ADMINISTRATIVE REGULATION REVIEW PROCEDURE
(Also see KRS Chapter 13A)

Notice of Intent

Administrative bodies shall file with the Regulations Compiler a Notice of Intent to promulgate an administrative regulation, including date, time and place of a public hearing on the subject matter to which the administrative regulation applies. This Notice of Intent, along with the public hearing information, shall be published in the Administrative Register. This Notice has to be filed and published in the Administrative Register, and the public hearing held or cancelled, prior to the filing of an administrative regulation.

After the scheduled hearing date, if held, the administrative body shall file with the Regulations Compiler a Statement of Consideration, setting forth a summary of the comments made at the public hearing, and the responses by the administrative body. This Statement shall not be published in the Administrative Register.

Filing and Publication

Administrative bodies shall file with the Regulations Compiler all proposed administrative regulations, public hearing information, tiering statement, regulatory impact analysis, fiscal note, and the federal mandate comparison. Those administrative regulations received by the deadline required in KRS 13A.050 shall be published in the Administrative Register.

Public Hearing

The administrative body shall schedule a public hearing on proposed administrative regulations to be held not less than twenty (20) nor more than thirty (30) days following publication. The time, date, and place of the hearing and the name and address of the agency contact person shall be included on the last page of the administrative regulation when filed with the Compiler's office.

Any person interested in attending the scheduled hearing must submit written notification of such to the administrative body at least five (5) days before the scheduled hearing. If no written notice is received at least five (5) days before the hearing, the administrative body may cancel the hearing.

If the hearing is cancelled, the administrative body shall notify the Compiler of the cancellation. If the hearing is held, the administrative body shall submit within fifteen (15) days following the hearing a statement of consideration summarizing the comments received at the hearing and the administrative body's responses to the comments.

No transcript of the hearing need to be taken unless a written request for a transcript is made, and the person requesting the transcript shall have the responsibility of paying for same. A recording may be made in lieu of a transcript.

Review Procedure

If a proposed administrative regulation is amended as a result of the public hearing, the amended version shall be published in the next Administrative Register; and the administrative regulation shall be reviewed by the Administrative Regulation Review Subcommittee at its next meeting following publication. If a proposed administrative regulation is not amended as a result of the hearing or if the hearing is cancelled, the administrative regulation shall be reviewed by the Administrative Regulation Review Subcommittee at its next meeting. After review by the Subcommittee, the administrative regulation shall be referred by the Legislative Research Commission to an appropriate jurisdictional committee for a second review. The administrative regulation shall be considered as adopted and in effect as of adjournment on the day the appropriate jurisdictional committee meets or thirty (30) days after being referred by LRC, whichever occurs first.

NOTICES OF INTENT TO PROMULGATE ADMINISTRATIVE REGULATIONS

KENTUCKY COUNCIL ON HIGHER EDUCATION

October 3, 1996

Kentucky Council on Higher Education

(1) The subject matter of the proposed administrative regulation is an administrative hearing process titled administrative hearing procedures for a determination of residency status, **13 KAR 2:070**, which is associated with appeals of residency determinations.

(2) The Kentucky Council on Higher Education is charged under KRS 164.020 and 164.030 with the responsibility for determining tuition at and minimum standards for admission to the public higher education institutions. Pursuant to those statutory responsibilities, the Council on Higher Education has promulgated an administrative regulation titled determination of residency status for admission and tuition assessment purposes. That administrative regulation contains an appeals process which is an adjudicatory proceeding within the meaning of KRS Chapter 13B. The proposed new administrative regulation will provide a framework for those appeals and comply with the requirements of KRS Chapter 13B.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 29, 1996 at 9:30 a.m. in the conference room, Kentucky Council on Higher Education, 1024 Capital Center Drive, Suite 320, Frankfort, Kentucky 40601-8204.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least five (5) persons, or an administrative body, or an association having at least five (5) members; and

2. A minimum of five (5) persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If five (5) persons, or an administrative body or association, request this public hearing, and agree in writing to be present at the public hearing, it will be held as scheduled.

(c) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least ten (10) days prior to November 29, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request, no later than November 19, 1996, to the following address: Kentucky Council on Higher Education; Attn: General Counsel, Dennis L. Taulbee; 1024 Capital Center Drive, Suite 320, Frankfort, Kentucky 40601-8204. The phone number is (502) 573-1555; the fax number is (502) 573-1535.

(b) On a request for a public hearing, a person shall state:

1. "I agree to attend the public hearing."; or,

2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Kentucky Council on Higher Education at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of an administrative regulation relating to residency status is KRS 164.020 and 164.030. The authority for the promulgation of an administrative regulation related to administrative hearings is KRS Chapter 13B.

(b) The administrative regulation the council intends to promulgate is a new administrative regulation concerning administrative hearing procedures for a determination of residency status. The new administrative regulation will provide a framework for the appeals process for residency determinations and will comply with the due process requirements of KRS Chapter 13B.

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: The passage of the Kentucky Administrative Hearings Act set forth due process requirements for state agencies conducting adjudicatory proceedings which decide the rights of individuals or groups. The administrative regulation, **13 KAR 2:045**, Determination of residency status for admission and tuition assessment purposes, provides for a student appeal of an institutional determination of residency status. The Council on Higher Education is the agency responsible for the final determination of that status. The appeal of residency status is an adjudicatory process which decides the rights of an individual student to a status, for admission and tuition assessment purposes, as a Kentucky resident or as a nonresident. In order to conform to the due process requirements of KRS Chapter 13B, it is necessary to develop an administrative regulation which sets forth the procedural safeguards of the appeals process.

(d) The benefits expected from the administrative regulation are: better procedural protection for students who appeal institutional determinations of residency status and a clear procedural framework for the public higher education institutions and the Council on Higher Education.

(e) This administrative regulation will be implemented by the Council on Higher Education and the eight public higher education institutions.

DEPARTMENT OF LAW
Office of the Attorney General

October 9, 1996

Department of Law

Office of the Attorney General

(1) **40 KAR 2:250**; Filing of annual reports by cemeteries.

(2) The Department of Law, Office of the Attorney General intends to promulgate an administrative regulation governing the subject matter listed above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for Monday,

ADMINISTRATIVE REGISTER - 1860

November 25, 1996, at 10 a.m., Eastern Time, at 1024 Capital Center Drive, Frankfort, Kentucky 40602.

- (4)(a) The public hearing will be held if:
1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Michael S. Schwendeman, Assistant Attorney General, Office of the Attorney General, Consumer Protection Division, 1024 Capital Center Drive, Frankfort, Kentucky 40602.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Office of the Attorney General at the address listed above.

(7) Information relating to the proposed administrative regulation:

(a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of the administrative regulation is KRS 15.180, 367.150(4), and 367.972(2).

(b) The administrative regulation that the Office of the Attorney General intends to promulgate will not amend an existing administrative regulation. It will establish a specific date by which cemeteries regulated under KRS 367.932 to 367.974 and 367.991 must file with the Attorney General the annual reports which are already required pursuant to KRS 367.946(4).

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: KRS 367.972(2) grants to the Attorney General the authority to establish such rules and regulations as are necessary to carry out the provisions of KRS 367.932 to 367.974 and 367.991. KRS 367.946(4) requires that every person who has registered with the Attorney General pursuant to KRS 367.946(1) must file an annual report with the Attorney General which includes the information specified by 367.946(4) and information reasonably required by the Attorney General pursuant to KRS 367.946(4). The proposed administrative regulation simplifies the administration of KRS 367.932 to 367.974 and 367.991 by defining the twelve month period to be covered by the annual report as the calendar year and establishing a specific date by which such report is due. All cemeteries will now have notice of when their report must be filed.

(d) The benefits anticipated from the proposed administrative regulation are (1) providing the cemeteries with a clear due date for their annual reports and fair notice of when they must file, thus avoiding unnecessary actions by the Attorney General for delinquency when the report was not filed in a timely manner; (2) enabling the Attorney General to more efficiently monitor compliance of the industry with filing their annual reports. Staff time will be saved by not having to do research on when a given cemetery would have to file its report. Any cemeteries which have not filed by the due date would be easily identified for possible enforcement action by the Attorney General.

(e) The administrative regulation will be implemented as follows: The regulation would take effect in the year following the year in which the administrative regulation was adopted. If adopted in 1996, the annual reports by the cemeteries would be due by the specified date in 1997 for the calendar year of 1996. For those cemeteries which had been filing their annual reports based on a fiscal year that does not coincide with the calendar year, they would file a report by the specified date in 1997 for that portion of the 1996 calendar year not previously reported on. In the subsequent years, their annual report would be for the preceding calendar year.

October 9, 1996

Department of Law

Office of the Attorney General

(1) **40 KAR 2:260**; Filing of annual reports by preneed burial licensees.

(2) The Department of Law, Office of the Attorney General intends to promulgate an administrative regulation governing the subject matter listed above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for Monday, November 25, 1996, at 11 a.m., Eastern Time, at 1024 Capital Center Drive, Frankfort, Kentucky 40602.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Michael S. Schwendeman, Assistant Attorney General, Office of the Attorney General, Consumer Protection Division, 1024 Capital Center Drive, Frankfort, Kentucky 40602.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Office of the Attorney General at the address listed above.

(7) Information relating to the proposed administrative regulation:

(a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of the administrative regulation is KRS 15.180, 367.150(4), and 367.972(2).

(b) The administrative regulation that the Office of the Attorney General intends to promulgate will not amend an existing administrative regulation. It will establish a specific date by which all preneed burial licensees regulated under KRS 367.932 to 367.974 and 367.991 must file with the Attorney General the annual reports which are already required pursuant to KRS 367.940(4).

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: KRS 367.972(2) grants to the Attorney General the authority to establish such rules and regulations as are necessary to carry out the provisions of KRS 367.932 to 367.974

and 367.991. KRS 367.940(4) requires that every person who has registered with the Attorney General pursuant to KRS 367.940(1) must file an annual report with the Attorney General which includes the information specified by 367.940(4) and information reasonably required by the Attorney General pursuant to KRS 367.940(4). The proposed administrative regulation simplifies the administration of KRS 367.932 to 367.974 and 367.991 by defining the twelve month period to be covered by the annual report as the calendar year and establishing a specific date by which such report is due. All preneed burial licensees will now have notice of when their report must be filed.

(d) The benefits anticipated from the proposed administrative regulation are: (1) providing the preneed burial licensees with a clear due date for their annual reports and fair notice of when they must file, thus avoiding unnecessary actions by the Attorney General for delinquency when the report was not filed in a timely manner; (2) enabling the Attorney General to more efficiently monitor compliance of the industry with filing their annual reports. Staff time will be saved by not having to do research on when a given preneed burial licensee would have to file his report. Any preneed burial licensees who have not filed by the due date would be easily identified for appropriate enforcement action by the Attorney General.

(e) The administrative regulation will be implemented as follows: The regulation would take effect in the year following the year in which the administrative regulation was adopted. If adopted in 1996, the annual reports by the preneed burial licensees would be due by the specified date in 1997 for the calendar year of 1996. For those preneed burial licensees who had been filing their annual reports based on a fiscal year that does not coincide with the calendar year, they would file a report by the specified date in 1997 for that portion of the 1996 calendar year not previously reported on. In the subsequent years, their annual report would be for the preceding calendar year.

September 24, 1996

Attorney General

(1) **40 KAR 3:010.** Payment schedule to hospitals/physicians for medical examination of victims of sexual offenses.

(2) The Office of the Attorney General intends to promulgate an administrative regulation governing the subject matter listed above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996, at 10 a.m., at 1024 Capital Center Drive, Frankfort, Kentucky.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and

2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people

at least 10 days prior to November 21, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Pat Arnold, Assistant Director, Prosecutors Advisory Council Staff, 1024 Capital Center Drive, Frankfort, Kentucky 40601.

(b) On request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or

2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Office of the Attorney General at the address listed above.

(7) Information relating to the proposed administrative regulation:

(a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of administrative regulation is KRS 216B.400.

(b) The administrative regulation that the Attorney General intends to promulgate will amend 40 KAR 3:010, Payment schedule to hospitals/physicians for medical examination of victims of sexual offenses. It will add the provision for the sexual assault nurse examiner to attest to the performance of the sexual assault examination and allow for payment of \$35 for an examination performed by a sexual assault nurse examiner.

(c) The necessity, function and conformity of the proposed administrative regulation is as follows: Add sexual assault nurse examiner to the payment schedule for performance of sexual assault exams.

(d) The benefits expected from administrative regulation are improved services to victims of sexual assault by providing additional trained personnel to perform sexual assault examinations.

(e) The administrative regulation will be implemented by payment paid to the service provider through the Rape Victims Assistance Program, Unified Prosecutorial System, administered by the Prosecutors Advisory Council Staff, Office of the Attorney General.

October 15, 1996

Office of the Attorney General

Department of Law

(1) **40 KAR 3:020.** Protocol for operation of local multidisciplinary teams on child sexual abuse.

(2) The Attorney General intends to promulgate an administrative regulation governing the subject matter above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 25, 1996, at 9 a.m. in Conference Room A - Attorney General's Office, Second Floor, 1024 Capital Center Drive, Frankfort, Kentucky.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least five persons, or an administrative body, or an association having at least five members; and

2. A minimum of five persons, or the administrative body or association, agree, in writing, to be present at the hearing.

(b) If a request for a public hearing, and an agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their request to the following address: John Patterson, Office of the Attorney General, P.O. Box 2000, Frankfort, Kentucky 40602, (502) 573-5900.

(b) On a request for public hearing, a person shall state:

1. "I will agree to attend the public hearing."; or

2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from John Patterson, Office of the Attorney General, P.O. Box 2000, Frankfort, Kentucky 40602.

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: This administrative regulation will enable the Kentucky Multidisciplinary Commission on Child Sexual Abuse to carry out its mandate to prepare and issue a model protocol which is incorporated into a regulation promulgated by the Attorney General. This model shall be used by local teams which include disciplines or agency members in addition to the Department for Social Services and law enforcement in developing their own local protocols.

(d) The benefits expected from this regulation are: This administrative regulation will ensure that policy concerns relating to investigation, prosecution and review of child sexual abuse cases are considered by local multidisciplinary teams in formulating their own protocols.

(e) The administrative regulation will be implemented as follows: The Multidisciplinary Commission on Child Sexual Abuse will approve or deny protocols developed and used by local communities.

KENTUCKY REAL ESTATE COMMISSION

October 10, 1996

Kentucky Real Estate Commission

(1) Regulation number and title; or subject matter if new: **201 KAR 11:190**, Rules of practice and procedure for hearings before the

Kentucky Real Estate Commission.

(2) The Kentucky Real Estate Commission intends to promulgate this administrative regulation relating to the implementation of KRS Chapter 13B, and to make technical changes in the regulations applying to the rules of practice and procedure before the Kentucky Real Estate Commission.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for Tuesday, November 26, 1996, at 10 a.m. (EST), at the Kentucky Real Estate Commission, 10200 Linn Station Road, Suite 201, Louisville, Kentucky 40223.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and

2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people

at least 10 days prior to November 26, 1996, the public hearing will be cancelled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Jeffrey C. Blair, General Counsel, Kentucky Real Estate Commission, 10200 Linn Station Road, Suite 201, Louisville, Kentucky 40223.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or

2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Kentucky Real Estate Commission at the address listed above.

(7) Information relating to the proposed administrative regulation:

(a) The statutory authority for the promulgation of an administrative regulation relating to the rules of practice and procedure before the Kentucky Real Estate Commission are KRS 13A.100(3) and 324.281.

(b) The administrative regulation that the Kentucky Real Estate Commission intends to promulgate will amend 201 KAR 11:190 to correspond to the enactment of amendments to KRS Chapter 13B, and its applicability to the Kentucky Real Estate Commission; amendments to KRS 324.170 and 324.200; the repeal of KRS 324.190 and 324.210, to make policy clarifications, to remove obsolete policy, to incorporate the provisions of KRS Chapter 13B.

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: This administrative regulation sets forth the provisions relating to the rules of practice and procedure before the Kentucky Real Estate Commission and implements the provisions of KRS Chapter 13B as they apply to the Kentucky Real Estate Commission.

(d) The benefits expected from administrative regulation are: Inform complainants and real estate licensees with the most updated policies and procedures with the handling of complaints, to comply with KRS Chapter 13A incorporation by reference requirements and the provisions of KRS Chapter 13B.

(e) The administrative regulation will be implemented as follows:

October 10, 1996

Kentucky Real Estate Commission

(1) Regulation number and title; or subject matter if new: **201 KAR 11:400**, Agency disclosure requirements.

(2) The Kentucky Real Estate Commission intends to amend 201 KAR 11:400 to exclude commercial sales and leases applicability

of the regulation.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for Tuesday, November 26, 1996, at 10 a.m. (EST), at the Kentucky Real Estate Commission, 10200 Linn Station Road, Suite 201, Louisville, Kentucky 40223.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and

2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people

at least 10 days prior to November 26, 1996, the public hearing will be cancelled.

ADMINISTRATIVE REGISTER - 1863

- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Jeffrey C. Blair, General Counsel, Kentucky Real Estate Commission, 10200 Linn Station Road, Suite 201, Louisville, Kentucky 40223.
- (b) On a request for public hearing, a person shall state:
1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Kentucky Real Estate Commission at the address listed above.

- (7) Information relating to the proposed administrative regulation:
- (a) The statutory authority for the promulgation of an administrative regulation relating to the rules of practice and procedure before the Kentucky Real Estate Commission are KRS 13A.100(3) and 324.281.
- (b) The administrative regulation that the Kentucky Real Estate Commission intends to promulgate will amend 201 KAR 11:400 to eliminate its applicability to commercial sales and leases from agency disclosure requirements, the purpose of the regulation being to protect the individual consumer, not the commercial or business consumer; to make necessary policy clarifications.
- (c) The necessity, function, and conformity of the proposed administrative regulation is as follows: The amendments to this administrative regulation will set forth agency disclosure requirements, to whom they apply and to whom or to what entities they do not apply.
- (d) The benefits expected from administrative regulation are: Clarify the applicability of the agency disclosure requirements.
- (e) The administrative regulation will be implemented as follows:

TOURISM DEVELOPMENT CABINET Department of Fish and Wildlife Resources

August 23, 1996

Tourism Development Cabinet

Department of Fish and Wildlife Resources

- (1) Regulation Number and Title: **301 KAR 2:221**, Waterfowl seasons and limits; **301 KAR 2:222**, Waterfowl hunting requirements; **301 KAR 2:224**, Waterfowl hunting zones.
- (2) The Department of Fish and Wildlife Resources intends to amend the administrative regulation cited above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996 at 9 a.m. in the Commission Room, Arnold L. Mitchell Building, at the Game Farm, five miles west of Frankfort on U.S. 60.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least five persons, or an administrative body, or an association having at least five members; and
 2. A minimum of five persons, or the administrative body or association agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least ten days prior to November 21, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to John Wilson, Assistant Director, Public Affairs/Policy, Kentucky Department of Fish and Wildlife Resources, #1 Game Farm Road, Frankfort, Kentucky 40601.

(b) In a request for a public hearing, a person shall state:

1. "I agree to attend the public hearing"; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request from the department at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of this administrative regulation is KRS 150.025, 150.340, 150.600.

(b) The administrative regulation that the department intends to promulgate will amend this administrative regulations as follows: 301 KAR 2:221: To change waterfowl seasons dates and limits to meet the requirements of federal season and limits frameworks. 301 KAR 2:222: To add requirements for waterfowl hunting on Barlow Bottoms Wildlife Management Area in Ballard County and to shorten the time when no public access is allowed on portions of the Taylorsville Lake Wildlife Management area. 301 KAR 2:224: To redefine the eastern boundary of the Pennyroyal-Coalfield Goose Zone.

(c) The necessity, function, and conformity of the proposed administrative regulation is to make Kentucky's waterfowl seasons fall within federal frameworks; to adjust season dates and hunting requirements on wildlife management areas and to change to boundaries of the Pennyroyal-Coalfield Goose zone to include whole counties.

(d) The benefits expected from the administrative regulation are permitting waterfowl hunting within sound resource conservation parameters.

(e) This administrative regulation will be implemented by publicity through season brochures and media outlets, and enforcement by the department's conservation officers.

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION
Department for Environmental Protection
Division of Water

October 4, 1996

Natural Resources and Environmental Protection Cabinet
Department for Environmental Protection, Division of Water

The subject matter of the administrative regulation to be amended is **401 KAR 8:030**, Water treatment plants; water distribution systems; certification of operators.

The Natural Resources and Environmental Protection Cabinet, Division of Water, intends to promulgate an administrative regulation governing the subject matter listed above.

A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 25, 1996, at 1:30 p.m. (eastern time), in the Auditorium of the Capital Plaza Tower, Mero Street, Frankfort, Kentucky. Persons may also submit written comments on the proposed administrative regulation to the Division of Water at the address given below, by 4:30 p.m. (eastern time) on November 25, 1996.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.

The Natural Resources and Environmental Protection Cabinet does not discriminate on the basis of race, color, national origin, sex, religion, age, or disability. The cabinet will provide, upon request, reasonable accommodations for the public hearing including auxiliary aids and services necessary to afford individuals with a disability an equal opportunity to participate in the scheduled public hearing and all other cabinet programs and activities. If you need an alternative version of this Notice of Intent, contact the Division of Water at the above address or by telephone, 502/564-3410, or TDD 1-800-648-6056.

Persons wishing to request a public hearing should mail their written request to the following address: Jack A. Wilson, Director, Division of Water, 14 Reilly Road, Frankfort Office Park, Frankfort, Kentucky 40601, telephone number 502/564-3410, fax number 502/564-4245.

On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

Persons who wish to file this request may obtain a request form from the Division of Water at the address listed above.

Information relating to the proposed administrative regulation relating to certification of water treatment plants and water distribution systems operators is KRS 223.160 to 223.220, 224.10-100, 224.10-110.

The administrative regulation that the Division of Water intends to promulgate will amend 401 KAR 8:030, Water treatment plants; water distribution systems; certification of operators. The cabinet intends to change the method by which water treatment systems are classified and an emergency regulation to implement these changes has been filed with the Regulations Compiler. The new method will focus on the assigned design capacity of the water plant and the type of filtration utilized in the treatment process; the present method will focus on the systems utilizing population served would be deleted. The system for classifying operators will also be changed to mirror the system classifications. The proposed amendments will reduce the on-site staffing requirements for Class III and IV systems which simply disinfect or physically treat the water. Public water systems in violation of the staffing requirements may request an extension to comply with these requirements if the system is otherwise in compliance with the remainder of 401 KAR Chapter 8. Systems electing to meet the staffing requirements by securing a contract operator will be required to submit a report outlining operation and maintenance responsibilities. Public water systems will be required to notify the cabinet of certified operator employment changes within 30 days. The proposed amendments seek to reduce the grace period allowed for operators to renew an expired license to one year. Language will allow operators with limited licenses a six month extension for renewal. Several additional administrative changes are proposed for clarification purposes. Language will be added to identify the penalties for cheating; operators with expired licenses cannot be in responsible charge of a system; and operators may apply for a state reciprocal license only if the applicant received the original license by testing for certification and all other requirements are comparable. Other provisions clarify the training required of operators with treatment and distribution licenses; operator record keeping responsibilities; the date training administrators must submit attendance rosters for completed courses; and how to calculate a continuous education unit. The regulation currently outlines operator sanctions and the procedures for administering a disciplinary action. The regulatory amendment will provide specific behaviors which may lead to disciplinary action. Also, the application for certification and license renewal application have been updated to clarify the information required; however, the changes are not significant. Changes to the application for certification are a revised layout of existing information, an area to identify if an operator is responsible for multiple facilities, clarification of the information to be provided with regard to the operator's job duties, and language specifying that the applicant's Social Security number is optional as required by federal law. The license renewal application is primarily a revised layout of existing information and language to advise that providing the Social Security number is optional.

The necessity, function, and conformity of the proposed administrative regulation is as follows: KRS 223.160 through 223.220 establishes a board of certification and authorizes the Natural Resources and Environmental Protection Cabinet to establish a program requiring certification of water system operators. KRS 224.10-110 directs the cabinet to enforce administrative regulations adopted by the secretary for the regulation and control of the purification of water for public and semipublic use. This administrative regulation establishes standards for classifying water treatment plants, distribution systems, and certified operators; qualifications of applicants; examination procedures; duties of the Kentucky Board of Certification of Water Treatment Plant and Water Distribution System Operators; provisions relating to the issuance and renewal of certificates; disciplinary actions; and other provisions necessary for the certification of operators.

The benefits expected from the administrative regulation are: a high quality and safe supply of water served by public water systems

ADMINISTRATIVE REGISTER - 1865

to protect the public's health. Trained operators assure the production of a high quality water with fewer violations and less reliance on technical assistance from cabinet personnel. Establishment of a classification system based on design capacity and treatment processes utilized will simplify the process for classifying facilities and will allow for the establishment of a classification which will remain constant unless the facility is modified or expanded. The current system is based on population served and can cause a facility class to change with the addition of a few customers. The new classification system will promote regionalization and planning for the future in that the cabinet will be able to advise a system of the operator classification required prior to facility construction.

(e) The administrative regulation will be implemented as follows: On and after the effective date of this administrative regulation, the new provisions delineated for the certification of operators of water treatment plants and water distribution systems will apply. Certified operators as well as utility managers will be notified of the regulatory changes. In addition, an emergency regulation to implement these changes has been filed with the Regulations Compiler and is now in effect. The emergency regulation will be replaced by the ordinary regulation with any amendments when the ordinary regulation becomes effective. Copies of the emergency regulation are available by contacting the Division of Water at the above address.

JUSTICE CABINET Department of Corrections

October 14, 1996
Justice Cabinet
Department of Corrections

(1) Regulation Number and Title: **501 KAR 6:020**, Department of Corrections: Uniformed employee dress code, use of force and substance abuse treatment program.

(2) The Justice Cabinet, Department of Corrections intends to amend the administrative regulation cited above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996 at 9 a.m., in the Fifth Floor Conference Room, in the State Office Building, Frankfort, Kentucky 40601.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Justice Cabinet, Department of Corrections, Office of General Counsel, Attention: Tamela Biggs, Room 200, State Office Building, Frankfort, Kentucky 40601, (502) 564-2024, facsimile (502) 564-6494.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Department of Corrections at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of this administrative regulation is KRS 196.035 and 197.020.

(b) The administrative regulation that the Department of Corrections intends to promulgate will amend 501 KAR 6:020, as follows:

1. Uniformed employee dress code (4.7) shall be added to delineate the types of clothing which shall be issued to uniformed security personnel, food support staff, maintenance staff and farm staff. The policy also sets standards for grooming and the use of accessories.

2. Use of force (9.1) shall be amended to:

- a. Reflect the correct references;
- b. Clarify the inclusion of the use of mechanical restraints;
- c. Clarify the progressive levels of force; and
- d. Comply with drafting rules in KRS Chapter 13A.

3. Substance abuse treatment program (13.8) has been added to describe the parameters of the program, including the requirements for admission and attendance, confidentiality, staffing, discharge and termination criteria.

(c) The necessity, function, and conformity of the proposed administrative regulation is: To provide consistent policies among all Department of Corrections entities and compliance with state and federal statutes.

(d) The benefits expected from the administrative regulation are: To provide consistent policies among all Department of Corrections entities and to most efficiently use departmental resources.

(e) The administrative regulation will be implemented as follows: By promulgating and enforcing the components of the various policies to provide consistent policy for the department.

October 11, 1996
Justice Cabinet
Department of Corrections

(1) Regulation Number and Title: **501 KAR 6:040**, Kentucky State Penitentiary.

(2) The Justice Cabinet, Department of Corrections, intends to promulgate an administrative regulation governing the subject matter listed above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996, at 9 a.m., in the Auditorium, in the State Office Building, Frankfort, Kentucky 40601.

(4)(a) The public hearing will be held if:

ADMINISTRATIVE REGISTER - 1866

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Justice Cabinet, Department of Corrections, Office of General Counsel, Room 200, State Office Building, Frankfort, Kentucky 40601.
- (b) On a request for public hearing, a person shall state:
 1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the Department of Corrections at the address listed above.
- (7) Information relating to the proposed administrative regulation:
 - (a) The statutory authority for the promulgation of this administrative regulation relating to the subject matter of this administrative regulation is KRS 196.035 and 197.020.
 - (b) The administrative regulation that the Department of Corrections intends to promulgate will amend 501 KAR 6:040, Kentucky State Penitentiary, as follows:
 1. Inventory records and control (KSP 02-08-01) shall be amended to comply with actual practice.
 2. Inmate records (KSP 06-01-01) shall be amended to comply with actual practice.
 3. Searches and preservation of evidence (KSP 09-08-01) shall be amended to comply with actual practice.
 4. Special security unit (KSP 10-02-05) shall be amended to comply with actual practice.
 5. Behavioral counseling record (KSP 100000-08) shall be deleted based upon duplication of this information in CPP 15.6.
 6. Inmate personal property (KSP 17-01-01) shall be amended to comply with actual practice.
 7. Disposition of unauthorized property (KSP 17-01-02) shall be amended to reflect number change from 100000-03 and to comply with actual practice.
 8. Property room, clothing storage, and property inventory control (KSP 17-01-04) shall be amended to comply with actual practice.
 9. General guidelines and functions of the classification committee (KSP 18-01-01) shall be amended to comply with actual practice.
 10. Classification document (KSP 18-06-01) shall be amended to comply with actual practice.
 11. Protective custody unit (KSP 18-15-01) shall be amended to comply with actual practice.
 12. Inmate work programs and safety inspections of inmate work locations (KSP 19-04-01) shall be amended to comply with actual practice.
 13. Correctional industries (KSP 19-05-01) shall be amended to comply with actual practice.
- (c) The necessity, function, and conformity of the proposed administrative regulation is as follows:
 1. KRS 196.035, 197.020, 439.470, 439.590, and 439.640 authorizes the commissioner to promulgate administrative regulations necessary and suitable for the proper administration of the department or any division therein. These policies and procedures are incorporated by reference in order to comply with the accreditation standards of the American Correctional Association.
 2. This administrative regulation updates operating procedures at the Kentucky State Penitentiary to comply with KRS Chapter 13A and to reflect current operating procedures.
- (d) The benefits expected from this administrative regulation are: To comply with KRS Chapter 13A and to codify current operating procedures.
- (e) This administrative regulation will be implemented as follows: Staff will comply with operational procedures and standards noted in policy changes.

JUSTICE CABINET Department of State Police

October 15, 1996
Justice Cabinet
Department of State Police

- (1) Regulation Number and Title: Employment of cadet troopers oral interview, **502 KAR 45:055**.
- (2) The Department of State Police intends to promulgate an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 25, 1996 at 10 a.m. at Kentucky State Police Headquarters, Commissioner's Conference Room, 919 Versailles Road, Frankfort, Kentucky 40601.
- (4)(a) The public hearing will be held if:
 1. It is requested, in writing, by at least five persons, or an administrative body, or an association having at least five members; and
 2. A minimum of five persons, or the administrative body or association agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing is not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to: Lt. Colonel Charles Johnson, Director, Administrative Division, Kentucky State Police Headquarters, 919 Versailles Road, Frankfort, Kentucky 40601.
- (b) On the request for a public hearing, a person shall state:
 1. "I agree to attend the public hearing," or
 2. "I will not attend the public hearing".
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the department at the address listed above.

ADMINISTRATIVE REGISTER - 1867

- (7)(a) The statutory authority for the promulgation of an administrative regulation governing the selection procedures for cadet troopers is KRS 16.050. This statute vests in the State Police Personnel Board the authority to establish eligibility lists as a result of competitive testing.
- (b) The administrative regulation that the Department of State Police proposes amends 502 KAR 45:055 in that it changes the weight of the score computed as a result of the oral interview process.
- (c) The necessity, function, and conformity of the proposed amendment to the administrative regulation is to provide the department with a means to measure the abilities of candidates and to select them accordingly.
- (d) The benefits expected to flow from this amended administrative regulation are candidates for appointment as cadet troopers who possess those sought after attributes consistent with the tasks that make up a state police officer's duties.
- (e) The amended administrative regulation will be implemented as follows: An emergency amendment to an administrative regulation.

TRANSPORTATION CABINET

November 1, 1996

Transportation Cabinet

- (1) **600 KAR 4:010**, relating to the certification of disadvantaged, minority and women business enterprises.
- (2) The Kentucky Transportation Cabinet intends to promulgate an administrative regulation which will amend existing administrative regulation 600 KAR 4:010. In that administrative regulation the role of the in-house certification committee is unclear. Should the committee be advisory only, or should the committee have an actual vote in the approval of certification of a disadvantaged business enterprise? In addition to addressing this issue, the Transportation Cabinet will examine the entire certification process to ensure that it is functioning as well as possible.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996 at 10 a.m. local prevailing time, at 501 High Street, 4th Floor Hearing/Conference Room, Frankfort, Kentucky 40622.
- (4)(a) The public hearing will be held if:
1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be canceled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Sandra Pullen Davis, 501 High Street, 10th Floor, State Office Building, Frankfort, Kentucky 40622.
- (b) On a request for public hearing, a person shall state:
1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the Transportation Cabinet at the address listed above.
- (7) Information relating to the proposed administrative regulation.
- (a) The statutory authority for the promulgation of an administrative regulation relating to the certification of disadvantaged, minority or women business enterprises is KRS 174.080 and 49 CFR 23.
- (b) The administrative regulation that the Transportation Cabinet intends to promulgate will amend an existing administrative regulation, 600 KAR 4:010 by clearly establishing the role of the certification committee.
- (c) The necessity, function, and conformity of the proposed administrative regulation is as follows: 49 CFR 23 requires that most recipients of funds from the United States Department of Transportation (USDOT) implement a program to support the fullest possible participation of firms or business enterprises owned and controlled by minorities, women and socially and economically disadvantaged individuals in USDOT programs. The Kentucky Transportation Cabinet, as a recipient of USDOT funds, is required by the federal regulation to have a program of certification of disadvantaged, minority and women business enterprises. This administrative regulation establishes the procedures and criteria for the Transportation Cabinet's certification program. It also sets forth the requirement that certified and prequalified DBE firms attend an orientation program and management development course to increase the probability of the firm remaining certified.
- (d) The benefit expected is the removal of uncertainty about the role of the certification committee.
- (e) The change to the administrative regulation will be implemented by informing all concerned of the role of the certification committee.
- (8) Any person with a disability for which the Transportation Cabinet needs to make an accommodation in order for the person to participate in the public comment hearing should notify Sandra Pullen Davis at the above-mentioned address no later than November 11, 1996.

November 1, 1996

Transportation Cabinet

- (1) **600 KAR 5:010**, relating to the transportation of nonpublic school students.
- (2) The Kentucky Transportation Cabinet intends to promulgate an administrative regulation amending 600 KAR 5:010 relating to the transportation of nonpublic school students because the existing administrative regulation only addresses the program through fiscal year 1995-96. It is necessary to amend the administrative regulation to address at least the next two fiscal years since the General Assembly appropriated \$2 million each year of the current biennium for this purpose.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996 at 11 a.m. local prevailing time, at 501 High Street, 4th Floor Hearing/Conference Room, State Office Building, Frankfort, Kentucky 40622.
- (4)(a) The public hearing will be held if:
1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Sandra Pullen Davis, 501 High Street, 10th Floor, State Office Building, Frankfort, Kentucky 40622.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Transportation Cabinet at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of an administrative regulation relating to the transportation of nonpublic school students is the budget bill enacted by the 1996 General Assembly, House Bill 379, Chapter 380 of the 1996 Acts.

(b) The administrative regulation that the Transportation Cabinet intends to promulgate will amend 600 KAR 5:010. It will address the administration of the reimbursement program for the transportation of nonpublic school students through the next two fiscal years.

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: The Commonwealth's Biennium Budget for fiscal years 1996-98 included \$2 million each year for the reimbursement of the cost incurred by a fiscal court in the transportation of nonpublic school students. This administrative regulation is necessary to establish the eligibility criteria for application for a portion of the \$2 million appropriated each fiscal year of the biennium.

(d) The benefits expected from the administrative regulation are increased safety for nonpublic school students as they are transported to and from school.

(e) The administrative regulation will be implemented as follows: Each eligible fiscal court will be allowed to submit an application for reimbursement of the costs it incurred in the transportation of nonpublic school students. If the total amount requested for reimbursement exceeds \$2 million, the Transportation Cabinet will prorate the funds among the eligible applicants.

(8) Any person with a disability for which the Transportation Cabinet needs to make an accommodation in order for the person to participate in the public comment hearing should notify Sandra Pullen Davis at the above-mentioned address no later than November 15, 1996.

November 1, 1996

Transportation Cabinet

(1) 603 KAR 3:080 relating to advertising devices.

(2) The Kentucky Transportation Cabinet intends to promulgate an administrative regulation governing advertising devices (billboards and on-premise signs).

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996 at 2 p.m. local prevailing time, in Training Rooms A and B on the first floor of the State Office Building, 501 High Street, Frankfort, Kentucky 40622.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996 the public hearing will be canceled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Sandra Pullen Davis, 501 High Street, 10th Floor, State Office Building, Frankfort, Kentucky 40622.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Transportation Cabinet at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of an administrative regulation relating to the advertising devices is KRS 177.860, 23 USC 131, 23 CFR Part 750.

(b) The administrative regulation that the Transportation Cabinet intends to promulgate will amend 603 KAR 3:080. It will add the portions of the National Highway System as approved by the federal government which are not already governed by this administrative regulation. Federal law requires that billboards be controlled along any highway which is part of the National Highway System. The Transportation Cabinet will also examine its prohibition against the use of commercial messages on an on-premise electronic changing sign. The Transportation Cabinet intends to amend its existing administrative regulation to comply with the recent Kentucky Supreme Court decision regarding the cabinet's regulation of commercial speech. Further, the Transportation Cabinet intends to once again examine the need for issuance of an encroachment permit in order to trim trees which are blocking the traveling public's view of a legal billboard. Since the Transportation Cabinet has not issued such permits in several years, the billboard industry and billboard lessors have become distressed at the number of billboards whose contents are obscured. The Transportation Cabinet feels it is time to once again address the issue.

(c) The necessity, function, and conformity of the proposed administrative regulation is as follows: KRS 177.860 authorizes the Department of Highways to establish reasonable standards for advertising devices on or visible from interstate, parkway and federal aid primary highways. This administrative regulation is the means used by the Department of Highways to establish those standards. In addition, KRS 177.867 requires the Department of Highways to pay just compensation for the removal of legally erected advertising devices which are not in compliance with current state law or administrative regulation. This administrative regulation sets forth standards for determining when the Department of Highways shall pay just compensation. The enactment of these statutes was in response to a federal mandate. 23 USC 131 and 23 CFR Part 750 require minimum standards for the control of advertising devices for all states. In addition, federal law requires more stringent control of advertising devices for those states which have entered into a bonus agreement with the Federal Highway Administration. Kentucky was one of the states which has agreed since the early 1960's to the more stringent control of outdoor advertising devices. As a bonus state,

Kentucky has received several million dollars in bonus funds from the Federal Highway Administration for the control and removal of outdoor advertising devices. The requirements of this administrative regulation mirror the requirements of the Bonus Agreement Act. Since the establishment of the National Highway System earlier this year, the Federal Highway Administration has notified the Transportation Cabinet any road segment which is included in the National Highway System but not governed by this administrative regulation must be added to this administrative regulation. Therefore, the Transportation Cabinet is proposing to add control to those highways.

(d) The benefits expected from the administrative regulation change are compliance with the federal mandate and Supreme Court decision. Further, the numbers of persons expressing their need/wish to have trees trimmed in front of billboards has increased; thus, necessitating the cabinet once again address the issue of issuing encroachment permits to trim trees in front of billboards.

(e) The administrative regulation will be implemented as follows: The listing of roads on which billboards must be controlled will be expanded to include National Highway System segments. The language regarding public service announcements and electronic flashing changeable message boards will be amended to comply with the Supreme Court decision. If sufficient evidence is issued at the public hearing to warrant change in the administrative regulation regarding the issuance of encroachment permits for tree trimming, the Transportation Cabinet will require the applicant for the encroachment permit pay for all of the costs the Transportation Cabinet incurs in removing the trees. This will include a administrative costs of the Transportation Cabinet, review of the permit application by an arborist, and contracting with a firm with significant tree removal experience.

(8) Any person with a disability for which the Transportation Cabinet needs to make an accommodation in order for the person to participate in the public comment hearing should notify Sandra Pullen Davis at the above-mentioned address no later than November 10, 1996.

EDUCATION PROFESSIONAL STANDARDS BOARD

September 23, 1996

Education Professional Standards Board

(1) **704 KAR 20:430.** Repeal of 704 KAR 20:001, 704 KAR 20:002, 704 KAR 20:032, and 704 KAR 20:040.

(2) The Education Professional Standards Board intends to repeal the administrative regulations cited above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 22, 1996 at 10 a.m. at the 1st Floor Conference Room, Capital Plaza Tower, 500 Mero Street, Frankfort, Kentucky 40601.

(4)(a) The public hearing will be held if it is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and a minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If 5 persons, or an administrative body or association, request this public hearing, and agree in writing to be present at this public hearing, it will be as scheduled.

