Suicide Death in Kentucky, 2017

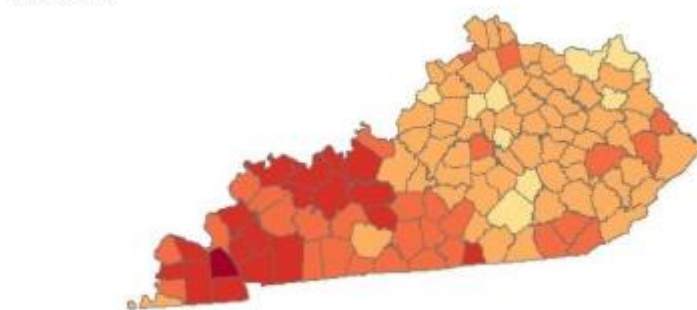

KENTUCKY EXCEEDS THE NATIONAL SUICIDE RATE IN EVERY COUNTY

This study*, by The Ohio State University, shows that in many places in the U.S., the rate of suicides has gradually exceeded the national average over the past 16 years. This includes many parts of Kentucky, especially in rural areas.

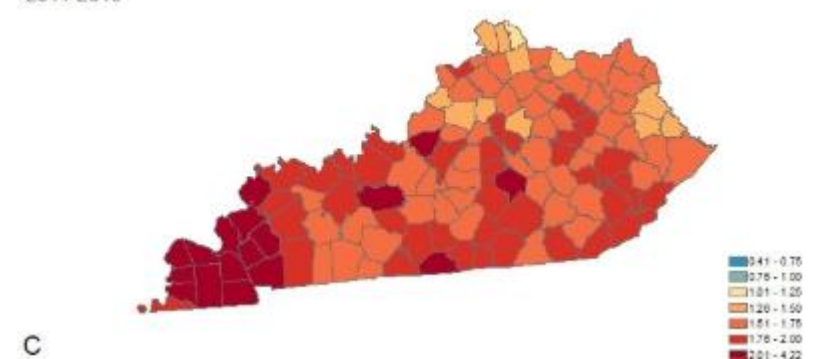

2002-2004

2008-2010

2014-2016

The darker the red a county is, the more that county's suicide rate is above the national average. Counties with an average close to the national rate are in yellow.

*Published into the Journal of the American Medical Association, September 2019

THE RESEARCH SHOWS...

- For every 10-20 orders in Connecticut, one suicide was prevented!₁
- For every 10 orders in Indiana, one suicide prevented!₂
- Out of 159 orders in California, ERPOs helped prevent **21 potential mass shootings**₃
- Creating time and space between an at-risk individual and a firearm can save lives
