### MISSION AND PROGRAMS

University of Kentucky – University System:

As one of the nation's 76 land-grant institutions, the University of Kentucky (UK) stands proudly as the Commonwealth's flagship for higher education, research, healthcare, innovation, and public service. While our mission has evolved over time, our commitment to educating, healing, innovating, and serving Kentuckians remains steadfast.

Rooted in the heart of the Bluegrass, UK brings together a vast array of resources on a single, centralized campus while maintaining a presence in every county throughout the state. This unique structure fosters collaboration and engagement across colleges, programs, and research initiatives, enabling us to tackle complex challenges with a unified approach.

With a headcount of nearly 36,000 students and approximately 28,000 employees, including close to 3,200 full-time faculty, UK is one of Kentucky's largest and most impactful institutions. Operating under an annual budget of nearly \$8.2 billion for FY 2025, the university's economic and educational impact is far-reaching. UK comprises 16 academic and professional colleges, offering more than 200 undergraduate and graduate degree programs. We are also one of only eight institutions in the country that houses colleges of agriculture, engineering, medicine, and pharmacy on a single campus – an environment that sparks groundbreaking discoveries and fuels interdisciplinary collaboration.

The size and complexity of our community create constant demands on our facilities. To meet those needs, we are committed to ongoing maintenance, renovation, and modernization. At the same time, rapid advances in technology and evolving societal needs are reshaping how we teach, learn, and deliver services. Our strategic planning and resource allocation are designed to provide the infrastructure, tools, and talent necessary to support student success, drive significant research, and deliver programs and services with excellence and efficiency.

University of Kentucky – Hospital:

The University of Kentucky's Capital Plan for UK HealthCare addresses both long-established components of the health enterprise as well as new initiatives. The plan includes targeted improvements to UK Chandler Hospital, the Gill Heart Institute, the Markey Cancer Center Complex, UK Good Samaritan, Kentucky Clinic, and other healthcare facilities.

In addition to enhancing existing infrastructure, the plan supports expansion efforts across the Chandler campus, the development of a new cancer and advanced ambulatory care center, and the construction of new healthcare facilities in the Hamburg area of Lexington. It also includes continued investment in partnerships with Kings Daughters Medical Center in Ashland and St. Claire Regional Medical Center in Morehead to broaden access to care across the Commonwealth.

UK HealthCares integrated academic and clinical enterprise places the university among an elite group of institutions. UK is one of only eight universities nationwide with colleges of Agriculture, Engineering, Medicine, and Pharmacy located on a single campus alongside a comprehensive hospital system.

As an academic health system, UK HealthCare is anchored by three core pillars: research, education, and clinical

excellence. Our mission is twofold: provide the most advanced care possible to the people of Kentucky, and empower communities with knowledge, tools, and partnerships that strengthen healthcare at the local level. Whether it's working alongside rural hospitals and local physicians or delivering specialty services on par with the nation's top institutions, UK HealthCare stands at the intersection of access and innovation. And in doing so, we are not only supporting the university's mission we are elevating the health of an entire state.

### PLAN OVERVIEW

#### University of Kentucky Capital Plan Overview:

At the heart of the University of Kentucky's Capital Plan are projects that reflect the rich heritage of our campus and our steadfast mission to serve and strengthen the Commonwealth through education, research, healthcare, and innovation.

#### 1. Expanding Research Capacity

Our top priority is the construction of a new, state-of-the-art research facility. This space is essential to supporting innovative, interdisciplinary research throughout our campus and at more than 70 centers and institutes. UK researchers, faculty, staff, and students alike tackle the most pressing challenges in Kentucky, the nation, and the world, while fostering the next generation of leaders and problem-solvers.

In FY24, UK invested \$527.7 million in research and development, generating \$937 million in economic activity across the state. This investment supported 4,712 jobs, with half directly linked to research initiatives.

#### 2. Asset Preservation and Modernization

Our second and third priorities focus on asset preservation and modernization multiphase initiatives to maintain and modernize critical campus education and general facilities and infrastructure. This includes upgrades to utilities, building systems, and essential facilities, ensuring long-term usability and demonstrating our commitment to the responsible stewardship of state resources.

#### 3. A New Enterprise Data Center

To meet the demands of a rapidly evolving digital landscape, we propose a modern Enterprise Data Center. This facility will support high-performance computing, AI technologies, and data-intensive research while improving system reliability, scalability, and security. It will also strengthen disaster recovery and reduce operational risks, especially for UK HealthCare.