(c) If a request for a public hearing is not received from the required number of people at least 10 days prior to November 22, 1996, the public hearing will be cancelled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Education Professional Standards Board, 1024 Capital Center Drive, Frankfort, Kentucky 40601, fax (502) 573-1610.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Education Professional Standards Board at the address listed above.

(7) Information relating to the proposed administrative regulation.

(a) The statutory authority for the promulgation of an administrative regulation relating to the requirements for teacher education programs is found in KRS 161.028.

(b) The administrative regulation that the Education Professional Standards Board intends to promulgate will repeal 704 KAR 20:001, 704 KAR 20:002, 704 KAR 20:032, and 704 KAR 20:040.

(c) The necessity, function, and conformity section of the proposed administrative regulation is as follows: The standards for accrediting teacher education programs have not been updated for several years. The repeal of these regulations allows the new standards to be implemented by the Education Professional Standards Board. The use of extant teaching prior to completing the professional education portion of the teacher education program will be eliminated. The use of correspondence credits in professional education courses precludes the inclusion and monitoring of classroom observations within teacher education programs.

(d) The benefits expected from administrative regulation are: (1) The number and volume of regulations for accrediting teacher education institutions and approving teacher education programs will decrease. (2) Regulations relating to the approval of teacher education programs will be simplified and consolidated for ease of use.

(e) The administrative regulation will be implemented as follows: Each institution of higher education having accredited teacher education programs will be copied with this regulation and required to forward an acknowledgement of receipt. Staff will be available on request, to respond to specific questions relating to the regulation.

June 1996

Education Professional Standards Board

(1) **704 KAR 20:585,** Procedures for certificate revocation, suspension, voluntary surrender, reinstatement and reissuance, and application denial.

(2) The Education Professional Standards Board intends to amend the administrative regulation cited above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 22, 1996, at 10 a.m. in the first floor conference room at the Capital Plaza Tower, 500 Mero Street, Frankfort, Kentucky 40601.

ADMINISTRATIVE REGISTER - 1870

- (4)(a) The public hearing will be held if:
1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or an administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 22, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Education Professional Standards Board, 1024 Capital Center Drive, Frankfort, Kentucky 40601.
- (b) On a request for public hearing, a person shall state:
1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the Education Professional Standards Board at the address listed above.
- (7) Information relating to the proposed administrative regulation.
- (a) The statutory authority for the promulgation of an administrative regulation relating to revocation of certificates is KRS 161.028 and 161.120.
- (b) The administrative regulation that the Education Professional Standards Board will amend is 704 KAR 20:585. This regulation was adopted in 1993. Prior to 1993, revocation procedures were specified in 704 KAR 20:580 which was adopted in 1992.
- (c) The necessity, function and conformity of the proposed administrative regulation is as follows: KRS 161.120 provides that any certificate issued under KRS 161.010 to 161.100 or any certificate or license issued under any previous law to superintendents, principals, teachers, supervisors, directors of pupil personnel, or other administrative supervisory, or instructional employees may be revoked by the Education Professional Standards Board for reasons specified in the statute. The statute also provides for a hearing process as a part of the revocation procedures. The proposed amendments are to comply with revisions to KRS 161.120 made by the 1996 Kentucky General Assembly and to comply with the provisions of KRS Chapter 13B.
- (d) The benefits expected from administrative regulation are: Conformance of regulation with statutory changes.
- (e) The administrative regulation will be implemented as follows: The amended regulation will be communicated to local school superintendents and professional education organizations by the Office of Teacher Education and Certification.

WORKFORCE DEVELOPMENT CABINET State Board for Adult and Technical Education

October 15, 1996

Workforce Development Cabinet

State Board for Adult and Technical Education

- (1) Regulation Number and Title: **780 KAR 3:070**, Attendance, compensatory time and leave.
- (2) The Workforce Development Cabinet, State Board for Adult and Technical Education, intends to amend an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996, 1 p.m. in the third floor conference room, 500 Mero Street, Capital Plaza Tower, Frankfort, Kentucky 40601.
- (4)(a) The public hearing will be held if:
1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Delmus Murrell, Secretary, State Board for Adult and Technical Education, 500 Mero Street, 20th Floor, Capital Plaza Tower, Frankfort, Kentucky 40601.
- (b) On a request for public hearing, a person shall state:
1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the State Board for Adult and Technical Education at the address listed above.
- (7) Information relating to the proposed administrative regulation:
- (a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of administrative regulation is KRS 151B.035.
- (b) The administrative regulation that the department intends to promulgate will amend 780 KAR 3:070, Attendance, compensatory time and leave. The amendment will allow 10 1/2 month employees to take annual leave outside the 10 1/2 month employment year up to at least the amount of annual leave earned in the fiscal year if approved due to lack of opportunity to take accrued annual leave.
- (c) The necessity, function, and conformity of the proposed amendment is to allow 10 1/2 month employees to take earned annual leave outside the 10 1/2 month employment year provided there is not opportunity enough to take annual leave during the school year.
- (d) The benefits expected from this administrative regulation are that teachers could take annual leave in the summer if they did not have opportunity to use annual leave earned that year during the 10 1/2 month period.
- (e) The administrative regulation will be implemented as follows: The school principal or director and the regional director will determine whether a secondary vocational school teacher will be paid for accrued annual leave which was not taken due to lack of opportunity during the

ADMINISTRATIVE REGISTER - 1871

10 1/2 month school year.

October 15, 1996

Workforce Development Cabinet

State Board for Adult and Technical Education

- (1) Regulation Number and Title: **780 KAR 3:080**, Extent and duration of school term, use of school days and extended employment.
- (2) The Workforce Development Cabinet, State Board for Adult and Technical Education, intends to amend an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996, 1 p.m. in the third floor conference room, 500 Mero Street, Capital Plaza Tower, Frankfort, Kentucky 40601.
- (4)(a) The public hearing will be held if:
 1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 21, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Delmus Murrell, Secretary, State Board for Adult and Technical Education, 500 Mero Street, 20th Floor, Capital Plaza Tower, Frankfort, Kentucky 40601.
 - (b) On a request for public hearing, a person shall state:
 1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
 - (b) Persons who wish to file this request may obtain a request form from the State Board for Adult and Technical Education at the address listed above.
- (7) Information relating to the proposed administrative regulation:
 - (a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of administrative regulation is KRS 151B.035.
 - (b) The administrative regulation that the department intends to promulgate will: Amend Section 5 by permitting the local school to set the 10 1/2 month work year to better serve the local school districts; delete Section 6 in its entirety which provides that annual leave may be charged only when an employee is otherwise scheduled to work; add a new section to require that extended employment activities for secondary instruction be approved by the State Board for Adult and Technical Education.
 - (c) The necessity, function, and conformity of the proposed regulation is to permit local control of the 10 1/2 month work year and to restrict extended employment of state secondary vocational school teachers to activities approved by the State Board for Adult and Technical Education.
 - (d) The benefits expected from this administrative regulation are that the area vocational schools will be open to better serve the local school districts and extended employment will be restricted to specific activities which are consistent across the state.
 - (e) The administrative regulation will be implemented as follows: The local school will set the 10 1/2 month school year with approval of the regional director, and the State Board for Adult and Technical Education will approve all extended employment activities for state secondary vocational teachers.

Department for Employment Services

October 1, 1996

Workforce Development Cabinet

Department for Employment Services

- (1) Regulation Number and Title; or Subject Matter if New: **787 KAR 1:320**, Priority of deductions from benefits; relative to KRS 341.391 which provides for voluntary withholding of federal income tax from unemployment compensation.
- (2) The Workforce Development Cabinet, Department for Employment Services, Division of Unemployment Insurance, intends to promulgate an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 25, 1996, at 9:30 a.m., in the Department for Health Services Auditorium, Health Services Building, first floor, 275 East Main Street, Frankfort, Kentucky.
- (4)(a) The public hearing will be held if:
 1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 25, 1996, the public hearing will be canceled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Beverly Haverstock, General Counsel, Workforce Development Cabinet, Capital Plaza Tower, 2nd Floor, 500 Mero Street, Frankfort, Kentucky 40601.
 - (b) On a request for public hearing, a person shall state:
 1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
 - (b) Persons who wish to file this request may obtain a request form from the Workforce Development Cabinet at the address listed above.
- (c) Note: Requests for Notification and the Notice of Intent to Promulgate shall be made available in another format, upon request,

in accordance with the Americans With Disabilities Act. Persons requesting assistance regarding Workforce Development Cabinet regulations may call toll free 1-800-372-2973 (V/TDD).

(7) Information relating to the proposed administrative regulation:

- (a) The statutory authority for the promulgation of an administrative regulation relating to priority of deductions from benefits is KRS 151B.020 and 341.115.
- (b) The administrative regulation that the Workforce Development Cabinet intends to promulgate will not amend an existing administrative regulation. It will establish the priority of deductions to be withheld from unemployment benefit payments.
- (c) The necessity, function, and conformity of the proposed administrative regulation is as follows: KRS 341.391(4) provides that amounts shall be deducted and withheld from benefit payments in accordance with priorities established in administrative regulation by the secretary. This administrative regulation establishes the priority of deductions from benefits.
- (d) The benefits expected from this administrative regulation are: Establishment of deduction priority by administrative regulation is required in order to implement voluntary income tax withholding for claimants. By enabling claimants to pay their income tax obligation on benefits as received, they will avoid the need for estimated tax payments or the burden of excessive additional tax due at income tax filing time.
- (e) The administrative regulation will be implemented as follows: Voluntary income tax withholding from benefits will take place only after any mandatory deductions are made as required by statute. The order of mandatory deductions set forth in this administrative regulation reflects existing department practice and will have no new effect on claimants.

LABOR CABINET Department of Workers' Claims

October 14, 1996

Kentucky Department of Workers' Claims

- (1) **803 KAR 25:036**, Computation of apportionment and attorneys' fees.
- (2) The Commissioner of the Department of Workers' Claims intends to amend the administrative regulation governing the computation of apportionment and attorneys' fees.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled November 22, 1996, at 10 a.m. at the Department of Workers' Claims, 1270 Louisville Road, Perimeter Park West, Building C, Frankfort, Kentucky 40601.
- (4)(a)1. The public hearing will be held if it is requested in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
- 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least ten (10) days prior to November 22, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Department of Workers' Claims, Perimeter Park West, Building C, 1270 Louisville Road, Frankfort, Kentucky 40601, ATTN: Marcy D. Ches, Staff Attorney.
- (b) On a request for public hearing, a person shall state:
 - 1. "I agree to attend the public hearing"; or
 - 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the Department of Workers' Claims at the address listed above.
- (7) Information relating to the proposed administrative regulation:
 - (a) The statutory authority for the promulgation of an administrative regulation relating to the computation of apportionment and attorneys' fees in workers' compensation claims is KRS 342.260.
 - (b) The administrative regulation that the Commissioner of the Department of Workers' Claims intends to promulgate will be an amendment to the existing administrative regulation, and will substitute the designation of a specific life expectancy table for the current provisions that require use of "the most recent available edition" of a table.
 - (c) The necessity and function of this amendment to 803 KAR 25:036 is the adoption of a specific life expectancy table pursuant to an amendment of KRS 342.260 approved in Senate Bill 161 enacted by the 1996 regular session of the Kentucky General Assembly. The Commissioner of the Department of Workers' Claims may adopt life tables published by the U. S. Department of Health and Human Services or other life tables developed by a qualified entity, as determined by the commissioner. The life tables designated by the commissioner through administrative regulations in effect as of the date of an opinion, award, or settlement in a workers' compensation claim shall apply to computations concerning that opinion, award, or settlement.
 - (d) The benefits expected from the amendment of this administrative regulation will be greater uniformity and certainty in the computation of benefits, and attorneys' fees, in workers' compensation claims.
 - (e) The administrative regulation will be implemented as follows: The Commissioner of the Department of Workers' Claims intends to adopt the male and female "all races" life tables published by the U. S. Department of Health and Human Services in Volume II, Section 6, Page 12, Table 6-3, of the "Vital Statistics of the United States, 1992, Life Tables."

ADMINISTRATIVE REGISTER - 1873

PUBLIC PROTECTION AND REGULATION CABINET Department of Insurance

September 20, 1996
Department of Insurance

- (1) **806 KAR 9:240**, Financial institutions licensed as noncredit related insurance agents.
- (2) The Department of Insurance intends to promulgate an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 21, 1996, at 10 a.m., at the Department of Insurance, 215 West Main Street, Frankfort, Kentucky.
- (4)(a) The public hearing will be held if:
 1. It is requested, in writing, by at least five (5) persons, or an administrative body, or an association having at least five (5) members; and
 2. A minimum of five (5) persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of persons at least ten (10) days prior to November 21, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: Kentucky Department of Insurance, Attn: Julie P. Mix, P.O. Box 517, Frankfort, Kentucky 40602, (502) 564-6032, fax number (502) 564-1456.
- (b) On a request for public hearing, a person shall state:
 1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the address listed above.
- (7) Information relating to the proposed administrative regulation are:
 - (a) The statutory authority for the promulgation of an administrative regulation relating to the subject matter of administrative regulation **806 KAR 9:240** is KRS 304.2-110.
 - (b) The administrative regulation that the department intends to promulgate will not amend an existing administrative regulation. It will confirm the applicability of licensure statutes and consumer protections to include financial institutions.
 - (c) The necessity, function and conformity of the proposed administrative regulation is as follows: The applicability of licensure statutes and insurance consumer protections is confirmed for financial institutions exercising their authority to sell insurance under the U.S. Supreme Court decision in Barnett Bank of Marion County, N.A. v. Nelson and the Department of Financial Institutions Parity Letter 96-2.
 - (d) The benefits expected from the administrative regulation are: The department will be able to license financial institutions as insurance agents, in accordance with the U.S. Supreme Court decision. Consumers will enjoy equal protection under the Insurance Code from the unique relationship of a financial institution insurance agent.
 - (e) The administrative regulation will be implemented as follows: A financial institution applicant for agent licensing will be accepted and processed according to the Kentucky Insurance Code. The department's enforcement division will investigate all written complaints received concerning conduct violative of the Kentucky Insurance Code and this administrative regulation.

CABINET FOR HEALTH SERVICES Office of Inspector General

September 16, 1996
Cabinet for Health Services
Office of Inspector General

- (1) **902 KAR 20:008** - License procedures and fee schedule.
- (2) The Office of Inspector General intends to promulgate the administrative regulation cited above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 27, 1996, at 9 a.m. in the Cabinet for Health Services Auditorium, Health Services Building, First Floor, 275 East Main Street, Frankfort, Kentucky.
- (4)(a) The public hearing will be held if:
 1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 27, 1996, the public hearing will be canceled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: William K. Moore, Jr., General Counsel, Cabinet for Health Services, 275 East Main Street, 4-West, Frankfort, Kentucky 40621, (502) 564-7900.
- (b) On a request for public hearing, a person shall state:
 1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."
- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from: Administrative Regulation Coordinator, Office of Inspector General, CHR Building, 4-East, 275 East Main Street, Frankfort, Kentucky 40621.
- (c) Note: Requests for Notification and the Notice of Intent to Promulgate shall be made available in another format, upon request, in accordance with the Americans with Disabilities Act. Persons requesting assistance regarding Cabinet for Health Services' regulations may call toll free 1-800-372-2973 (V/TDD).

(7) Information relating to the proposed administrative regulation:

- (a) The statutory authority for the promulgation of an administrative regulation relating to license procedures and fee schedules is KRS 216B.042. KRS 216.530 mandates that all annual inspections of long-term care facilities be unannounced.
- (b) The administrative regulation that the Office of Inspector General intends to promulgate will amend 902 KAR 20:018, Section 2, to permit unannounced licensure inspections of all health facilities and health services. Section 2(5) will be amended to delete references to the Commission on Health Economics Control. Section 3(2) will be amended to bring up to date the listing of license types and their fee rates. Other amendments will delete references to the Cabinet for Human Resources and will refer to the Cabinet for Health Services in accordance with Executive Order 96-862, and comply with drafting requirements of KRS Chapter 13A.
- (c) The necessity, function, and conformity of the proposed administrative regulation is as follows: This administrative regulation provides for the licensure requirements to operate a health facility and establishes the fee schedule for a license.
- (d) The benefits expected from this proposed administrative regulation is that the amendments will permit unannounced routine inspections of all health facilities and health services, which may result in a more accurate evaluation of conditions. The amendments will also update the regulation by the deletion or addition of licensure categories and fee rates.
- (e) The administrative regulation will be implemented as follows: By the Division of Licensing and Regulation in the Office of Inspector General, Cabinet for Health Services.

**Department for Public Health
Division of Environmental Health and Community Safety**

October 15, 1996

Cabinet for Health Services

Department for Public Health

Division of Environmental Health and Community Safety

(1) **902 KAR 47:080**, Training and certification requirements for persons who perform lead hazard detection and abatement; **902 KAR 47:090**, Accreditation of training programs and providers of educational programs for individuals who perform lead hazard detection and abatement; **902 KAR 47:100**, Permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement in target housing and child-occupied facilities.

(2) The Cabinet for Health Services, Department for Public Health, Division of Environmental Health and Community Safety, intends to promulgate three "new" administrative regulations governing the subject matters cited above.

(3) A public hearing to receive oral and written comments on the proposed administrative regulations has been scheduled for November 27, 1996, at 9 a.m., in the Cabinet for Health Services Auditorium, Health Services Building, first floor, 275 East Main Street, Frankfort, Kentucky.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least five members; and
2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.

(b) If a request for public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 27, 1996 the public hearing will be cancelled.

(5)(a) Persons wishing to request a public hearing should mail their written request to the following address: William K. Moore, Jr., General Counsel, Cabinet for Health Services, 275 East Main Street, 4-West, (502) 564-7900.

(b) On a request for public hearing, a person shall state:

1. "I agree to attend the public hearing."; or
2. "I will not attend the public hearing."

(6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.

(b) Persons who wish to file this request may obtain a request form from the Administrative Regulation Coordinator, Department for Public Health, Commissioner's Office, 275 East Main Street, Frankfort, Kentucky 40621.

(c) Note: Requests for Notification and the Notice of Intent to promulgate shall be made available in another format, upon request, in accordance with the Americans With Disabilities Act. Persons requesting assistance regarding Cabinet for Health Services' regulations may call toll free 1-800-372-2973 (V/TDD).

(7) Information relating to the proposed administrative regulations.

(a) The statutory authority for the promulgation of these administrative regulations relating to 902 KAR 47:080, 902 KAR 47:090, 902 KAR 47:100 is 1996 Ky. Acts ch. 168.

(b) The "new" administrative regulations that the Cabinet for Health Services, Department for Public Health, intends to promulgate, concern requirements for training and certification of persons who perform lead hazard detection and abatement; training programs and providers of educational programs to those individuals who perform lead hazard and detection, etc.; designation of permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement in target housing and child-occupied facilities.

(c) The necessity, function and conformity of the proposed administrative regulations are as follows: Establish requirements for training and certification for persons who perform lead hazard detection and abatement; accreditation of training programs and providers of educational programs for individuals who perform lead hazard detection and abatement; permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement in target housing and child-occupied facilities.

(d) The benefits expected from the administrative regulation are: Competent and effective training requirements, accreditation requirements and surveillance and abatement standards and methodology, under these regulations also concern appropriate training to ensure reduction in potential lead poisoning, and accompanying potential for lasting harmful effects to children and adults.

(e) The administrative regulation will be implemented as follows: The Division of Environmental Health and Community Safety, Department for Public Health will be responsible for the implementation of these new administrative regulations.

ADMINISTRATIVE REGISTER - 1875

CABINET FOR FAMILIES AND CHILDREN
Department for Social Insurance
Division of Management and Development

October 15, 1996

Cabinet for Families and Children
Department for Social Insurance
Division of Management and Development.

- (1) **904 KAR 2:410.** Child support collection and distribution.
- (2) The Cabinet for Families and Children, Department for Social Insurance intends to promulgate an administrative regulation governing the subject matter listed above.
- (3) A public hearing to receive oral and written comments on the proposed administrative regulation has been scheduled for November 27, 1996 at 9 a.m., in the Department for Health Services Auditorium, Health Services Building, first floor, 275 East Main Street, Frankfort, Kentucky.

(4)(a) The public hearing will be held if:

1. It is requested, in writing, by at least 5 persons, or an administrative body, or an association having at least 5 members; and
 2. A minimum of 5 persons, or the administrative body or association, agree, in writing, to be present at the public hearing.
- (b) If a request for a public hearing, and agreement to attend the public hearing, are not received from the required number of people at least 10 days prior to November 27, 1996, the public hearing will be cancelled.
- (5)(a) Persons wishing to request a public hearing should mail their written request to the following address: William K. Moore, Jr., General Counsel, Cabinet for Families and Children, 275 East Main Street, 4th West, Frankfort, Kentucky 40621, 502-564-7900.
- (b) On a request for public hearing, a person shall state:
1. "I agree to attend the public hearing."; or
 2. "I will not attend the public hearing."

- (6)(a) KRS Chapter 13A provides that persons who desire to be informed of the intent of an administrative body to promulgate an administrative regulation governing a specific subject matter may file a request to be informed by the administrative body.
- (b) Persons who wish to file this request may obtain a request form from the Administrative Regulation Coordinator, Department for Social Insurance, Cabinet for Families and Children, 3 West, 275 East Main St., Frankfort, Kentucky 40621.
- (c) Note: Requests for Notification and the Notice of Intent to Promulgate shall be made available in another format, upon request, in accordance with the Americans With Disabilities Act. Persons requesting assistance regarding Cabinet for Families and Children regulations may call toll free 1-800-372-2973 (V/TDD).

(7) Information relating to the proposed administrative regulation.

- (a) The statutory authority for the promulgation of an administrative regulation relating to the collection and distribution of child support collection amounts is KRS 194.050; 205.710-205.800; 405.520; 405.465-405.467; 186.570, and 1996 Ky. Acts ch. 365; and Personal Responsibility and Work Opportunity Reconciliation Act of 1996, PL 104-193.

(b) The administrative regulation that the Department for Social Insurance intends to promulgate shall amend 904 KAR 2:410, Child support collection and distribution. It will provide guidance for the collection of child support and medical support obligation amounts and the process of distribution of these collections as required by the Omnibus Reconciliation Act of 1993 and the resulting 1996 Kentucky statutory changes. Additional enforcement remedies include amended procedures for the revocation or suspension of driver's license when a child support arrearage of one year's amount has accumulated. To comply with the removal of federal mandates, the provision for the pass-through of the first \$50 to the IVA/IVD recipient has been removed.

(c) The necessity, function, and conformity section of the proposed administrative regulation is as follows: The Cabinet for Families and Children shall administer the Child Support Enforcement Program in accordance with KRS 205.710 to 205.800. KRS 205.712 provides for the child support agency to receive and process all child support payments. This administrative regulation sets forth the procedures for collection and distribution of child support payments in accordance with 1996 Ky. Acts ch. 365.

(d) The benefits expected from administrative regulation are: This regulation shall provide information concerning federal mandates and state requirements concerning the collection of child support and medical support obligation amounts, and the process for the distribution of these collections. This administrative regulation shall also provide amended policies for the implementation of the denial or suspension of a driver's license. The removal of the provision to comply with the federal mandate to pass through the first \$50 to the IVA/IVD recipient will save the state \$6 million dollars of state funds annually.

(e) The administrative regulation will be implemented as follows: This regulation shall be implemented by the Department for Social Insurance upon adoption of the regulation.

EMERGENCY ADMINISTRATIVE REGULATIONS NOW IN EFFECT

(NOTE: Emergency administrative regulations expire 170 days from publication or upon replacement, repeal, or withdrawal)

STATEMENT OF EMERGENCY
40 KAR 3:020E

This emergency administrative regulation establishes the model protocol which will provide guidance to local professionals regarding their roles and responsibilities in handling child sexual abuse cases. The model protocol will provide a framework for local multidisciplinary teams to use in developing a protocol for use in their communities as required by 1996 Kentucky Acts Chapter 18. It is imperative to the health and welfare of Kentucky's children that this protocol be put into place as soon as possible. In order to establish the protective measures in the protocol to safeguard the health and safety of children who have been sexually abused and to implement the provisions of 1996 Ky. Acts ch. 18, it is necessary to promulgate this emergency administrative regulation. This emergency administrative regulation shall be replaced by an ordinary administrative regulation. The Notice of Intent for 40 KAR 3:020 will be filed with the Regulations Compiler on October 15, 1996.

PAUL E. PATTON, Governor
 A.B. CHANDLER III, Attorney General

ATTORNEY GENERAL
Department of Law
Victims Advocacy Division

40 KAR 3:020E. Protocol for operation of local multidisciplinary teams on child sexual abuse.

RELATES TO: KRS 431.600 to 431.660, 620.020 to 620.050
 STATUTORY AUTHORITY: KRS 431.600, 1996 Ky. Acts ch. 18
 EFFECTIVE: October 15, 1996

NECESSITY, FUNCTION, AND CONFORMITY: KRS 431.600 requires the Kentucky Multidisciplinary Commission on Child Sexual Abuse to develop and the Attorney General to promulgate administrative regulations for a model protocol. The model shall be used by local teams in defining the roles of members in the investigation of child sexual abuse when teams include members in addition to staff from the Department for Social Services and law enforcement.

Section 1. Incorporation of Reference. (1) The "Model Protocol for the Operation of Local Multidisciplinary Teams, September 1995 Edition" developed by the Kentucky Multidisciplinary Commission on Child Sexual Abuse is hereby incorporated by reference.

(2) This document may be inspected, copied or obtained at the Office of the Attorney General, 1024 Capital Center Drive, Frankfort, Kentucky 40601, 8 a.m. to 4:30 p.m. Monday through Friday.

A.B. CHANDLER III, Attorney General
 APPROVED BY AGENCY: October 14, 1996
 FILED WITH LRC: October 15, 1996 at 8 a.m.

REGULATORY IMPACT ANALYSIS

Agency Contact Person: John Patterson, Victim Advocate

(1) Type and number of entities affected: This administrative regulation will affect how persons work with sexually abused children in law enforcement agencies, prosecutor's offices, social service agencies, community mental health agencies and schools. It should not result in any increase in costs or expenditures to any state or

local entity. For that reason, no "Fiscal Note on Local Government" is being completed.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: This will be determined after the public comment period and review of any comments which may be received.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: This will be determined after the public comment period and review of any comments which may be received.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Local multidisciplinary teams must submit, for approval, a copy of the protocol developed for their community to the Kentucky Multidisciplinary Commission on Child Sexual Abuse. Teams are already required to compile an annual report of activities pursuant to existing statute (KRS 620.040). The report includes data related to victims, offenders and prosecution, general statistics on rates of reporting and substantiation, and other information which describes the team's activities.

2. Second and subsequent years: None

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: None

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs: None

(4) Assessment of anticipated effect on state and local revenues:

None

(5) Source of revenue to be used to for implementation and enforcement of administrative regulation. The Kentucky Multidisciplinary Commission on Child Sexual Abuse is charged with implementing the regulation promulgated by the Attorney General. The commission accepts or denies approval of the protocol submitted by local teams. The commission is provided staff support by the Office of the Attorney General, Victim Advocacy Division. This staff support is provided as part of the mission of the division. Commission members are provided no compensation for their service.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

(a) Geographical area in which the administrative regulation will be implemented: There is no anticipated economic impact, however, this can be determined with more certainty after the public comment period.

(b) Kentucky: Same response as (6)(a).

(7) Assessment of alternative methods; reasons why alternatives were rejected: Statute required that this regulation be developed.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: Implementation of multidisciplinary teams should have the effect of providing further safeguards for children who have been victims of child sexual abuse. The coordinated efforts of team members will decrease the likelihood of a child "falling through the cracks" of the child protection, mental health and criminal justice systems. Professionals will work together instead of separately to assist the child

during this traumatic phase of the child's life.

(b) State whether a detrimental effect on environment and public health would result if not implemented: Failure to implement this regulation would have detrimental effects on children who have been victims of child sexual abuse.

(c) Developing a model protocol which is incorporated into administrative regulation gives further support to law enforcement, social service and other agencies who serve children in their efforts to provide a coordinated, community response to children who are endangered as a result of this crime.

(9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplicative: None

(a) Necessity of proposed regulation if in conflict: Not applicable.

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied? Tiering was not applied. No area of the state or group will be treated differently. All children who are served by multidisciplinary teams shall be treated in a like manner. All teams are expected to develop protocols which are reflective of the guidance in the model protocol as developed by the Kentucky Multidisciplinary Commission on Child Sexual Abuse.

STATEMENT OF EMERGENCY 201 KAR 11:190E

This emergency administrative regulation amends and establishes procedures related to the rules of practice and procedure before the Kentucky Real Estate Commission. This emergency administrative regulation is required in order to comply with the amendments to KRS Chapter 13B during the 1996 Regular Session of the General Assembly. It is necessary to promulgate this emergency administrative regulation in order to immediately implement KRS Chapter 13B as it applies to the Kentucky Real Estate Commission from the filing of a complaint through an administrative hearing and posthearing procedures. This emergency administrative regulation shall be replaced by an ordinary administrative regulation. The Notice of Intent for 201 KAR 11:190 was filed with the Regulations Compiler on October 14, 1996. The amendments to KRS Chapter 13B were effective on July 15, 1996, and this emergency administrative regulation is necessary to establish and implement practices and procedures before the Kentucky Real Estate Commission consistent with the requirements of KRS Chapter 13B.

PAUL E. PATTON, Governor

JOSEPH B. HELM, JR., Executive Director

KENTUCKY REAL ESTATE COMMISSION

201 KAR 11:190E. Rules of practice and procedure [for hearings] before the Kentucky Real Estate Commission.

RELATES TO: KRS 324.160

STATUTORY AUTHORITY: KRS 13A.100(3)

EFFECTIVE: October 14, 1996

NECESSITY, FUNCTION, AND CONFORMITY: To set forth practices and procedures for hearings held before the Kentucky Real Estate Commission. These rules and of practice and procedures are designed to inform the complainants and the real estate licensees of the steps to be followed in processing complaints through an administrative hearing before the Kentucky Real Estate Commission.

Section 1. Complaint Review and Investigation. (1) An aggrieved party shall file a complaint with the commission within two (2) years from actual knowledge of the cause of action, or from such time as circumstances would reasonably have put the aggrieved party on

notice of such cause of action.

(2) Any complaint filed with the commission that fails to set forth a legitimate issue under KRS Chapter 324 shall be dismissed by the commission without further investigation or hearing.

(3) (4) If a complaint filed with the commission sets forth an issue that, if proved, would entail a violation of KRS Chapter 324, that complaint shall be assigned to a commission investigator for investigation in accordance with KRS 324.150.

(4) (3) Upon receipt of the complaint and answer and upon completion of the investigation, the commission may dismiss a case without an administrative hearing if no factual controversy is presented that could result in a violation of KRS Chapter 324.

(5) (4) Upon receipt of the complaint and answer and upon completion of the investigation, the commission may dismiss a case, upon advice of its general counsel, if insufficient evidence is discovered during the investigation to justify further proceedings.

(6) (5) Upon receipt of the complaint and answer and upon completion of the investigation, the commission may set a case for hearing in accordance with KRS Chapter 13B, 324.151 and 324.170.

(7) The commission shall issue appropriate orders concerning its resolution of a pending complaint. Transmittal of such order may be sent by regular mail to the last known address of the party and the party's counsel.

(8) If the commission decides not to conduct an administrative hearing in response to a complaint, the commission shall notify the complainant and respondent of its decision in writing, with a brief statement of the commission's reasons.

Section 2. Intervention; Joinder of Additional Parties. (1) In all complaints filed before the commission, the commission, or a hearing officer appointed by the commission, shall grant a petition for intervention if:

(a) The petitioner has a statutory right pursuant to KRS 324.151 to initiate the proceeding in which he wishes to intervene; or

(b) The petitioner has an interest which is or may be adversely affected by the outcome of the proceeding.

(2) A petition for intervention shall be filed with the commission and copies mailed to all parties named in the complaint or in the notice of hearing, at least fourteen (14) days before the hearing. The parties shall have seven (7) days in which to file any response they may have to the petition to intervene. The motion for intervention will then stand submitted for decision by the commission or the hearing officer, if one has been appointed.

(3) A petition to intervene may be granted by the commission or hearing officer, if one has been appointed, after consideration of the following factors and a determination that intervention is in the interests of justice:

(a) The nature of the issues;

(b) The adequacy of representation of the petitioner's interest that will be provided by the existing parties to the proceeding;

(c) The ability of the petitioner to present relevant evidence and argument; and

(d) The effect of intervention on the commission's ability to implement its statutory mandate.

(4) If a petitioner qualifies for intervention under subsection (3) of this section, the commission or hearing officer may impose conditions upon the intervenor's participation in the proceedings, either at the time that the intervention was granted or any subsequent time. Conditions may include:

(a) Limiting the intervenor's participation to designated issues in which the intervenor has a particular interest demonstrated by the petition;

(b) Limiting the intervenor's use of discovery, cross-examination, and other procedures to promote the orderly and prompt conduct of the proceedings;

(c) Requiring two (2) or more intervenors to combine their presentations of evidence and argument, cross-examination, discov-

ery, and other participation in the proceedings; or
 (d) Any other condition which in the interests of justice will provide for the expedient resolution of a complaint, conduct of proceedings or a hearing.

(5) The commission or the hearing officer, if one has been appointed, shall, at least three (3) working days prior to a hearing, issue an order granting or denying each then pending petition for intervention, specifying any conditions for participation under subsection (4) of this section and briefly state the reasons for the order. The commission or the hearing officer shall promptly provide notice of an order granting, denying or modifying an intervention to the petitioner for intervention, and to all parties.

Section 3. Motions and Requests for Withdrawal of Complaints or Dismissal. (1) All motions of any nature must be in writing and filed with the Kentucky Real Estate Commission and shall be served on every other party to the action and the hearing officer assigned to the case.

(2) The party filing a motion shall tender a proposed order granting the relief requested.

(3) The movant may file a brief memorandum supporting the motion, and opposing parties may file brief memoranda in reply. Further memoranda (e.g., reply to response) shall not be filed.

(4) Every motion and response, the grounds of which depend upon the existence of facts not appearing in evidence, shall be supported by affidavits demonstrating such facts.

(5) Every motion, the grounds of which depend upon the existence of facts which movant contends are shown in the evidence or are admitted by the pleadings, shall make reference to the point in the record where that evidence or admission is found.

(6) Motions to dismiss or other motions affecting a substantive issue must be considered by a quorum of the commission members. Procedural issues, including motions for continuances or discovery motions may be ruled upon by the chairperson [chairman] of the commission or the hearing officer appointed by the commission.

(7) [(2)] Motions for a continuance of a hearing shall only be granted for good cause. A scheduling conflict of a party, a witness or an attorney for a party shall not be good cause for a continuance unless the request for the continuance is received within ten (10) working days of receipt of the notice of hearing.

(8) [(2)] A complainant has the right to withdraw a complaint within twenty (20) days of the date of the complaint or prior to the commission's receipt of an answer filed in accordance with KRS 324.151, whichever is earlier. Complaints may be withdrawn subsequent to this deadline only upon a showing of good cause and with the approval of the commission.

Section 4. [3-] Discovery. (1) Discovery and the taking of depositions shall be in accordance with the provisions of Civil Rules 26 to 37, inclusive, except for Civil Rule 27, which shall not apply to practice before the commission or a hearing officer.

(2) In all cases for a hearing before the commission, discovery through written or oral depositions, interrogatories, or requests for admission shall be permitted; provided that:

(a) The time, place and method of discovery imposes no undue burden upon the witness and other parties;

(b) Any oral deposition must be taken where the witness resides or does business;

(c) All the discovery will be completed fifteen (15) days prior to the hearing date, unless otherwise ordered by the commission or hearing officer, if one has been appointed; and [transcribed prior to the hearing date; and]

(d) Copies of all discovery documents and depositions are filed with the commission at the cost of the party requesting discovery on or before the date set for a hearing.

(3) The commission or hearing officer, if one has been appointed, may issue subpoenas and discovery orders when requested by a

party or on its own volition. When a subpoena is disobeyed, any party may apply to the Circuit Court of the Judicial Circuit in which the administrative hearing is to be held for an order requiring obedience. Failure to comply with an order of the Circuit Court shall be cause for punishment as a contempt of the court.

(4) Depositions may be taken by telephone provided the reporter administering the oath to the witness and reporting the deposition is physically present with the witness at the time the deposition is given. Notice of telephonic deposition must include the following information:

(a) That the deposition is to be taken by telephone;

(b) The address and telephone number from which the call will be placed to the witness;

(c) The address and telephone number of the place where the witness will answer the deposition call; and

(d) That all opposing parties may participate in the deposition either at the place where the deposition is being given, at the place the telephone call is placed to the witness, or by conference call. If a party elects to participate by conference call, that party must contribute proportionate costs of the conference call.

(5) [(2)] The chairperson [chairman] of the commission or the hearing officer appointed in that case shall have the right to deny, limit, restrict or mandate discovery.

(6) [(2)] Any notice of deposition must be served on the general counsel of the commission and the general counsel shall have the right to attend and participate in all depositions or other discovery proceedings pertaining to a case before the commission.

(7) [(4)] The commission's general counsel may, in his discretion, allow the parties to a case before the commission to review the investigative file of that case. If disclosure of said file prior to the hearing may impede or obstruct the prosecution of that case, the investigative file shall not be disclosed until the termination of the administrative proceedings.

Section 5. [4-] Prehearing Conferences and Settlement Agreements. (1) Any party or the general counsel may request and the chairperson [chairman] of the commission or appointed hearing officer may order that a prehearing conference take place in a given case. The commission may also order the convening of a prehearing conference on its own volition.

(2) A prehearing conference shall be convened and conducted by the commission or a hearing officer upon reasonable notice to all parties to deal with the exploration of jurisdictional and procedural matters, settlement possibilities or facilitation of settlement, preparation of stipulations, clarification of issues, rulings on motions and witnesses, taking of evidence, issuance of subpoenas and orders, and all other matters that will promote the orderly and prompt conduct of the hearing.

(3) Any [A] prehearing conference shall be attended by all parties, attorneys and the general counsel of the commission. [i- a hearing officer appointed by the commission may attend said conference-

(2) The purpose of a prehearing conference shall be to explore the possibility of settlement, prepare stipulations, clarify issues, address procedural motions and such other matters as will promote the orderly and prompt conduct of the hearing.]

(4) The commission or hearing officer may conduct all or part of a prehearing conference by telephone, television, or other electronic means, if each party to the prehearing conference has an opportunity to hear, and, if technically feasible, to see the entire proceeding as it occurs, and if each party agrees.

(5) Upon conclusion of a prehearing conference, the hearing officer shall issue a prehearing order incorporating matters determined at the prehearing conference. If a prehearing conference is not held, the hearing officer may issue a prehearing order, based upon the pleadings, to regulate the conduct of the administrative hearing.

(6) [(2)] Settlement agreement may be negotiated between the general counsel for the commission, the complainant and the respondent. All settlement agreements must be in writing and clearly

provide that the parties understand that they are waiving their right to an administrative hearing and that the settlement agreement, if accepted and adopted by the commission, will become a final order.

(7) The commission shall review all proposed settlement agreements. ~~((4) Upon reviewing a proposed settlement agreement,)~~ The commission may accept or reject said proposal in its entirety; no alterations to such an agreement may become a final order without the agreement and consent of all parties to the case. If a proposed settlement agreement is rejected by the commission, the commission shall return the proposed agreement to the parties to the agreement. If a settlement agreement is accepted, the commission shall issue an order approving settlement.

Section 6. ~~(6-)~~ Hearings. (1) The chairperson ~~(chairman)~~ of the commission or the duly appointed hearing officer shall preside over all administrative hearings and shall have the authority to rule on all motions, to control the conduct ~~(procedure)~~ of the hearing and to admit or exclude testimony or other evidence.

(2) All hearings conducted pursuant to the provisions of KRS Chapter 324 and this administrative regulation, shall be in accordance with KRS Chapter 13B.

(3) Notice of an administrative hearing shall be provided pursuant to the provisions of KRS 13B.050.

(4) ~~((2))~~ Evidence on behalf of the complainant shall be presented by the general counsel for the commission, unless the complainant chooses to employ a private attorney to present said evidence. In all cases, the general counsel shall have the right to question witnesses and offer evidence into the record.

(5) ~~((3))~~ Evidence may be admitted if it is of the type commonly relied upon by reasonably prudent men and women in the conduct of their affairs. Irrelevant, immaterial or unduly repetitious evidence shall be excluded. Hearsay evidence, including affidavits, may be admitted for the purpose of supplementing competent evidence in the discretion of the chairperson ~~(chairman)~~ of the commission or the hearing officer appointed to conduct the hearing.

(6) ~~((4))~~ Two (2) or more proceedings under the act may be consolidated ~~(joined)~~ by the commission in its discretion.

(7) ~~((5))~~ All hearings before the commission or hearing officer shall proceed in the following order, wherever practical:

(a) Opening statements in the following order:

1. General counsel;
2. Complainants;
3. Respondents;

(b) Witnesses and evidence on behalf of the complainant;

(c) Additional witnesses and evidence presented by general counsel;

(d) Witnesses and evidence on behalf of respondent;

(e) Closing statements in the following order:

1. Respondents;
2. Complainants;
3. General counsel.

(6) Testimony to be considered by the commission or hearing officer may be provided ~~(taken)~~ by deposition, in accordance with KRS 324.190(4) ~~((3))~~. A party or witness will be allowed to testify by deposition, rather than attend the hearing, upon a showing of inability to attend and that the other parties shall ~~(will)~~ have an opportunity to cross-examine at said deposition.

