

A mental health disorder or substance use disorder, or both.

Behavioral Health Treatment Program

A plan or recovery program based upon a clinical assessment, that:

- (a) Identifies and incorporates recovery services to meet the specific treatment and recovery goals and the needs of the individual served;
- (b) Addresses the social determinants of health to include housing, transportation, access to medical care, meaningful employment; and
- (c) Considers a full continuum of care.

Behavioral Health Conditional Dismissal Program (BHCDP)

Program designed to provide an eligible person who has a behavioral health disorder and who has been charged with a qualifying offense an alternative to receive treatment and recovery support services addressing the behavioral health disorder instead of incarceration, resulting in dismissal of the charges upon successful completion.

Case Navigator

Through the Department of Pretrial Services, the position of Case Navigator was created to bridge the referral process of individuals assessed by a mental health assessor, found to meet the criteria, and agreed to participate in the Behavior Health Conditional Dismissal Program (BHCDP).

Clinical Assessment

An assessment that is performed by a qualified mental health professional in accordance with the most recent American Society of Addiction Medicine criteria for substance use disorder, and the most recent edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders for a mental health disorder.

Court Statistics Project (CSP)

An initiative of the Conference of State Court Administrators and the National Center for State Courts, the Court Statistics Project (CSP) is the only source for an annual national overview of comparable state court caseload data. The State Court Guide to Statistical Reporting can be found on their website under the Court Statistics tab. <https://www.courtstatistics.org>

Digital Data Organization Repository (DDOR)

Fletcher Group Inc.'s data collecting system for treatment providers. Collects information for the 14-day, 42-day, Quarterly Reports, and Final Report for AOC's Annual Report.

DMS

Department for Medicaid Services

DBHDID

Department of Behavioral Health, Developmental and Intellectual Disabilities

EKCEP

Eastern Kentucky Concentrated Employment Program

Eligible Defendant or Eligible Participant

An individual assessed by Pretrial Services as a low-risk, low level offender or has been otherwise determined by the attorney for the Commonwealth or the attorney for the defendant as a viable participant in BHCDP. A clinical assessment performed by an approved mental health provider determines if the defendant is eligible/ineligible.

Glossary

Emergency Barrier Relief Funds

Granted through the Opioid Abatement Trust Fund, is the money allocated to relieving the barriers that SB 90 participants may face such as transportation, housing, or even utilities assistance. The Emergency Barrier Relief Funds are requested by participants' case managers and if deemed necessary are distributed by EKCEP.

FGI

Fletcher Group Inc.

Final Report

Report due upon completion or removal from program due to non-compliance.

Findings of Initial Assessor

Report due upon completion of the clinical assessment. Provides recommended level of care and presence of mental health disorder, substance use disorder, co-occurring disorders, or none.

KYAE

Kentucky Adult Education

Mental Health Disorder

A diagnostic term that covers many clinical categories typically including behavioral or psychological symptoms, or both, along with impairment of personal and social function, and specifically defined and clinically interpreted through reference to criteria contained in the most recent edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorder.

Opioid Abatement Trust Fund

The Kentucky Opioid Abatement Trust Fund is a trust and agency account established in the State Treasury to combat the opioid epidemic in Kentucky. The fund consists of 50% of all proceeds received by the Commonwealth, counties, consolidated local governments, urban-county governments, and cities of the Commonwealth in opiate litigation. The fund is distributed as described in subsection (3) of KRS 15.293 and shall not be appropriated or transferred by the General Assembly for any other purposes.

PSA

The PSA (Public Safety Assessment) is an actuarial, data-driven evidence based risk assessment instrument designed to measure the likelihood of a defendant to fail to appear for court or to be re-arrested while released on bail. The risk assessment includes two scales (FTA - failure to appear), and NCA (new criminal activity) and scores defendants as either low, moderate, and high risk for each scale.

Qualified Mental Health Professional

The same as in KRS 202A.011 and shall include a licensed clinical and alcohol and drug counselor under KRS Chapter 309.

Qualifying Offense

A misdemeanor or Class D felony that is not:

- (a) An offense that would qualify the person as a violent offender under KRS 439.3401;
- (b) A sex crime as defined by KRS 17.500;
- (c) An offense under KRS 189A.010;
- (d) An offense against a victim who has a protective order as defined in KRS 508.130 against the defendant at the time the offense is charged;
- (e) An act of domestic violence and abuse as defined in KRS 403.720, or an act of dating violence and abuse as defined in KRS 456.010, against the defendant at the time the offense is charged; or
- (f) An offense against a victim who has an interpersonal protective order issued under KRS 456.060;

Glossary

Quarterly Report

Report due on January 15, April 15, July 15, and October 15 annually. Reports completed individually by qualified mental health provider, Commonwealth's Attorney, and County Attorney. Prosecutor Quarterly Report details demographics of participants, how many participants declined participation, and how many participants were denied participation in the program by the prosecutor. Behavioral Health Provider Report includes level of care, educational and employment training, housing status, and insurance information.

Recovery Services

Rehabilitative treatment services that shall include but not limited to any or all of the following:

- (a) Outpatient treatment;
- (b) National Alliance of Recovery Residences or the Council of Accreditation of Rehabilitation Facilities certified housing;
- (c) Medication treatment;
- (d) Personal and family counseling;
- (e) Substance abuse education and prevention classes or counseling;
- (f) Vocational training;
- (g) Literacy training;
- (h) Community service;
- (i) Inpatient or residential behavioral health treatment as needed to address;
 - 1. Impaired capacity to use self-control, judgment, or discretion related to behavior;
 - 2. Severe dependence;
 - 3. Special detoxification;
 - 4. Relapse; or
 - 5. Other treatments recommended by a qualified mental health professional;
- (j) Restorative practices designed to make the participant accountable to the victim when there is an identified victim, and it is safe to do so;
- (k) Recovery housing assistance; and
- (l) Recovery housing programs that have an established third party outcome evaluation

Recovery Housing

Refers to safe, supportive, and substance free living environments designed to help recovering from substance use disorders. These residences often provide peer support, accountability, and resources to promote long term recovery. Recovery housing can vary in structure but typically includes shared living spaces, house rules, and participation in recovery programs or activities. The focus is on fostering a sense of community and supporting residents as they transition to independent, substance free living.

Report 1 (14-day Report)

Report due fourteen days after the agreement to participate in the program was signed. Report includes level of care, employment, educational, housing, and insurance status. Report also includes case management services provided by the qualified mental health provider.

Report 2 (42-day Report)

Report due forty-two days after the agreement to participate in the program was signed. Report includes level of care, insurance information, education and employment updates, and case management services provided by the qualified mental health provider.

Senate Bill 90

The Behavioral Health Conditional Dismissal Program signed by Governor Beshear in 2022.

Substance Use Disorder

A cluster of cognitive, behavioral, and physiological symptoms indicating that the individual continues using the substance despite significant substance-related problems (KRS 222.005)

YourPath

Statewide approved qualified mental health professional that completes the initial assessment to determine eligibility.