#### 4. UK HealthCare Expansion

This plan supports the continued growth of UK HealthCare, including the addition of 500 patient beds and a new, advanced cancer and ambulatory care facility. These enhancements will ensure we continue providing high-quality, accessible healthcare for all Kentuckians.

In summary, the University of Kentucky's Capital Plan is a forward-looking strategy centered on growth, modernization, and service. By investing in education, research, infrastructure, and healthcare, we are building a more prosperous, resilient future for the Commonwealth.

## PLAN OVERVIEW

### UK HealthCare: Rising to Meet Kentucky's Greatest Needs:

Across Kentucky, from rural communities to urban centers, UK HealthCare serves as a vital lifeline providing advanced treatment, driving groundbreaking research, and delivering care where it's needed most. As a vast network of caregivers and facilities spanning the Commonwealth, UK HealthCare exists for one reason: to ensure every Kentuckian has access to the care they need today and the promise of better health tomorrow.

In fiscal year 2024, the scale of this mission was evident. In a single month, UK HealthCare performed over 1,200 inpatient surgeries and more than 2,000 outpatient procedures. Nearly 45,000 radiology services were delivered. Emergency departments saw over 10,000 visits, and our ambulatory clinics welcomed more than 118,000 patients. These numbers tell a powerful story of demand but also of strain. Each month, an average of 144 patient transfer requests went unfulfilled not due to lack of will, but lack of capacity.

This growing demand is not slowing down. Its accelerating and it's calling us to act. The future is clear: more Kentuckians, in more regions of the state, will look to UK HealthCare for care. And we must be ready. Projections from the U.S. Census Bureau tell us that by 2030, nearly 25% of Kentucky's population will be age 60 or older a 32% increase from 2012. Our state's population is expected to grow to 5.3 million by 2050. These trends are compounded by sobering realities: Kentucky continues to face some of the highest rates of cancer, heart disease, diabetes, and other serious conditions in the country.

To meet this growing need, the UK HealthCare 2026-2032 Capital Plan lays out a bold and necessary path forward. At its heart is the continued expansion of our Chandler campus, including 500 new inpatient beds and the development of a cutting-edge cancer and advanced ambulatory care facility. This growth is not just about space, it's about access, innovation, and delivering the kind of care Kentuckians deserve.

The plan also includes the launch of new healthcare facilities at our Hamburg campus designed to serve patients in one of the state's fastest-growing regions. Alongside these efforts, we will continue investing in the preservation and improvement of our existing infrastructure while expanding partnerships across Kentucky to bring care closer to home.

At the University of Kentucky, we bring together world-class research, education, and clinical care with a singular focus: Kentucky's health. Everything we do is for the people of this Commonwealth. And we believe no Kentuckian should ever have to leave the state to receive the care they need.

**Proposed Projects Involving the General Fund (cash or bonds)**  
(amounts in **bold** are the total budget)

**2026-2028 Biennium**

(Projects listed by agency priority; descriptions are from the agency submission)

**1 Construct Research Facility** **500,000,000**

This project will construct science research facility providing state-of-the-art research space for multidisciplinary studies such as health sciences, chemistry, physics, earth sciences, psychology, biomedical engineering, nutrition, material science, and nanotechnology. In support of modern research, a portion of this facility could be assigned to a data center role. Providing additional computational and/or storage assets furthers the university's research mission. (C-O)

CPAB Staff Notes

- *This project was included in the past five capital plans.*

**2 Asset Preservation Pool** **250,000,000**

This project will be used for individual asset preservation, renovation, and maintenance projects for education and general space and state-owned and operated residential facilities. This pool of projects may finance projects that cost \$1,000,000 or more. (C-PI)

CPAB Staff Notes

- *This project is related to the FY22-24 Asset Preservation Pool associated with CPE biennial recommended project authorizations. These projects accommodate related deferred maintenance initiatives and improvements.*
- *Phase I and II of this pool were authorized for \$100.5 million and \$154.3 million, respectively, in the last two budgets.*

**3 Construct/Improve Enterprise Data Center** **300,000,000**

This project will renovate/construct/relocate the University's Data Center. The University is reviewing different long-term financing options for this project and may opt to use either Third-Party financing pursuant to KRS 45.763, Agency Bonds, Restricted Funds or Private Funds. (C-O)

CPAB Staff Notes

- *This project was authorized in the past four biennial budgets (most recently for \$60 million in restricted funds), however, the project has not been undertaken.*
- *The project budget has increased to align with scope changes and estimated future costs.*
- *This project was included in the past four capital plans.*