Section 7. ~~(6-)~~ Posthearing Proceedings. (1) The hearing officer shall complete and submit to the commission, no later than sixty (60) days after receiving a copy of the official record of the proceeding, a written recommended order which shall include the hearing officer's findings of fact, conclusions of law and recommended disposition of the hearing, including recommended penalties, if any. The recommended order shall also include a statement fully advising the parties of their rights to file exceptions and their appeal rights.

(2) If an extension of time is needed by the hearing officer to

complete and submit his recommended order to the commission, the hearing officer may be granted an extension, not to exceed thirty (30) days, by the chairperson of the commission, and based upon substantial proof that the extension of time is needed. The statement and order granting an extension shall be included in the record of the hearing, and notice of the extension shall be sent to all parties.

(3) A copy of the hearing officer's recommended findings of fact, conclusions of law and order, and recommended disposition of the hearing shall be sent to each party and their counsel, if represented, and each party shall have fifteen (15) days from the date the recommended order was mailed within which to file exceptions to the recommended findings of fact, conclusions of law and order and recommended disposition of the hearing with the commission. Transmittal of a recommended order may be sent by regular mail to the last known address of the party and the party's counsel. Exceptions must be received by the commission within the time denominated in this subsection, consistent with Civil Rule 6.01. The case shall thereafter stand submitted to the commission for its decision.

(4) The provisions of this section shall not apply to an administrative hearing where the hearing officer conducts the hearing in the presence of the commission, and the commission renders a decision without the recommendation of the hearing officer.

Section 8. Commission Action Upon Submission of a Case. (1) The commission shall deliberate on all cases in closed session. The specific findings of the commission shall be made in open session following the commission's deliberation.

(2) The commission shall consider the entirety of the record, including the recommended findings of fact, conclusions of law and order and recommended disposition, and any exceptions duly filed to the recommended findings of fact, conclusions of law and order.

(3) The commission may accept the recommended order of the hearing officer and adopt it as the commission's final order, or it may reject or modify, in whole or in part, the recommended order, or it may remand the matter, in whole or in part, to the hearing officer for further proceedings.

(4) If a matter is remanded to the hearing officer for further proceedings, such remand shall be in writing, and shall state the reason for the remand, and include the proceedings or issues to be addressed by the hearing officer on remand. Following a remand, the matter will be returned to the commission for issuance of its final order.

(5) The final order of the commission shall be in writing, and stated in the record. If the final order differs from the recommended order of the hearing officer, the commission's order shall include separate statements of findings of fact and conclusions of law. The final order shall include the effective date of the order, fully advising the parties of their available appeal rights.

(6) The commission shall render a final order or order of remand in an administrative hearing within ninety (90) days after receipt of the official record of the hearing and submission of the hearing officer's recommended findings of fact, conclusions of law and order to the commission, unless the matter is remanded to the hearing officer for further proceedings, in which case the commission shall issue its final order within ninety (90) days after resubmission of the case for its decision.

(7) Unless waived by a party, a copy of the final order shall be transmitted to each party and to his attorney of record by certified mail, return receipt requested, sent to the last known address of the parties or their counsel, or by personal service. Service by mail shall be complete upon the date on which the commission receives the returned receipt or the returned notice.

(8) This section shall not apply to disposition of cases or settlements pursuant to KRS 13B.070(3) and Section 5 of this administrative regulation.

(9) The commission shall not reconsider any final order.

Section 9. Appeals. (1) Any party aggrieved by the action of the commission issuing a final order to a hearing, may appeal that decision pursuant to the provisions of KRS 13B.140.

(2) As a prerequisite to appeal, the aggrieved party shall first post a bond to secure the cost of the action and any award of damages, including restitution, or an award from the recovery fund, in an amount as may be approved by the Clerk of the Circuit Court, with good and solvent surety.

REGULATORY IMPACT ANALYSIS

Contact person: Jeffrey C. Blair

(1) Type and number of entities affected: All licensed real estate brokers and sales associates; all applicants seeking licensure with the commission.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No costs or savings.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: Since this is an emergency regulation, no public hearing has been held. However, it will have no effect on the cost of doing business in the state.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: There are no additional compliance, reporting, or paperwork requirements in this regulation.

2. Second and subsequent years: None

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: The printing of the emergency regulations for the membership of the commission will be the only significant cost incurred by the Real Estate Commission.

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs:

(b) Reporting and paperwork requirements: There are no additional reporting or paperwork requirements in this regulation.

(4) Assessment of anticipated effect on state and local revenues: There will be no effect on state or local revenues attributable to this regulation.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: To the extent that printing costs are incurred, funds from the Kentucky Real Estate Commission account will be used.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: Since this is an emergency regulation, no public hearing has been held. However, it will have no economic impact in the geographical area.

(b) Kentucky: Since this is an emergency regulation, no public hearing has been held. However, it will have no economic impact in the state.

(7) Assessment of alternative methods; reasons why alternatives were rejected: The regulation complies with the specific legislative mandate passed by the 1996 General Assembly as contained in the amendments to KRS Chapter 13B; amendments to KRS 324.151, 324.170 and 324.200; the repeal of KRS 324.190 and 324.210. No alternatives were considered.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: None

(b) State whether a detrimental effect on environment and public health would result if not implemented: N/A

(c) If detrimental effect would result, explain detrimental effect: N/A

(9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication:

(a) Necessity of proposed regulation if in conflict: N/A

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: N/A

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied? Tiering was not applied because the regulation applies to all real estate brokers and licensees, and applicants for licensure in Kentucky regardless of location. All Kentuckians, whether urban or rural, are equally served and protected by this regulation of practice and procedure before the Kentucky Real Estate Commission.

STATEMENT OF EMERGENCY 301 KAR 2:221E

Waterfowl hunting season frameworks are established annually by the United States Fish and Wildlife Service. Under federal law, states which wish to establish waterfowl hunting seasons must do so within these federal frameworks. Development of the federal regulations involves consideration of harvest and population data, coordination with state wildlife agencies, and public involvement. Consequently, federal migratory bird hunting regulations are promulgated less than six (6) weeks before the opening dates of the hunting season. An ordinary administrative regulation cannot be adopted in the short time between final promulgation of federal regulations and the scheduled opening of state waterfowl hunting seasons, necessitating the promulgation of an emergency administrative regulation. This emergency administrative regulation will be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
C. THOMAS BENNETT, Commissioner

TOURISM DEVELOPMENT CABINET Department of Fish and Wildlife Resources

301 KAR 2:221E. Waterfowl seasons and limits.

RELATES TO: KRS 150.010, 150.025(1) [~~150.015, 150.170, 150.175, 150.235, 150.240~~], 150.305(1), 150.330, 150.340(1), (3), [~~150.360~~], 150.600(1), [~~150.603, 150.630~~], 150.990, 59 CFR 20

STATUTORY AUTHORITY: KRS 150.025(1)(a), (b), 150.340(1), (2), (3), 150.600(1), 50 CFR Part 20 [~~150.015, 150.021, 150.170, 150.175, 150.330, 150.340, 150.600, 150.603, 50 CFR 20~~]

EFFECTIVE: October 2, 1996

NECESSITY, FUNCTION, AND CONFORMITY: To set waterfowl season dates and limits within federal waterfowl hunting frameworks. This amendment is necessary to adjust season dates, limits, and open or closed areas for the 1996-97 [~~1995-96~~] waterfowl season. This administrative regulation imposes a shorter season in the Ballard reporting area than permitted by federal frameworks in an effort to build Canada goose populations in that portion of the state.

Section 1. Zone Descriptions. Hunting zones, special hunt areas and reporting areas are described in 301 KAR 2:224.

Section 2. Gun and Archery Season Dates and Bag Limits for Ducks, Coots and Mergansers. (1) Season dates.

~~{a}~~ Statewide, November 28 through December 1 and December

5 through January 19. ~~[23 through November 26.~~

~~(b) Eastern Duck Zone: December 7 through January 21.~~

~~(c) Western Duck Zone: December 2 through January 16.]~~

(2) Gun and archery daily limits.

(a) Five (5) ducks, which shall include no more than:

1. Four (4) mallards, which shall include no more than one (1) hen mallard.

2. Two (2) wood ducks.

3. One (1) black duck.

4. Two (2) redheads. ~~[One (1) redhead.]~~

5. One (1) pintail.

6. One (1) canvasback.

~~(b) Fifteen (15) coots.~~

~~(c) Five (5) mergansers, which shall include no more than one (1) hooded merganser.~~

~~(d) Possession limits are double daily limits.~~

~~(3) Youth hunt.~~

~~(a) Season date: October 12.~~

~~(b) Bag limits: as specified in subsection (2) of this section.~~

~~(c) Persons sixteen (16) years old or older shall not hunt.~~

~~(d) A person over the age of eighteen (18) shall accompany the juvenile hunter.~~

~~(e) The person accompanying the juvenile hunter shall:~~

~~1. Not hunt.~~

~~2. Not be required to possess a hunting license or Kentucky waterfowl permit.~~

~~3. Remain in a position to take immediate control of the juvenile's firearm.~~

Section 3. Gun and Archery Seasons Dates and Bag Limits for Geese. (1) ~~[(a) Snow geese.]~~ White-fronted goose and brant season dates:

(a) November 28 through January 20 in the Ballard reporting area;

(b) [statewide,] November 28 [23] through January 31 in:

1. The remainder of the Western goose zone;

2. The Pennyroyal-Coalfield goose zone; and

3. The Eastern goose zone.

~~[(b) In the portion of Fulton County in the Western Goose Zone, hunters may take snow geese until the end of the Canada geese season or January 31, whichever occurs later.]~~

(2) Snow goose season dates.

(a) Pennyroyal-Coalfield and Eastern goose zones: November 28 - January 31.

(b) Western goose zone:

1. Ballard reporting area: November 28 through January 20 and February 15 through March 10.

2. That portion of Fulton County in the Western goose zone: November 28 through March 10.

3. The remainder of the Western goose zone: November 28 through January 31 and February 15 through March 10. The reporting requirements specified in 301 KAR 2:223 shall not apply during the February 15 - March 10 portion of the season.

(3) Canada goose season dates.

(a) Eastern goose zone: December 13 through January 31.

(b) Pennyroyal/Coalfield goose zone: December 16 [43] through January 19 [46].

(c) Western goose zone: December 5 through:

1. January 20 in the Ballard reporting area;

2. February 15 in the portion of Fulton County in the Western goose zone;

3. January 31 in the remainder of the Western goose zone; unless

4. The quotas specified in Section 7 of this administrative regulation are reached. [November 23 through November 26 and December 2 through January 31, or until quotas described in Section 7 of this administrative regulation are reached.]

~~(d) The portion of Fulton County in the Western Goose Zone: November 23 through November 26 and December 2 through February 15, or until quotas described in Section 7 of this administrative regulation are reached.]~~

~~(d) [(e)] West-Central and Northeast special hunt zones: January 11 [6] through January 19 [46].~~

~~(3) A person shall not hunt geese in (The following are closed to geese hunting):~~

~~(a) Breathitt, Knott, and Perry counties.~~

~~(b) The portions of Bell, Clay, Laurel, Pulaski and Whitley Counties owned by the U.S. Forest Service, including Laurel River Lake.~~

~~(c) McCreary County east of US 27.~~

~~(d) Cave Run Lake and the lands inside a boundary formed by Highways 801, 1274, 36, 211, [and] US 60 and Highway 826.~~

~~(4) A person shall not hunt Canada geese in Christian County north of Highway 68/80 [is closed to Canada geese hunting].~~

~~(5) Daily limits.~~

~~(a) Except in the Northeast special hunt zone, ten (10) geese, which shall include no more than:~~

~~1. Two (2) Canada geese.~~

~~2. Two (2) white-fronted geese.~~

~~3. Two (2) brant.~~

~~(b) In the Northeast special hunt zone, two (2) Canada geese. Persons shall not take snow geese, brant or white-fronted geese.~~

~~(6) Possession limits are double daily limits.~~

Section 4. Shooting Hours. (1) Except as specified in this administrative regulation or on wildlife management areas as stipulated in 301 KAR 2:222, one-half (1/2) hour before sunrise until sunset.

(2) In the Northeast special hunt zone, one-half (1/2) hour before sunrise until 2 p.m.

Section 5. Ballard Wildlife Management Area ~~[North of Terrell Landing Road]~~. (1) Ducks, coots and mergansers.

(a) December 5 [42] through January 18 [46] or until the Ballard reporting area goose quota is reached.

(b) During waterfowl hunts occurring before October 15.

(2) Geese, December 5 [42] through January 18 [27] or until the Ballard Reporting Area quota is reached.

(3) No hunting on Sundays, Mondays, Christmas Day or New Year's Day.

(4) Shooting hours: one-half (1/2) hour before sunrise until noon.

(5) Waterfowl hunters:

(a) Shall apply in advance as stipulated in 301 KAR 2:222.

(b) Shall not have more than ten (10) shotgun shells in their possession.

(c) Shall case their guns while using department-supplied transportation to and from blinds.

(d) Shall be accompanied by an adult if under eighteen (18) years old.

(6) More than four (4) person shall not occupy a blind.

(7) A person [Persons] shall not hunt waterfowl on the Ohio River from fifty (50) yards upstream from Dam 53 to fifty (50) yards downstream from the southern border of the Ballard Wildlife Management Area from October 15 through March 15.

Section 6. Falconry Waterfowl Season and Limits. (1) Season: statewide, November 5 through January 31 for ducks, coots, mergansers, Canada geese, and except in the Western goose zone, other geese.

(2) For other geese in the Western goose zone, November 24 through November 27 and during the open gun and archery season.

(3) [(2)] Daily limit: three (3) waterfowl.

(4) [(3)] Possession limit: six (6) waterfowl.

Section 7. Quotas and Early Goose Season Closings. (1) If hunters reach a quota of 8,000 ~~[22,425]~~ Canada geese in the Ballard reporting area before January 20, goose hunting ~~[34]~~:

(a) ~~Goose season~~ shall cease ~~[else]~~ in the Ballard reporting area.

~~[(b) In the counties associated with the Ballard Reporting Area, the goose season shall close:~~

~~1. Seven (7) days later; or~~

~~2. On the scheduled closing date, whichever occurs first.]~~

(2) If hunters reach a quota of 3,990 ~~[6,555]~~ Canada geese in the Henderson-Union reporting area before January 31:

(a) Goose hunting ~~[season]~~ shall cease ~~[else]~~ in the Henderson-Union reporting area.

(b) In the counties associated with the Henderson-Union reporting area, goose hunting ~~[season]~~ shall cease ~~[else]~~:

1. Seven (7) days later; or

2. On the scheduled closing date, whichever occurs first.

(3) If a quota of 21,000 Canada geese is reached in the Western goose zone before January 31, goose hunting shall cease in the Western goose zone.

(4) The department shall provide at least a twenty-four (24) hour notice of the time and date of early closures.

(5) Closures as stipulated in this section shall not apply to the February 15 - March 10 portion of the snow goose season.

ANN R. LATTA, Secretary

MIKE BOATWRIGHT, Chairman

APPROVED BY AGENCY: August 23, 1996

FILED WITH LRC: October 2, 1996 at 2 p.m.

REGULATORY IMPACT ANALYSIS

Contact Person: John Wilson

(1) Type and number of entities affected: Approximately 14,000 persons hunt waterfowl annually in Kentucky.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments received. This administrative regulation should have no impact on costs of living or employment.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No impacts are anticipated.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Waterfowl hunters must purchase licenses as well as state and federal waterfowl stamps. This is a continuing requirement that will impose no additional requirements.

2. Second and subsequent years: Same as first year.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: No new direct or indirect costs or savings will be incurred.

2. Continuing costs or savings: Same as for first year.

3. Additional factors increasing or decreasing costs:

(b) Reporting and paperwork requirements: No additional reporting or paperwork requirements.

(4) Assessment of anticipated effect on state and local revenues: No increase or decrease on state or local revenues is anticipated.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: Revenue from the sale of hunting and fishing licenses and from the Federal Aid to Wildlife Restoration will be used to implement this administrative regulation.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: No public comments received. Waterfowl hunting creates substantial economic activity in certain sections of the state. This administrative regulation will allow waterfowl hunting to continue by establishing hunting seasons within federal frameworks.

(b) Kentucky: The statewide impact of waterfowl hunting is minimal, but this administrative regulation does allow for the continuance of this activity.

(7) Assessment of alternative methods; reasons why alternatives were rejected: The alternative of not having a waterfowl season was rejected because waterfowl represent a renewable natural resource which affords recreational opportunities and generates economic activity throughout the commonwealth.

(8) Assessment of expected benefits: Continuation of waterfowl hunting and short- and long-term conservation of waterfowl resources are the primary benefits.

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: Regulated harvest of waterfowl ensures the continuation of this important component of the Commonwealth's biological diversity.

(b) State whether a detrimental effect on environmental and public health would result if not implemented: Yes

(c) If detrimental effect would result, explain detrimental effect: Inability to regulate waterfowl resource.

(9) Identify and statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict: Not applicable.

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

(10) Any additional information or comments: The provisions of this regulation were contained in 301 KAR 2:220, which is being repealed and replaced with regulations which better meet the formatting and wording requirements of KRS Chapter 13A.

(11) TIERING: Is tiering applied? Tiering was used to apply different season dates and harvest limits to various regions of the state. This was done to maximize hunter opportunity while conserving waterfowl resources.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. 50 CFR Part 20, Federal Register, Vol. 61, No 188, Thursday, September 26, 1996.

2. State compliance standards. State seasons and bag limits are within the federal frameworks.

3. Minimum or uniform standards contained in the federal mandate. Ducks, coots and mergansers: Not more than a 50 day season with a five bird bag limit between the Saturday closest to October 1 and the Sunday closest to January 20. The state may be split into two zones with no more than two segments in each zone. The daily bag limit is 5 ducks and may not include more than 4 mallards (no more than 1 hen mallard), 1 black duck, 1 pintail, 2 wood ducks, 1 canvasback and 2 redheads. The possession limit shall be twice the daily bag. The coot daily bag shall be 15 with the possession limit being 30. The merganser limit shall be 5 daily (only 1 may be a hooded merganser) and the possession limit being twice the daily bag. Both the coot and merganser bag shall be in addition to the duck limit.

Geese: The season for light geese (snow geese) may extend for 107 days and the season for white-fronted geese may extend for 70 days. Season framework for light geese is between the Saturday nearest October 1 and March 10. The season framework for white-fronted geese is between the Saturday nearest October 1 and January 31.

The Canada goose season in the Western goose zone season may extend for 65 days (80 days in Fulton County) between October 1 and January 31 (except February 15 in Fulton County), or until the harvest of 21,000 birds is taken, whichever occurs first.

Pennyroyal/Coalfield Zone Canada goose season may extend for 35 days with a daily bag limit of 2 Canada geese.

The Canada goose season in the remainder of the state may extend for 50 days with a daily bag limit of 2 Canada geese.

The daily bag limit shall be 10 geese, to include no more than 2 Canada geese, 2 white-fronted geese and 2 brant. Possession limit is twice the daily bag limit.

Shooting hours shall be one-half hour before sunrise until sunset daily for all species.

Falconry season for migratory birds mentioned above shall fall between September 1 and March 10 and shall not exceed 107 days. Daily bag and possession limits shall not exceed 3 birds daily or 6 in possession, singly or in the aggregate of species. Hunting hours shall be the same as for firearms hunting.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? Yes

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. Seasons for light geese are shorter due to the paucity of birds wintering in Kentucky during the early parts of the framework dates. Exerting hunting pressure on so few birds could jeopardize long-term bird use in Kentucky.

The Ballard Wildlife Management Area season is shorter than the Western goose zone so that controlled hunts will not jeopardize goose and duck use. Scheduled resting periods during the framework is a good means of enhancing historic use patterns. Other wildlife management area season dates and shooting hours were adjusted to optimizing public use within sound waterfowl conservation practices.

STATEMENT OF EMERGENCY 301 KAR 2:222E

Waterfowl hunting season frameworks are established annually by the United States Fish and Wildlife Service. Under federal law, states which wish to establish waterfowl hunting seasons must do so within these federal frameworks. Development of the federal regulations involves consideration of harvest and population data, coordination with state wildlife agencies, and public involvement. Consequently, federal migratory bird hunting regulations are promulgated less than six (6) weeks before the opening dates of the hunting season. An ordinary administrative regulation cannot be adopted in the short time between final promulgation of federal regulations and the scheduled opening of state waterfowl hunting seasons, necessitating the promulgation of an emergency administrative regulation. This emergency administrative regulation will be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
C. THOMAS BENNETT, Commissioner

TOURISM DEVELOPMENT CABINET Department of Fish and Wildlife Resources

301 KAR 2:222E. Waterfowl hunting requirements.

RELATES TO: KRS 150.010(40), 150.025(1), ~~150.015, 150.170, 150.175, 150.235, 150.240,~~ 150.305(1), 150.330, 150.340(1), (3), ~~150.360,~~ 150.600(1), ~~150.603, 150.630,~~ 150.990, 59 CFR 20

STATUTORY AUTHORITY: KRS 150.025(1)(a), (b), 150.340(1), (2), (3), 150.600(1), 50 CFR Part 20 ~~150.015, 150.021, 150.170,~~

~~150.175, 150.330, 150.340, 150.600, 150.603, 59 CFR 20]~~

EFFECTIVE: October 2, 1996

NECESSITY, FUNCTION, AND CONFORMITY: To establish statewide waterfowl hunting requirements and to specify seasons and other requirements on wildlife management areas. This amendment is necessary to specify hunting requirements for units of the Barlow Bottoms Wildlife Management Area and to shorten the closed period at Taylorsville Lake Wildlife Management Area. Selected wildlife management areas have shorter seasons or more restrictive shooting hours than allowed by federal law to optimize public use within sound waterfowl conservation practices. ~~[Swan Lake Wildlife Management Area and application procedures for certain wildlife management areas.]~~

Section 1. Definitions. (1) "Blind" means:

- (a) A concealing enclosure.
- (b) A pit.
- (c) A boat.

(2) "Party" means:

- (a) A person hunting alone; or
- (b) From two (2) to four (4) persons who share a blind.

(3) "Permanent blind" means a blind left in place more than twenty-four (24) hours.

(4) ~~[(3)]~~ "Statewide waterfowl seasons" means the provisions of this administrative regulation and of 301 KAR 2:221.

(5) ~~[(4)]~~ "Waterfowl" is defined by KRS 150.010(40). ~~(means ducks, geese, eests and mergansers.)~~

Section 2. Waterfowl hunters shall not use or carry:

(1) Shotgun shells containing:

- (a) Lead shot; or
- (b) Shot not approved by the U.S. Fish and Wildlife Service for waterfowl hunting.

(2) Shot larger than size "T."

(3) Shotshells longer than three and one-half (3-1/2) inches.

Section 3. Requirements for Waterfowl Hunters in the Ballard Reporting Area, as Described in 301 KAR 2:224. (1) Waterfowl hunters:

(a) Shall hunt from blinds unless hunting in flooded, standing timber.

(b) Shall not hunt from or establish a blind:

- 1. Within 100 yards of another blind; or
- 2. Within fifty (50) yards of a property line.

(c) Shall not possess more than one (1) shotgun while in a blind.

(2) More than five (5) persons shall not occupy a blind.

(3) The requirements of subsection (1) of this section shall not apply during the February 15 - March 10 portion of the snow goose season.

Section 4. Blind Restrictions on Wildlife Management Areas. (1) Except as specified in this section or in Section 5 of this administrative regulation, on wildlife management areas:

(a) Waterfowl hunters shall not establish or hunt from:

- 1. Permanent blinds.
- 2. Blinds within 200 yards of:
 - a. Another blind; or
 - b. A waterfowl refuge.

(b) Persons shall not hunt in designated recreation areas or access points.

(c) More than four (4) persons shall not occupy a blind.

(d) Hunters shall remove decoys and personal effects from the wildlife management area daily.

(2) Persons wishing to establish permanent blinds on Barkley Lake, Barren River Lake, Buckhorn Lake, Green River Lake, Nolin River Lake, Paintsville Lake, Rough River Lake and Taylorsville Lake Wildlife Management Areas:

(a) Shall first obtain a permit from the U. S. Army Corps of Engineers.

(b) May designate one (1) other person as a partner.

(c) Shall participate in a drawing for blind permits on the Barkley, Barren, Green, Paintsville, and Taylorsville areas.

(d) Shall present a valid hunting license at the time of the drawing.

(e) Shall not hold more than one (1) permit per area.

(3) Holders of blind permits:

(a) Shall construct blinds before November 20 or forfeit the permit.

(b) Shall not lock blinds.

(c) Unless an extension of time is granted, shall remove blinds within thirty (30) days of the close of waterfowl season or be ineligible for a permit the following year.

(4) Blinds not occupied by the permit holder one-half (1/2) hour before sunrise shall be available to other hunters on a first-come, first-serve basis.

(5) Blind restrictions specified in this section shall not apply to falconers when gun or archery seasons are not open.

Section 5. Exceptions for Wildlife Management Areas. (1)(a) Statewide waterfowl seasons apply unless otherwise stated in this section.

(b) ~~[(2)]~~ If specific hunting dates are given in this section, a person shall not hunt waterfowl except on those dates. ~~[persons may hunt waterfowl only on those dates.]~~

(2) A person shall not:

(a) Hunt on areas or portions of areas marked by signs as closed to hunting;

(b) Enter areas or portions of areas marked by signs as closed to public access; or

(c) Hunt a species on areas or portions of areas marked by signs as closed to hunting for that species.

(3) Wildlife management areas in Ballard County: [Ballard Wildlife Management Area. Waterfowl hunting requirements are stipulated in 301 KAR 2:221.]

(a) Seasons and hunting requirements for the Ballard Wildlife Management Area shall be as stipulated in 301 KAR 2:221.

(b) Barlow Bottoms Wildlife Management Area.

1. A person shall:

a. Not hunt waterfowl after 12 noon;

b. Not possess more than fifteen (15) shotgun shells while waterfowl hunting;

c. Not hunt Mondays through Wednesdays;

d. During Canada goose season, check in and out daily at the designated check station.

2. When hunting from blinds assigned by the department as stipulated in Section 6 of this administrative regulation:

a. At least one (1) person in the blind shall be eighteen (18) years old or older.

b. Blinds of persons who have not checked in by 5 a.m. shall be available to other hunters on a first-come, first-served basis.

(c) Lower Bottoms Public Waterfowl Hunting Area. In addition to the requirements of paragraph (b) of this subsection:

1. A person shall not:

a. Hunt waterfowl except from permanent department blinds.

b. Except as authorized by the department, be on the area after 1 p.m. during waterfowl seasons.

2. During Canada goose seasons, permanent department blinds shall be allocated by advance application as specified in Section 6 of this administrative regulation.

(d) Peal Public Hunt Lakes. In addition to the requirements of paragraph (b) of this subsection:

1. More than seven (7) parties shall not hunt at the same time on:

a. Buck Lake; or

b. Flat Lake.

2. More than four (4) parties shall not hunt at the same time on Fish Lake.

3. More than three (3) parties shall not hunt at the same time on:

a. First Lake; or

b. Second Lake.

(e) Swan Lake Unit. In addition to the requirements of paragraph (b) of this subsection:

1. A person shall not hunt ducks, coots, mergansers or geese other than Canada geese unless:

a. The season for these species is open; and

b. The season for Canada geese is also open.

2. Waterfowl hunters shall use blinds assigned by the department as stipulated in Section 6 of this administrative regulation.

(4) Barkley Lake Wildlife Management Area.

(a) Permanent blinds may be used as specified in Section 4 of this administrative regulation.

(b) Persons shall establish permanent blinds within ten (10) yards of their assigned and numbered blind markers within:

1. An area bounded by the mouth of Donaldson Creek, the east side of the Cumberland River Channel and the boat ramp at Linton.

2. An area bounded by the Pryor's Creek Light, the west side of the Cumberland River Channel, Land Between the Lake Road 204 and river mile 73.5.

(c) The following refuge areas are closed to the public:

1. From November 1 through February 15 within an area west of the main river channel between river mile 51 (Hayes Landing Light) and river mile 57.3 (Crooked Creek Light);

a. Including the row of islands on the west side of the main river channel; and

b. Not including Taylor Bay and Jake Fork Bay.

2. From November 1 through March 15 within Honker Bay and Fulton Bay as marked by buoys and signs.

(d) From October 15 through March 15, persons shall not hunt:

1. Within 200 yards of; or

2. Within the area defined by the levee between river mile 68.4 and river mile 70.4.

(5) Barren River Lake Wildlife Management Area. Permanent blinds may be used as specified in Section 4 of this administrative regulation.

(6) Buckhorn Lake Wildlife Management Area. Permanent blinds may be used as specified in Section 4 of this administrative regulation.

(7) Cane Creek Wildlife Management Area is closed to waterfowl hunting.

(8) Cumberland Lake Wildlife Management Area. The following sections are closed to the public from October 15 through March 15:

(a) Wesley Bend, the area bounded by Fishing Creek, Beech Grove Road and Fishing Creek Road.

(b) Yellowhole, the area bounded by Fishing Creek Road and Hickory Nut Road.

(9) Cyprus-AMEX Wildlife Management Area is closed to waterfowl hunting.

(10) Grayson Lake Wildlife Management Area. Persons shall not hunt waterfowl:

(a) Within the no wake zone at the dam site marina;

(b) From the shores of Camp Webb;

(c) From the shores of the state park; or

(d) On Deer Creek Fork of Grayson Lake.

(11) Green River Lake Wildlife Management Area.

(a) Permanent blinds may be used as specified in Section 4 of this administrative regulation.

(b) Shooting hours: one-half (1/2) hour before sunrise until 2 p.m.

(12) Higginson-Henry Wildlife Management Area. Portions marked by signs are closed to the public.

(13) Kaler Bottoms Wildlife Management Area. Shooting hours: one-half (1/2) hour before sunrise until 2 p.m.

(14) Land Between the Lakes.

- (a) The following portions are closed to the public from November 1 through March 15:
 1. Long Creek Pond.
 2. The eastern one-third (1/3) of Smith Bay.
 3. The eastern two-thirds (2/3) of Duncan Bay.
- (b) The following portions are closed to waterfowl hunting:
 1. The Environmental Education Center.
 2. Energy Lake.
- (c) Persons shall possess an annual Land Between the Lakes Hunting Permit when hunting waterfowl:
 1. Inland from the water's edge of Kentucky Lake or Barkley Lake; or
 2. From boats over flooded portions of Land Between the Lakes when lake levels are above elevation 359.
- (d) Persons shall not hunt waterfowl on inland areas during quota deer hunts.
- (e) Persons shall not establish or use permanent blinds:
 1. On inland areas; or
 2. Along the Kentucky Lake shoreline of Land Between the Lakes.
- (f) Waterfowl hunters shall remove decoys and personal effects daily.
- (15) Mill Creek Wildlife Management Area is closed to waterfowl hunting.
- (16) Nolin River Lake Wildlife Management Area. Permanent blinds may be used as specified in Section 4 of this administrative regulation.
- (17) Obion Creek Wildlife Management Area. Shooting hours are one-half (1/2) hour before sunrise until 2 p.m.
- (18) Ohio River Waterfowl Refuge.
 - (a) Persons shall not hunt from October 15 through March 15 on the Kentucky portion of the Ohio River from Smithland Lock and Dam upstream to a powerline crossing at approximately river mile 911.5.
 - (b) Stewart Island is closed to the public from October 15 through March 15, except for quota deer hunting.
- (19) Peabody Wildlife Management Area.
 - (a) Shooting hours: one-half (1/2) hour before sunrise until 2 p.m.
 - (b) The following portions, as posted by signs, are closed to the public from October 15 through March 15:
 1. Gibraltar Mine, as bounded by Rockport Road, the Western Kentucky Parkway, Pond Creek and the P&M Haul Road.
 2. Sinclair Mine, as bounded by railroad tracks, the haul road and posted signs.
 3. Homestead, as bounded by the haul road and the Green River.
- (20) Peal Wildlife Management Area. Shooting hours: one-half (1/2) hour before sunrise until 2 p.m.
- (21) Pioneer Weapons Wildlife Management Area.
 - (a) Waterfowl hunters may use breech-loading shotguns along the shoreline of Cave Run Lake.
 - (b) Waterfowl hunters shall use muzzle-loading shotguns elsewhere on the area.
- (22) Redbird Wildlife Management Area is closed to waterfowl hunting.
- (23) The main block of Robinson Forest Wildlife Management Area is closed to waterfowl hunting.
- (24) Sloughs Wildlife Management Area.
 - (a) Shooting hours, one-half (1/2) hour before sunrise until 2 p.m.
 - (b) On the Grassy-Pond Powells Lake Unit, waterfowl hunters:
 1. Shall use permanent blinds provided by the department.
 2. Shall remove decoys and personal effects from blinds or the vicinity of blinds daily.
 - (c) On the Jenny Hole-Highlands Creek Unit, waterfowl hunters:
 1. Shall not establish or hunt from blinds closer than 200 yards from another hunting party.
 2. Shall remove decoys and personal effects from blinds or the vicinity of blinds daily.
 - (d) If the Ohio River reaches a level that requires boat access, waterfowl hunters:
 1. May hunt from boats without regard to department blinds.
 2. Shall not hunt closer than 200 yards from another boat.

- (e) Waterfowl hunters on the Crenshaw and Duncan Tracts of the Sauerheber Unit:
 1. Shall hunt from blinds assigned by the department through a drawing as stipulated in Section 6 of this administrative regulation.
 2. May occupy blinds not claimed by the permittee by the opening of shooting hours.
 3. Shall not have more than fifteen (15) shotgun shells per person in their possession.
 4. Shall be accompanied by an adult if under eighteen (18) years of age.
 - (f) The Crenshaw and Duncan tracts are closed to hunting except waterfowl from October 15 through March 15.
 - (g) The remainder of the Sauerheber Unit is closed to the public from October 15 through March 15.
 - (25) ~~Swan Lake Wildlife Management Area.~~
 - ~~(a) Portions marked by signs are closed to the public from October 15 through March 15, except for waterfowl hunting as stipulated below.~~
 - ~~(b) Goose season: December 14 through January 28.~~
 - ~~(c) Duck, coot and merganser season: December 14 through January 14.~~
 - ~~(d) Persons shall not hunt on Mondays, Tuesdays, or Wednesdays.~~
 - ~~(e) Waterfowl hunters:~~
 - ~~1. Shall hunt from blinds assigned by the department through a drawing as stipulated in Section 6 of this administrative regulation.~~
 - ~~2. May occupy blinds not claimed by the permittee by the opening of shooting hours.~~
 - ~~3. Shall not have more than fifteen (15) shotgun shells per person in their possession.~~
 - ~~4. Shall be accompanied by an adult if under eighteen (18) years of age.~~
 - (26) Taylorsville Lake Wildlife Management Area.
 - (a) Permanent blinds may be used as specified in Section 4 of this administrative regulation.
 - (b) The portion east of Van Buren Boat Ramp as marked by signs is closed to the public from the Monday following the scheduled quota deer hunt through the last day of February. ~~[March 15.]~~
 - (26) ~~[(27)]~~ Westvaco Wildlife Management Area.
 - (a) Shooting hours, one-half (1/2) hour before sunrise until 2 p.m.
 - (b) The portion south of the Westvaco Road as posted by signs is closed to the public from November 1 through March 15.
 - (c) Persons shall obtain a Westvaco Permit before hunting.
 - (27) ~~[(28)]~~ White City Wildlife Management Area. Shooting hours are from one-half (1/2) hour before sunrise until 2 p.m.
 - (28) ~~[(29)]~~ Yellowbank Wildlife Management Area. The area designated by signs and painted boundary markers is closed to the public from October 15 through March 15.
- Section 6. Applying for Waterfowl Hunts. (1) Persons wishing to apply to hunt waterfowl on Ballard, Swan Lake or the Sauerheber unit of Sloughs wildlife management areas shall:
- (a) Apply on forms provided by the department.
 - (b) Submit completed application forms before the deadline date on the form.
 - (2) Forms which are not completed according to the instructions on the form shall be disqualified from the drawing.
 - (3) Persons shall not apply more than one (1) time for each hunt.
 - (4) Each hunter drawn may bring up to three (3) additional hunters.
 - (5) The following are incorporated by reference. They may be obtained from or examined at the Department of Fish and Wildlife Resources, #1 Game Farm Road, Frankfort, Kentucky 40601, from 8 a.m. until 4:30 p.m. eastern time during business days.
 - (a) Sloughs Wildlife Management Area Waterfowl Hunting

Application, August, 1995.

(b) Ballard Wildlife Management Area Goose Hunt Application, August, 1995.

(c) Application for Lower Bottoms/Swan Lake waterfowl blind drawings in Ballard County, August, 1996. [Swan Lake Wildlife Management Area Waterfowl Hunting Application, August, 1995.]

REGULATORY IMPACT ANALYSIS

Contact Person: John Wilson

(1) Type and number of entities affected: Approximately 14,000 persons hunt waterfowl annually in Kentucky.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments received. This administrative regulation should have no impact on costs of living or employment.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No impacts are anticipated.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Waterfowl hunters must purchase licenses as well as state and federal waterfowl stamps. This is a continuing requirement that will impose no additional requirements.

2. Second and subsequent years: Same as first year.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: No new direct or indirect costs or savings will be incurred.

2. Continuing costs or savings: Same as for first year.

3. Additional factors increasing or decreasing costs:

(b) Reporting and paperwork requirements: No additional reporting or paperwork requirements.

(4) Assessment of anticipated effect on state and local revenues: No increase or decrease on state or local revenues is anticipated.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: Revenue from the sale of hunting and fishing licenses and from the Federal Aid to Wildlife Restoration will be used to implement this administrative regulation.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: No public comments received. Waterfowl hunting creates substantial economic activity in certain sections of the state. This administrative regulation will allow waterfowl hunting to continue by establishing hunting seasons within federal frameworks.

(b) Kentucky: The statewide impact of waterfowl hunting is minimal, but this administrative regulation does allow for the continuation of this activity.

(7) Assessment of alternative methods; reasons why alternatives were rejected: The alternative of not having a waterfowl season was rejected because waterfowl represent a renewable natural resource which affords recreational opportunities and generates economic activity throughout the commonwealth.

(8) Assessment of expected benefits: Continuation of waterfowl hunting and short- and long-term conservation of waterfowl resources

are the primary benefits.

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: Regulated harvest of waterfowl ensures the continuation of this important component of the Commonwealth's biological diversity.

(b) State whether a detrimental effect on environmental and public health would result if not implemented: Yes

(c) If detrimental effect would result, explain detrimental effect: Inability to regulate waterfowl resource.

(9) Identify and statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict: Not applicable.

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

(10) Any additional information or comments: The provisions of this regulation were contained in 301 KAR 2:220, which is being repealed and replaced with regulations which better meet the formatting and wording requirements of KRS Chapter 13A.

(11) TIERING: Is tiering applied? Tiering was used to apply different season dates and other specialized hunting requirements to various wildlife areas across the state. This was done to maximize hunter opportunity while conserving waterfowl resources.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. 50 CFR Part 20, Federal Register, Vol. 61, No 188, Thursday, September 26, 1996.

2. State compliance standards. State seasons and bag limits are within the federal frameworks.

3. Minimum or uniform standards contained in the federal mandate. Ducks, coots and mergansers: Not more than a 50 day season with a five bird bag limit between the Saturday closest to October 1 and the Sunday closest to January 20. The state may be split into two zones with no more than two segments in each zone. The daily bag limit is 5 ducks and may not include more than 4 mallards (no more than 1 hen mallard), 1 black duck, 1 pintail, 2 wood ducks, 1 canvasback and 2 redheads. The possession limit shall be twice the daily bag. The coot daily bag shall be 15 with the possession limit being 30. The merganser limit shall be 5 daily (only 1 may be a hooded merganser) and the possession limit being twice the daily bag. Both the coot and merganser bag shall be in addition to the duck limit.

Geese: The season for light geese (snow geese) may extend for 107 days and the season for white-fronted geese may extend for 70 days. Season framework for light geese is between the Saturday nearest October 1 and March 10. The season framework for white-fronted geese is between the Saturday nearest October 1 and January 31.

The Canada goose season in the Western Goose Zone season may extend for 65 days (80 days in Fulton County) between October 1 and January 31 (except February 15 in Fulton County), or until the harvest of 21,000 birds is taken, whichever occurs first.

Pennyroyal/Coalfield Zone Canada goose season may extend for 35 days with a daily bag limit of 2 Canada geese.

The Canada goose season in the remainder of the state may extend for 50 days with a daily bag limit of 2 Canada geese.

The daily bag limit shall be 10 geese, to include no more than 2 Canada geese, 2 white-fronted geese and 2 brant. Possession limit is twice the daily bag limit.

Shooting hours shall be one-half hour before sunrise until sunset daily for all species.

Falconry season for migratory birds mentioned above shall fall between September 1 and March 10 and shall not exceed 107 days. Daily bag and possession limits shall not exceed 3 birds daily or 6 in possession, singly or in the aggregate of species. Hunting hours shall be the same as for firearms hunting.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? Yes

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. Seasons for light geese are shorter due to the paucity of birds wintering in Kentucky during the early parts of the framework dates. Exerting hunting pressure on so few birds could jeopardize long-term bird use in Kentucky.

The Ballard Wildlife Management Area season is shorter than the Western Goose Zone so that controlled hunts will not jeopardize goose and duck use. Scheduled resting periods during the framework is a good means of enhancing historic use patterns. Other wildlife management area season dates and shooting hours were adjusted to optimizing public use within sound waterfowl conservation practices.

STATEMENT OF EMERGENCY

301 KAR 2:224E

Waterfowl hunting season frameworks are established annually by the United States Fish and Wildlife Service. Under federal law, states which wish to establish waterfowl hunting seasons must do so within these federal frameworks. Development of the federal regulations involves consideration of harvest and population data, coordination with state wildlife agencies, and public involvement. Consequently, federal migratory bird hunting regulations are promulgated less than six (6) weeks before the opening dates of the hunting season. An ordinary administrative regulation cannot be adopted in the short time between final promulgation of federal regulations and the scheduled opening of state waterfowl hunting seasons, necessitating the promulgation of an emergency administrative regulation. This emergency administrative regulation will be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
C. THOMAS BENNETT, Commissioner

TOURISM DEVELOPMENT CABINET

Department of Fish and Wildlife Resources

301 KAR 2:224E. Waterfowl hunting zones.

RELATES TO: KRS 150.010(40), 150.025(1), ~~150.015, 150.170, 150.175, 150.235, 150.240,~~ 150.305(1), 150.330, 150.340(1), (3), ~~150.360,~~ 150.600(1), ~~150.603, 150.630,~~ 150.990, 59 CFR 20

EFFECTIVE: October 2, 1996

NECESSITY, FUNCTION, AND CONFORMITY: Unevenly distributed waterfowl resources and federal requirements necessitate different season dates and harvest administrative regulations in different sections of the Commonwealth. This administrative regulation establishes waterfowl hunting zones. This amendment is necessary to change the boundaries of the Pennyroyal-Coalfield goose zone. ~~[names of the Cave Run Lake Special Hunt Region and the West Central Special Hunt Region.]~~

Section 1. Goose Hunting Zones. (1) The Western goose zone includes Henderson County and the portion of Kentucky west of:

- (a) US 60 from the Henderson-Union County line to US 641;
 - (b) US 641 to Interstate 24;
 - (c) Interstate 24 to the Purchase Parkway; and
 - (d) The Purchase Parkway.
- (2) The Ballard reporting area includes the portion of Ballard

County north or west of:

- (a) The Ballard-McCracken County line to State Road 358;
- (b) State Road 358 to US 60;
- (c) US 60 to the city limits of Wickliffe;
- (d) The city limits of Wickliffe to the center of the Mississippi River.

(3) Counties associated with the Ballard reporting area include:

- (a) The portion of Ballard County not included in the Ballard reporting area;

- (b) Carlisle and McCracken Counties; and
- (c) The portions of Fulton, Graves, Hickman and Marshall Counties in the Western goose zone.

(4) The Henderson-Union reporting area includes Henderson County and the portion of Union County in the Western goose zone.

(5) Counties associated with the Henderson-Union reporting area include those portions of Crittenden, Livingston and Lyon Counties in the Western goose zone.

(6) The Pennyroyal-Coalfield goose zone includes the area from the Western goose zone to and including Simpson, Warren, Butler, Ohio and Daviess Counties. ~~[between the Western goose zone and:~~

~~(a) Interstate 65 from the Tennessee line to the Green River Parkway;~~

~~(b) The Green River Parkway to the US 60 Bypass at Owensboro;~~

~~(c) The U.S. 60 Bypass to U.S. 231; and~~

~~(d) U.S. 231 to the Indiana border.]~~

(7) The Eastern goose zone includes the portions of Kentucky not included in the Western or Pennyroyal-Coalfield goose zones.

(8) The West-Central Special Hunt Zone includes:

- (a) Muhlenburg County;
- (b) Ohio County south of Rough River;
- (c) Butler County west of Highway 79 and north of Highway 70;
- (d) Hopkins County:
 1. East of Highways 814 and 109;
 2. South of US 41A between Highways 814 and Madisonville; and
 3. South of Highway 85 east of Madisonville.

(9) The Northeast Special Hunt Zone includes Bath, Menifee, Morgan and Rowan Counties, except Paintsville Lake and its shoreline in Morgan County.

Section 2. Duck, Coot, and Merganser Hunting Zones. (1) The Western duck zone includes [ie] the portion of Kentucky ~~[included]~~ in the Western and Pennyroyal-Coalfield goose zones.

(2) The Eastern duck zone includes [ie] the portion of Kentucky not ~~[included]~~ in the Western duck zone.

The Ballard Wildlife Management Area season is shorter than the Western goose zone so that controlled hunts will not jeopardize goose and duck use. Scheduled resting periods during the framework is a good means of enhancing historic use patterns. Other wildlife management area season dates and shooting hours were adjusted to optimizing public use within sound waterfowl conservation practices.

STATEMENT OF EMERGENCY 401 KAR 8:030E

KRS 223.200 requires the Natural Resources and Environmental Protection Cabinet to adopt administrative regulations as are reasonably necessary to carry out the intent that every operator in responsible charge of a water treatment plant or water distribution system be required to hold a valid and effective certificate of competency in a class equal to or higher than the class of the particular treatment plant or distribution system where the operator is currently employed,

to protect the public health. An ordinary administrative regulation is not sufficient and an emergency exists of an imminent threat to the public health and welfare because the current classification system is based on populations served and does not focus on the types of treatment provided. This emergency administrative regulation will implement a classification system for water treatment plants which focuses more on the treatment processes used and the system design capacity rather than on population served, therefore providing greater protection for citizens of the Commonwealth. This emergency administrative regulation will be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
JAMES E. BICKFORD, Secretary

STATUTORY AUTHORITY: KRS 223.160 to 223.220, 224.10-100, 224.10-110[, 42 USCA 300f, 300g, 300j, 40 CFR 141.2, as amended at 54 Federal Register 27526 and 27562 (1989)]

EFFECTIVE: October 7, 1996

NECESSITY, FUNCTION, AND CONFORMITY: KRS 223.160-223.220 establishes a board of certification and authorizes the cabinet to establish a program requiring certification of water system operators. KRS 224.10-110 directs the cabinet to enforce administrative regulations adopted by the secretary for the regulation and control of the purification of water for public and semipublic use and for the certification of water plant operators. [The Safe Drinking Water Act, as amended by the Safe Drinking Water Act Amendments of 1986, provides for primary enforcement responsibility by states that have adopted regulations "no less stringent than the national primary drinking water regulations", as well as meeting other criteria stipulated by the Act. The Commonwealth of Kentucky has accepted and is currently exercising the primary enforcement responsibility.] This administrative regulation establishes standards for classification of water treatment plants and water distribution systems; qualifications of applicants; examination procedures; duties of the Kentucky Board of Certification of Water Treatment Plant and Water Distribution System Operators; and provisions relating to the issuance and renewal of certificates; disciplinary actions; and other provisions necessary for the certification of operators. There is no federal law or regulation governing the subject matter of this administrative regulation, therefore, this administrative regulation is not more stringent than the federal law or regulation.

Section 1. General Provisions. (1)(a) Each public water system shall ensure that each component of the system is operated according to the provisions of KRS Chapters 223 and 224 and the administrative regulations of this chapter.

(b) ~~[Direct responsible charge.]~~ Each public water system shall operate its water treatment plant and water distribution system ~~[be operated]~~ under the supervision of a certified operator who is in ~~[direct]~~ responsible charge of the system. Certified operators are not required for semipublic water systems.

(c) All ~~[The]~~ certified operators in ~~[direct]~~ responsible charge shall hold a valid certificate in a class equal to or higher than that required for the system under his supervision. A ~~[The]~~ certified operator ~~[in direct responsible charge]~~ may be an individual who has been assigned ~~[sole]~~ responsibility for the operational procedures performed at the plant ~~[operation of the system]~~, or may be a person who

is supervising ~~[has been delegated the direct responsibility to supervise]~~ others in the performance of operational procedures at the plant. ~~[their duties in operating the system. The certified operator in direct responsible charge shall be physically on the premises of the water treatment facility or otherwise performing system related duties within the system during the shifts for which the operator is responsible, except as provided in subsection (2) of this section. System related duties include but are not limited to attending local government meetings, having parts repaired, purchasing supplies and maintenance of distribution system appurtenances.]~~

(2) Staffing requirements.

(a) [Shifts.

~~(a) Water treatment systems. Public water systems shall employ a certified operator in direct responsible charge as specified in subparagraphs 1 through 4 of this paragraph;~~

~~1. Class I. Operational procedures performed at Class IA-D or IB-D water treatment systems shall be conducted under the supervision of, or by, a certified operator.~~

~~2. Class II.~~

~~a. Operational procedures performed at Class IIA water treatment systems serving a population less than 500 shall be conducted under the supervision of, or by, a Class IIA, IIIA or IVA certified water treatment plant operator. Class IIA water treatment systems serving a population equal to or greater than 500 and less than 3,000 shall be staffed with a Class IIA, IIIA or IVA certified water treatment plant operator in direct responsible charge during the daytime shift. Operational procedures conducted during other shifts shall be conducted under the supervision of, or by, a Class IIA, IIIA or IVA certified water treatment plant operator.~~

~~b. Operational procedures performed at Class IIB-D water treatment systems shall be conducted under the supervision of, or by, a Class IIA, IIB-D, IIIA, IIB or IVA certified operator.~~

~~c. Operational procedures performed at Class IIC-D water treatment systems shall be conducted under the supervision of, or by, a Class IIA, IIB-D, IIC-D, III or IV certified operator.~~

~~3. Class III.~~

~~a. Class IIIA water treatment systems shall be staffed with a Class IIIA or IVA certified water treatment plant operator in direct responsible charge of shifts where water is treated.~~

~~b. Class IIIB and IIIC water treatment systems shall be staffed by a Class III or IVA certified water treatment plant operator in direct responsible charge during the daytime shift. Operational procedures conducted during other shifts shall be conducted under the supervision of, or by, a Class III or IVA certified water treatment plant operator.~~

~~4. Class IV. Class IVA water treatment systems shall be staffed with a Class IVA certified water treatment plant operator in direct responsible charge for shifts where water is treated.~~

~~(b) Water distribution systems. Operational procedures performed within water distribution systems shall be conducted by or under the supervision of, or by, a distribution system operator certified in a class equal to or higher than the class of the system. [Furthermore, water distribution systems having booster chlorination or other treatment capabilities shall be staffed with a certified distribution operator in direct responsible charge in a class equal to or higher than the class of the distribution system during the daytime weekday shift.]~~

(b) Combination water treatment plants and water distribution systems. Operational procedures at all Class IA-D, IB-D, and IIB-D water systems shall be conducted by or under the supervision of a certified water system operator who holds a valid combination or separate water treatment and distribution system operator certificate of the appropriate class and who is in responsible charge of the system.

(c) Water treatment plants.

1. Class IIA. Operational procedures at a Class IIA water treatment plant shall be conducted by a certified water treatment plant

operator who holds a valid certificate in a class equal to or higher than Class IIA who is in responsible charge of the plant and is physically located on the premises of the water treatment plant during the daytime shift or is otherwise performing system-related duties. Operational procedures conducted during other shifts shall be conducted under the supervision of, or by, a Class IIA, IIIA, or IVA certified water treatment plant operator.

2. Class IIIA. Operational procedures at a Class IIIA water treatment plant shall be conducted by a certified water treatment plant operator who holds a valid certificate in a class equal to or higher than Class IIIA who is in responsible charge of the plant and is physically located on the premises of the water treatment plant when water is being treated or is otherwise performing system-related duties.

3. Class IIIB. Operational procedures at a Class IIIB water treatment plant shall be conducted by or under the supervision of a certified water treatment plant operator who holds a valid certificate in a class equal to or higher than Class IIIB who is in responsible charge of the system.

4. Class IVA. Operational procedures at a Class IVA water treatment plant shall be conducted by a certified water treatment plant operator who holds a valid Class IVA certificate who is in responsible charge of the plant and is physically located on the premises of the water treatment plant when water is being treated or is otherwise performing system-related duties.

5. Class IVB. Operational procedures at a Class IVB water treatment plant shall be conducted by or under the supervision of a certified water treatment plant operators who holds a valid certificate in a class equal to or higher than Class IVB who is in responsible charge of the system.

(3) Certifiable personnel. Persons who are under the supervision of the operator in [direct] responsible charge are encouraged to and may become certified by the cabinet if they meet the [appropriate education and experience] requirements of Section 8 of this administrative regulation and pass the appropriate examination of the requested class. This provision shall apply only to personnel who have hands-on drinking water treatment or distribution system experience.

(4) Production personnel. On-site laboratory or distribution personnel and others who have significant routine input into the treatment [production] or distribution of potable water may be certified if they demonstrate to the satisfaction of the cabinet that they meet the education and experience requirements and possess the technical and practical knowledge to perform the procedures involved in the operation of a water treatment plant or water distribution system.

(5) A public water system may fulfill the staffing requirements of this section by securing a contract operator or an operations firm. If a public water system secures a contract operator or operations firm to operate a treatment plant or distribution system, the public water system shall provide the following information to the cabinet:

(a) Name, mailing address, and telephone number of:

1. The certified operator or contract operations firm; and

2. Principal contact within the firm for certification activities, if different;

(b) Name and certificate type and number for each certified operator;

(c) Facility name, public water supply identification number, and county location of each system for which the operator is assuming responsibility;

(d) Effective date and expiration date of the contract; and

(e) Duties and responsibilities to be performed by each party involved. [Semipublic system. Certified operators are not required for semipublic water systems.]

(6) Certificate display. If a public water system office is available at the water treatment plant or within the distribution system, each [the] operator's certificate[s] shall be prominently displayed [on the wall].

(7) Wallet card. Certified operators shall carry the cabinet-issued wallet card showing current certification status while on duty.

(8) Provisional compliance. Public water systems that are in compliance with all other provisions of 401 KAR Chapter 8 except for the requirements of subsections (1) and (2) of this section shall be in provisional compliance if:

(a) The system comes into compliance with the requirements of subsections (1) and (2) of this section within ninety (90) days of the loss of the certified operator; or

(b)1. A Class II, III, or IV public water system submits a written request to the cabinet for its approval for a provisional staffing plan which contains the information required in subsection (9) of this section;

2. The cabinet approves the provisional staffing plan; and

3. The system is meeting the provisional staffing plan.

(c) During provisional compliance, public water systems may use certified operators who possess a certificate of one (1) class lower than that required by the facility as provisional operators, if a certified operator of the appropriate class as required by subsections (1) and (2) of this section is immediately available. No more than two-thirds (2/3) of the number of operators required for the facility to maintain coverage of the hours when water is treated may be provisional operators.

(9) Provisional staffing plan.

(a) The provisional staffing plan shall demonstrate how the system will meet the requirements of subsections (1) and (2) of this section within a reasonable time frame, not to exceed two (2) years.

(b) The cabinet will approve the provisional staffing plan if:

1. The plan meets the criteria specified in subsection (8) of this section and paragraph (a) of this subsection;

2. The system is otherwise in compliance with 401 KAR Chapter 8;

3. Public health and safety will be protected throughout the period identified in the provisional staffing plan; and

4. The system does not have a history of noncompliance in the last two (2) years.

(c) The provisional staffing plan shall be considered to be approved unless the cabinet otherwise notifies the system within ninety (90) days of the receipt of the provisional staffing plan.

(d) The cabinet may approve a second provisional staffing plan for a system if the public water system is in compliance with this subsection and subsection (8) of this section, taking into consideration previous efforts made to obtain the requisite number of properly certified operators as required by subsections (1) and (2) of this section.

(10) Reporting requirements.

(a) Each public water system shall notify the cabinet in writing within thirty (30) calendar days of certified operator employment changes.

(b) Certified operators shall notify the cabinet within thirty (30) calendar days of employment or mailing address changes. Employment change information shall include the name and identification number of the public water system, the effective date of the change, and whether the operator is assuming or relinquishing responsibility for the plant or system. [Staffing compliance schedule. Class III and IV public water systems subject to the on-site staffing requirements of subsection (2) of this section shall comply with the staffing requirements by January 1, 1993.]

Section 2. Duties of the Board. In carrying out its responsibilities and with consideration given to the minimum standards and guidelines of the ABC, the board may:

(1) Examine the qualifications of applicants and recommend qualified applicants to the cabinet for certification;

(2) Review and approve substitutions for education and experience requirements;

(3) Review and assist the cabinet in the preparation of examina-

tions;

(4) Review and provide comments to the cabinet on proposed drinking water operator certification administrative regulations;

(5) Review and provide comments to the cabinet on proposed training courses and seminars designed to provide continuing education to certified operators;

(6) Review evidence and advise the cabinet regarding disciplinary actions for certified operators who fail to comply with the applicable laws and administrative regulations of the Commonwealth;

(7) Review the certification administrative regulations of states which are seeking reciprocity with the Commonwealth; and

(8) Review and provide comments to the cabinet on proposed fees for training and certification of operators.

Section 3. Application and Examinations for Certification. (1) Application. An individual desiring to be certified shall file an application with the cabinet and pay the applicable fee specified in 401 KAR 8:050, Section 3. Application shall be made on a form provided by the cabinet and incorporated by reference in Section 9 of this administrative regulation. Applications shall not be filed with the cabinet until the individual has met the minimum qualifications required in this administrative regulation.

(2) Examinations. The board and cabinet shall be jointly responsible for preparation of the examinations which shall be used in determining knowledge, ability and judgment of the applicants. The cabinet shall administer written exams unless the cabinet and board grant a waiver to allow an oral exam. Oral exams may be administered to applicants who meet the minimum qualifications outlined in Section 8 of this administrative regulation. The cabinet shall grade the examinations and notify the applicant of the outcome. Applicants shall achieve a score of at least seventy (70) percent to pass the examination. Examinations shall not be returned to the applicant, but results may be reviewed with a member of the board or cabinet upon written request by the applicant.

(3) Scheduling examinations. Examinations shall be conducted at least semiannually at places and times set by the cabinet. The cabinet shall provide advance announcement of these examinations.

(4) Exam content. The cabinet will prepare examinations to address the basic differences in the duties and responsibilities of certified operators, treatment processes, [types of facilities,] drinking water standards, surface and groundwater source characteristics and other pertinent matters.

(5) Applicant's conduct. Applicants found cheating shall be subject to disciplinary action including, but not limited to, a final score of zero on the examination, denial of future applications for certification, or the provisions of Section 5 of this administrative regulation.

(6) Confidentiality of examinations. Examination questions are confidential. Any person who copies questions, removes all or part of any examination, or reveals all or part of any examination for unauthorized use may be denied certification, be subjected to the sanctions identified in Section 5 of this administrative regulation, or be liable for civil and criminal penalties pursuant to KRS 223.991 or 224.99-010.

(7) Qualified applicants, other than those specified in subsection (5) or (6) of this section, who fail to pass an examination may register to take the examination at a regularly scheduled examination date.

Section 4. Issuance of Certificates. (1) Certification. Upon satisfactory fulfillment of the requirements of this administrative regulation and upon recommendation of the board, the cabinet shall issue a certificate to the applicant designating the classification of the water treatment plant or water distribution system for which the operator has demonstrated competency. ~~[If information related to the operator's employment or mailing address changes from the application filed for certification, the certified operator shall provide written notification to the division within thirty (30) days. If a certified operator becomes permanently incapacitated while employed by a water~~

~~treatment plant or distribution system, the employer shall notify the division.]~~

(2) Duration and renewal of certificates.

(a) Certificates for all certified operator classes, except the limited classification as identified in Section 6(5) [(4)] of this administrative regulation, shall be issued with a common expiration date of June 30 of even-numbered years, and shall remain valid until that date [valid for up to two (2) years after each renewal], unless suspended or revoked for cause. Certificates issued between January 1 and June 30 of an even-numbered year will be issued to include the next two (2) year renewal period. [or replaced by one of a higher and similar classification.]

(b) Certificates shall expire on June 30 of even-numbered years if not renewed. Operators with expired certificates shall not be in responsible charge of a public water system.

(c) Renewals. Certificates may be renewed without examination, if the certified operator is in good standing; upon completion of the required, board-approved continuing education hours outlined in subsection (7) of this section and upon submittal of a complete renewal application and applicable fees specified in 401 KAR 8:050, Section 3. Operators desiring renewal shall apply on a form provided by the cabinet and incorporated by reference in Section 9 of this administrative regulation by June 30 of even-numbered years. Expired certificates shall continue in force pending administrative processing of a renewal, if the certified operator is in good standing and has complied with all the renewal requirements of this subsection and subsection (7) of this section by June 30 of the renewal year. Certificates continued under this paragraph remain fully effective and enforceable.

(d) ~~[(b)]~~ Limited certificates shall expire on June 30 of each year. The cabinet may renew the limited certificate upon receipt of the renewal application if the certified operator has complied with all requirements for proper operation of the facility under his responsible charge and has submitted a written application and applicable fees specified in 401 KAR 8:050, Section 3.

(3) Certification for a higher classification. Certified operators who desire to become certified in a higher classification shall satisfactorily complete the requirements of Sections 3 and 8 of this administrative regulation for the higher classification ~~[before submitting a new application. Experience earned under a limited certificate shall not count toward fulfillment of qualifications for other classifications].~~

(4) Certificates shall be valid only while the holder uses reasonable care, judgment, and application of his knowledge in the performance of his duties. Certificates shall not be issued or valid if obtained through fraud, deceit or the submission of inaccurate data on qualifications.

(5) Termination of a certificate.

(a) If a certified operator fails to renew his certificate, the certificate shall terminate one (1) year after its expiration date [after two (2) consecutive renewal periods]. Limited certificates shall terminate on December 31 of the renewal year [immediately after the expiration date] if they are not renewed. Once a certificate has terminated, an operator shall apply, pay applicable fees and pass an examination in the classification for which he is qualified to be certified.

(b) Operators holding a certificate with an expiration date of June 30, 1994, on the effective date of this emergency administrative regulation may renew the certificate by fulfilling the renewal requirements specified in subsections (2)(c) and (7) of this section for each renewal period by June 30, 1997.

(6) Reciprocity. Certificates may be issued in a comparable classification, without examination, to a person who holds a valid certificate in a state, territory, or possession of the United States, or a country, if:

(a) The applicant filed a complete application as required in Section 3(1) of this administrative regulation;

(b) The certificate was earned by passing an examination in the

reciprocal state:

(c) ~~The requirements for certification [of operators] under which the [person's] certificate was issued are no less stringent than the provisions of KRS Chapters 223 and [KRS Chapter] 224 and this administrative regulation; and~~

(d) Reciprocal privileges are granted to certified operators of the commonwealth.

(7) Training requirements.

(a) Certified operators shall accumulate continuing education credits approved by the cabinet or board, prior to applying for certificate renewal.

~~[1. This subparagraph shall apply to operators whose certification expires on or before June 30, 1992. Class I operators shall complete six (6) hours of training for renewal. Class II, III, and IV operators shall complete twelve (12) hours of appropriate cabinet approved training for certificate renewal. Such training may include, but is not limited to, correspondence courses, short courses, trade association meetings, and on-the-job training courses. Training hours accumulated in excess of the minimum number required for renewal may be carried forward for two (2) years. No training is required for operators with limited certificates.~~

~~2. This subparagraph shall apply to operators whose certification expires after June 30, 1992. Class I and II certified operators shall complete twelve (12) hours of training during each two (2) year renewal period for certificate renewal. Class III and IV certified operators shall complete twenty-four (24) hours of training during each two (2) year renewal period for certificate renewal. Training includes, but is not limited to, correspondence courses, short courses, trade association meetings, and on-the-job training courses. [Training hours accumulated in excess of the minimum number required for renewal may be carried forward for two (2) years from the date earned. No] Training is suggested but not required for operators with limited certificates.~~

~~(b) [The board may waive any of the requirements of paragraph (a) of this subsection for all or portions of a class of operators, as identified in Section 7 of this administrative regulation.~~

~~(c) 1. This subparagraph shall apply to operators whose certification expires on or before June 30, 1992. Operators holding both treatment and distribution certificates shall be required to complete eighteen (18) hours of training for recertification in lieu of the requirements of subsection (7)(a)1 of this section.~~

~~2. This subparagraph shall apply to operators whose certification expires after June 30, 1992. Certified operators holding [with] separate [Class I and II] treatment and distribution certificates shall complete the [twelve (12) hours of] training for recertification required for only the highest certificate in lieu of the continuing education requirements specified for both certificates in paragraph (a) [of subsection (7)(a)2] of this subsection. [Certified operators holding separate Class III or IV treatment and distribution certificates shall complete twenty-four (24) hours of training for recertification in lieu of the continuing education requirements of subsection (7)(a)2 of this section.]~~

(c) Certified operators shall keep their own records of approved training, education, and work experience and shall be prepared to present the records if requested by the cabinet.

(d) Certified operators who teach board-approved training courses may receive, upon approval of the board, hour-for-hour credit for actual instruction time.

(e) The criteria for determining whether to approve training, other than the training provided by the cabinet, are:

1. The ability of the course to provide information that will enhance the proper operation and maintenance of water treatment and distribution systems; and

2. The ability of the instructor to properly present the information.

3. In making its determination regarding approval of training courses, the cabinet and board shall require that the following information be submitted for review: the course name; the date,

location and a timed agenda for the course; the credit hours being requested; a summary of the course content of sufficient detail to determine relevance and quality of the course; and the name and credentials of each instructor for the course.

4. The board or cabinet may attend and evaluate, or cause to be evaluated, all board-approved courses.

(f) All course administrators who provide board-approved training shall maintain records on each board-approved course conducted and shall submit the information in the records to the cabinet within thirty (30) days of the conclusion of the course. The information shall include, but not be limited to:

1. The course name;

2. The course number assigned by the cabinet;

3. The class date and location;

4. The name, certificate type and number, and hours attended by each operator; and

5. The course administrator's signature.

Section 5. Disciplinary Action. (1) A certified operator shall be subject to a disciplinary action identified in this section if the cabinet, in consultation with the board according to this section, determines that the individual [certified operator] has:

(a) Willfully or negligently violated or caused a violation of this administrative regulation;

(b) Submitted false or misleading information on any document provided to the cabinet, including applications for certification or renewal;

(c) Cheated on an examination, or violated confidentiality of examination questions;

(d) Used fraud or deception in the course of employment as an operator;

(e) Failed to use reasonable care or judgment in the course of employment as an operator, failed to apply knowledge or ability in the performance of duties, was incompetent in the performance of duties, or was unable to properly perform duties;

(f) Willfully or negligently caused or violated the requirements of KRS Chapters 223 or 224 or 401 KAR Chapter 8; or

(g) Willfully or negligently falsified or failed to maintain or submit, records required by 401 KAR Chapter 8, [practiced fraud or deception in obtaining certification or filing cabinet mandated reports; has not used reasonable care or judgment in the performance of duties; has failed to apply knowledge in the performance of duties; or is incompetent, unable or unwilling to properly perform duties.]

(2) ~~(4)~~ Sanctions. The disciplinary action shall be determined by the cabinet in accordance with the review procedures in subsection (3) ~~(2)~~ of this section, and may take the form of the following sanctions according to subsection (4) ~~(3)~~ of this section, depending on the severity, duration, and number of the violations. The sanctions may include, but are not limited to:

(a) Probation for a specified period of time, not to exceed one (1) year;

(b) Suspension of the operator's certificate for a specified period of time, not to exceed one (1) year, during which the certificate shall be considered void;

(c) Temporary or permanent revocation of the operator's certification (temporary revocations shall not be less than one (1) year or more than four (4) years in duration); or

(d) Civil or criminal penalties against the operator.

(3) ~~(2)~~ Initial review procedures. Written complaints received by the board or cabinet on a certified operator, unless duplicitous or frivolous, shall be reviewed at the next regularly scheduled board meeting. If the charges warrant further investigation, the certified operator may be advised to appear before the board to discuss the charges levied. Upon completion of the review, the board shall make a recommendation to the cabinet regarding the operator's certification status. The board may recommend that no action be taken or that the cabinet impose a sanction identified in subsection (2) ~~(4)~~ of this

section, or any other action.

(4) ~~{(3)}~~ Cabinet action. The cabinet shall review the evidence presented and the board's recommendations. Upon completion of the review, the cabinet will initiate the recommended action or notify the board as to why an alternative action was taken. The certified operator and his employer shall be advised by certified mail of the action, the reasons outlined for the action, and the length of time for which the sanction shall apply. A certified operator whose certificate has been suspended or revoked shall not perform responsible charge operator duties during the period that the disciplinary action remains in effect. If a certification is permanently revoked, the operator shall be ineligible for future certification as a water treatment plant or distribution system operator. Experience gained during a suspension or temporary or permanent revocation shall not be included toward meeting the requirements of Section 8 of this administrative regulation. An action taken by the cabinet pursuant to this administrative regulation shall not preclude the cabinet from pursuing additional civil or criminal action.

(5) ~~{(4)}~~ Sanction review and removal. During the operator's probation, suspension, or temporary revocation, the board and cabinet will monitor the operator's work activities. At the end of the sanction period, the board will recommend to the cabinet whether the sanction should be lifted or whether additional action is necessary against the certified operator.

(6) ~~{(5)}~~ Appeal procedures. An operator who considers himself aggrieved by the disciplinary action may file a petition for hearing with the cabinet pursuant to KRS 224.10-420(2).

Section 6. Classification of Water Treatment Plants and Water Distribution Systems. The classification system is structured with four (4) classes of water treatment plants, Class I, II, III, or IV, which includes two (2) subclasses of treatment types, A or B, and four (4) classes of water distribution systems, Class I, II, III, or IV. Class IV is the highest class and subclass A is the highest subclass. Combined treatment and distribution classifications also exist for Class I and II systems: Class IA-D, IB-D, and IIB-D. The class structure relates to and corresponds with the operator classifications outlined in Section 7 of this administrative regulation. Operators with separate treatment and distribution certifications may supervise a facility with a combined classification if the certificates are equal to or higher than the system classification.

(1) Public water system classifications [Classification. Classification] shall be established in accordance with the classes listed in subsections (2) and (3) of this section. However, the cabinet may make changes in classifications in accordance with needs created by particular complexities of a public water system by reason of special features of design, or by reason of a source of supply that has characteristics that may make operation more difficult than normal, or a combination of these conditions. Due notice of a change shall be given to the owner of the public water system.

(2) Water treatment plants or systems shall be classified as one (1) of four (4) classes, based on the cabinet-assigned design capacity for finished water production that the treatment plant is able to produce in twenty-four (24) continuous hours of production, taking all limiting factors into consideration, and the treatment process employed. Public water systems with more than one (1) treatment plant shall have each treatment plant classified in accordance with this section, and each plant shall be operated in accordance with Section 1 of this administrative regulation.

(a) The treatment plant classifications and designated capacities shall be:

1. Class I: All treatment plants which have an assigned design capacity of less than 50,000 gallons of water per day;

2. Class II: All treatment plants which have an assigned design capacity of 50,000 or more gallons of water per day but less than 500,000 gallons per day;

3. Class III: All treatment plants which have an assigned design

capacity of 500,000 or more gallons of water per day but less than 3,000,000 gallons per day; and

4. Class IV: All treatment plants which have an assigned design capacity of 3,000,000 or more gallons of water per day.

(b) Each class shall be subdivided according to the type of treatment used by the plant. The subclasses shall be:

1. A: Water treatment plants which use gravity filtration, except slow sand filtration as described in 401 KAR 8:150, as a part of their treatment scheme; and

2. B: Water treatment plants which use treatment processes other than gravity filtration. This includes the use of slow sand filtration as described in 401 KAR 8:150 for Class I and II water treatment plants.

(c) Combination treatment and distribution system classifications. Class IA-D, IB-D, and IIB-D systems shall be classified as combined treatment and distribution systems.

(3) Water treatment plant or system classifications.

(a) Class I.

1. Class IA-D. Systems which have an assigned design capacity of less than 50,000 gallons of water per day using gravity filtration, except for slow sand filtration, as a part of their treatment scheme and are responsible for the distribution of treated water. [Plants using only physical treatment and disinfection, if the treatment plant operator is also responsible for the distribution system, and which serve a population less than 500.]

2. Class IB-D. Systems which have an assigned design capacity of less than 50,000 gallons of water per day using slow sand filtration or treatment processes other than gravity filtration, and are responsible for distribution of treated water. [Plants using only disinfection, if the treatment plant operator is also responsible for the distribution system, and which serve a population less than 500.]

(b) Class II:

1. Class IIA. Plants which have an assigned design capacity of 50,000 or more gallons of water per day but less than 500,000 gallons per day using gravity filtration, except slow sand filtration, as a part of their treatment scheme. [using physical and chemical treatment, including disinfection, and serving a population less than 3,000.]

2. Class IIB-D. Systems which have an assigned design capacity of 50,000 or more gallons of water per day but less than 500,000 gallons per day using slow sand filtration or treatment processes other than gravity filtration, and are responsible for the distribution of treated water. [Plants using only physical treatment and disinfection, if the treatment plant operator is also responsible for the distribution system, and which serve a population equal to or greater than 500 but less than 3,000.]

3. Class IIC-D. Plants using only disinfection, if the treatment plant operator is also responsible for the distribution system, and which serve a population equal to or greater than 500 but less than 3,000.]

(c) Class III:

1. Class IIIA. Plants which have an assigned design capacity of 500,000 or more gallons of water per day but less than 3,000,000 gallons of water per day using gravity filtration, except slow sand filtration, as a part of their treatment scheme. [using physical and chemical treatment, including disinfection, and serving a population equal to or greater than 3,000 and less than 15,000.]

2. Class IIIB. Plants which have an assigned design capacity of 500,000 or more gallons of water per day but less than 3,000,000 gallons of water per day using treatment processes other than gravity filtration. [using only physical treatment and disinfection, and serving a population equal to or greater than 3,000 and less than 15,000.]

3. Class IIIC. Plants using only disinfection, and serving a population equal to or greater than 3,000 and less than 15,000.]

(d) Class IV.

1. Class IVA. Plants which have an assigned design capacity of 3,000,000 or more gallons of water per day using gravity filtration, except slow sand filtration, as a part of their treatment scheme.

2. Class IVB. Plants which have an assigned design capacity of 3,000,000 or more gallons of water per day using treatment processes other than gravity filtration. ~~(serving a population equal to or greater than 15,000.)~~

(4) ~~(3)~~ Water distribution systems. Populations shall be determined as specified in 401 KAR 8:200.

(a) Class ID. Distribution systems serving a population less than 1,500.

(b) Class IID. Distribution systems serving a population equal to or greater than 1,500 and less than 15,000.

(c) Class IIID. Distribution systems serving a population equal to or greater than 15,000 and less than 50,000.

(d) Class IVD. Distribution systems serving a population equal to or greater than 50,000.

(5) ~~(4)~~ Limited. A limited classification is available to water treatment facilities for schools and semipublic water systems.

(6) ~~(5)~~ Special. Special designations may be added to any certificate if necessary to show competency of the operator for a parameter of treatment or operation not covered by the basic requirements for standard classification set forth in this section.

Section 7. Classification of Water Treatment Plant and Water Distribution System Operators. Thirteen (13) subclasses ~~Nine (9) classes~~ of certified operators are established and designated as Class I through Class IV for water treatment, Class I through Class IV for distribution, and limited. Each operator classification, except for limited, relates directly to the corresponding classification of water treatment plant or water distribution system outlined in Section 6 of this administrative regulation.

Section 8. Operator Qualifications: Experience, Education and Equivalencies. (1) Requirements. Applicants shall be examined by the cabinet regarding education, experience, and knowledge, as related to the classification of water treatment plants or water distribution systems for which the application applies. Applicants shall pass the required written examination unless granted a waiver to take an oral examination in accordance with Section 3(2) of this administrative regulation.

(2) Classification of water treatment plant operators. Operators shall comply with the experience and educational requirements of this subsection prior to applying for certification.

(a) Class IA-D ~~and Class IB-D~~:

1. Completion of high school or general education development (GED) efficiency; and

2. One (1) year of acceptable operation of a Class IA-D or higher public water system.

(b) Class IB-D:

1. Completion of high school or GED efficiency; and

2. One (1) year of acceptable operation of a Class IB-D or higher public water system.

(c) Class IIA:

1. Completion of high school or GED efficiency; and

2. Two (2) years of acceptable operation of a public water treatment plant [system], with six (6) months of that experience in a Class IIA, IIIA or IVA treatment plant.

(d) ~~(e)~~ Class IIB-D ~~and Class IIC-D~~:

1. Completion of high school or GED efficiency; and

2. ~~[For Class IIB-D,]~~ Two (2) years of acceptable operation of a public water system, with six (6) months of that experience in a Class IA-D [IIA], IIB-D, or higher [IIIA, IIIB, or IVA] treatment system. [plant, or

3. For Class IIC-D, two (2) years of acceptable operation of a public water system with six (6) months in a Class II, III or IV water treatment plant.]

(e) ~~(d)~~ Class IIIA:

1. Completion of high school or GED efficiency; and

2. Three (3) years of acceptable operation of a public water

treatment plant ~~[system]~~ with one (1) year in a Class IIA, IIIA, or IVA water treatment plant.

(f) ~~(e)~~ Class IIIB:

1. Completion of high school or GED efficiency; and

2. Three (3) years of acceptable operation of a public water treatment plant [system] with one (1) year in a Class IIA, IIB-D, IIIA, IIIB, ~~(or)~~ IVA, or IVB water treatment plant.

~~(f)~~ Class IIIC:

1. Completion of high school or GED efficiency; and

2. Three (3) years of acceptable operation of a public water system with one (1) year in a Class II, III, or IV water treatment plant.]

(g) Class IVA:

1. A baccalaureate degree from an accredited college or university; and

2. Three (3) years of acceptable operation of a public water treatment plant [system], with two (2) years of that experience being in a Class IIIA or IVA water treatment plant.

(h) Class IVB:

1. A baccalaureate degree from an accredited college or university; and

2. Three (3) years of acceptable operation of a public water treatment plant, with two (2) years of that experience being in a Class IIIA, IIIB, IVA, or IVB water treatment plant.

(i) Limited: An operator of a water treatment facility for a school or for a semipublic water supply shall be entitled to apply for a limited certificate of competency for his particular facility, if he has demonstrated to the cabinet that he has the knowledge and experience required to properly operate the particular water treatment facility for which he is responsible.

(3) Classification of water distribution system operators. Operators shall comply with the experience and educational requirements of this subsection prior to applying for certification.

(a) Class ID:

1. Completion of high school or GED efficiency; and

2. One (1) year of acceptable operation of a distribution system.

(b) Class IID:

1. Completion of high school or GED efficiency; and

2. Two (2) years of acceptable operation of a distribution system with six (6) months in a Class IID, IIID or IVD distribution system.

(c) Class IIID:

1. Completion of high school or GED efficiency; and

2. Three (3) years of acceptable operation of a distribution system, with one (1) year of that experience in a Class IID, IIID or IVD distribution system.

(d) Class IVD:

1. A baccalaureate degree from an accredited college or university; and

2. Three (3) years of acceptable operation of a distribution system, with one (1) year of that experience being in a Class IIID or IVD distribution system.

(4) Substitutions.

(a) If applicable, education may be substituted for a portion of the required experience, as specified below:

1. No substitution for Class I.

2. Successful completion of one (1) year of college work ~~[[limited to curricula in environmental engineering, environmental technology or related scientific fields]]~~ may be considered as equivalent to one (1) year of experience, limited to one (1) year for Class II, two (2) years for Class III, and two (2) years for Class IV.

3. Education applied to the experience requirement shall not be applied to the educational requirement or used as continuing education hours toward certification renewal.

(b) If applicable, the cabinet may authorize experience to be substituted for education requirements as specified below:

1. One (1) year experience in active operation of a water system at a Class II level or above shall be considered equivalent to one (1) year of college. Four (4) years of experience may be substituted for

the requirement of a college degree by a high school graduate or recipient of a GED.

2. One (1) year of board-approved experience may be considered equivalent to one (1) year of high school. Four (4) years of board-approved experience may be considered equivalent to a high school diploma or a GED, subject to the approval of the board. Operators requesting this substitution shall submit a written request to the cabinet and may be requested to appear before the board.

3. Experience applied to education requirements shall not be applied to the experience requirement.

(c) Substitutions of related experience for treatment plant and distribution experience.

1. Experience gained in distribution system operation may be credited toward fulfillment of the treatment plant experience requirement as follows: two (2) years of distribution experience [~~in a related field~~] may be considered equivalent to one (1) year of treatment experience.

2. Experience gained in drinking water treatment plant operation may be credited toward fulfillment of the distribution system experience requirements as follows: one (1) year of drinking water treatment experience [~~in a related field~~] may be considered equivalent to one (1) year of distribution experience.

3. Partial credit, as determined by the board, may be given for operating experience in maintenance, laboratories, other work of drinking water treatment or distribution systems and allied trades.

(d) Substitutions for formal education may be as follows: Training earned at [~~credits for~~] board-approved operator training schools, seminars and technical courses may be substituted for high school and college requirements upon approval of the board. One (1) year of college work shall equal thirty (30) semester hours or forty-five (45) quarter hours. Six (6) classroom hours of board-approved courses shall equal one (1) training credit, and forty-five (45) training credits shall equal eighteen (18) semester hours of college or one (1) year of high school. One (1) continuing education unit (CEU) shall equal ten (10) classroom [~~training credit~~] hours.

Section 9. Documents Incorporated by Reference. The following documents are incorporated by reference and are available for public inspection and copying, subject to the copyright laws, between the hours of 8 a.m. and 4:30 p.m. Monday through Friday, at the Division of Water, 14 Reilly Road, Frankfort Office Park, Frankfort, Kentucky 40601:

(1) "Drinking Water or Wastewater Operator Certification Application", "DEP 6047 (8/96)", available from the Kentucky Natural Resources and Environmental Protection Cabinet, Division of Water, Frankfort, Kentucky [~~January 1992~~].

(2) "Application for Certificate Renewal," "DEP 6007 (8/96)", available from the Kentucky Natural Resources and Environmental Protection Cabinet, Division of Water, Frankfort, Kentucky [~~January 1992~~].

JAMES E. BICKFORD, Secretary

REGULATORY IMPACT ANALYSIS

Contact Person: Jack A. Wilson, Director

(1) Type and number of entities affected: This administrative regulation establishes the program for the certification of water treatment plant and water distribution system operators. The regulation is being amended under an emergency regulation primarily to change the basis for the classification of water treatment plants and to allow facilities an extension of time to meet staffing requirements if certain conditions are met. The amendments to this regulation will affect approximately 770 public water systems, and 3,029 certified operators of those public water systems. This amendment will also

affect all future applicants for certification. Approximately 300 new applicants test for drinking water treatment or distribution certifications annually.

(2) Direct and indirect costs or savings on the affected entities: The most significant revision to this regulation changes the classification of public water treatment plants from a population/treatment techniques based system to one based on the treatment plant's design capacity and treatment techniques employed. Every effort has been made to avoid disruption of the current classification system, however, some facility classifications may change. Of the 770 public water systems, approximately 104 systems will be reclassified to a lower level and 57 systems will receive a higher classification. Those receiving a higher classification may request approval of a provisional staffing plan which will allow up to a two year extension for securing a properly certified staff.

(a) Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: Although this is an emergency regulation and no formal hearing has occurred yet, the cabinet requested input from various impacted groups during the development of this regulation, including representatives of the Rural Water Association, Kentucky Water and Wastewater Operators Association, Kentucky Board of Certification of Drinking Water Treatment and Distribution System Operators, Kentucky Board of Wastewater System Operators, American Water Works Association, and Kentucky League of Cities. This regulation is implemented statewide. The regulation currently specifies certified operator staffing levels for each class of water treatment plant and distribution system. The changes proposed actually relax the staffing requirements for certain facility classes. Since certified operators command higher wages due to education and operational experience within a drinking water or wastewater system, the changes imposed could result in a net reduction in the number of operators required.

(b) Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: Public comment has been solicited from several impacted groups, however, this is an emergency regulation and no formal hearing has occurred yet. (See also (2)(a).) If a system does not currently employ a staff sufficient to meet the regulatory staffing requirements, additional certified staff will need to be hired. This will increase the operation and maintenance costs of the facility. This should not be an unanticipated cost, however, due to the current regulatory standards for staffing and the assumption that treatment facilities cannot operate "automatically." The changes relax the existing staffing requirements for certain facility classes. Taking into consideration the classification changes identified in this regulation, the required number of operators will decrease by approximately 41. Assuming a statewide annual salary of \$21,000, this amendment could potentially result in a statewide decrease of \$861,000 in the cost of doing business.

(c) Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition), to the extent available from the public comments received, for the: The reporting requirements referenced below require extra time and effort on the part of public water systems but the information requested should be readily available within the system and the costs should be minimal.

1. First year following implementation: Public comment has been solicited from several impacted groups, however, this is an emergency regulation and no formal hearing has occurred. (See also (2)(a).) Public water systems are required to notify the cabinet within 30 days of certified operator employment changes. Previously, systems only had to report to the cabinet when an operator died or became permanently incapacitated. The amendments to this regulation allow facilities in violation of the on-site staffing requirements an extension to comply with the on-site staffing requirements if the systems are otherwise in compliance with the requirements of 401 KAR Chapter

8. Facilities must comply within 90 days or request approval of a provisional staffing plan. The provisional staffing plan shall demonstrate how the system will meet the staffing requirements within a two year period and protect public health and safety throughout the compliance period.

2. Second and subsequent years: Additional reporting and paperwork requirements include:

a. Training course administrators, which include public water systems, professional trainers, operator associations, etc., must submit, within 30 days of completion, a list of course attendees.

b. Public water systems which secure a contract operator must submit information to identify the certified operator in responsible charge, facilities for which he is responsible, duties assigned to all parties, and the effective date and expiration date of the contract.

(3) Effects on the promulgating administrative body: The primary change to this regulation is a revision of the classification system. This will require some computer programming changes and notification of facility class changes. Examinations utilized to test operators for certification will have to be revised to reflect the new/revised classifications. Several new facility reporting requirements are included within the regulation. Much of the information required is already being submitted but in a haphazard manner. While the cabinet will have to handle and process the information, less staff time should be expended if the reports are complete.

(a) Direct and indirect costs or savings: Minor costs and no savings are anticipated.

1. First year: The cabinet will have to review within 90 days all provisional staffing plans submitted to determine if the system is eligible and if approval of the plan can be granted. It is estimated that initially 150 systems will request this approval.

2. Continuing costs or savings: N/A

3. Additional factors increasing or decreasing costs: None

(b) Reporting and paperwork requirements: The cabinet presently maintains a database of all applicants for certification and certified operators, conducts and documents training for each operator, and tests them for competency. Those who pass the test are issued a certificate and wallet card for the respective classification. These practices will continue under this regulation. As previously referenced, the changes require several new reports of the regulated community. Submittal of these reports should actually reduce the staff time spent on tracking due to the haphazard manner in which the information is currently submitted.

(4) Assessment of anticipated effect on state and local revenues: The amendments to this regulation will not affect state and local revenues.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: The cabinet uses operator fees and monies appropriated by the Kentucky General Assembly to administer this program.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: Public comment has been solicited from impacted groups, however, this is an emergency regulation and no formal hearing has occurred. (See also (2)(a).) This regulation is implemented statewide. The regulation has no effect on economic activities, except to the extent that the availability of a high quality water supply facilitates economic development.

(b) Kentucky: This regulation is implemented throughout Kentucky. The regulation has no effect on economic activities, except to the extent that the availability of a high quality water supply facilitates economic development.

(7) Assessment of alternative methods; reasons why alternatives were rejected: Various methods for the classification of public water system operators have been considered. The alternative methods considered for this amendment include: a rating system based on the

water treatment techniques utilized, a system based on population served, plant design capacity, or a combination of these. The first alternative would require the establishment of a rating system and a review of all the treatment techniques utilized by each system. The classification required would be based on information compiled by the system and/or cabinet staff. This alternative is more detailed than the present system and can easily prompt class changes and inconsistencies so it was rejected as overly costly and disruptive. The second method, which was utilized prior to implementation of the emergency regulation, was causing plant classification increases, due to simple treatment process changes and/or line extensions to serve additional customers. The third focuses primarily on the design capacity of the plant and whether the water is filtered as part of the treatment process. Conversion to a design capacity based system allows the cabinet to advise the system during the plans review of the type and number of operators required for the facility. Use of the design capacity and only one aspect of the treatment process will prevent systems from receiving a new classification due to a water line extension and a chemical change within the treatment process. This method was selected to alleviate sudden facility class changes and allow classification changes to be identified during the facility planning stage.

(8) Assessment of expected benefits of the administrative regulation: Training and testing operators helps assure a high quality of drinking water for customers of public water systems and protects public health. Certified operators can also extend the life of the water system through proper operation and maintenance. The reclassification of water treatment plants from a population based system to one based on design capacity will prevent systems from suddenly being moved into a higher class due to population growth with no change in their treatment process.

(9)(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: A well-trained and competent group of public water system operators helps assure public water system consumers of a high quality, healthful product. Sound infrastructure is also necessary to support economic development initiatives. Public water systems which are not operated properly can result in numerous problems for the consumers of water. These can range from the discoloration of clothes washed in improperly treated water, to gastrointestinal illness, and in extreme cases, death. Inexperienced operators can also operate a facility in a manner which increases the day-to-day cost of operation (i.e., electrical and chemical costs) and/or reduce the life of the facility.

(b) State whether a detrimental effect on environment and public health would result if not implemented: No, not directly as a result of implementing this regulation, although improperly treated water affects the public's health, see above.

(c) If detrimental effect would result, explain detrimental effect: N/A

(10) Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: No statute, administrative regulation, or government policy is in conflict with this administrative regulation.

(a) Necessity of proposed regulation if in conflict: No conflict exists.

(b) If in conflict, was effort made to harmonize the proposed administration regulation with conflicting provisions: No conflict exists.

(11) Any additional information or comments: None

(12) TIERING: Is tiering applied? Yes, tiering is applied. Different operator classifications require varying levels of training and experience for certification. Also, the plant classifications are tiered to reflect the design capacity of the treatment plant, the complexity of the treatment process, and the water source. The facility classification also establishes the operator coverage required taking into consideration the number of hours drinking water is treated. Depending on storage capacity, a higher class facility may be required to employ more operators than a smaller system to maintain coverage.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part or division of local government this administrative regulation will affect. This regulation affects public water systems, many of which are owned or controlled by local government.

3. State the aspect or service of local government to which this administrative regulation relates. This regulation affects public water systems. It requires such systems to have their water treatment plant and/or distribution system operated by properly certified operators.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impact of the administrative regulation. The amendments to this regulation are intended to clarify the requirements and streamline the process by which operators are certified into a higher classification of system. Public water systems are currently required to employ certified operators. Systems which are not in compliance with the regulatory staffing requirement will incur the cost of testing and/or hiring a properly certified operator(s). The costs incurred will depend on many factors including the geographic area of the state in which the facility is located, facility classification, and hours of water treatment. As an example of a worst-case scenario, Class IIIA and IVA water treatment plants which represent the largest, full chemical treatment plants, are required to have a properly certified operator on-site when water is being treated. Assuming that a system does not have any properly certified operators and treats water 24 hours per day, seven days a week, the system would need five operators working 40 hours to maintain shift and backup coverage. Assuming that five operators must be hired at an annual salary of \$21,000, the base cost to a local government would be \$105,000. Class IIA facilities require operator coverage of the daytime shift which requires two operators at a cost of \$42,000 if water is treated seven days a week. Class IA-D, IB-D, IIB-D, IIIB, and IVB systems which serve smaller populations and/or physically treat the water require an operator to be in responsible charge of the system but not necessarily on-site, all day, everyday. This allows for a part-time operator as long as water quality standards of 401 KAR Chapter 8 are maintained. The impact on Class II or higher systems could be alleviated by the amendments which allow for qualified systems to use a provisional staffing plan (see below). It should be noted, however, that the overall effect of the classification changes will result in the need for 41 fewer certified operators.

Revenues (+/-): None

Expenditures (+/-): Public water systems are already required to have properly certified operators. If the system does not have sufficient staff or will be changed to a higher classification, additional operators may need to be certified and/or employed. The regulation allows for approval of a provisional staffing plan, however, which will allow facilities which are currently in compliance with drinking water standards up to two years for securing the appropriate staff.

Other explanation: None

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. The Safe Drinking Water Act Amendments of 1996, enacted August 6, 1996 (Pub. L. 104-182), include a provision for the certification of operators of public water systems. The regulations to implement this section are required no later than 30 months after enactment of the law. Therefore, although there is a federal statute (42 USC 300g-8), presently there is no federal regulation relating to the certification of operators.

2. State compliance standards. N/A

3. Minimum or uniform standards contained in the federal mandate. None

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements than those required by the federal mandate? N/A

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. N/A

STATEMENT OF EMERGENCY
502 KAR 45:055E

This administrative regulation amendment is necessitated in order to bring it into harmony with all other administrative regulations that govern the application process. This amendment provides for this and an emergency exists as the selection process will culminate with conditional offers of employment being made as soon as December 1, 1996. This administrative regulation will be replaced by an ordinary administrative regulation to be filed in accordance with KRS Chapter 13A.

PAUL E. PATTON, Governor
GARY W. ROSE, Commissioner

JUSTICE CABINET
Department of State Police

502 KAR 45:055E. Oral interview.

RELATES TO: KRS 16.050

STATUTORY AUTHORITY: KRS 16.050

EFFECTIVE: October 15, 1996

NECESSITY, FUNCTION, AND CONFORMITY: KRS 16.050 requires the State Police Personnel Board to establish open competitive examination of applicants for employment as officers. This administrative regulation establishes the oral interview component of the examination.

Section 1. (1) An appropriate number of applicants who have completed the CBTT shall be eligible to participate in the oral interview component of the selection process. Oral interviews shall be conducted by oral interview panels appointed by the commissioner, who shall determine the number of applicants to be interviewed. The commissioner shall determine the number of applicants to be interviewed based upon the number of available vacant funded positions and the projected attrition rates as candidates advance through the selection process. Applicants shall be selected for interviews in rank order as determined by their combined scores on the written examination and the CBTT. The commissioner may deviate from the rank order of score only when necessary to correct a manifest imbalance in the representation of minorities or women in the pool of qualified applicants, and there exists a manifest imbalance of minorities or women in the department.

(2) Each oral interview panel shall consist of three (3) members, at least one (1) of whom shall be a female or a member of a minority group, and at least one (1) of which shall be a sworn officer. To ensure fairness and consistency, panel members shall receive training related to interview methodology and equal employment opportunity law.

(3) Members of the oral interview panels shall disclose each instance in which they are personally acquainted with an applicant to be interviewed or with any member of the applicant's immediate family, and that applicant shall be interviewed by another panel.

Section 2. (1) Each interview shall be structured so that all applicants are asked the same initial questions and rated in the same manner, although panel members may ask supplementary questions

if they deem it necessary.

(2) Each applicant interviewed shall be scored in each of five (5) categories by each panel member. The categories shall be:

- (a) Maturity, emotional stability and ego strength;
- (b) Conscientiousness and persistence;
- (c) Social boldness and venturesomeness;
- (d) Self-assuredness; and
- (e) Self-discipline.

For each category, the applicant shall be scored on a range from zero to six (6), with six (6) being the highest score and zero being the lowest score.

(3) The oral interview score shall constitute sixty (60) ~~forty (40)~~ percent of the overall score. As soon as practicable after the oral interview, each applicant shall be advised of his score and ranking, and may be requested to inform the department in writing as to whether the applicant wishes to continue to participate in the selection process by consenting to a background investigation.

REGULATORY IMPACT ANALYSIS

Agency Contact Person: Jean Ann Gabbard, Personnel Manager

(1) Type and number of entities affected: All applicants for the position of cadet trooper with the Department of State Police.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: None anticipated.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: None seen.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition): No significant compliance, reporting or paperwork changes are anticipated.

1. First year following implementation: Minor

2. Second and subsequent years: Minor

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings: No significant costs, program is completed. Savings anticipated in processing of applicants.

1. First year: Minor

2. Continuing costs or savings: All procedures in place at this time. Savings in processing will offset any costs.

3. Additional factors increasing or decreasing costs: Not applicable.

(b) Reporting and paperwork requirements: No additional reporting or paperwork requirements will be created by this administrative regulation.

(4) Assessment of anticipated effect on state and local revenues: No significant impact seen.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: Current, budgeted funds are to be used for implementation. There are no enforcement costs.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on: There is no economic impact anticipated at this time.

(a) Geographical area in which administrative regulation will be implemented: Not applicable.

(b) Kentucky: Not applicable.

(7) Assessment of alternative methods; reasons why alternatives were rejected: No viable alternatives were proposed.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: None

(b) State whether a detrimental effect on environmental and public health would result if not implemented: No

(c) If detrimental effect would result, explain detrimental effect: None

(9) Identify any statute, administrative regulation or governmental policy which may be in conflict, overlapping, or duplicative:

(a) Necessity of proposed regulation if in conflict: None

(b) If in conflict, was effort to harmonize the proposed administrative regulation with conflicting provisions: None

(10) Any additional information or comments: This amendment is designed to ensure that the selection process is specific as to job requirements and business necessity.

(11) Tiering: Is tiering applied? No. This regulation applies only to applicants for the position of cadet trooper.

STATEMENT OF EMERGENCY

787 KAR 1:320E

Under KRS Chapter 13A, the administrative body is required to implement this administrative regulation in order to have sufficient authority for the prioritizing of deductions from unemployment benefit payments. Section 702(b) of PL 103-465 amended federal law to require state law to provide for the voluntary withholding of federal income tax from unemployment compensation. Specifically, new paragraph (18) of Section 3304(a) of the Federal Unemployment Tax Act was added to require, as a condition for employers in a state to receive credit against the federal unemployment tax, that: "Federal individual income tax from unemployment compensation is to be deducted and withheld if an individual receiving such compensation voluntarily requests such deduction and withholding." This administrative regulation establishes the priority of deductions from unemployment benefits if deductions and withholding from benefit payments are required under more than one (1) statute or for more than one (1) purpose and must be instituted prior to implementation of voluntary withholding January 1, 1997. These time constraints necessitate the promulgation of an emergency administrative regulation. This emergency administrative regulation shall be replaced by an ordinary administrative regulation. The Notice of Intent for 787 KAR 1:320 will be filed with the Regulations Compiler by October 15, 1996.

PAUL E. PATTON, Governor

RODNEY S. CAIN, Secretary

WORKFORCE DEVELOPMENT CABINET

Department for Employment Services

Division of Unemployment Insurance

787 KAR 1:320E. Priority of deductions from benefits.

RELATES TO: KRS 341.391

STATUTORY AUTHORITY: KRS 151B.020, 341.115

EFFECTIVE: October 3, 1996

NECESSITY, FUNCTION, AND CONFORMITY: KRS 341.391(4) provides that amounts shall be deducted and withheld from benefit payments in accordance with priorities established in administrative regulation by the secretary. This administrative regulation establishes the priority of deductions from benefits.

Section 1. If deductions and withholding from benefit payments are required under more than one (1) statute or for more than one (1) purpose, the priority for deduction shall be as follows:

(1) Deduction of wages, remuneration in lieu of notice and pension compensation as required under KRS 341.390.

(2) Deduction for recoupment of a previous overpayment as

required under KRS 341.415.

(3) Child support obligations as required under KRS 341.392.

(4) Any other mandatory deduction imposed under any federal or Kentucky statute or administrative regulation.

(5) Voluntary withholding of income tax requested by a claimant as provided under KRS 341.391.

REGULATORY IMPACT ANALYSIS

Contact Person: Beverly Haverstock

(1) Type and number of entities affected: Potentially, all unemployment insurance claimants should all choose to have income tax deducted.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: None

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: None

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Reduces claimant need to make estimated federal income tax payments.

2. Second and subsequent years: Reduces claimant need to make estimated federal income tax payments.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings: None resulting from this administrative regulation.

1. First year:

2. Continuing costs or savings:

3. Additional factors increasing or decreasing costs:

(b) Reporting and paperwork requirements: Claimants electing income tax withholding will be furnished an accounting of the amount withheld.

(4) Assessment of anticipated effect on state and local revenues: None

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: U.S. Department of labor administrative funding.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on: None

(a) Geographical area in which administrative regulation will be implemented:

(b) Kentucky:

(7) Assessment of alternative methods; reasons why alternatives were rejected: Not applicable.

(8) Assessment of expected benefits: Not applicable.

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky:

(b) State whether a detrimental effect on environment and public health would result if not implemented:

(c) If detrimental effect would result, explain detrimental effect:

(9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: None

(a) Necessity or proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions:

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied? Tiering was not applied as

federal law requires that mandatory deductions consistently take precedence over voluntary income tax deductions.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. Section 3304(a)(18), Federal Unemployment Tax Act (FUTA).

2. State compliance standards. This administrative regulation establishes the priority of deductions from unemployment benefits if deductions and withholding from benefit payments are required under more than one statute or for more than one purpose. The priority of such deductions shall be as follows: (1) deduction of wages, remuneration in lieu of notice and pension compensation as required under KRS 341.390; (2) deduction for recoupment of a previous overpayment as required under KRS 341.415; (3) child support obligations as required under KRS 341.392; (4) any other mandatory deduction imposed under any federal or Kentucky statute or administrative regulation; and, (5) voluntary withholding of income tax requested by a claimant as provided under KRS 341.391.

3. Minimum or uniform standards contained in the federal mandate. Section 702(b) of PL 103-465 amended federal law to require state law to provide for the voluntary withholding of federal income tax from unemployment compensation. New paragraph (18) of Section 3304(a), Federal Unemployment Tax Act (FUTA) was added to require that "federal individual income tax is to be deducted and withheld from unemployment compensation if an individual receiving such compensation voluntarily requests such deduction and withholding."

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? No

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? No

2. State what unit, part or division of local government this administrative regulation will affect.

3. State the aspect or service of local government to which this administrative regulation relates.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impact of the administrative regulation.

Revenues (+/-):

Expenditures (+/-):

Other Explanation:

STATEMENT OF EMERGENCY

803 KAR 25:036E

This emergency administrative regulation adopts a life expectancy table for use in workers' compensation cases. Pursuant to an amendment to KRS 342.260 enacted by the 1996 regular session of the Kentucky General Assembly, the Commissioner of the Department of Workers' Claims is required to adopt life expectancy tables published by the U. S. Department of Health and Human Services or other life tables developed by a qualified entity, as determined by the commissioner. It has been determined that an emergency exists that requires immediate action to prevent a threat to the public welfare. This emergency administrative regulation is necessary to provide immediate uniformity in workers' compensation cases in the computa-

REGULATORY IMPACT ANALYSIS

Contact Person: Marcy D. Ches

(1) Type and number of entities affected: Workers' compensation claimants, employers, the Special Fund, and their attorneys. Approximately 10,000 formal Applications for Adjustment of Claims are filed with the Department of Workers' Claims each year.

(2) Direct or indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments have been received.

(b) Cost of doing business in geographical area in which the administrative regulation will be implemented to the extent available from public comments received: No public comments have been received.

(c) Compliance reporting and paperwork requirements for the:

1. First year following implementation. No additional paperwork requirements are imposed upon the entities affected by this administrative regulation.

2. Second and subsequent years: Same as first year.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: Some additional cost for printing copies of the amended administrative regulation; not to exceed \$1,000.

2. Continuing costs or savings: Negligible

3. Additional factors increasing or decreasing costs: None known.

(b) Reporting and paperwork requirements: No additional requirements to the agency.

(4) Assessment of anticipated effect on state and local revenues: No effect.

(5) Source of revenue to be used for implementation and enforcement of this administrative regulation: The Kentucky Workers' Compensation Funding Commission pursuant to KRS 342.122.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: This administrative regulation will be implemented state wide, and also will affect Kentucky workers' compensation claimants who reside outside of Kentucky. No public comments have been received about any anticipated impact, but the amendments to this regulation should help to assure uniformity in the calculations made by the Special Fund and all administrative law judges.

(b) Kentucky: Same as (a), above.

(7) Assessment of alternative methods: Reasons why alternatives were rejected: KRS 342.260(2), as amended by the regular session of the 1996 Kentucky General Assembly, requires the commissioner to develop or adopt life expectancy tables for use in making computations for the apportionment of benefits, attorneys fees, and for use in all other situations arising under the Workers' Compensation Act in which the calculation of a life expectancy is necessary or desirable.

(8) Assessment of expected benefits:

(a) Identify effect on public health and environment welfare: No effect.

(b) State whether a detrimental effect would result if not implemented: No effect.

(c) Explain detrimental effect: Not applicable.

(9) Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping or duplication: None known.

(a) Necessity of proposed regulation if in conflict: Not applicable.

(b) If in conflict, was effort made to harmonize proposed administrative regulation with conflicting provisions: Not applicable.

(10) Any additional information or comments: None

(11) Tiering: Is tiering applied? Yes. The amount of Special Fund liability will depend upon the life expectancy of the claimant as well as the degree and type of injury. Attorneys' fees will be tiered based upon the amount of the award, which in total disability cases will be based in part on the life expectancy of the claimant. The calculation of reserves for self-insurers, likewise, will be tiered in accordance with the number of claims and the life expectancies of the claimants involved.

STATEMENT OF EMERGENCY

806 KAR 9:240E

This emergency administrative regulation confirms the applicability of licensure statutes and insurance consumer protections to financial institutions exercising their authority to sell insurance under the U.S. Supreme Court decision in Barnett Bank of Marion County, N.A. v. Nelson, 116 S.Ct. 1103 (1996), and the Department of Financial Institutions Parity Letter 96-2. The Department of Insurance needs this administrative regulation in place by September 20, 1996, to uniformly process agent applications by financial institutions and to ensure the protection of the insurance consumer due to the unique relationship of the financial institution insurance agent. This emergency administrative regulation shall be replaced by an ordinary administrative regulation to be filed at a later date.

PAUL E. PATTON, Governor

LAURA M. DOUGLAS, Secretary

GEORGE NICHOLS III, Commissioner

PUBLIC PROTECTION AND REGULATION CABINET

Department of Insurance

806 KAR 9:240E. Financial institutions licensed as noncredit related insurance agents.

RELATES TO: KRS 304.9-080, 304.9-130, 304.12-140, 304.12-150, 304.12-160, 304.12-170

STATUTORY AUTHORITY: KRS 304.2-110

EFFECTIVE: September 20, 1996

NECESSITY, FUNCTION, AND CONFORMITY: KRS 304.2-110 provides that the Commissioner of Insurance may make reasonable rules and administrative regulations necessary for or as an aid to the effectuation of any provision of the Kentucky Insurance Code. This administrative regulation confirms the applicability of licensure statutes and insurance consumer protections to financial institutions exercising their authority to sell insurance under the U.S. Supreme

Court decision in Barnett Bank of Marion County, N.A v. Nelson, 116 S.Ct. 1103 (1996), and the Department of Financial Institutions Parity Letter 96-2.

Section 1. Definitions. (1) "Financial institution" means a bank holding company, as defined in the Bank Holding Company Act of 1956, as amended, 12 USC sec. 1841, a bank, savings bank, savings and loan association, trust company, or any depository institution as defined by the Federal Deposit Insurance Act, in 12 USC sec. 1813(c)(1), any affiliate or subsidiary of any of the above, and any other individual, corporation, partnership, or association authorized to take deposits and make loans in the Commonwealth, including state banks exercising their authority under the Department of Financial Institutions Parity Letter 96-2; and

(2) "Insurance agency activities" means any activity relating to insurance other than credit life insurance, credit health insurance, or insurance of the interest of a real property mortgagee in mortgaged property, other than title insurance, for which a license as agent, solicitor, broker, or consultant is required pursuant to KRS Chapter 304.

(3) "Insurance information" means any information provided by a consumer in order to obtain insurance.

Section 2. All financial institutions located and doing business in a town the population of which does not exceed 5,000 inhabitants, as shown by the last preceding decennial census, its subsidiaries, or any officer, agent, representative, or employee thereof, may exercise its authority under 12 USC sec. 92 and be licensed to act as agent for any fire, life or other insurance company authorized pursuant to this chapter to engage in the business of insurance in the Commonwealth if:

(1) The financial institution or officer, agent, representative or employee thereof otherwise qualifies for licensure under all applicable provisions of KRS Chapter 304; and

(2) The licensee abides by all applicable provisions of KRS Chapter 304 and applicable administrative regulations.

Section 3. Notice of Free Choice of Agent or Insurer. A financial institution shall provide a written statement, signed or initialed by the consumer, to evidence compliance with KRS 304.12-150.

Section 4. Insurance Information. If the consumer voluntarily discloses or authorizes in a written statement, signed or initialed by the consumer, the disclosure of insurance information about the consumer to any person, the statement shall be an acknowledgment that the disclosure is not to the detriment of the consumer.

Section 5. Tying Arrangements Prohibited. (1) A financial institution licensed by the Department of Insurance to engage in insurance agency activities shall not in any manner issue insurance, extend credit, lease or sell property of any kind or furnish any service or fix or vary the consideration for any of the foregoing, on the condition or requirement:

(a) That the consumer shall obtain some additional insurance, credit, property, or service from the financial institution other than a loan, discount, deposit or trust service;

(b) That the consumer shall obtain some additional insurance, credit, property, or service from the financial institution, bank holding company of the financial institution, or any subsidiary of the bank holding company;

(c) That the consumer provide some additional insurance, credit, property, or service to the financial institution, other than those related to and usually provided in connection with a loan, discount, deposit, or trust service;

(d) That the consumer provide some additional insurance, credit, property, or service to a bank holding company of the financial institution, or to any other subsidiary of the bank holding company; or

(e) That the consumer shall not obtain some other insurance, credit, property, or service from a competitor of the financial institution, bank holding company of the financial institution, or any subsidiary of the bank holding company, other than a condition or requirement that the bank shall reasonably impose in a credit transaction to assure the soundness of the credit.

(2) A financial institution licensed by the Department of Insurance to engage in insurance agency activities shall notify the department in writing within ten (10) days of any final judgment or of any final administrative action by a federal agency authorized to enforce the anti-tying provisions which finds that the financial institution or any of its employees committed any the violation. Any the final judgment or final administrative action shall be deemed a violation of the Kentucky Insurance Code.

Section 6. Written Disclosures. Prior to the sale of any policy of insurance to a consumer, a financial institution shall provide to the consumer a written statement, signed or initialed by the consumer, that:

(1) The insurance offered by the financial institution is not a deposit;

(2) The insurance offered by the financial institution is not insured by the Federal Deposit Insurance Corporation or other government agency which insures deposits;

(3) The insurance offered by the financial institution is not guaranteed by the financial institution;

(4) The insurance is optional or, if required, that the insurance may be purchased from any insurance agent or insurer selected by the consumer which provides the same or equivalent coverage; and

(5) That not purchasing the insurance if it is optional, or that purchasing the insurance from another insurance agent or insurer if the insurance is required, will not in any way affect current or future credit decisions.

Section 7. Transaction Delay. An officer or employee of a financial institution shall not directly or indirectly delay or impede the completion of a loan transaction or any other transaction with a financial institution for the purpose of influencing a consumer's selection or purchase of any insurance.

Section 8. Referral fees. An employee of a financial institution may receive compensation for the referral of a consumer who seeks information about or to purchase any insurance product to a licensed person or for the provision of the telephone number of a licensed person who sells or provides information on the product only if:

(1) The employee receives the referral fee regardless of whether insurance coverage is sold;

(2) The referral compensation is a fixed amount;

(3) The referral compensation is a portion of a financial institution's program offering referral fees for other noninsurance products or services marketed by the financial institution; and

(4) The referral compensation is paid by the financial institution.

FILED WITH LRC: September 20, 1996 at 3 p.m.

REGULATORY IMPACT ANALYSIS

Contact Person: Julie P. Mix

(1) Type and number of entities affected: The department does not know how many financial institutions will apply for a license as an

insurance agent. At this time, several have expressed interest.

(2) Direct or indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: The department has not received public comments at this time.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: The department has not received public comments at this time.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects on competition) for the:

1. First year following implementation: This administrative regulation requires the filing of an application, and examination, where applicable, by all financial institutions interested in becoming licensed as an insurance agent.

2. Second and subsequent years: The only additional information filed with regard to this administrative regulation would occur if something in the original application changed.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: The department will have the responsibility of evaluating the applications and examinations of financial institutions. However, at this time, the department predicts the costs to be minimal since the volume of applications currently evaluated should not increase significantly. Additionally, the department will have the responsibility of evaluating consumer complaints regarding the financial institution agents. However, the increased cost is predicted to be minimal, in light of the volume of complaints presently investigated.

2. Continuing costs or savings: Unknown

3. Additional factors increasing or decreasing costs: The number of applicants and complaints received.

(b) Reporting and paperwork requirements: The department will have to review all applications for licensing and consumer complaints. The department will have to send an approval or rejection of licensing and a written resolution to complainants.

(4) Assessment of anticipated effect on state and local revenues: Minuscule increase in licensure revenue.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: The budget for the Department of Insurance will be used to implement this administrative regulation.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: No public comments have been received at this time.

(b) Kentucky: No public comments have been received at this time.

(7) Assessment of alternative methods; reasons why alternatives were rejected: This administrative regulation is necessary for the Department of Insurance to license financial institutions as insurance agents.

(8) Assessment of expected benefits: The department will be able to license financial institutions as insurance agents, in accordance with the U.S. Supreme Court decision. Consumers will enjoy full protection under the Insurance Code from the unique relationship of a financial institution insurance agent.

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: None

(b) State whether a detrimental effect on environment and public health would result if not implemented: None

(c) If detrimental effect would result, explain detrimental effect:

(9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: KRS

287.030(4).

(a) Necessity of proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: Parity Letter 96-2 sets aside the statutory prohibition of state banks selling most kinds of insurance in order to give Kentucky banks the same marketing capabilities that national banks were given in Barnett Bank of Marion County, N.A. v. Nelson.

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied: Tiering is not applied, because this administrative regulation will be applied equally to all financial institution applicants and agents.

STATEMENT OF EMERGENCY 902 KAR 47:080E

The administrative regulation 902 KAR 47:080E establishes requirements for training and certification for persons who perform lead hazard detection and abatement in target housing and child-occupied facilities. This administrative regulation is needed to comply with 1996 Ky. Acts ch. 168 "Lead Hazard Act", and Section 403 of the U.S. Environmental Protection Agency's (EPA) Toxic Substances Control Act (TSCA), 15 USC 2683. It is necessary to promulgate this emergency administrative regulation to comply with statutory requirements that these regulations shall be promulgated before October 1, 1996. This emergency administrative regulation shall be replaced by an ordinary administrative regulation.

Division of Environmental Health and Community Safety

902 KAR 47:080E. Training and certification requirements for individuals who perform lead hazard detection or lead hazard abatement.

RELATES TO: KRS 211.900 through 211.905, 211.990, 211.994, 217.801

STATUTORY AUTHORITY: 211.090, 211.180, 1996 Ky. Acts ch. 168, EO 96-862

EFFECTIVE: October 1, 1996

NECESSITY, FUNCTION, AND CONFORMITY: Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources, establishes and creates the Cabinet for Health Services, changes the name of the Department for Health Services to Department for Public Health, and places the Department for Public Health and its programs under the Cabinet for Health Services. 1996 Ky. Acts ch. 168 authorizes the Department for Public Health to promulgate administrative regulations relating to the training, testing requirements and procedures for certification of persons who perform or offer to perform lead hazard detection or lead hazard abatement in "target housing" or "child-occupied facilities".

Section 1. Definitions. As used in this administrative regulation:

(1) "Accredited training program" means a training program that has been accredited by the Department for Public Health to provide training for individuals engaged in lead hazard detection and abatement activities.

(2) "Certificate" means a document issued by the Department for Public Health affirming that the person who intends to engage in lead hazard detection or abatement activities has successfully completed the training and other requirements for such activities.

(3) "Certified" means that a person engaged in lead hazard

detection or abatement activity has successfully completed the required training through an accredited training program, completed other requirements established by the department, and has been issued a document of certification.

(4) The definition of "child-occupied facility" shall be governed by 1996 Ky. Acts ch. 168.

(5) "Department" means the Department for Public Health.

(6) "Discipline" means one (1) of the specific types or categories of lead hazard assessment and abatement activities for which individuals may receive certification such as lead hazard abatement worker, lead hazard inspector, lead hazard worker, and lead hazard project designer.

(7) "EPA" means the U.S. Environmental Protection Agency.

(8) "Lead hazard" means any condition that causes exposure to lead from lead-contaminated dust, soil, water or deteriorated paint which is present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

(9) The definition of "lead hazard abatement" shall be governed by 1996 Ky. Acts ch. 168.

(10) "Lead hazard company" means a company who employs only individuals that are department certified in a lead hazard discipline.

(11) "Lead hazard abatement worker" means a person who has been trained to perform physical lead hazard abatement activities.

(12) The definition of "lead hazard detection" shall be governed by 1996 Ky. Acts ch. 168.

(13) "Lead hazard inspector" means a person who has been trained in lead inspection by an accredited training program. An inspector also collects samples for analysis for the presence of lead in paint, dust, water and soil for the purpose of lead hazard detection, potential abatement or clearance testing.

(14) "Lead hazard project designer" means a person who has been trained by an accredited training program to prepare abatement plans, prepare occupant protection plans, and prepare abatement reports.

(15) "Lead hazard risk assessment" means an on-site investigation to determine the existence, nature, severity, location of lead hazards, and the provision of a report by the individual or firm conducting the risk assessment, explaining the results of the investigation and options for reducing the potential for lead exposure.

(16) "Lead hazard risk assessor" means a person who has been trained by an accredited training program to conduct risk assessments. A risk assessor also may sample for the presence of lead in paint, dust, and soil for the purpose of lead hazard detection, or conduct potential abatement and clearance testing.

(17) "Lead hazard supervisor" means a person who has been trained by an accredited training program to supervise and conduct abatements, and to prepare occupant protection plans and abatement reports.

(18) The definition of "target housing" shall be governed by 1996 Ky. Acts ch. 168.

(19) "Third-party exam" means an exam approved by the department that is administered by the department or its designated agent. This does not include course exams administered by an accredited training program.

Section 2. Scope and Application. This administrative regulation contains procedures and requirements for the certification of individuals engaged in lead hazard detection and abatement in target housing and child-occupied housing after July 1, 1997.

Section 3. Application for Certification. (1) An individual seeking certification by the department shall submit to the department the applicable fee, application and documentation demonstrating that he meets the requirements established in Section 4, or if applicable, Section 5 of this administrative regulation. The fee payment shall be according to the particular discipline for which certification is sought,

as specified in Section 7 of this administrative regulation.

(2) Following the submission of an application demonstrating that all requirements have been met and payment of the specified fee, the department shall certify an applicant as lead hazard inspector, risk assessor, supervisor, project designer, company, or abatement worker, as appropriate. The certification shall expire three (3) years after issuance. To maintain certification beyond three (3) years, an individual shall be recertified as described in Section 6 of this administrative regulation.

(3) Fees for certification shall not be imposed on department employees or its agents.

(4) Initial fees shall be submitted with each application in the form of check or money order, and be made payable to the Kentucky State Treasurer.

Section 4. Initial Certification. (1) A person who requests certification by the department shall provide documentation that he has:

(a) Successfully completed an accredited course in the appropriate discipline and received a course completion certificate from an accredited training program; and

(b) Except for lead hazard companies, successfully completed a third-party exam; and

(c) Met or exceeded the requirements for the appropriate discipline indicated as follows:

1. Lead hazard inspector discipline has no additional educational or experience requirements.

2. Lead hazard risk assessor.

a. Prior to taking the accredited risk assessor course, the person shall have successfully completed an accredited training course for inspectors; and

b. Have a bachelor's degree and one (1) year of experience in a related field dealing with lead, asbestos, or environmental remediation work, construction; or

c. Have an associate degree and two (2) years of experience in a related field dealing with lead, asbestos, or environmental remediation work, construction; or

d. Have certification as an industrial hygienist, professional engineer, registered architect, registered sanitarian or certification in another related engineering-health-environmental field (e.g., safety professional, environmental scientist); or

e. Have a high school diploma (or equivalent), and at least three (3) years of experience in a related field dealing with lead, asbestos, construction, or environmental remediation work.

3. Lead hazard supervisor.

a. Have one (1) year of experience as a certified lead hazard abatement worker; or

b. Have at least two (2) years of experience in a related field dealing with lead, asbestos, or environmental remediation work, or in the building trades.

4. Lead hazard project designer.

a. Prior to taking the accredited project designer course, the person shall have successfully completed an accredited training course for supervisors; and

b. Have a bachelor's degree in engineering, architecture, or a related profession, and one (1) year of experience in building construction and design or a related field; or

c. Have four (4) years of experience in building construction and design or a related field.

5. Lead hazard worker discipline has no additional experience or education requirements.

6. Lead hazard companies shall submit to the department a notarized affidavit from the company head affirming that all persons employed in the inspection, abatement, risk assessment, and other regulated lead program activities are certified by the department.

(2) Certain documents shall be provided to the department by the applicant as evidence of meeting certification requirements of a

ADMINISTRATIVE REGISTER - 1905

specific discipline. These documents are as follows:

- (a) Official academic transcripts, as evidence of meeting the educational requirements; and
- (b) Resumes, letters of reference, or documentation of work experience, as evidence of meeting the work experience, requirements; and
- (c) Course completion certificates from lead-specific or other related training courses, issued by accredited training programs, as evidence of meeting the training requirements.
- (d) Certification of the successful completion of a third-party examination.

Section 5. Certification Based on Other Training. (1) An individual who qualifies for reciprocity certification under 1996 Ky. Acts ch. 168 shall be issued a certification upon providing proof of certification in an EPA approved lead program state or tribe and the payment of the applicable fee to the department.

(2) Any individual who received training in lead hazard assessment and abatement activities before July 1, 1997 shall be eligible for certification by the department under the following conditions:

- (a) The applicant shall demonstrate that they have successfully completed EPA recognized training in the conduct of the appropriate lead-based paint activity;
 - (b) Demonstrate that they meet the education and experience requirements in Section 4(c) of this administrative regulation;
 - (c) Have successfully completed an EPA recognized refresher course, if the training course identified in paragraph (a) of this subsection was before July 1, 1995; and
 - (d) Have successfully completed a third-party exam; and
 - (e) Pay the applicable fee for the particular discipline, as designated in Section 7 of this administrative regulation.
- (3) The individual applicant shall have until July 1, 1997, to apply to the department for certification. After that date, all individuals wishing to obtain certification shall be required to meet all of the requirements indicated in Section 4 of this administrative regulation.

Section 6. Renewal and Recertification Requirements. (1) To maintain certification in a particular discipline, a certified person shall:

- (a) Submit an annual renewal fee; and
 - (b) Apply to department for recertification sixty (60) days prior to end of the three (3) year certification period.
- (2) Except for lead hazard companies the person shall have successfully completed the appropriate accredited refresher training course and submit a valid copy of the completion certificate.
- (3) The person shall pay the applicable fee as designated in Section 7 of this administrative regulation.
- (4) Lead hazard companies shall submit a new notarized affidavit certifying that all employees hold certification.

Section 7. Fee Schedule. The fee for application for certification shall be made to the department in the amount for the particular discipline as indicated below:

| Fee Schedule | | |
|---------------------------------|---|---|
| Discipline | Initial Certification Application Fee (Due upon application for initial certification) | Renewal Application (Due every year) |
| Lead Hazard Project Designer | \$250 | \$250 |
| Lead Hazard Risk Assessor | \$150 | \$150 |
| Lead Hazard Inspector | \$140 | \$140 |

| | | |
|----------------------------------|-------|-------|
| Supervisor | \$125 | \$125 |
| Lead Hazard Abatement Worker | \$100 | \$100 |
| Reissue of lost certification | \$25 | |

Section 8. Suspension, Revocation, Denial and Modification of Certifications. The department may revoke, suspend, deny or restrict the certificate of any holder for causes indicated in 1996 Ky. Act ch. 168 of this administrative regulation.

Section 9. Procedures for Suspension, Revocation, Denial or Modification of the Certification. If the department finds cause to suspend, revoke, deny or modify the certification of any individual or firm, it shall notify the affected entity in writing of the following:

- (1) The legal and factual basis for the suspension, revocation, denial, or modification;
- (2) The commencement date and duration of the suspension, revocation, or modification;
- (3) Action, if any, which the certified individual may take to avoid suspension, revocation, or modification or to receive certification in the future;
- (4) The opportunity and method for requesting a hearing prior to final department action; and
- (5) Any additional information, as appropriate, which the department may provide.

Section 10. Administrative Hearings. All administrative hearings shall be conducted in accordance with 902 KAR 1:400.

RICE C. LEACH, Commissioner

JOHN H. MORSE, Secretary

APPROVED BY AGENCY: September 27, 1996

REGULATORY IMPACT ANALYSIS

Agency Contact Person: David Nichols

(1) Type and number of entities affected: 1,000-2,000 in-state; 2,000-4,000 out-of-state (estimated) contractors, engineers, architects, construction workers, environmental health specialists, etc., who may desire certification to perform lead hazard detection and abatement services.

(2) Direct and indirect costs or savings to those affected:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comment received: As regulation applies statewide, and affected individuals are currently engaged in similar work activities relative to construction, renovation and remodeling on a local, regional or statewide basis, there should be no change for in-state individuals. For out-of-state individuals, providing lead hazard detection and abatement services in Kentucky may result in either costs or savings relative to their state of origin's costs.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comment received: For in-state individuals and firms costs will increase for those who choose to become certified. Cost increases involve receiving accredited training by third-party training providers (actual costs will vary depending on level of training, training site location, etc.), and certification cost for initial application and annual renewal (based on discipline level of certification desired). For out-of-state individuals and firms cost increases would be the same as above, in addition to any costs imposed by any other state or local governmental agencies for permission to do business within their jurisdiction. Actual cost to an individual/firm to attain and maintain certification and conduct business on an annual basis, is unknown due to start-up nature of the program and the highly variable

nature of their specific circumstances.

(c) Compliance reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Reporting and paperwork will increase for those individuals and firms who choose to become certified. Proof of training documents, initial application for certification form, and application for annual renewal, will be generated by all certification recipients; higher certification levels will also generate inspection/abatement plan reports, lab test reports, clearance reports, etc., directly related to the services they provide. Costs will only increase for those individuals and firms who desire certification; as only certified individuals and firms can provide lead hazard detection and abatement services, any competitor will also be subject to the same requirements. Actual costs are unknown at this time, but should be similar to other state regulated services which require licensing or certification of service providers.

2. Second and subsequent years: No change from above, other than initial application for certification paperwork would not recur.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: Program start-up costs for database development; forms/certificates; informational materials/program publicity; staffing; administration and enforcement are being covered by federal grant monies (2 yr. grant \$440,000), which results in a savings to the department.

2. Continuing costs or savings: Program operation beyond start-up should stabilize within 2-3 years as certified workforce levels attune to service volume. Fee collection should be sufficient to cover program cost by that time on a break-even basis.

3. Additional factors increasing or decreasing costs: None currently, although future federal mandates may warrant changes.

(b) Reporting and paperwork requirements: Will require setup and maintenance of a database for accredited training providers; certified service providers; status of abatement projects/testing and clearance status; creation of appropriate forms/educational materials; and quarterly/year-end reports to Federal EPA on program status. Also will require liaison with surrounding states for reciprocity/enforcement activities.

(4) Assessment of anticipated effect on state and local revenues: For agency, should be revenue neutral; for other state/local agencies which collect taxes or fees for construction activities or sales of materials, it may have a positive impact.

(5) Source if revenue to be used for implementation and enforcement of administrative regulation: Start-up source of funding is by federal grant, with ongoing funding by fees.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: See (b) below.

(b) Kentucky: Should have positive impact on local/state economy relative to goods and services common to residential construction/remodelling/renovation. If out-of-state certified individuals/firms provide service then local revenues from lodging/meals/etc., also would increase. Negative impact should be limited to owners of properties with lead hazards present, and the costs of detection/abatement activities. Once abated, however, property value increase should balance abatement cost.

(7) Assessment of alternative methods; reasons why alternatives were rejected: Do nothing alternative - not feasible, as statutes mandate regulatory program; and, do-nothing allows lead poisoning hazards to remain a threat to public health. Delay or minimal program alternatives - not feasible, as statute sets timetable for implementation in one instance, and federal mandates establish acceptable state program to avoid federal takeover of state lead activities.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: As program is statewide, all areas should reap public health and environmental benefits. The detection and removal of lead hazards from target housing and child-occupied structures will prevent current and future generations of children (and their parents) from the damage of lead poisoning. Requiring providers of lead hazard detection and abatement services to meet standards of training and competency, and be subject to continuing education and performance scrutiny, assures the property owner that work will be properly done.

(b) State whether a detrimental effect on environment and public health would result if not implemented: If not implemented, lead poisoning hazards for small children will remain which can result in permanent brain damage as well as other physical and mental effects. As to work being performed by certified providers, if work is not done properly it can result in a major increase in lead contamination and exposure to children and adults.

(c) If detrimental effect would result, explain detrimental effect: See above.

(9) Identify any statute, administrative regulation or governmental policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions:

(10) Any additional information or comments: Companion regulation to 902 KAR 47:090E and 47:100E.

(11) TIERING: Is tiering applied? Yes. As different levels of certification require different degrees of education, training and experience this regulation can be considered tiered.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes. May relate to any local government which owns/operates target housing and/or child-occupied facilities.

2. State whether this administrative regulation will affect the local government or only a part or division of the local government. Would affect only those local governments which own/ operate target housing and/or child-occupied facilities, and only that part of local government involved in the management/maintenance of such structures.

3. State the aspect or service of local government to which this administrative regulation relates. Rental of target housing units and operation of child-occupied facilities and their maintenance.

4. How does this administrative regulation affect the local government or any service it provides. Will require that lead hazards in the above structures be addressed only by properly trained and certified personnel (either local government staff or third-party providers), and any mitigation or abatement work performed in compliance with state and federal regulations.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. 40 CFR Part 745; note that federal intent is that states and indian tribes establish their own lead programs and seek federal authorization to administer same; otherwise, federal EPA will enforce rules in states and tribal lands after August 31, 1998.

2. State compliance standards. KRS 211.9063 through 211.9075; and the proposed 902 KAR 47:080E, 47:090E, and 47:100E. Note: The above statutes and the proposed regulations have been drafted with federal EPA oversight, with the intent to secure federal authorization for Kentucky's Lead Program.

3. Minimum or uniform standards contained in the federal mandate. 40 CFR Part 745

4. Will this administrative regulation impose stricter requirements,

or additional or different responsibilities or requirements, than those required by the federal mandate? 902 KAR 47:080E, 47:090E, and 47:100E have been reviewed by Region IV Federal EPA staff and edited to conform with federal mandates, so that application for authorization of the state program may proceed.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. State standards will mirror federal standards.

**STATEMENT OF EMERGENCY
902 KAR 47:090E**

The administrative regulation 902 KAR 47:090E establishes accreditation of training programs and providers of educational programs for individuals who perform lead hazard detection and abatement. This administrative regulation is needed to comply with 1996 Ky. Acts ch. 168 "Lead Hazard Act", and Section 403 of the U.S. Environmental Protection Agency's (EPA) Toxic Substances Control Act (TSCA), 15 USC 2683. It is necessary to promulgate this emergency administrative regulation to comply with statutory requirements that these regulations shall be promulgated before October 1, 1996. This emergency administrative regulation shall be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
JOHN H. MORSE, Secretary

**CABINET FOR HEALTH SERVICES
Department for Public Health
Division of Environmental Health and Community Safety**

902 KAR 47:090E. Accreditation of training programs and providers of educational programs for individuals who perform lead hazard detection and abatement.

RELATES TO: KRS 211.900 through 211.905, 211.990, 211.994, 217.801

STATUTORY AUTHORITY: 211.090, 211.180, 1996 Ky. Acts ch. 168, EO 96-862

EFFECTIVE: October 1, 1996

NECESSITY, FUNCTION, AND CONFORMITY: Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources, establishes and creates the Cabinet for Health Services, changes the name of the Department for Health Services to Department for Public Health, and places the Department for Public Health and its programs under the Cabinet for Health Services. 1996 Ky. Acts ch. 168 authorizes the Department for Public Health to promulgate administrative regulations relating to the accreditation of training programs and providers of educational programs for individuals who perform lead hazard detection and abatement activities in "target housing" or "child-occupied facilities" within the Commonwealth of Kentucky.

Section 1. Definitions. As used in this administrative regulation:

(1) "Accredited training program" means a training program that has been accredited by the department to provide training for individuals engaged in lead hazard detection and abatement activities.

(2) "Certified" means that a person engaged in lead hazard detection or abatement activities has successfully completed the training and other requirements for such activities established by the department, and has been issued a document of certification.

(3) "Certificate of accreditation" means a document issued by the department, or under the authority of the department, affirming that a training program is approved for individuals who perform lead hazard detection and abatement.

(4) The definition of "child-occupied facility" shall be governed by

1996 Ky. Acts ch. 168.

(5) "Course agenda" means an outline of the key topics to be covered during a training course, including time allotted to teach each topic.

(6) "Course test" means an evaluation of the overall effectiveness of the training which shall test the trainees' knowledge and retention of the topics covered during the course.

(7) "Course test blueprint" means written documentation identifying the percentage of course test questions devoted to each major topic in the course curriculum.

(8) "Department" means the Department for Public Health.

(9) "Discipline" means one (1) of the specific types or categories of lead hazard assessment and abatement activities for which individuals may receive certification such as lead hazard abatement worker, lead hazard inspector, lead hazard worker, and lead hazard project designer.

(10) "EPA" means the U. S. Environmental Protection Agency.

(11) "Hands-on skills assessment" means an evaluation which tests the trainees' ability to perform the work practices and procedures satisfactorily as identified in 902 KAR 47:100.

(12) "Lead hazard" means any condition that causes exposure to lead from lead-contaminated dust, soil, water or deteriorated paint which is present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

(13) The definition of "lead hazard abatement" shall be governed by 1996 Ky. Acts ch. 168.

(14) "Lead hazard abatement worker" means a person who has been trained to perform physical lead hazard abatement activities.

(15) The definition of "lead hazard detection" shall be governed by 1996 Ky. Acts ch. 168.

(16) "Lead hazard inspector" means a person who has been trained in lead inspection by an accredited training program. An inspector also collects samples for analysis for the presence of lead in paint, dust, water and soil for the purpose of lead hazard detection, potential abatement or clearance testing.

(16) "Lead hazard project designer" means a person who has been trained by an accredited training program to prepare abatement plans, prepare occupant protection plans, and prepare abatement reports.

(17) "Lead hazard risk assessment" means an on-site investigation to determine the existence, nature, severity, and location of lead hazards, and the provision of a report by the individual or firm conducting the risk assessment, explaining the results of the investigation and options for reducing the potential for lead exposure.

(18) "Lead hazard risk assessor" means a person who has been trained by an accredited training program to conduct risk assessments. A risk assessor may also:

(a) Sample for the presence of lead in paint, dust, and soil for the purpose of lead hazard detection; or

(b) Conduct potential abatement and clearance testing.

(19) "Lead hazard supervisor" means a person who has been trained by an accredited training program to supervise and conduct abatements, and to prepare occupant protection plans and abatement reports.

(20) "Principle instructor" means the individual who has the primary responsibility for organizing and teaching a particular course.

(21) The definition of "target housing" shall be governed by 1996 Ky. Acts ch. 168.

(22) "Training curriculum" means an established set of course topics for instruction in an accredited training program for a particular discipline designed to provide specialized knowledge and skills.

(23) "Training hour" means at least fifty (50) minutes of actual teaching, including, time devoted to lecture, learning activities, small group activities, demonstrations, evaluations, and hands-on experience.

(24) "Training manager" means the individual responsible for administering a training program and monitoring the performance of

principal and guest instructors.

(25) "Training program course" or "training course" means a planned training program for a specific work discipline for a lead hazard detection or abatement activity.

(26) "Training program provider" or "program provider" means a person or firm who is applying to the department to obtain accreditation to provide one (1) or more training programs for work disciplines in lead hazard detection and abatement.

Section 2. Scope. This administrative regulation contains requirements for the application procedures, qualifications, and fee schedule for accreditation of training programs for persons engaged in lead hazard activities relating to detection and abatement in "target housing" or "child-occupied" facilities in the Commonwealth beginning January 1, 1997.

Section 3. Initial Application for Accreditation. (1) The training program provider shall submit to the department the applicable fee, application, and documentation demonstrating they meet the requirements established in this administrative regulation.

(2) The training program provider shall abide by the following procedures in order to receive accreditation to offer a training program course or courses:

(a) Submit a fee payment of \$800 and written application containing the following information:

1. The program provider's name, address, and telephone number;
2. A list of courses for which it is applying for accreditation; and
3. Accreditation from another state, which has been recognized as being substantially equal to or greater than the requirements established by the department; or
4. A statement signed by the training manager certifying that the training program meets the minimum requirements indicated in this administrative regulation.

(b) If a program provider uses the EPA-developed model training materials, the training program manager shall also include a statement so certifying.

(c) If a program provider does not use the EPA-developed model, its application for accreditation shall include:

1. A copy of the student and instructor manuals to be used for each course; and
2. A copy of the course agenda for each course.

(d) In addition, the training program provider shall include in his application for accreditation the following:

1. The description of the facilities and equipment to be used for lecture and hands-on training;
2. A copy of the course test blueprint for each course;
3. A description of the activities and procedures that will be used for conducting the assessment of hands-on skills for each course; and
4. A copy of the quality control plan as indicated in Section 7(2)(c) of this administrative regulation.

Section 4. Review of Application. (1) The department shall approve or disapprove an application for accreditation no more than sixty (60) days after its receipt. If needed, during that time period the department shall request clarification or additional information from the applicant.

(2) In the case of acceptance, a notice of approval and accreditation certificates for each training program shall be sent to the applicant.

(3) In the case of disapproval, a letter describing the reason for disapproval shall be sent to the applicant. The applicant may correct the unapproved conditions and reapply for accreditation if desired.

(4) A program provider may apply for accreditation to offer courses or refresher courses in as many disciplines as desired and seek accreditation for additional courses at any time.

Section 5. Additional Requirements of the Training Provider. (1)

The training provider shall ensure the availability of and provide adequate facilities for the delivery of the lecture, course test, hands-on training, and assessment activities. This includes providing training equipment that reflects current work practices and maintaining or updating the equipment and facilities as needed.

(2) The provider shall ensure that a course test be given for each course offered at its completion, and if applicable, a hands-on skill assessment. Each individual shall successfully complete the hands-on skills assessment and receive a passing score on the course test to receive certification.

(3) The provider shall also ensure the issuance of the unique course completion certificate to each individual who passes the training course. The course completion certificate shall include the following:

- (a) Name, unique identification number, and address of the individual;
- (b) Title of the particular course that the individual completed;
- (c) Date of course completion or test passage; and
- (d) Name, address, and telephone number of the training program provider.

Section 6. Requirement of the Training Manager. For a training program provider to obtain accreditation to offer lead hazard training courses, he shall employ a training manager who has the following qualifications:

(1) At least two (2) years of experience, education, or training in teaching adults; or

(2) A bachelor or graduate degree in building construction technology, engineering, industrial hygiene, safety, public health, education, business administration or program management; or

(3) Two (2) years experience in managing an occupational health and safety training program specializing in environmental hazards; and

(4) Demonstrated experience, education, or training in the construction industry that includes:

- (a) Lead or asbestos abatement;
- (b) Painting;
- (c) Carpentry;
- (d) Renovation;
- (e) Remodeling;
- (f) Occupational safety and health; or
- (g) Industrial hygiene.

Section 7. Responsibilities of the Training Manager. (1) It shall be the responsibility of the training manager to review the qualifications of and to designate a qualified principal instructor to organize the course and oversee the teaching of all course materials. The qualifications of the instructor is as follows:

(a) Demonstrated experience, education, or training in teaching workers or adults; and

(b) Successfully completed at least sixteen (16) hours of any EPA-accredited, or EPA-authorized state or tribal accredited lead-specific training; and

(c) Demonstrated experience, education, or training in lead or asbestos abatement, painting, carpentry, renovating, remodeling, occupational safety and health, or industrial hygiene.

(2) The training manager shall also have the following responsibilities:

(a) Designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a course; and

(b) Shall also be responsible for conducting the following activities which concern course activities and course evaluation:

1. Maintaining the validity and integrity of the hands-on skills assessment to ensure that it accurately evaluates the trainees' performance of the work practices and procedures associated with the course topics;

2. Maintaining the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics; and

3. Insuring that the course test was developed in accordance with the course test blueprint submitted with the training accreditation application.

(c) Shall also develop and implement a quality control plan. The plan shall be used to maintain and improve the quality of the training program over time. This plan shall contain at least the following elements:

1. Procedures for periodic revision of training materials and the course test to reflect innovations in the field; and

2. Procedures for the training managers annual review of principal instructor competency.

(d) Shall also be responsible for ensuring that the program provider complies at all times with all of the requirements of this administrative regulation.

Section 8. Supportive Documentation. (1) Certain documents shall be recognized by the department as evidence that the training managers and principal instructors have the education, work experience, training requirements or experience.

(2) The documents are not required to be submitted with the initial accreditation application, but shall be retained by the program provider and shall be provided to the department upon request. Those documents include the following:

(a) Official academic transcripts, as evidence of meeting the education requirements; and

(b) Resumes, letters of reference, or documentation of work experience, as evidence of meeting the work experience requirement; and

(c) Certificates from train the trainer courses and lead-specific training courses, as evidence of meeting the training requirements.

Section 9. Inspection Requirements. (1) The training program provider shall allow representatives of the department to conduct unannounced on-site audits of the training program.

(2) The department shall if needed, use other indirect methods shall be used to verify the contents of the application for accreditation.

Section 10. Knowledge of Work Practice Standards. (1) The training program provider shall offer courses which teach the work practice standards established by this administrative regulation for conducting lead hazard activities and other related standards developed by EPA, and other federal and state agencies.

(2) These standards shall be taught in the appropriate courses to provide trainees with knowledge needed to perform the lead hazard evaluation and abatement activities they are responsible for conducting.

Section 11. Requirements for Specific Program Disciplines. The training program provider shall provide training courses that meet the following training hour requirements:

(1) The "lead hazard inspector" course shall last a minimum of twenty-four (24) training hours, including a minimum of eight (8) hours devoted to hands-on training activities. The minimum curriculum requirements for the inspector course topics are as follows:

(a) Role and responsibilities of an inspector;

(b) Background information on lead and its adverse health effects;

(c) Background information on federal, state and local regulations and guidance that pertains to lead hazards and lead hazard assessment and abatement activities;

(d) Lead hazard inspection methods, including selection of rooms and components for sampling or testing, with hands-on activities;

(e) Paint, dust, water and soil sampling methodologies, with hands-on activities;

(f) Clearance standards and testing, including random sampling,

with hands-on activities;

(g) Preparation of an inspection report, with hands-on activities; and

(h) Recordkeeping.

(2) The "lead hazard risk assessor" course shall last a minimum of sixteen (16) training hours, including a minimum of four (4) hours devoted to hands-on training activities. The minimum curriculum requirements for the risk assessor course topics are as follows:

(a) Role and responsibilities of the risk assessor;

(b) Collection of background information to perform a risk assessment;

(c) Sources of environmental lead contamination found in paint, surface dust, soil, water and air, packaging and food;

(d) Visual inspection for the purposes of identifying potential sources of lead-in-paint hazards, which includes hands-on activities;

(e) Lead hazard screening protocol;

(f) Sampling for other sources of lead exposure, with hands-on activities;

(g) Interpretation of lead-in-paint and other lead sampling results, including all applicable federal or state guidance pertaining to lead-in-paint hazards, with hand-on activities;

(h) Development of hazard control options, the role of interim controls, and operation and maintenance activities to reduce lead-in-paint hazards; and

(i) Preparation of a final risk assessment report.

(3) The "lead hazard supervisor" course shall last a minimum of thirty-two (32) training hours, including a minimum of eight (8) hours devoted to hands-on activities. The minimum curriculum requirements for the supervisor course topics are as follows:

(a) Role and responsibilities of a supervisor;

(b) Background information on lead and its adverse health effects;

(c) Background information on federal, state, and local regulations and guidance that pertain to lead hazards and lead hazard assessment and abatement activities;

(d) Liability and insurance issues relating to lead-in-paint abatement;

(e) Risk assessment and inspection report interpretation, with hands-on activities;

(f) Development and implementation of an occupant protection plan;

(g) Lead-in-paint hazard recognition and control, with hands-on activities;

(h) Lead-in-paint abatement and lead hazard reduction methods, including restricted practices, with hands-on activities;

(i) Interior dust abatement, cleanup, or lead hazard control and reduction methods, with hand-on activities;

(j) Soil and exterior dust abatement or lead hazard control and reduction methods, with hands-on activities;

(k) Clearance standards and testing;

(l) Cleanup and waste disposal; and

(m) Recordkeeping.

(4) The "lead hazard project designer" course shall last a minimum of eight (8) training hours. The minimum requirements for the project designer course are as follows:

(a) Role and responsibilities of a project designer;

(b) Development and implementation of an occupant protection plan for large scale abatement projects;

(c) Lead-in-paint abatement and lead hazard reduction methods, including restricted practices for large scale abatement projects;

(d) Interior dust abatement, cleanup, or lead hazard control and reduction methods for abatement projects;

(e) Clearance standards and testing for large scale abatement projects; and

(f) Integration of lead-in-paint abatement methods with modernization and rehabilitation projects for large scale abatement projects.

(5) The "lead hazard abatement worker" course shall be a minimum of sixteen (16) training hours, including a minimum of eight

(8) hours devoted to hands-on training activities. The minimum requirements for the worker course are as follows:

- (a) Role and responsibilities of an abatement worker;
- (b) Background information on lead and its adverse health effects;
- (c) Background information on federal, state, and local regulations and guidance to lead hazard abatement;
- (d) Lead hazard recognition and control, with hands-on activities;
- (e) Lead hazard abatement and lead hazard reduction methods, including restricted practices, with hands-on activities;
- (f) Interior dust abatement methods, cleanup, or lead-in-paint hazard reduction, with hands-on activities; and
- (g) Soil and exterior dust abatement methods of lead-based paint hazard reduction, with hands-on activities.

Section 12. Accreditation of Refresher Training Programs. (1) A training program provider may seek accreditation to offer refresher training courses. To obtain accreditation to offer training courses, the program provider shall meet the following minimum requirements:

(a) Each refresher course shall teach the curricula topics of the full-length courses listed in Section 11 of this administrative regulation. In addition, the course study shall include:

- 1. An overview of current safety practices relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline;
- 2. Current laws and regulations relating to lead-based paint activities in general, as well as specific information pertaining to the applicable discipline; and
- 3. Current technologies relating to lead hazard in paint activities in general, as well as specific information pertaining to the applicable discipline.

(b) Each course shall, except for the project designer course, shall last a minimum of eight (8) hours. The project designer course shall last a minimum of four (4) hours.

(c) For each course offered, the training program shall conduct, if applicable, a hands-on assessment, and at the completion of the course, a course test.

(2) A training program may apply for accreditation of a refresher course concurrently with its application for accreditation of the corresponding training course as described in Section 3 of this administrative regulation. If so, the department shall use the approval procedure as described in Section 4 of this administrative regulations. In addition, the program shall meet other program requirements specified in this administrative regulation.

Section 13. Reccreditation of Training Programs. (1) Unless reaccredited, a training program provider's accreditation (including refresher training accreditation) shall expire four (4) years after issuance.

(2) A training program provider seeking reaccreditation shall submit a fee payment of \$1200, and application to the department no later than sixty (60) days before their accreditation expires.

(3) The program provider's application for reaccreditation shall contain:

- (a) The program provider's name, address, and telephone number;
- (b) A list of courses for which they are applying for reaccreditation;
- (c) A description of any changes or updates to the training facility or equipment since the last application was approved; and
- (d) A statement signed by the program manager stating:
 - 1. The training program provider complies at all times with all accreditation requirements indicated in this administrative regulation, as applicable;
 - 2. The recordkeeping and reporting requirements of this administrative regulation shall be followed.
- (4) Upon request, the training program shall allow the department to audit the training program provider to verify the contents of the

application for reaccreditation as described in this section.

Section 14. Recordkeeping Requirements. (1) An accredited training program provider shall maintain and make available to the department, upon request the following records:

- (a) All documents specified in Section 8 of this administrative regulation that demonstrate the qualifications of the training manager and principal instructors;
- (b) Current curriculum, course materials, and documents reflecting any changes made to these materials;
- (c) The course test blueprint; and
- (d) Information regarding how the hands-on assessment is conducted such as:
 - 1. Who conducts the assessment;
 - 2. How the skills are graded,
 - 3. What facilities are used; and
 - 4. The pass or fail rate.
- (e) The quality control plan.
- (f) Results of the student's hands-on skills assessments and course test, and a record of each student's course completion certification; and
- (g) Any other material not listed in paragraphs (a) through (f) of this subsection that was submitted to the department as part of the program's application for accreditation.

(2) The training program provider shall retain these records at the address specified on the accreditation application, or modified in accordance with subsection (3) of this section, for a minimum of three (3) years and six (6) months.

(3) The training program provider shall notify the department in writing within thirty (30) days of changing the address specified on their training program provider accreditation application or transferring the records from that address.

Section 16. Notice to Suspend, Revoke, Deny or Modify Accreditation. The department may suspend, revoke, deny or modify the accreditation for any training program, if the training program provider fails to comply with the accreditation requirements. At that time, the department shall notify the training program provider in writing of the following:

- (1) The legal and factual basis for the suspension, revocation, denial, or modification;
- (2) The commencement date and duration of the suspension, revocation, or modification;
- (3) Action, if any, which the affected certified person may take to avoid suspension, revocation, denial or modification to certification in the future;
- (4) The opportunity and method for requesting a hearing prior to final department action; and
- (5) Any additional information, as appropriate, which the department may provide.

Section 17. Administrative Hearings. All administrative hearings shall be conducted in accordance with 902 KAR 1:400.

REGULATORY IMPACT ANALYSIS

Agency Contact Person: David Nichols

(1) Type and number of entities affected: 20-30 training providers (in-state and out-of-state) for lead hazard detection and abatement services training.

(2) Direct and indirect costs or savings to those affected:

- (a) Cost of living and employment in the geographical area in

which the administrative regulation will be implemented, to the extent available from the public comment received: As regulation applies statewide, training providers currently engaged in similar training activities relative to construction, renovation and remodeling on a local, regional or statewide basis, there should experience no change for in-state providers. For out-of-state providers there would be no impact.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comment received: For in-state individuals and firms costs will increase for those who choose to become accredited as training providers. Cost increases involve being accredited to offer training in approved discipline levels (actual costs will vary depending on level of training, training site location, etc.), and accreditation cost for initial application and annual renewal (based on discipline levels of accreditation desired). For out-of-state training providers, accreditation costs would also apply. Actual cost to an individual/firm to attain and maintain accreditation as trainers and conduct business on an annual basis, is unknown due to startup nature of the program and the highly variable nature of their specific circumstances.

(c) Compliance reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Reporting and paperwork will increase for those individuals and firms who choose to become training providers seeking accreditation. Training curricula (federal EPA approved), course content documentation, initial application for accreditation form, and application for annual renewal, will be generated by all accreditation recipients; costs will only increase for those individuals and firms who desire accreditation as training providers; as only accredited training providers can provide lead hazard detection and abatement training. Any competitor will also be subject to the same requirements. Actual costs are unknown at this time, but should be similar to other state regulated training which requires licensing or accreditation for training providers.

2. Second and subsequent years: No change from above, other than initial application for accreditation paperwork would not recur.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: Program start-up costs for database development; forms/certificates; informational materials/program publicity; staffing; administration and enforcement are being covered by federal grant monies (2 yr. grant \$440,000), which results in a savings to the department.

2. Continuing costs or savings: Program operation beyond start-up should stabilize within 2-3 years as certified workforce levels attune to service volume. Fee collection should be sufficient to cover program cost by that time on a break-even basis.

3. Additional factors increasing or decreasing costs: None currently, although future federal mandates may warrant changes.

(b) Reporting and paperwork requirements: Will require setup and maintenance of a database for accredited training providers; certified service providers; status of abatement projects/testing and clearance status; creation of appropriate forms/educational materials; and quarterly/year-end reports to federal EPA on program status. Also will require liaison with surrounding states for reciprocity/enforcement activities.

(4) Assessment of anticipated effect on state and local revenues: For agency, should be revenue neutral; for other state/local agencies which collect taxes or fees for construction activities or sales of materials, it may have a positive impact.

(5) Source if revenue to be used for implementation and enforcement of administrative regulation: Start-up source of funding is by federal grant, with ongoing funding by fees.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: See (b) below.

(b) Kentucky: Should have positive impact on local/state economy relative to goods and services common to residential construction/remodeling/renovation. If out-of-state individuals/firms attend training then local revenues from lodging/meals/etc., also would increase.

(7) Assessment of alternative methods; reasons why alternatives were rejected: Do nothing alternative - not feasible, as statutes mandate regulatory program; and, do-nothing allows lead poisoning hazards to remain a threat to public health. Delay or minimal program alternatives - not feasible, as statute sets timetable for implementation in one instance, and federal mandates establish acceptable state program to avoid federal takeover of state lead activities.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: As program is statewide, all areas should reap public health and environmental benefits. The detection and removal of lead hazards from target housing and child-occupied structures will prevent current and future generations of children (and their parents) from the damage of lead poisoning. Requiring providers of lead hazard detection and abatement services to meet standards of training and competency, and be subject to continuing education and performance scrutiny, assures the property owner that work will be properly done.

(b) State whether a detrimental effect on environment and public health would result if not implemented: If not implemented, lead poisoning hazards for small children will remain which can result in permanent brain damage as well as other physical and mental effects. As to work being performed by certified providers, if work is not done properly it can result in a major increase in lead contamination and exposure to children and adults.

(c) If detrimental effect would result, explain detrimental effect: See above.

(9) Identify any statute, administrative regulation or governmental policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions:

(10) Any additional information or comments: Companion regulation to 902 KAR 47:080E and 47:100E.

(11) TIERING: Is tiering applied? No. Tiering was not used because performance standards must apply equally statewide for the same work, and accreditation standards for course curricula must be uniform to assure equivalency for reciprocity purposes between states.

STATEMENT OF EMERGENCY 902 KAR 47:100E

The administrative regulation 902 KAR 47:100E establishes permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement. This administrative regulation is needed to comply with 1996 Ky. Acts ch. 168, "Lead Hazard Act", and Section 403 of the U.S. Environmental Protection Agency's (EPA) Toxic Substances Control Act (TSCA), 15 USC 2683. It is necessary to promulgate this emergency administrative regulation to comply with statutory requirements that these regulations shall be promulgated before October 1, 1996. This emergency administrative regulation shall be replaced by an ordinary administrative regulation.

PAUL E. PATTON, Governor
JOHN H. MORSE, Secretary

CABINET FOR HEALTH SERVICES
Department for Public Health
Division of Environmental Health and Community Safety

902 KAR 47:100E. Permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement.

RELATES TO: KRS 211.900 through 211.905, 211.190, 211.994, 217.801

STATUTORY AUTHORITY: 211.090, 211.180, 1996 Ky. Acts ch. 168, EO 96-862

NECESSITY, FUNCTION, AND CONFORMITY: Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources, establishes and creates the Cabinet for Health Services, changes the name of the Department for Health Services to Department for Public Health, and places the Department for Public Health and its programs under the Cabinet for Health Services. 1996 Ky. Acts ch. 168 authorizes the Department for Public Health to promulgate administrative regulations relating to the establishment of permit fees, permit requirements and procedures, and standards for performing lead hazard detection and abatement in detection of lead hazard abatement activities in "target housing" or "child-occupied facilities."

Section 1. Definitions. As used in this administrative regulation:

(1) "Abatement lead level in paint" means that the level of lead in paint or similar coating contains lead equal to or in excess of one (1.0) milligrams per square centimeter or more than one-half (0.5) percent by weight.

(2) "Abatement permit" means a permit issued by the department or its representative to a firm or individual who intends to conduct lead hazard abatement in target housing or child-occupied facilities.

(3) "Abatement permit holder" means a certified project designer, risk assessor or supervisor, who has been issued an abatement permit.

(4) "Adequate quality control" means a plan or design which ensure the authenticity, integrity, and accuracy of samples; including dust, soil, and paint chips. Adequate quality control also includes provision for representative sampling.

(5) "Certified" means that a person engaged in lead hazard detection or abatement activities has successfully completed the training and other requirements for such activities established by the Department for Public Health and has been issued a document of certification.

(6) "Child" or "children" means an individual or individuals who are six (6) years of age or less.

(7) The definition "child-occupied facility" shall be governed by 1996 Ky. Acts ch. 168.

(8) "Clearance level" means an assigned value that indicates the maximum amount of lead permitted in dust on a surface following completion of an abatement activity or levels found during a screening of a dwelling for lead hazards.

(9) "Common area" means a portion of a building that is generally accessible to children. Such an area may be hallways, stairways, laundry and recreational rooms, playgrounds, community center, garages, and boundary fences.

(10) "Component or building component" means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form function, and location.

(11) "Containment" means a process to protect workers and the environment by controlling exposures to lead-contaminated dust and debris created during an abatement.

(12) "Deteriorated paint" means paint that is cracking, flaking, chipping, peeling or separating from the substrate of a building component.

(13) "Department" means the Department for Public Health.

(14) "Distinct painting history" means the application history, as indicated by its visual appearance or a record of application, over time, of paint or other surface coatings to a component or room.

(15) "Documented methodologies" means methods or protocols used to sample for the presence of lead in paint, dust, and soil.

(16) "Encapsulant" means a substance that forms a barrier between lead containing paint and the environment, using a liquid-applied coating or an adhesively bonded covering material.

(17) "Encapsulation" means the application of an encapsulant.

(18) "Enclosure" means the use of rigid, durable construction materials that are mechanically fastened to the substrate, in order to act as a barrier between the underlying lead containing paint and the environment. This does not include the application of paneling to lead painted surface through the use of a fastening method that does not disturb the underlying lead painted surface.

(19) "EPA" means the U.S. Environmental Protection Agency.

(20) "Interim controls" means a set of measure designed to temporarily reduce human exposure or likely exposure to lead in paint hazards, including specialized cleaning, repairs, maintenance, painting, temporary containment, ongoing in monitoring, and the establishment and operation of management and resident educational programs.

(21) "Lead-contaminated dust" means surface dust that contains an area or mass concentration of lead at or in excess of clearance levels.

(22) "Lead-contaminated soil" means bare soil on residential real property and on the property of a child-occupied facility that contains lead at or in excess of levels identified in EPA guidelines.

(23) "Lead hazard" means any condition that causes exposure to lead from lead-contaminated dust, soil, or paint that is deteriorated or present in accessible surfaces, friction or impact surfaces, that would result in adverse human health effects.

(24) The definition of "lead hazard abatement" is governed by 1996 Ky. Acts ch. 168.

(25) "Lead hazard abatement worker" means a person who has been trained to perform physical lead-abatement hazard activities.

(26) "Lead hazards activities" means, in the case of target housing and child-occupied facilities, inspection, screening, risk assessment, and abatement.

(27) The definition of "lead hazard detection" is governed by 1996 Ky. Acts ch. 168.

(28) "Lead hazard inspection" means a surface-by-surface examination to determine the presence of lead hazards and the provision of a report explaining the results of the investigation.

(29) "Lead hazard inspector" means a person who has been trained in lead inspection by an accredited training program. An inspector also collects samples for analysis for the presence of lead in paint, dust and soil for the purpose of lead hazard detection, potential abatement or clearance testing.

(30) "Lead hazard project designer" means a person who has been trained by an accredited training program to prepare abatement plans, prepare occupant protection plans, and prepare abatement reports.

(31) "Lead hazard risk assessment" means an on-site investigation to determine the existence, nature, severity, and location of lead hazards, and the provision for a report by the individual or the firm conducting the risk assessment, explaining the results or the investigation and options for reducing the lead hazards.

(32) "Lead hazard risk assessor" means a person who has been trained by an accredited training program to conduct risk assessments. A risk assessor may also: sample for the presence of lead in paint, dust, and soil for the purpose of lead hazard detection, or conduct potential abatement and clearance testing.

(33) "Lead hazard screen" means a risk assessment activity that involves limited paint and dust or other potential lead hazard sampling.

(34) "Lead hazard supervisor" means a person who has been

trained by an accredited training program to supervise and conduct abatements, and prepare occupant protection plans and abatement reports.

(35) "Living area" means area of a residential dwelling used by one (1) or more children, such as living rooms, kitchen area, dens, play rooms, and children's bedrooms.

(36) "Multifamily dwelling" means a structure that contains more than one (1) separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, as the home or residence of one (1) or more persons.

(37) "Paint in poor condition" means more than ten (10) square feet of deteriorated paint on exterior components with large surface areas; or more than two (2) square feet of deteriorated paint on interior components with large surface areas (walls, ceilings, floors, doors); or more than ten (10) percent of the total surface area of the component is deteriorated on interior or exterior components with small surface areas (window sills, baseboards, soffits, trim).

(38) "Permanently covered soil" means soil which has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, such as pavement or concrete. Grass, mulch, and other landscaping materials are not considered permanent covering.

(39) "Quality assurance inspection" an inspection conducted by the department or the department's representative at the conclusion of the abatement for the purpose of determining if the lead abatement activity and process complied with certification requirements, work practices and performance standards.

(40) "Recognized laboratory" means an environmental laboratory recognized by EPA as being capable of performing an analysis for lead compounds in paint, soil, dust and water.

(41) "Reduction" means measures designed to reduce or eliminate human exposure to lead hazards through methods including interior controls and abatement.

(42) "Residential dwelling" means:

(a) A detached single family dwelling unit, including attached structures such as porches and stoops; or

(b) A single family dwelling unit in a structure that contains more than one (1) separate residential dwelling unit, which is used or occupied, or intended to be used or occupied as the home or residence of one (1) or more persons.

(43) "Room" means an enclosed or semienclosed space within a residential dwelling for a child-occupied facility.

(44) The definition of "target housing" is governed by 1996 Ky. Acts ch. 168.

(45) "Visual inspection for clearance testing" means the visual examination of a residential dwelling or a child-occupied facility following an abatement to determine whether or not the abatement has been successfully completed, as indicated by the absence of visible residue, dust, and debris.

(46) "Visual inspection for risk assessment" means the visual examination of a residential dwelling or child-occupied facility to determine the existence of deteriorated lead containing paint or other potential sources of lead hazards.

(47) "XRF" means an x-ray fluorescence device that indicates the lead levels of paint on a painted surface.

Section 2. Scope. This administrative regulation establishes requirements and procedures, and standards for performing lead hazard detection and abatement activities in "target housing" or "child-occupied facilities". This administrative regulation also establishes a fee schedule, for abatement activities in these locations.

Section 3. Work Practices Requirements and Methodologies. (1) Beginning July 1, 1997 all lead hazard detection and abatement activities in "target housing" and "child-occupied facilities" shall be performed pursuant to work practice standards and procedures established by this administrative regulation; and

(2) In addition, shall perform the activities using the following technical documented methodologies, which are adopted without change for use in this administrative regulation:

(a) U.S. Department of Housing and Urban Development (HUD) "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" edition June, 1995;

(b) "EPA Guidance on Residential Lead-Based Paint, Lead-contaminated Dust, and Lead-Contaminate Soil" edition July 14, 1994; and

(c) "EPA Residential Sampling for Lead: Protocols for Dust and Soil Sampling" (EPA report number 7474-R-95-001) edition March 1995.

(3) Copies of these federal guidelines are on file in the Office of the Commissioner, Department for Public Health, 275 East Main Street, Frankfort, Kentucky 40621, and is available for public inspection and copying, Monday through Friday, 8 a.m. to 4:30 p.m. Copies of these federal guidelines are also available from the specified federal agencies indicated in titles of the documents.

Section 4. Lead hazard inspections. (1) Work practice standards and procedures for lead hazard inspections shall be as follows:

(a) Inspections shall be conducted only by an individual certified by the department as a lead hazard inspector or lead hazard risk assessor;

(b) The following sites shall be selected according to documented methodologies and tested for the presence of lead in paint:

1. In a residential dwelling and child-occupied facility, each interior or exterior component with a distinct painting history shall be tested for lead levels, except those components that the inspector or risk assessor determine to have been replaced after 1978, or not coated with paint; and

2. In addition, in a multifamily dwelling or child-occupied facility, each component with a distinct painting history in every common area, except those components that the inspector or risk assessor determine to have been replaced after 1978, or not coated with lead-containing paint.

(c) Paint shall be sampled or tested in the following manner:

1. The analysis of paint to determine the presence of lead shall be conducted using documented methodologies which incorporate quality control procedures; and

2. All collected paint chip samples shall be analyzed according to Section 11 of this administrative regulation, to determine if they contain detectable levels of lead.

(2) In addition to performing the specified work practices and activities, the certified lead hazard inspector or risk assessor shall prepare an inspection report which shall include the following:

(a) Date of each inspection;

(b) Address of building;

(c) Date of construction;

(d) Apartment numbers (when applicable);

(e) Name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility;

(f) Name, signature, and certification number of the certified inspector or risk assessor conducting the inspection;

(g) Name, address, and telephone number of the firm or individual employing each inspector or risk assessor, when applicable;

(h) Name, address, and telephone number of each laboratory conducting an analysis of collected samples, when applicable;

(i) Each testing method, testing device, or sampling procedure employed for paint analysis, including quality control data, and when used the serial number and radioactive materials license number of any x-ray fluorescence (XRF) device;

(j) Specific locations of each painted component tested for the presence of lead in paint; and

(k) The results of the inspection expressed in terms appropriate to the sampling method used.

(3) A copy of the lead hazard inspection report shall be main-

tained by the certified individual for the time period specified in Section 13 of this administrative regulation. In addition, a copy of the inspection report shall be submitted to the department within thirty (30) days after the completion of the inspection.

Section 5. Lead hazard Screening. (1) Work practice standards and procedures for lead hazard screening shall be as follows:

(a) A lead hazard screen shall be conducted only by a person certified by the department as a risk assessor; and

(b) When conducting a lead hazard screen the risk assessor shall:

1. Collect background information regarding the physical characteristics of the residential dwelling or child-occupied facility, and occupant use patterns that may cause lead exposure to one (1) or more children;

2. Conduct a visual inspection of the residential dwelling or child-occupied facility to determine if any deteriorated paint is present, and locate at least two (2) dust sampling locations;

3. Test for the presence of lead on each surface with deteriorated paint, which is determined by using documented methodologies to be in "poor condition" and to have a "distinct painting history";

4. Collect two (2) composite dust samples. One (1) from the floors and the other from the windows, in rooms where one (1) or more children are most likely to come in contact with dust; and

5. Collect additional samples in multifamily dwellings and child-occupied facilities. Composite dust samples shall be collected from common area where one (1) or more children are most likely to come into contact with dust.

(c) All collected paint chip or dust samples shall be taken using documented methodologies that incorporate adequate control procedures, and shall be analyzed under the conditions indicated in Section 11 of this administrative regulation.

(2) In addition to performing the specified work practices and activities, the risk assessor shall prepare a lead hazard screen report, which shall include the following information:

(a) The information required in a risk assessment report as specified in Section 6(2)(a) through (p) of this administrative regulation. Additionally, any background information collected pursuant to Section 6(1)(b)2 of this administrative regulation shall be included in the risk assessment report; and

(b) Recommendations, when warranted, for a follow-up risk assessment, and when appropriate, any further actions.

(3) A copy of the lead hazard screen report shall be maintained by the certified individual for the time period specified in Section 13 of this administrative regulation. In addition, a copy of the report will be submitted to the department within thirty (30) days after the completion of the assessment.

Section 6. Lead hazard Risk Assessments. (1) Work practice standards and procedures for risk assessments shall be as follows:

(a) A risk assessment shall be conducted only by a person certified by the department as a risk assessor.

(b) When conducting a lead hazard screen the risk assessor shall:

1. Conduct a visual inspection for risk assessment of the residential dwelling or child-occupied facility shall be undertaken to locate the existence of deteriorated paint, assess the extent and causes of the deterioration, and review for other potential sources of lead hazards;

2. Collect background information regarding the physical characteristic of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead in paint exposure to one (1) or more children;

3. Test the following locations for presence of lead:

a. Deteriorated paint, which is determined by using documented methodologies to be in "poor condition" and to have a "distinct painting history"; and

b. Other surfaces or sites determined, using documented methodologies, to be a potential lead hazard;

4. Collect in residential dwelling, dust samples (either composite or single-surface samples) from the window and floor shall be collected in all living areas where one (1) or more children are most likely to come into contact with dust;

5. Collect additional samples in multifamily dwellings and child-occupied facilities. Window and floor dust samples (either composite or single-surfaces samples) shall be collected in the following locations:

a. Common areas adjacent to the sampled residential dwelling or child-occupied facility; and

b. Other common areas in the building where the risk assessor determines that one (1) or more children are likely to come into contact with dust;

6. Collect additional samples in child-occupied facilities. Window and floor dust samples (either composite or single-surface samples) shall be collected in each room utilized by one (1) or more children, and in other common areas where the risk assessor determines children are likely to come in contact with dust;

7. Collect soil samples to be collected and analyzed for lead concentration in the following locations:

a. Exterior play areas where bare soil is present; and

b. Dripline or foundation areas where bare soil is present.

(c) Any paint, dust, or soil sampling or testing shall be conducted using documented methodologies that incorporate quality control procedures.

(d) Any collected paint chip, dust, or soil samples shall be analyzed accordingly by an EPA recognized laboratory to determine if they contain detectable levels of lead.

(2) In addition to performing the specified work practices and activities, the certified risk assessor shall prepare a risk assessment report which shall include the following information:

(a) Date of assessment;

(b) Address of each building;

(c) Date of construction of buildings;

(d) Apartment numbers (when applicable);

(e) Name, address, and telephone number of each owner of each building;

(f) Name, signature, and certification number of the certified risk assessor conducting the assessment;

(g) Name, address, and telephone number of the firm or individual employing each certified risk assessor, when applicable;

(h) Name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples;

(i) Results of visual inspection;

(j) Testing method and sampling procedure for paint analysis employed;

(k) Specific locations of each painted component tested for the presence of lead in paint; and

(l) All data collected from on-site testing, including quality control, data, and when used, the serial number of any XRF device;

(m) All results of laboratory analysis on collected paint, soil and dust samples;

(n) Any other sampling results;

(o) Any background information collection pursuant to subsection (1)(b)2 of this section.

(p) The extent of any previous inspection or analysis for the presence of lead, lead assessments, or other lead hazards found, that are used as part of the lead in paint hazard determination;

(q) A description of the location, type, and severity of identified lead in paint hazards and any other potential lead hazards;

(r) A description of interim controls or abatement options for each identified lead hazard, and suggested priority for addressing each hazard; and

(s) When the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring

schedule for the encapsulant or enclosure.

(3) A copy of the risk assessment report shall be maintained by the certified individual for the time period specified in Section 13 of this administrative regulation. In addition, a copy of the report shall be submitted to the department within thirty (30) days after the completion the assessment.

Section 7. Lead hazard Abatement. (1) Standards and procedures for lead hazard abatement shall be as follows:

(a) Certification, abatement permit and fee shall be required by the department for lead hazard abatement activities, and are as follows:

1. An abatement permit shall be obtained from and issued by the department under the procedures indicated in Section 14 of this administrative regulation, prior to the commencement of lead hazard abatement activities;

2. The fee payment shall be according to the fee schedule indicated in Section 15 of this administrative regulation; and

3. A lead hazard abatement shall be conducted only by individuals certified by the department. A certified lead supervisor, lead risk assessor or project designer shall be available to the lead abatement workers at all times while abatement is being conducted. A certified lead supervisor, lead risk assessor or project designer shall be on site during all work site preparation and during the post-abatement cleanup of work areas.

(b) The certified supervisor and the abatement permit holder shall ensure that all abatement activities are conducted according to the requirements of this administrative regulation and all other federal, state, and local requirements.

(c) A written abatement and occupant protection plan shall be developed for all abatement projects and shall be prepared according to the following procedures:

1. A certified supervisor or certified project designer shall prepare the abatement and occupant protection plan;

2. A certified project designer shall prepare the plans for projects in which ten (10) or more residential dwellings will be abated. A certified supervisor or project designer may prepare the occupant protection plan for child-occupied facilities and projects in which fewer than ten (10) residential dwellings will be abated;

3. The abatement plan shall be a detailed written description of the abatement, including abatement methods to be used, locations of rooms and components where abatement will occur, and reason for selecting particular abatement methods for each component; and

4. The occupant protection plan shall be unique to each residential dwelling or child-occupied facility and be developed prior to the abatement. The occupant protection plan shall describe the measures and management procedures that will be taken during the abatement to protect the building occupants from exposure to any lead hazards.

(d) When conducted, soil abatement shall be conducted in one (1) of the following ways:

1. When soil is removed, the lead-contaminated soil shall be replaced with soil that is not lead-contaminated; or

2. When soil is not removed, the lead-contaminated soil shall be permanently covered.

(2) The following work practices shall be restricted during an abatement of paint containing lead:

(a) Open-flame burning or torching of the paint is prohibited;

(b) Machine sanding or grinding, or abrasive blasting or sand-blasting of the paint is prohibited unless used with a "high efficiency particulate air" (HEPA) exhaust control which removes particles of three-tenths (0.3) microns or larger from the air at 99.97 percent or greater efficiency;

(c) Dry scraping of the paint is permitted only in conjunction with heat guns, or around electrical outlets, or when treating defective paint spots total no more than two (2) square feet in any one room or totaling no more than twenty (20) square feet on exterior surfaces; and

(d) Operating a heat gun on paint is permitted only at temperatures below 1100 degrees Fahrenheit.

Section 8. Post Abatement Clearance Procedures. (1) Postabatement clearance procedures shall be performed only by a certified inspector or risk assessor.

(2) Following an abatement, a visual inspection shall be performed to determine if deteriorated painted surfaces or visible amounts of dust, and debris or residue are still present. When deteriorated painted surfaces or visible amounts of dust are present, these conditions must be eliminated prior to the continuation of the clearance procedures.

(3) Following the visual inspection and any postabatement cleanup required, clearance sampling for lead-contained dust shall be conducted. Clearance sampling may be conducted by employing single-surfacing or composite sampling techniques.

(4) Dust samples for clearance purposes shall be taken using documented methodologies that incorporate adequate quality control procedures, and shall be taken a minimum of one (1) hour after completion of final postabatement cleanup activities.

(5) Rooms, hallways, stairwells or other sites selected for sampling shall be selected according to documented methodologies.

(6) The following post abatement clearance activities shall be conducted as appropriate based upon the extent or manner of abatement activities conducted in or to the residential dwelling or child-occupied facility:

(a) After conducting an abatement with containment between abated and unabated areas, the number of samples and sites to be selected are as follows:

1. A minimum of one (1) dust sample shall be taken from one (1) window (when available) and a minimum of one (1) dust sample shall be taken from the floor of no less than four (4) rooms, hallways or stairwells within the containment area.

2. In addition, a minimum of one (1) dust sample shall be taken from the floor outside the containment area; or

3. When there are less than four (4) rooms, hallways or stairwells within the containment area, then all rooms, hallways or stairwells shall be sampled.

(b) After conducting an abatement with no containment, the number of samples and sites to be selected are as follows:

1. A minimum of two (2) dust samples shall be taken from every room in the residential dwelling or child-occupied facility.

2. A minimum of one (1) dust sample shall be taken from one (1) window (when available) and a minimum of one (1) dust sample shall be taken from the floor of each room; or

3. When there are less than four (4) rooms, hallways or stairwells within the residential area, then all rooms, hallways or stairwells shall be sampled.

(c) Following an exterior paint abatement, a visual inspection shall be conducted for compliance with the following conditions:

1. All horizontal surfaces in the outdoor living area closest to the abated surface shall be found to be cleaned of visible dust and debris;

2. Paint chips or other painted debris shall not be present in the dripline area or next to the foundation below any exterior surface abated; and

3. When present shall be removed from the site and properly disposed of, according to all applicable federal, state and local requirements.

(7) The certified inspector or risk assessor shall compare the residual lead level (as determined by the laboratory analysis) from each dust sample, with applicable clearance levels for lead in dust as indicated in Section 10 of this administrative regulation. When the residual lead levels in a dust sample exceed the specified clearance levels, all the components represented by the failed sample shall be recleaned and retested until clearance levels are met.

(8) In a multifamily dwelling with similarly constructed and

maintained residential unit, random sampling for the purposes of clearance may be conducted provided:

(a) The individuals who abate or clean the residential dwelling do not know which residential dwelling will be selected for the random sample;

(b) A sufficient number of residential dwellings are selected for dust sampling to provide a ninety-five (95) percent level of confidence that no more than five (5) percent or fifty (50) of the residential units (whichever is smaller) in the randomly sampled population exceed the appropriate clearance levels; and

(c) The randomly selected residential dwellings shall be sampled and evaluated for clearance according to the procedures found in Section 11 of this administrative regulation.

Section 9. Abatement Report. (1) An abatement report shall be prepared by a certified supervisor or project designer. The abatement report shall include the following information:

(a) Start and completion dates of abatement;

(b) The name and addresses of each certified supervisor assigned to the abatement project;

(c) The occupant protection plan prepared pursuant to Section 7(1)(d)4 of this administrative regulation.

(d) The name, address, and signature of each certified risk assessor or inspector conducting clearance sampling and the date of clearance testing;

(e) The results of clearance testing and all soil analysis (when the applicable) and the name of each recognized laboratory that conducted the analysis; and

(f) The abatement plan results - a detailed written description of the abatement, including abatement methods used, locations of rooms and components where abatement occurred, and reason for selecting particular abatement methods for each component, and any suggested monitoring of encapsulant or enclosures.

(2) A copy of the final abatement report shall be maintained by the certified individual or the abatement permit holder for the time period specified in Section 13 of this administrative regulation. In addition, a copy of the report will be submitted to the department within thirty (30) days after the completion of the abatement.

Section 10. Clearance Levels. The following levels are to be used as the clearance dust standards (wipe sampling only) for requirements under this administrative regulation.

| Surface | Level (ug/ft2) |
|--------------------------|----------------|
| Bare and carpeted floors | 100 |
| Interior Window Sills | 500 |
| Window Troughs | 800 |
| Exterior concrete | 800 |

Section 11. Collection and Laboratory Analysis of Samples. Any paint chip, dust, or soil samples collected pursuant to the work practice standards and procedures contained in this administrative regulation shall be:

(1) Collected by persons certified by the department as an inspector or risk assessor; and

(2) Analyzed by a laboratory recognized by EPA as being capable of performing analysis for lead compounds in paint chip, dust, and soil samples.

Section 12. Composite Dust Sampling. Composite dust sampling shall be conducted under the conditions specified in this administrative regulation. When this sampling is conducted, the following conditions shall apply:

(1) Composite dust samples shall consist of at least two (2) subsamples;

(2) Every component that is being tested shall be included in the

sampling; and

(3) Composite dust samples shall not consist of subsamples from more than one (1) type of component.

Section 13. Recordkeeping. All reports or plans required by this administrative regulation shall be maintained by the abatement permit holder or other certified individual who prepared the report for no fewer than three (3) years. The abatement permit holder or certified individual also shall provide copies of these reports to the building owner or other individual who contracted for the services.

Section 14. Abatement Permit Application and Clearance Procedures. (1) A certified individual shall make an application to the department, provide an abatement plan and pay the appropriate permit fee indicated in Section 15 of this administrative regulation.

(2) On receipt of the application, the appropriate information and fee, the department shall respond according to the time requirements indicated in 1996 Ky. Acts ch. 168.

(3) When the application is approved, the abatement services shall proceed. When an application is not approved a written notification of nonacceptance will be provided to the applicant. The applicant shall correct the unacceptable conditions of the application, accompanying information, or permit fee, indicated in notification by department before the abatement service is approved. The applicant then may resubmit the application according to the procedures specified in subsection (1) of this section.

(4) On completion of the abatement project the permit holder shall notify the department of the completion of the abatement services and clearance testing. The department shall conduct a quality assurance inspection of ten (10) percent of the abatement jobs for which permits issued, on a random basis. These inspections shall be conducted to determine compliance with state federal and local requirements. It is the responsibility of the abatement permit holder to provide access to the facility for quality assurance testing.

(5) The quality assurance inspection for the department shall be conducted by the department or its agent. The inspection and required sample collected shall be conducted in the same manner as specified under clearance review and sampling, required in post abatement clearance procedures in Section 8 of this administrative regulation.

(6) When the inspection findings of the department indicate that abatement levels of paint are found, or collected dust samples, exceed the clearance levels, all the components represented by the failed sample shall be recleaned, or otherwise lead hazard abated, and retested until clearance levels are met.

(7) The permit holder shall not begin construction and renovation activities after the abatement services are concluded, until the department reports to the permit holder that the abatement project passed the quality assurance inspection; or when the department fails to conduct the inspection within the time requirements in 1996 Ky. Acts ch. 168.

(8) The permit holder shall be responsible for paying a reinspection fee of \$100 for each reinspection required due to failure to pass the clearance levels.

Section 15. Permit Fee Schedule. The fee for an abatement permit shall be made under the following conditions to the department in the amount:

| Abatement in residential and child-occupied facilities | Fees |
|--|---|
| With containment | \$225 |
| Without containment | \$100 plus \$25 per potentially contaminated room |
| Exterior abatement | \$125 |

Section 16. Enforcement. Any person who violates the standards, procedures, or other requirements specified in this administrative regulation shall be subject to the enforcement and penalties specified 1996 Ky. Acts ch. 168.

Section 17. Administrative Hearings. When an administrative hearing is required under conditions which concern compliance with this administrative regulation, the hearing shall be conducted in accordance with 902 KAR 1:400.

RICE C. LEACH, Commissioner

JOHN H. MORSE, Secretary

APPROVED BY AGENCY: September 27, 1996

FILED WITH LRC: October 1, 1996 at 2 p.m.

REGULATORY IMPACT ANALYSIS

Agency Contact Person: David Nichols

(1) Type and number of entities affected: 1,000-2,000 in-state; 2,000-4,000 out-of-state (estimated) contractors, engineers, architects, construction workers, environmental health specialists, etc., who may desire certification to perform lead hazard detection and abatement services, and 20-30 accredited training providers (in-state and out-of-state).

(2) Direct and indirect costs or savings to those affected:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comment received: As regulation applies statewide, and affected individuals and training providers are currently engaged in similar work activities relative to construction, renovation and remodeling on a local, regional or statewide basis, there should be no change for in-state individuals. For out-of-state individuals, providing lead hazard detection and abatement services in Kentucky (or if training provider, providing training to individuals) may result in either costs or savings relative to their state of origin's costs.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comment received: For in-state individuals and firms costs will increase for those who choose to become certified or who choose to become accredited as training providers. Cost increases involve receiving accredited training (or being accredited to train) by third-party training providers (actual costs will vary depending on level of training, training site location, etc.), and certification cost for initial application and annual renewal (based on discipline level of certification desired). For out-of-state individuals and firms cost increases would be the same as above, in addition to any costs imposed by any other state or local governmental agencies for permission to do business within their jurisdiction. For out-of-state training providers, accreditation costs would apply. Actual cost to an individual/firm to attain and maintain certification (or accreditation for trainers) and conduct business on an annual basis, is unknown due to start-up nature of the program and the highly variable nature of their specific circumstances.

(c) Compliance reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: Reporting and paperwork will increase for those individuals and firms who choose to become certified (or training providers seeking accreditation). Proof of training documents, initial application for certification form, and application for annual renewal, will be generated by all certification recipients; higher certification levels will also generate inspection/abatement plan reports, lab test reports, clearance reports, etc., directly related to the services they provide. Costs will only increase for those individuals and firms who desire certification; as only certified individuals and firms can provide lead hazard detection and abatement services, any competitor will also be subject to the same requirements. Training

providers must submit an application for accreditation and supportive documentation of federal EPA approved curricula. Actual costs are unknown at this time, but should be similar to other state regulated services which require licensing or certification of service or training providers.

2. Second and subsequent years: No change from above, other than initial application for certification or accreditation paperwork would not recur.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: Program start-up costs for database development; forms/certificates; informational materials/program publicity; staffing; administration and enforcement are being covered by federal grant monies (2 yr. grant \$440,000), which results in a savings to the department.

2. Continuing costs or savings: Program operation beyond start-up should stabilize within 2-3 years as certified workforce levels attune to service volume. Fee collection should be sufficient to cover program cost by that time on a break-even basis.

3. Additional factors increasing or decreasing costs: None currently, although future federal mandates may warrant changes.

(b) Reporting and paperwork requirements: Will require setup and maintenance of a database for accredited training providers; certified service providers; status of abatement projects/testing and clearance status; creation of appropriate forms/educational materials; and quarterly/year-end reports to federal EPA on program status. Also will require liaison with surrounding states for reciprocity/enforcement activities.

(4) Assessment of anticipated effect on state and local revenues: For agency, should be revenue neutral; for other state/local agencies which collect taxes or fees for construction activities or sales of materials, it may have a positive impact.

(5) Source if revenue to be used for implementation and enforcement of administrative regulation: Start-up source of funding is by federal grant, with ongoing funding by fees.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: See (b) below.

(b) Kentucky: Should have positive impact on local/state economy relative to goods and services common to residential construction/remodeling/renovation. If out-of-state certified individuals/firms provide service then local revenues from lodging/meals/etc., also would increase. Negative impact should be limited to owners of properties with lead hazards present, and the costs of detection/abatement activities. Once abated, however, property value increase should balance abatement cost.

(7) Assessment of alternative methods; reasons why alternatives were rejected: Do nothing alternative - not feasible, as statutes mandate regulatory program; and, do-nothing allows lead poisoning hazards to remain a threat to public health. Delay or minimal program alternatives - not feasible, as statute sets timetable for implementation in one instance, and federal mandates establish acceptable state program to avoid federal takeover of state lead activities.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: As program is statewide, all areas should reap public health and environmental benefits. The detection and removal of lead hazards from target housing and child-occupied structures will prevent current and future generations of children (and their parents) from the damage of lead poisoning. Requiring providers of lead hazard detection and abatement services to meet standards of training and competency, and be subject to continuing education and performance scrutiny, assures the property owner that work will be properly done.

(b) State whether a detrimental effect on environment and public

health would result if not implemented: If not implemented, lead poisoning hazards for small children will remain which can result in permanent brain damage as well as other physical and mental effects. As to work being performed by certified providers, if work is not done properly it can result in a major increase in lead contamination and exposure to children and adults.

(c) If detrimental effect would result, explain detrimental effect: See above.

(9) Identify any statute, administrative regulation or governmental policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions:

(10) Any additional information or comments: Companion regulation to 902 KAR 47:080E and 47:090E.

(11) TIERING: Is tiering applied? No. Tiering was not used because performance standards must apply equally statewide for the same work. There is some inherent tiering within the standards relative to clearance levels after abatement work is done, and between lead abated situations and lead safe.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes. May relate to any local government which owns/operates target housing and/or child-occupied facilities.

2. State whether this administrative regulation will affect the local government or only a part or division of the local government. Would affect only those local governments which own/ operate target housing and/or child-occupied facilities, and only that part of local government involved in the management/maintenance of such structures.

3. State the aspect or service of local government to which this administrative regulation relates. Rental of target housing units and operation of child-occupied facilities and their maintenance.

4. How does this administrative regulation affect the local government or any service it provides. Will require that lead hazards in the above structures be addressed only by properly trained and certified personnel (either local government staff or third party providers), and any mitigation or abatement work performed in compliance with state and federal regulations.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. 40 CFR Part 745; note that federal.

2. State compliance standards.

3. Minimum or uniform standards contained in the federal mandate.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate?

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements.

STATEMENT OF EMERGENCY

904 KAR 2:410E

This emergency administrative regulation is being amended to comply with 1996 Ky. Acts ch. 365 which implements the Family Support Act, the 1993 Omnibus Budget Reconciliation Act, and the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, PL 104-193. As a result of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, PL 104-193, the Department for Social Insurance is no longer mandated to distribute

DEFRA payments to IVA/IVD clients as the federal government will no longer share in the cost of the distribution of DEFRA effective October 1, 1996. It is necessary to promulgate this emergency administrative regulation to prevent the possible loss of state general funds due to the change in PL 104-193. Concurrently, we will initiate the regular filing process providing opportunity for public comment. The administrative regulation shall also be replaced by an ordinary administrative regulation. The notice of intent for the ordinary administrative regulation will be filed with the Regulations Compiler for the October 15, 1996, filing.

PAUL E. PATTON, Governor

VIOLA P. MILLER, Secretary

CABINET FOR FAMILIES AND CHILDREN

Department for Social Insurance

Division of Management and Development

904 KAR 2:410E. Child support collection and distribution.

RELATES TO: KRS 205.710-205.800, 403.215, 405.450, 405.465, 405.467, 405.490, 405.520, 45 CFR 302.32, 302.37, 302.38, 302.51-302.54, 302.60, 303.6, 303.100-303.102, 15 USC 1673(b)

STATUTORY AUTHORITY: KRS 186.570, 194.050, 205.710 to 205.800, 405.520, EO 96-862, 1996 Ky. Acts ch. 365, PL 104-193 [95-79]

EFFECTIVE: October 1, 1996

NECESSITY, FUNCTION, AND CONFORMITY: The Cabinet for Families and Children shall administer the Child Support Enforcement Program [~~(CSEP)~~] in accordance with KRS 205.710 to 205.800. KRS 205.712 provides for the child support agency to receive and process all child support payments. Executive Order 96-862, effective July 2, 1996, reorganized the Cabinet for Human Resources and placed the Department for Social Insurance and the Division of Child Support Enforcement under the Cabinet for Families and Children. This administrative regulation sets forth the procedures for collection and distribution of child support payments.

Section 1. Collection of Maintenance. Agency efforts shall include collecting maintenance if it meets the definition of "duty of support" in KRS 205.710(5).

Section 2. Methods of Collection. (1) Wage withholding.

(a) As specified in KRS 403.215, 405.465 and 405.467, the cabinet shall use this method:

1. As the primary tool for child support collection; and

2. As necessary to facilitate enrollment of a child through an employer in an available health insurance plan.

(b) For all cases, the child support agency shall provide for wage withholding without necessity of an amendment or court action to the child support order.

(c) If a noncustodial ~~(an absent)~~ parent has more than one (1) child support wage assignment against him, the child support agency shall allocate and distribute child support as specified by 1996 Ky. Acts ch. 365. ~~[amounts available for withholding, giving priority to the current child support obligation amount due each family.]~~

(d) If current support and an arrearage amount is owed and is to be paid through a wage withholding order, and no specified arrearage payment amount is ordered by the court, the cabinet shall determine the arrearage payment by multiplying the current court or administratively ordered obligation amount by twenty-five (25) percent.

(e) If the noncustodial ~~(absent)~~ parent no longer owes a current child support payment, the cabinet shall determine:

1. The arrearage payment to be equal to the last court or administratively ordered obligation amount; and [amount to be paid by wage withholding;]

2. The frequency of the arrearage payment, [i-and

3. ~~The arrearage payment to be equal to the last court or administratively ordered obligation amount.~~

(f) A noncustodial ~~[An absent]~~ parent shall not be obligated to pay current support when parental rights have been terminated or when all children of a particular order are emancipated.

(g) No amount of an employee paid share of the cost of health insurance shall be deducted if, after child support and maintenance are deducted:

1. The total monthly amount of health care coverage exceeds the Federal Consumer Credit Protection Act limits; or

2. Only a portion of the monthly amount needed to purchase health insurance is available.

(h) If amounts are improperly withheld, the cabinet shall promptly refund those amounts.

(i) To comply with the advance notice requirements of KRS 405.467(4), when the address of the noncustodial parent is known, the agency shall send written notification to [the agency shall notify] the noncustodial [absent] parent within fifteen (15) calendar days of the:

1. Request for wage withholding; or

2. The date the arrearage of the noncustodial parent is equal to the monthly obligation amount. [in writing that:]

(j) If the address of the noncustodial parent is unknown, the cabinet shall provide advance notice within fifteen (15) calendar days of locating the noncustodial parent.

(k) The advance notice shall inform the noncustodial parent:

1. He has ten (10) days to contest the withholding; and

2. Failure to contest the withholding within the specified time shall result in the child support agency notifying the employer within five (5) working days to begin withholding; and

3. Withholding shall apply to the current and any subsequent employer.

(l) ~~[(4)]~~ In addition to the requirements of KRS 405.467(5)-(11), the employer shall be notified, within fifteen (15) days of the request for wage withholding, of the following:

1. The employer shall forward collected child support amounts to the child support agency and collected medical insurance premiums to the health insurance carrier within ten (10) working days of the date the amount is withheld from the noncustodial ~~[absent]~~ parent's wages;

2. The employer shall include on the transmittal to the child support agency the name and Social Security number of the noncustodial ~~[absent]~~ parent, the child support agency assigned case number and the date the money was withheld;

3. The employer may combine amounts due the child support agency into one (1) payment if the employer identifies by the name, Social Security number, and the child support agency assigned case number the amount attributable to each noncustodial ~~[absent]~~ parent;

4. The employer shall implement withholding no later than the first pay period that occurs after fourteen (14) work days following the date the notice was mailed; and

5. The employer shall notify the child support agency promptly when the noncustodial ~~[absent]~~ parent terminates employment and provide information to the agency as required by 1996 Ky. Acts ch. 365.

(m) ~~[the following information:~~

a. ~~The absent parent's last known address; and~~

b. ~~The name and address of the new employer, if known.~~

(k) The noncustodial ~~[absent]~~ parent shall keep the child support agency informed of his current employer, if he has access to health insurance coverage at a reasonable cost, and the health insurance policy information.

(n) ~~[(4)]~~ The child support agency shall extend the withholding system to include withholding from wages derived in this state although the support order was issued by another state.

1. Within twenty (20) days of determining that withholding is appropriate for an interstate case, the initiating state shall notify the child support agency of the state where the noncustodial ~~[absent]~~

parent is employed to implement interstate withholding.

2. The notice shall contain:

a. The amount requested to be withheld;

b. The arrearage amount; and

c. A copy of the child support and medical support order.

3. The state where the support order was entered shall provide the information necessary for withholding within thirty (30) days of the receipt of the request.

4. The state of the employer of the noncustodial parent [absent parent's employer] shall:

a. Send notice to the noncustodial ~~[absent]~~ parent within fifteen (15) calendar days of locating the noncustodial ~~[absent]~~ parent or his employer;

b. Provide the noncustodial ~~[absent]~~ parent with the opportunity to contest the withholding; and

c. Send notice to his employer and to the noncustodial ~~[absent]~~ parent.

5. The child support agency shall notify the state in which the custodial parent resides when the noncustodial ~~[absent]~~ parent is no longer employed in the state and provide the state with both the noncustodial ~~[absent]~~ parent's and new employer's name and address, if known.

6. Except for when the withholding shall be implemented in the state where the support order is filed, the laws and procedures of the state where the noncustodial ~~[absent]~~ parent is employed shall apply.

(o) ~~[(4)]~~ The child support agency shall terminate wage withholding ~~[procedures]~~ when there is no longer a current order of support and all arrearages have been satisfied.

(2) Withholding of unemployment compensation.

(a) The child support agency, through an agreement with the state employment security agency, shall provide withholding of a child support obligation from a noncustodial ~~[an absent]~~ parent receiving unemployment compensation under the following conditions:

1. A noncustodial ~~[An absent]~~ parent who is delinquent and owes child support may voluntarily sign an agreement to withhold child support from unemployment compensation benefits.

2. The employment security agency shall commence withholding if:

a. An agreement is signed by the noncustodial ~~[absent]~~ parent; or

b. A notice of claim of intent to withhold is completed by the child support enforcement agency when the noncustodial ~~[absent]~~ parent fails to sign an agreement to withhold within fifteen (15) calendar days; and

c. No mistake in fact or law is proven which causes the noncustodial ~~[absent]~~ parent to be found not owing.

(b) Withholding of unemployment shall not exceed fifty (50) percent of the benefit amount unless:

1. Ordered by a court of competent jurisdiction; or

2. Requested by the noncustodial ~~[absent]~~ parent.

(3) Federal tax refund (offset).

(a) Past-due child support, medical support payments (if a specified dollar amount is included in the order) maintenance, and foster care related support shall qualify for offset if:

1. There is a court ordered or administratively established support obligation;

2. There has been an assignment of support to the child support agency;

3. The arrearage equals at least \$150 and shall have been delinquent at least three (3) months;

4. The arrearage shall be owed for a child or for a child and the parent with whom the child is presently living;

5. The child support agency shall determine the amount of the arrearage and have a copy of the payment record. If there is no payment record, the child support agency shall have an affidavit signed by the custodial parent attesting to the amount of support paid.

6. The child support agency shall verify the accuracy of the noncustodial ~~[absent]~~ parent's name and social security number.

(b) Past due child support, medical support or maintenance in a nonpublic assistance case shall qualify for offset if:

1. There is a court ordered or administratively established support obligation and the child support agency is enforcing the order;

2. The arrearage shall be equal to no less than \$500 dollars and may not include fees, court costs, or any other non child support debt owed to the state or to the family;

3. The child support agency shall have verified the accuracy of the arrearage and have a copy of the support order, including modifications and a copy of the payment record. If there is no payment record, the child support agency shall have an affidavit signed by the custodial parent attesting to the amount of support paid;

4. The arrearage shall be owed on behalf of a child who lives with the client and who is a minor as of December 31 of the year in which the case is submitted for offset;

5. The child support agency shall calculate an assigned arrearage;

6. The child support agency shall verify the accuracy of the noncustodial ~~[absent]~~ parent's name and social security number.

(4) State income tax refund (offset).

(a) An AFDC, foster care, or medical support arrearage which is owed by any person who is required to provide medical support for a child who is eligible for medical assistance (if a specified dollar amount is included in the order) related child support arrearage shall qualify for offset if:

1. There is an arrearage on a legally established child and medical support obligation;

2. The noncustodial ~~[absent]~~ parent's name and social security number are known;

3. The arrearage is at least twenty-five (25) dollars; and

4. The arrearage has been verified as accurate.

(b) A nonpublic assistance support arrearage shall qualify for offset if criteria specified in Section 2(3)(b) of this administrative regulation is met and arrearages are not less than \$150.

Section 3. Aid to Families with Dependent Children (AFDC) Accounts Distribution. (1) A child support payment collected on behalf of a recipient of AFDC shall:

(a) Be made payable to the child support agency; and

(b) Be reported to the AFDC agency within ten (10) working days of the end of the month in which the support is received.

(2) A child support payment that makes the AFDC family ineligible for AFDC shall be reported to the child support agency by the AFDC agency.

(a) If the family is ineligible for an AFDC payment, the child support agency shall:

1. Distribute the amount of child support collected; and

2. Notify the family of continuation of child support services as specified in 904 KAR 2:380, Section 4(2).

(b) If the household remains eligible for an AFDC payment or if a hearing is requested:

1. The AFDC agency shall notify the child support agency; and

2. The child support agency shall distribute the collection as specified in Section 3(7) of this administrative regulation.

(3) A current payment that includes payment on a prior month obligation shall be distributed by the child support agency.

(4) A payment received in the month after ineligibility for AFDC is determined but prior to the last assistance payment being issued shall be used:

(a) To reimburse the state for any assistance paid; and

(b) To pay any excess to the family.

(5) If a hearing is requested and it is determined that the family is ineligible for an assistance payment, the child support agency shall:

(a) Determine the collected amount the family would have received; and

(b) Forward any amount in excess of the assistance payment to the family.

(6) If a hearing is requested and the family is determined to be eligible for an assistance payment, distribution of that month's child support collection shall be made.

~~[(7) The amount collected in a month on behalf of the AFDC family up to the first fifty (50) dollars shall be distributed to the AFDC family within fifteen (15) days of the date of initial receipt by the agency.]~~

~~(a) If the collected amount is less than fifty (50) dollars, the collected amount shall be sent to the family within fifteen (15) days of the end of the month in which it is collected.~~

~~(b) If the collected amount exceeds fifty (50) dollars, only fifty (50) dollars shall be paid to an AFDC family receiving support.~~

~~(c) If the collected amount represents payments from two (2) or more absent parents, only the first fifty (50) dollars shall be paid to the AFDC family.~~

~~(d) If the amount collected represents a payment for a prior month and is received by the child support agency in the month it is due, up to the first fifty (50) dollars shall be paid to the family.~~

~~(e) If the amount collected represents a payment for a prior month and is received by the child support agency in the month in which it is due, but the collection is less than fifty (50) dollars, the collected amount shall be sent to the family within fifteen (15) days of the end of the month in which it is collected.]~~

Section 4. Distribution of Foster Care Accounts. A child support payment collected on behalf of a foster care recipient shall be:

(1) Made payable to the child support agency; and

(2) Upon receipt by the child support agency, shall be disbursed to the foster care agency for distribution.

Section 5. Tax Refund Intercept. (1) Public assistance accounts.

(a) Amounts collected in public assistance cases shall be applied to assigned arrearages.

(b) If no assigned arrearages remain, the collections shall be forwarded to the AFDC family or foster care agency within thirty (30) calendar days of the date of initial receipt by the agency.

(c) If a timely appeal is filed by a noncustodial ~~[an absent]~~ parent and the appeal is resolved, payment shall be made to the family or refunded to the noncustodial ~~[absent]~~ parent within fifteen (15) calendar days of the resolution date.

(d) If a joint return has been filed, tax refund intercept collection shall be held by the child support agency for six (6) months prior to being distributed.

(2) Nonpublic assistance accounts. For a nonpublic assistance account, if no assigned arrearage remains, an amount collected which represents an arrearage amount shall be sent to the family within thirty (30) calendar days of the initial receipt date.

(3) If the noncustodial ~~[absent]~~ parent contests the accuracy of a past due amount, he may request an administrative review in accordance with specifications in 904 KAR 2:400, Section 4.

Section 6. Treatment of Excess Payments. (1) Collection of child support payments shall be applied to the required obligation amount for the month in which the support was collected.

(2) After the current obligation amount is satisfied, any excess amount shall be treated as payment on previous unpaid arrearage.

Section 7. Wage Withholding Distribution. (1) A child support or medical support payment made through wage or other withholding shall use the date the income is withheld for the date of collection for distribution to meet the support obligation.

(2) Distribution of wage withholding collections shall be made according to specification in Sections 3, 4, 6 or 8 of this administrative regulation.

Section 8. Interstate Case Payment Distribution. Child support payments that are collected by a responding state on behalf of an

initiating state shall be forwarded to the initiating state within fifteen (15) calendar days of initial receipt by the responding state.

(1) If the collected amount is less than fifty (50) dollars, the responding state shall send the amount collected to the location specified by the child support agency in the initiating state within fifteen (15) calendar days of the date of initial receipt in the responding state.

(2) The initiating state upon receipt of collection made by the responding state shall retain the collections to reimburse the assistance payment for the month it was received or the next month if the amount collected exceeds the required support obligation for the month and is in excess of the AFDC assistance payment.

(3) Collection of child support in the month after the month the family receives its last AFDC assistance payment shall be distributed and sent to the family within fifteen (15) calendar days of the date of initial receipt in the state.

Section 9. Additional Administrative Enforcement Remedies. (1) When the cabinet determines that the obligor owes an arrearage, the cabinet may implement administrative enforcement remedies listed below to collect the delinquent support amounts:

(a) Filing of liens on personal or real property when an arrearage is equal to or greater than one month's obligation;

(b) Report to credit bureaus; and

(c) Notifying the Transportation Cabinet to deny or revoke motor vehicle driver's license.

(2) The Cabinet for Families and Children shall:

(a) Provide information to credit reporting agencies as specified by KRS 205.768; and

(b) Provide [Within the context of the provisions of KRS 205.768, the Cabinet for Families and Children:

(a) Shall inform the credit reporting agency of a child support arrearage in each case referred for federal tax refund intercept; and

(b) May inform the credit reporting agency of a child support arrearage in any case which did not meet criteria for federal tax refund intercept because the parent's social security number is unknown.

(3) advance written notice to the noncustodial parent of the release of the information required by KRS 205.768(2) [shall be given to the absent parent in the preoffset letter of information concerning the federal tax refund intercept].

(c) The name of the noncustodial parent shall be:

1. Deleted from the list provided to credit report agencies when the advance notice is returned as undeliverable, and subsequent location efforts are unsuccessful; or

2. Added to the list provided to the credit reporting agencies when subsequent location efforts are successful.

[(4) An absent parent whose case shall not be certified for federal tax refund intercept but may be reported to a consumer reporting agency shall receive prior notice of the past due amount of child support and of the right to request an administrative review within thirty (30) days of the receipt of the notice.

(a) If the preoffset letter is returned and location services are unsuccessful, that individual shall be deleted from the list sent by the child support agency.

(b) If location services are successful, his name may be added to an updated list.

(c) An identifying list of absent parents is forwarded to the credit reporting agency the January following the certification year.]

(3) [(6)] Denial or suspension of driver's license.

(a) The cabinet shall as provided by KRS 186.570(2); [As a remedy of last resort when all other civil remedies either do not apply or have been tried and have failed, including judicial remedies, the cabinet shall:]

1. Identify a case with a verified arrearage equal to one (1) year's obligation amount which accrued beginning January 1, 1994, or thereafter; and

2. Contact the contracting official to determine if the contracting official intends to pursue judicial action.

3. If the contracting official determines that judicial action will not be taken, advise the contracting official of the intent of the agency to proceed with the referral to revoke or deny a driver's license.

4. [2-] Send by first class mail to a noncustodial [an absent] parent who holds a valid Kentucky driver's license and who has the ability to pay support:

a. A notice of intent to request denial or suspension of a driver's license; and

b. A noncustodial [An absent] parent answer to notice of intent.

3. Notify the noncustodial [absent] parent that the only basis for resolution of the dispute shall be:

a. The arrearage is incorrect and does not equal or exceed the amount of support owed for one (1) year;

b. The wrong individual has been identified;

c. A bond is posted for the total arrearage which has accrued since January 1, 1994;

d. A payment agreement is entered into by the noncustodial [absent] parent to pay current support, plus a specified monthly payment amount on the total arrearage which has accrued since January 1, 1994. The monthly payments shall be:

(i) Fifty (50) percent if the arrearage owed is less than \$1,000; or

(ii) \$500 plus twenty-five (25) percent of the amount over \$1,000 if the arrearage is not less than \$1,000 and not greater than \$2,000; or

(iii) \$750 plus ten (10) percent of the amount over \$2,000 if the arrearage is \$2,000 or more; or

e. The noncustodial [absent] parent pays the total arrearage which has accrued since January 1, 1994.

(b) To assure delivery of the notice of intent, the cabinet shall refer the case for parent locator service if the notice is returned and the forwarding address is unknown;

(c) If the noncustodial [absent] parent requests a dispute hearing by contesting the arrearage based upon a mistake of fact and returns the noncustodial [absent] parent answer to notice of intent form within twenty (20) calendar days of the notification date, the cabinet shall:

1. Within ten (10) working days of the noncustodial [absent] parent's response, schedule and hold an interview with the noncustodial [absent] parent;

2. Attempt to resolve the dispute at the time of the interview; and

3. Forward the noncustodial [absent] parent's written request for a hearing to the agency responsible for conducting the dispute hearing.

(d) The child support agency shall inform the agency responsible for conducting the hearing that:

1. A resolution has been reached as a result of the interview and a written request from the noncustodial [absent] parent to withdraw the hearing request shall be sent; or

2. A resolution to the dispute has not been reached and the hearing request remains in effect.

(e) Upon the decision made by the agency conducting the hearing, and within twenty (20) calendar days of the hearing officer's decision, the child support agency shall notify the Transportation Cabinet of the request for the denial or suspension of the driver's license, unless:

1. The noncustodial [absent] parent makes full payment of the total arrearage that may have accrued since January 1, 1994;

2. The noncustodial [absent] parent enters into a payment agreement to pay current support, plus the specified amount on the total arrearage which accrued since January 1, 1994 as determined by paragraph (a)3d of this subsection; or

3. The noncustodial [absent] parent posts a bond for the total arrearage which has accrued since January 1, 1994.

(f) If the case does not qualify for submittal to the Transportation Cabinet, a notice to deny or suspend the driver's license shall not be sent.

(g) If the noncustodial [absent] parent does not contest the arrearage or after the interview and hearing process, the case qualifies for submittal to the Transportation Cabinet, the Cabinet for Families and Children shall refer the name of the noncustodial [absent] parent to the Transportation Cabinet for the denial or suspension of the driver's license, unless:

1. The noncustodial [absent] parent makes full payment of the arrearage within twenty (20) calendar days of the interview by the Cabinet for Families and Children;

2. The noncustodial [absent] parent posts a bond within twenty (20) calendar days of the interview for the total arrearage which accrued since January 1, 1994; or

3. The noncustodial [absent] parent enters into a payment agreement to pay current support, plus the specified amount on the total arrearage which has accrued since January 1, 1994 as determined by paragraph (a)3d of this subsection.

(h) The Cabinet for Families and Children shall notify the Transportation Cabinet to reinstate or reissue a previously suspended or revoked driver's license if:

1. The noncustodial [absent] parent makes full payment of the arrearage;

2. The noncustodial [absent] parent posts a bond for the total arrearage amount; or

3. The noncustodial [absent] parent:

a. Makes a good faith payment which equals three (3) months' current support; and

b. Enters into a payment agreement to pay the specified amount on the remaining arrearage which has accrued since January 1, 1994 as determined by paragraph (a)3d of this subsection.

Section 10. Appeal Procedure. An obligor may request a dispute hearing in accordance with KRS 405.490 or 405.450 as described in 904 KAR 2:400, Section 4.

Section 11. Material Incorporated by Reference. (1) Forms necessary for the collection and distribution of child support and medical support are incorporated effective February 15, 1995. These forms include:

(a) CS-111, revised 5/89;

(b) CS-63, issued 2/95;

(c) CS-78, revised 5/89;

(d) CS-44, issued 2/95;

(e) CS-148, revised 10/93;

(f) CS-149, revised 10/93;

(g) CS-122, revised 7/96 [7/94];

(h) CS-123, revised 7/96 [7/94].

(2) These forms may be inspected and copied at the Department for Social Insurance, 275 East Main Street, Frankfort, Kentucky 40621. Office hours are 8 a.m. to 4:30 p.m.

JOHN L. CLAYTON, Commissioner

VIOLA P. MILLER, Secretary

APPROVED BY AGENCY: September 30, 1996

FILED WITH LRC: October 1, 1996 2 p.m.

REGULATORY IMPACT ANALYSIS

Agency Contact Person: Marty Mason, Director

(1) Type and number of entities affected: This administrative regulation sets forth the procedures for collection and distribution of child support payments. This regulation will include the procedures by which the denial or suspension of drivers' licenses will occur when a child support arrearage of one year accumulates beginning January 1, 1994, the distribution of wage withheld child support obligations, and credit bureau reporting procedures. This will affect any obligor having an arrearage of one (1) year's amount, beginning January 1, 1994. Additionally, the removal of the mandate to pass through the

first \$50 of child support is being deleted as a result of PL 104-193. A regular administrative regulation will be promulgated to replace this emergency regulation. Collections to IVA/IVD clients will effect approximately 12,000 cases.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented to the extent available from public comments received. To be determined after the publication of the notice of intent.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented to the extent available from public comments received. To be determined after the publication of the notice of intent.

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First Year following implementation: An increase in paperwork will be realized by child support offices and legal representatives. No additional costs should be incurred by the clients.

2. Second and subsequent years: An increase in paperwork will be realized by child support offices and legal representatives. No additional costs should be incurred by the clients.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings: Failure to eliminate the DEFRA mandate by PL 104-193, will result in a yearly state cost of \$6.0 million to the cabinet. The following is a result of the denial or revocation of driver's license:

1. First Year: 1997

| | |
|--------------------------------------|-----------|
| 5 staff and related cost | \$156,400 |
| 2 hearing officers and related costs | 62,600 |
| System costs | 84,000 |
| Policy costs | 46,900 |
| New form cost | 1,000 |
| Postage | 2,100 |
| Total | \$353,000 |

2. Continuing costs or savings: 1998

| | |
|--------------------------------------|-----------|
| 5 staff and related cost | \$164,300 |
| 2 hearing officers and related costs | 65,800 |
| Forms | 1,500 |
| Postage | 2,200 |
| Total | 233,800 |

3. Additional factors increasing or decreasing costs:

(a) It is anticipated collections will increase as a result of driver's license revocation. The additional collections retained by the state is anticipated to be \$385,200. If these projections hold, the collections will offset the cost by SFY 1998. Failure to remove the DEFRA mandate by PL 104-193 will result in a yearly state cost \$6.0 million to the cabinet.

(b) Reporting and paperwork requirements: An increase in paperwork will be realized by child support offices and legal representatives.

(4) Assessment of anticipated effect on state and local revenues: Failure to remove the DEFRA mandate by PL 104-193 would result in a yearly state cost of \$6.0 million to the cabinet.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: Federal funding-66%; agency funding-34%.

(6) To the extent available from public comments received, economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: To be determined after the publication of the notice of intent.

(b) Kentucky: To be determined after the publication of the notice of intent.

(7) Assessment of alternative methods; reasons why alternatives were rejected: No alternative methods were considered. Regulatory

amendments were developed in order to harmonize with statutory language. The elimination of the DEFRA (pass through) payments to the IVA/IVD was an option to the state chosen by the state due to the lack of federal funding match for this payment.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: The implementation of the provisions as identified will provide an easier and more efficient method of determining paternity and therefore providing the basis for the collection of child support.

(b) State whether a detrimental effect on environment and public health would result if not implemented: None

(c) If detrimental effect would result, explain detrimental effect:

(9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: None

(a) Necessity of proposed regulation if in conflict:

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions:

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied? No. Tiering was not applied because the Child Support Enforcement Program requires uniformity in the application of policy as specified in 45 CFR 302.33(c).

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate. 45 CFR 303.21; 45 CFR 303.105; 45 CFR 303.107; 45 CFR 302.34; PL 104-193.

2. State compliance standards. There are no differing or additional state compliance standards.

3. Minimum or uniform standards contained in the federal mandate. This administrative regulation provides requirements of the child support agency in the collection and distribution of child support payments.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate. No

5. Justification for the imposition of the stricter standards, or additional or different responsibilities or requirements. None

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State whether this administrative regulation will affect the local government or only a part or division of the local government. This regulation contains new services and new requirements of the contracting officials, and therefore does affect local governments by requiring additional administrative work in the collection of child support and medical support payments.

3. State the aspect or service of local government to which this administrative regulation relates. This regulation relates to the collection of child support payments and medical support payments for the child support enforcement program by contracting officials.

4. How does this administrative regulation affect the local government or any service it provides? This regulation requires the contracting officials to provide for possible modification of child support orders and for modification of orders to collect medical support/insurance orders.

ADMINISTRATIVE REGULATIONS AMENDED BY REVIEWING SUBCOMMITTEE AND PROMULGATING AGENCY

COMPILER'S NOTE: The following administrative regulations were amended by the Administrative Regulation Review Subcommittee and the promulgating agency on October 7, 1996, unless otherwise noted.

FINANCE AND ADMINISTRATION CABINET Office of the Secretary (As Amended)

200 KAR 5:302. Delegation of authority.

RELATES TO: KRS Chapter 45A

STATUTORY AUTHORITY: KRS 45A.035, 45A.045(3), 45A.050(5)

NECESSITY, FUNCTION, AND CONFORMITY: This administrative regulation is required by KRS 45A.035 where the Secretary of the Finance and Administration Cabinet delegates purchasing authority to any other agency. It will provide uniformity for all delegations of authority by the Finance and Administration Cabinet and help to ensure the competency of the agency receiving the authority over the proposed delegated area. The administrative regulation will also help to ensure that the agency receiving the authority follows all requirements of KRS Chapter 45A. In addition, this administrative regulation will set out the requirements for the Secretary of the Finance and Administration Cabinet to waive the small purchase limitations pursuant to KRS 45A.100. This administrative regulation includes the substance of the administrative regulation to be repealed, 200 KAR 5:301.

Section 1. Delegations of Authority Other than for Small Purchases. A secretary's order may delegate Finance and Administration Cabinet authority pursuant to KRS 45A.045(3).

(1) A government agency requesting a delegation from the Finance and Administration Cabinet under KRS 45A.045(3) shall submit the following in writing to the secretary:

(a) A statement that the agency will comply with all applicable laws, administrative regulations and Finance and Administration Cabinet policies and procedures.

(b) Proof of competency in the proposed delegated area demonstrated by staff experience and training and the resources available to the agency to perform the purchase delegation.

(2) The secretary's order shall specify the authority the agency shall receive, the purpose for which the delegation is given, and the period of time for which the delegation is valid.

(3) Any agency receiving such delegation shall comply with the provisions of KRS Chapter 45A and all other purchasing statutes, administrative regulations, policies and procedures of the Finance and Administration Cabinet.

(4) Each agency receiving a delegation shall certify annually to the secretary that it is in compliance with all purchasing laws, administrative regulations and policies. This certification shall be filed with the secretary on or before January 1, 1997 and thereafter on July 1 of each year, including July 1, 1997.

(5) All standing delegations of purchasing authority by the secretary shall remain in force according to the original terms thereof unless modified, or until rescinded by the secretary.

(6) Delegations of purchasing authority for an agency's individual requirements, or to authorize procurement activities by an agency for preestablished and limited periods of time may be granted as appropriate with regard to the procurement activity or function by the Commissioners of the Departments for Administration and Facilities Management or their designees by letter setting forth with particularity

the kind and type of procurement activity or function authorized by the delegation and fixing the limits and restrictions or the exercise of the delegation and its duration. No such delegation of purchasing authority shall be extended or renewed except with the written approval of the Secretary of the Finance and Administration Cabinet.

Section 2. Small Purchase Delegation Exceeding an Agency's Statutory Small Purchase Limit Under KRS 45A.100. The Secretary of the Finance and Administration Cabinet may delegate purchasing authority that exceeds the agency's small purchase limit set out in KRS 45A.100 by secretary's order. These standing delegations shall set forth with particularity the kind or type of procurement activity or function delegated together with any limitations or restrictions on the exercise of such authority.

(1) An agency request for small purchase delegation above the limits established in KRS 45A.100 shall be submitted to the secretary, shall be signed by the agency head submitting the request and shall supply the following information:

(a) The total dollars spent each of the two (2) preceding fiscal years under the agency's existing small purchase authority and the number of small purchase transactions represented by those dollar figures for each fiscal year.

(b) A description of the agency's organizational structure which must demonstrate that the placement of the procurement function is appropriate to the agency's size and procurement needs.

(c) A description of the agency's internal controls, which shall ensure adequate safeguarding of assets and the segregation and separation of duties, particularly the separation of purchasing, accounting, and receiving functions.

(d) Documentation that the agency has prepared and implemented a plan to identify and utilize small and minority-owned suppliers for small purchases. The agency's future goals in this respect shall be reported, with a goal of five (5) percent utilization being the minimum. An action plan showing how the agency plans to reach its goals shall be included. The agency shall be prepared to report its progress toward meeting that goal upon the secretary's request.

(e) The agency shall acknowledge that it is aware of, and in compliance with, the provisions of KRS 45A.500 and 200 KAR 5:330 relating to recycled material content products.

(f) Every record of control weakness or noncompliance relating to procurement practices issued to the agency by the Auditor of Public Accounts, internal auditors, or the Finance Divisions of Purchases or Contracting and Administration, for each of the past two (2) fiscal years and the agency's response to the finding. All such records of control weakness or noncompliance shall be addressed in the agency's request and any corrective measure taken shall be to the satisfaction of the Secretary of the Finance and Administration Cabinet.

(g) A list of the agency's procurement personnel, below the level of Branch Manager, to whom the agency will give signature authority for purchases at the requested higher small purchase limits and their professional purchasing certification or training. Such persons shall, within one (1) year after the granting of the delegation or within one (1) year of employment in government in a procurement position, whichever is sooner, have completed a course in purchasing offered by the Finance and Administration Cabinet's Division of Purchases and Division of Contracting and Administration, or the introductory course in purchasing offered by the National Institute of Governmental Purchasing or an equivalent course offered by the National Association of Purchasing Management.

(2) The requesting agency shall utilize each on-line function of the Kentucky Automated Purchasing System that has been offered to the

agency by the Divisions of Purchases or Contracting and Administration.

(3) The Divisions of Purchases and Contracting and Administration may perform or request the performance of periodic procurement audits of the agencies to which small purchase delegation above the limits established in KRS 45A.100 has been granted. Such audits shall investigate an agency's compliance with the provisions of KRS Chapter 45A, purchasing administrative regulations and the Finance and Administration Cabinet Manual of Policies and Procedures. If an agency demonstrates deficiencies in procurement expertise or practice, the divisions shall recommend that the secretary revoke or amend any delegations granted under this administrative regulation. Authority shall not be extended or renewed except with the written approval of the secretary.

Section 3. 200 KAR 5:301. Delegation of purchasing authority, is hereby repealed.

(As Amended)

200 KAR 5:306. Competitive sealed bidding.

RELATES TO: KRS 45A.080

STATUTORY AUTHORITY: KRS 45A.035, 45A.080

NECESSITY, FUNCTION, AND CONFORMITY: The Secretary of the Finance and Administration Cabinet is authorized by KRS 45A.055 to publish state purchasing administrative regulations for the implementation of the Kentucky Model Procurement Code (KRS Chapter 45A). (The Secretary of the Finance and Administration Cabinet is authorized by KRS 45A.055 to publish state purchasing administrative regulations for the implementation of the Kentucky Model Procurement Code (KRS Chapter 45A). This administrative regulation implements the provisions of KRS 45A.080. This administrative regulation is amended to more clearly state that this administrative regulation pertains only to those contracts exceeding the small purchase limits established by KRS 45A.100. These amendments also change the reference to "bidders' list" to "source list" and "purchasing official" and "buyer" to "purchasing officer." These amendments further provide that only those late bids postmarked prior to the scheduled opening date shall be considered for award, and that facsimile bids and responses shall not be accepted by the Division of Purchases. These amendments make revisions to bring the administrative regulation into compliance with the drafting rules established under KRS Chapter 13A.)

Section 1. (1) The purchasing agencies of the Commonwealth shall cause adequate public notice of invitations for bids pursuant to [for furnishing procurement requirements of the Commonwealth and its agencies through newspaper advertisement in the manner set forth in] KRS 45A.080(3).

(2) For those contracts estimated to exceed \$25,000, adequate public notice shall include publication of a notice in either or both the Louisville and Lexington daily newspapers not less than seven (7) days prior to the date set for the opening of bids.

(3) The agencies shall transmit [and shall solicit bids from interested persons listed on the source lists for particular requirements by sending] invitations for bids not less than fourteen (14) days prior to the date set for the opening of bids, to prospective vendors.

(4) An agency shall transmit an invitation for bid by:

(a) Sending a hard copy to at least ten (10) persons listed in a source list for the item that is the subject of the invitation for bid; or

(b) If less than ten (10) persons are listed in the source list, to all persons listed in the source list; or

(c) Electronically upload an invitation for bid to the electronic Vendor Information Program Bulletin Board System operated by the Division of Purchases, Finance and Administration Cabinet, if it has been determined by the Director, Division of Purchases, that reasonable access to the Vendor Information Program Bulletin Board System is available to potential bidders. [The agencies shall transmit invitations for bids by either sending a hard copy to at least ten (10) persons listed in such source lists, and if less than ten (10), all potential bidders listed in the source lists as interested in supplying the particular requirement; or agencies may electronically upload bid invitations or notices of invitations to the electronic Vendor Information Program bulletin board system operated by the Division of Purchases, Finance and Administration Cabinet.] [If there are not ten (10) persons listed on a particular source list, invitations shall be sent to all persons listed on that particular list.]

Section 2. (1) A bid shall comply with the instructions contained in the invitation for bid.

(2) A bidder shall submit a signed bid on the form furnished by the purchasing agency. [Bidders shall complete, execute and submit their bids in strict compliance with the instructions contained in the invitation for bids. Bid forms shall be provided by the purchasing agencies in paper or electronic format and a bidder responding to an invitation for bids shall use only the bid form or form of proposal furnished by the purchasing agency in submitting his bids.]

Section 3. Bidders shall submit their bids at the place and at, or prior to the date and hour set in the invitation for bids. Bids received after the hour set for opening bids shall be marked late ~~[are late bids and shall be so marked]~~. A late bid shall not be considered for an award unless no other bid is received in response to an invitation for bids. The late bid, together with the envelope in which the bid was submitted bearing the stamped date and hour of receipt of the bid, shall be retained in the invitation for bids file ~~[pertaining to the invitation for bids]~~. Only those late bids postmarked prior to the scheduled opening date shall be considered for award.

Section 4. All bids, and any modifications to bids previously filed, received prior to the date and hour fixed for opening bids shall be kept secure and unopened. Envelopes containing bids but not marked to indicate that they contain a bid and listing the invitation for bids number and the date and hour of opening bids for that invitation may be opened to identify ~~[for the purpose of identification of]~~ the contents of the envelope and shall [will] be marked and resealed.

Section 5. The purchasing officer or other employee of the purchasing agency designated to open the bids shall determine when the time set for opening bids has arrived and shall so declare the time to those present for the bid opening. He shall then and there personally, in the presence of the bidders or their representatives and anyone else who may wish to attend the bid opening, open all bids received as of that date and hour; when practical, the names of the bidders and the amounts of their bids may be read aloud to the persons present. Except where it may be deemed impractical, ~~[it may be deemed impractical]~~ a bid tabulation summary sheet shall be prepared for each invitation for bids recording the name of each bidder, a description of the supplies or services bid and the amounts of the bids received. The bid tabulation summary sheet shall be permanently retained in the file pertaining to that invitation for bids and shall be available for public inspection. Inspection of bids by interested persons shall not be permitted ~~[or authorized]~~ during the formal bid

opening process.

Section 6. The bids shall be examined by the purchasing officer responsible for the procurement for any clerical or technical errors, reviewed for technical compliance with the terms of the invitation for bids, and the supplies or services bid evaluated for conformity with the specifications contained in the invitation for bids. Every bidder shall, when requested by the purchasing officer responsible for the particular procurement, clarify ~~[or explain]~~, in writing, any matter contained in his bid about which the purchasing officer may have question or believes in good faith needs to be clarified ~~[and explained]~~. The bid of any bidder who fails or refuses, within a reasonable time, to give a written clarification ~~[or explanation]~~ of his bid, or any part thereof, when requested to do so by the purchasing officer, shall not be considered further for an award on the basis of that invitation for bids. The written clarification ~~[or explanation]~~ of a bid, or a part of a bid, shall be incorporated in ~~[and become a part of]~~ any contract awarded on the basis of that bid. ~~[In due course, and]~~ After a reasonable bid evaluation period, the contract shall be awarded to the responsive and responsible bidder whose bid is either the lowest bid price or the lowest evaluated bid price, whichever is determined by the purchasing officer to be in the best interests of the Commonwealth or as designated in the invitation for bids as the basis for award of the contract. ~~[If]~~ After evaluation of the bids, including consideration of any clarifying ~~[or explanatory]~~ information submitted by the bidders, ~~the purchasing officer may determine [it is determined by the purchasing officer]~~ that no satisfactory bid has been received and ~~[]~~ all bids may be rejected. At ~~[and, in]~~ the discretion of the purchasing officer, the invitation for bids may be cancelled and ~~[]~~ new bids invited on the basis of the same or revised specifications, or competitive negotiations undertaken for the procurement. The basis for the rejection of all bids and subsequent action taken or to be taken with respect to the invitation for bids shall be recorded in writing and filed in the invitation for bids file relating to the particular procurement.

Section 7. (1) The right to reject any ~~[and all]~~ bid~~s~~ and to waive technicalities and minor irregularities in bids shall be ~~[maintained and]~~ preserved in the case of all invitations for bids issued by purchasing agencies within the Finance and Administration Cabinet or pursuant to delegations of purchasing authority by the Finance and Administration Cabinet.

(2) Grounds for the rejection of bids include :

(a) Failure of a bid to conform to the essential requirements of an invitation for bids.

(b) Any bid which does not conform to the specifications contained or referenced in any invitation for bids shall be rejected unless the invitation authorized the submission of alternate bids and the items offered as alternatives meet the requirements specified in the invitation.

(c) Any bid which fails to conform to a delivery schedule established in an invitation for bids.

(d) A bid imposing conditions which would modify the terms and conditions of the invitation for bids, or limit the bidder's liability to the state on the contract awarded on the basis of such invitation for bids.

(e) Any bid determined by the purchasing officer in writing to be unreasonable as to price.

(f) Bids received from bidders determined to be not responsible bidders.

(g) Failure to furnish a bid guarantee when required by an invitation for bids.

(h) For other cause as documented by the purchasing officer pursuant to a written determination and finding.

(3) Technicalities or minor irregularities in bids which may be waived when the purchasing officer determines that it will be in the Commonwealth's best interest to do so, are mere matters of form not affecting the material substance of a bid or some immaterial deviation

from or variation in the precise requirements of the invitation for bids and having no or a trivial or negligible effect on price, quality, quantity or delivery of supplies or performance of the services being procured, the correction or waiver of which will not affect the relative standing of, or be otherwise prejudicial to other bidders. The purchasing officer may either give a bidder an opportunity to cure any deficiency resulting from a technicality or minor irregularity in his bid, or waive such deficiency where it is advantageous to the Commonwealth to do so.

Section 8. Where a mistake in a bid is claimed, and the evidence is clear and convincing that a material mistake was made in the bid and that due to such mistake, the bid submitted was not the bid intended, the bidder may be permitted to withdraw his bid. It shall be the duty of all contractors bidding to carefully review and verify the accuracy of their bids both before submitting them and prior to execution of a contract. When a mistake in a bid is claimed after the award and execution of a contract, on the basis of such bid, the contractor shall be required to perform according to the terms and conditions of the contract unless it is established by clear and convincing evidence that a material mistake had been made in the original bid and that the contractor would sustain a financial loss if required to perform the contract according to its terms; a reduction or diminution in profit margin shall not be deemed a financial loss under this section. Where the evidence is clear and convincing that a material mistake has been made in a bid after the award of a contract, and the contractor will sustain a financial loss if required to perform the contract, the contract shall be rescinded and the contractor shall be ineligible to submit a bid upon readvertisement for the commodity or service.

Section 9. The following matters shall apply ~~[be applicable]~~ to all invitations for bids issued, bids submitted, and contracts awarded for the purchase of commodities, supplies and equipment pursuant to KRS 45A.080 and this administrative regulation:

(1) Time discounts or cash discounts shall not be considered.

(2) ~~[Trade discounts.]~~ Trade discounts shall ~~[should]~~ be deducted by the vendor in calculating the unit price quoted, unless otherwise indicated in the bid.

(3) ~~[Quantity discounts.]~~ Quantity discounts shall be included in the price of the item. When not included in the item price, the discount shall be considered only if the purchasing agency deems it to be in the Commonwealth's best interests. The unit price shown on the contract shall be the net price, less the discount, unless otherwise indicated in the bid.

(4) ~~[Unit prices.]~~ In case of a discrepancy in the extension of a price, the unit or item price shall govern over the total price of all items.

(5) ~~[Awards on an aggregate or individual item basis.]~~ An award may be made to the lowest aggregate bidder for all items, group of items, or on an individual item basis, whichever is deemed to be in the Commonwealth's best interest. The methods and bases of award of contract and of evaluation of bids shall be stated in the invitation for bids.

(6) ~~[Telegraphic or facsimile bids.]~~ When the purchasing agency has invited competitive sealed bids or request for proposals, telegraphic or facsimile responses shall not be accepted.

200 KAR 15:010. Formula for allocation of private activity bonds.

RELATES TO: KRS 103.200(1)(k), (m), (n), (2), 103.2101, 103.286 [Chapter 103]

STATUTORY AUTHORITY: KRS 103.286(3), 26 USC Sec. 146
 NECESSITY AND FUNCTION: ~~[Pursuant to KRS 103.286, the Kentucky Private Activity Bond Allocation Committee shall attempt to allocate the state ceiling for the issuance of private activity bonds of Kentucky in order to foster economic development within the Commonwealth and promote the general welfare of its citizens and the public purposes of the Commonwealth.]~~ KRS 103.286(3) provides that the Secretary of the Finance and Administration Cabinet ~~[(as Chairman of the Kentucky Private Activity Bond Allocation Committee)]~~ shall promulgate administrative regulations ~~[in accordance with KRS Chapter 13A]~~ to provide for the allocation of the state ceiling for the issuance of private activity bonds ~~[among all issuers of such bonds within the Commonwealth of Kentucky]~~. This administrative regulation establishes the formula for that allocation. ~~[by which state ceiling for the issuance of private activity bonds will be allocated.]~~

Section 1. Definitions. For the purposes of this administrative regulation:

(1) "Affected bonds" means "private activity bonds" as defined by 26 USC sec. 146 [in the Internal Revenue Code of 1986, as amended by 26 USC sec. 146, et seq. (the "Code")], excluding any ~~[such]~~ obligations not subject to the state ceiling under the Code;

(2) "Bonds", see KRS 103.200(2); ~~[means bonds, notes and other like obligations;]~~

(3) "Committee" means the Kentucky Private Activity Bond Allocation Committee;

(4) "Issuer" or "issuing authority" means the public or authorized governmental body which issues the bonds;

(5) "Issued" means delivered and paid for;

(6) "Local issuer pool" means the portion of the state ceiling from which allocations for local projects are made to issuers of affected bonds issued on behalf or for the benefit of an entity which is not a state agency;

(7) "Local project" means a project for which bonds are issued on behalf or for the benefit of an entity which is not a state agency;

(8) "Single issuer pool" means the portion of the state ceiling from which allocations are made to any issuer;

(9) "Staff" means the Office of Financial Management and Economic Analysis of the Finance and Administration Cabinet.

(10) "State ceiling" means the cap imposed by 26 USC sec. 146 [Section 146 of the Code] on private activity bonds issued within the Commonwealth of Kentucky;

(11) "State issuer pool" means the portion of the state ceiling from which allocations for state projects are made to issuers of affected bonds issued on behalf or for the benefit of a state agency;

(12) "State project" means a project for which bonds are issued on behalf or for the benefit of a state agency; and

(13) "Year" shall mean calendar year.

Section 2. Allocation of State Ceiling for Private Activity Bonds. ~~[(4)]~~ On January 1st of each year, the state ceiling for private activity bonds shall be divided into two (2) separate pools;

~~[(1) [a state issuer pool and a local issuer pool.]~~ Sixty (60) percent of the state ceiling shall be reserved in a local issuer pool until October 1st. On October 1st, the remainder of any unallocated portion of the state ceiling shall revert to a single issuer pool.

~~[(2) [for the local issuer pool and]~~ Forty (40) percent of the state

ceiling shall be reserved for a [the] state issuer pool until July 1st. On July 1st, the remainder of any unallocated portion of the state ceiling shall revert to the single issuer pool. ~~[On and after July 1 of each year, any remaining unallocated portion of the state ceiling in the state issuer pool shall revert to the single issuer pool. On October 1 of each year, any remaining unallocated state ceiling in the local issuer pool shall revert to the single issuer pool. On and after October 1 of each year, any remaining unallocated portion of the single issuer pool shall be allocated on a first come, first served basis, subject to the limitations of KRS 103.286(2)(a).]~~

Section 3. Allocations For Local Projects. Prior to October 1 ~~[of any year]~~ the committee shall not allocate a portion of the state ceiling for any project in an aggregate principal amount greater than ten (10) percent of the amount of the local issuer pool.

Section 4. Evaluation of Local Projects. Local projects seeking allocation from the state ceiling prior to October 1 shall be evaluated by the committee using the following criteria:

(1) Creation of new jobs, as well as preservation of existing jobs, by the project;

(2) Average salary per employee proposed for the project;

(3) Capital investment in Kentucky being made as a result of the project;

(4) Unemployment rate in the county of the project;

(5) State economic development incentives awarded to the ~~company [pre]ject~~, if any;

(6) Previous private activity bond cap allocated to the company.

Section 5. Committee Meetings. The committee shall meet at least quarterly to allocate the state ceiling. Special meetings may be held on the call of the committee chairman.

Section 6. A confirmation authorizing the issuance of affected bonds shall be obtained by the issuer filing with the committee a written notice of intention to issue bonds ("notice of intent" form). Obtaining Confirmations in Advance-notice of Intent. The committee shall issue a confirmation ("Confirmation of Allocation of State Ceiling" form) allocating to the issuer a portion of the state ceiling equal to the amount of the bonds proposed to be issued. ~~[Ne]~~ Affected bonds shall not be issued by any issuer prior to receiving confirmation by the committee of an allocation under the state ceiling. ~~[A confirmation authorizing the issuance of affected bonds shall be obtained by the filing by or on behalf of the issuer with the committee of a written notice of intention to issue such bonds (the "notice of intent").]~~ Confirmations shall be dated and numbered in the order issued ("Notice of Issuance" form).

Section 7. Notice of Issuance. Original Confirmation Effective for Ninety (90) Days. A confirmation shall expire ninety (90) calendar days from the date of issuance by the committee, or December 15, whichever is earlier. The issuer shall deliver to the committee a notice that the affected bonds have been issued. The notice of issuance may be sent by any means but it shall be received by ~~[shall be transmitted by means the issuer may select, but shall be sent in time sufficient to allow the notice to reach]~~ the committee by the close of business on the 90th day after the confirmation. If the [such] period ends on a Saturday, Sunday, or other day upon which state offices are closed for business, the notice period shall be extended to the next business day.

Section 8. Renewal of Confirmation Period. (1) If the bonds are not issued within the ninety (90) day confirmation period, the issuer may seek a renewal of confirmation for all or any part of the project described in the original notice of intent;

(2) The issuer may seek renewal by filing a new notice of intent;

(3) The issuer shall wait a period of thirty (30) days after expiration of the original confirmation period before filing the new notice of intent;

(4) The committee shall review the new notice of intent and may grant a renewal confirmation which shall be valid for a period of thirty (30) days. [Subsequent Renewals. Thirty (30)-Day Waiting Period. If the applicable bonds are not issued within such ninety (90)-day period no new notice of intent for a project consisting of all or any part of the project described in any prior notice of intent may be filed until the expiration of thirty (30) days following the expiration of the last confirmation. If so filed, the confirmation issued upon such new notice of intent shall expire thirty (30) days after the date of such subsequent confirmation.]

Section 9. Supplementary Confirmation for Excess Amounts Required. If the amount of affected bonds proposed to be issued is insufficient to pay the costs of the proposed project, an issuer may file with the committee a supplementary notice of intention to issue additional bonds. The committee shall confirm the supplementary notice of intention to issue bonds[~~—if any,~~] by a supplementary confirmation. The supplementary confirmation shall expire on the date of the confirmation that it supplements.

Section 10. Issuance of Bonds in Lesser Amounts than Confirmation. Eighty-five (85) Percent Requirement. A confirmation of affected bonds shall be effective if issued in amounts less than the confirmed amount; provided, that the face amount of the issued bonds is not less than eighty-five (85) percent of the original confirmed amount. [~~as to affected bonds issued in amounts less than the confirmed amount, provided that the face amount of the bonds issued is not less than eighty-five (85) percent of the confirmed amount of the affected bonds.~~] The issuer shall notify the committee if the bonds issued are within the eighty-five (85) percent limit [limits expressed herein] and the unused part of the allocation shall revert to the issuer pool from which the allocation was made, or to a single issuer pool after July 1 of any year.

Section 11. (1) If the aggregate amount of private activity bonds issued during the year does not exceed the state ceiling, an issuer may, in order to carry forward to the next year, file with the committee by December 31st:

(a) A "notice of intent" ("Notice of Intent" form); and

(b) A "carry forward election of unused private activity bond volume cap" (U.S. Treasury Department Form 8328).

(2) The carry forward of any unallocated portion of the state ceiling may be for any purpose authorized by 26 USC sec. 146(f).

(3) The committee shall issue a confirmation of the notice and election to carry forward ("Confirmation of Carry Forward Allocation of State Ceiling" form).

(4) The committee may consider, but shall not be required to grant, a carry forward notice or election filed after December 31st. [Elective Carry Forward. Any issuer may file with the committee by December 31, of each year, in which the state ceiling exceeds the aggregate amount of private activity bonds issued during the preceding calendar year, a "carry forward notice of intent" and a "carry forward election of unused private activity bond volume cap" (currently, U.S. Treasury Department Form 8328), for the carry forward to the next calendar year, for any purpose authorized by Section 146(f) of the Internal Revenue Code of 1986, of an unallocated portion of the state ceiling. The committee shall issue a carry forward confirmation confirming the notice and election to carry forward the unused portion of the state ceiling. Failure to file the carry forward notice and election forms by December 31, shall not adversely affect an issuer's right to carry forward under this section, provided such forms are filed with the committee within a reasonable time after December 31, of the preceding year, and, in any event, within a time frame acceptable to the Internal Revenue Service.]

Section 12. The committee shall not confirm a notice of intent to issue bonds after the aggregate amount of bond confirmations, including carry forwards, have reached the state ceiling for that year. [Confirmations. No confirmations of notices of intent to issue affected bonds shall be issued by the committee after the total aggregate amount of bonds for which confirmations, including carry forward confirmations, issued during the year equals the state ceiling for that calendar year.]

Section 13. Form and Manner. (1) The notice and confirmation forms required to be filed with and issued by the committee are incorporated by reference in Section 15 of this administrative regulation.

(2) An issuer shall not:

(a) File a notice of intent to issue bonds unless the issuance will be made within the ninety (90) day confirmation period established in Section 7 of this administrative regulation;

(b) Seek an allocation of the state ceiling in excess of the amount necessary to finance all costs of a project. [Form and Manner. The forms for notices and confirmations required to be filed with and issued by the committee are incorporated by reference in Section 15 of this administrative regulation. No issuer shall file a notice of intent to issue affected bonds sooner than will reasonably permit issuance of the bonds within the time frame established by Section 7 of this administrative regulation, nor seeking an allocation of the state ceiling in excess of the amount reasonably required to pay the costs of the project to be financed through sale of the proposed bonds.]

Section 14. Delegation of Functions. The committee shall [will] review and allocate all requests for state ceiling. The committee shall not delegate authority to make allocations of the state ceiling to staff except in cases of surplus or carry forward allocations. Any delegation of authority and the limit of that authority shall be recorded verbatim in the minutes of the committee meeting at which the delegation is made. [No delegation of authority to make allocations of the state ceiling to staff shall be made except for in cases of surplus or carry forward allocations for which the committee gives specific authority to staff. Such delegations of authority, including limits thereto, shall be recorded verbatim in the minutes of the committee meeting at which the delegation is made.]

Section 15. Incorporation by Reference. (1) The following forms are incorporated by reference:

(a) "Notice of Intent" application (July 1996 [September 1995]);

(b) "Confirmation of Allocation of State Ceiling" (September 1995);

(c) "Confirmation of Carry-forward Allocation of State Ceiling" (September 1995); [and]

(d) "Notice of Issuance" (September 1995); and

(e) "U.S. Treasury Department Form 8328".

(2) Copies of the forms may be inspected, copied or obtained at the Office of Financial Management and Economic Analysis, 261 Capitol Annex, Frankfort, Kentucky 40601, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

APPROVED BY AGENCY: July 12, 1996

FILED WITH LRC: July 12, 1996 at 1 p.m.

TOURISM CABINET
Department of Fish and Wildlife Resources
(As Amended)

301 KAR 1:201. Fishing limits.

RELATES TO: KRS ~~[450.040, 450.170,]~~ 150.470, 150.990(2)
 STATUTORY AUTHORITY: KRS 150.025(1) ~~[460.170,]~~ 150.470
 NECESSITY AND FUNCTION: KRS 150.025(1) requires the department to promulgate administrative regulations ~~[To establish size and creel limits]~~ to protect fish species from overharvest, allocate their harvest, maintain ecological balance and improve fishing. This administrative regulation establishes size, daily, and possession limits for fishing and also repeals 301 KAR 1:100. ~~[This amendment is necessary to adjust size or creel limits on Barkley Lake, Laurel Lake, Kentucky Lake, Symphon Lake, Taylorsville Lake, and the Cumberland River below Lake Cumberland; to add Peabody and Cypress AMAX fishing restrictions, and to incorporate the pertinent provisions of, and repeal 301 KAR 1:100.]~~ ~~[Cave Run Lake, Lebanon City Lake, Lake Malone, Nolin River Lake and Rough River Lake.]~~

Section 1. Definitions. (1) "Artificial baits" means lures or flies made of wood, metal, plastic, feathers, preserved pork rind or similar inert materials and having no organic baits, such as insects, minnows, fish eggs, worms, corn, cheese, cut bait or a similar substance attached to the lure.

(2) "Daily limit" means the creel limit, the maximum number of a particular species or group of species a person may legally take in a day or have in possession while fishing.

(3) "Kentucky bass" means a largemouth bass, Kentucky bass or Coosa bass with a patch of teeth on its tongue.

(4) "Lake" means impounded waters.

(5) "Length" means the distance from the tip of a fish's lower jaw to the tip of its tail, measured with the fish laid flat on a rule and its tail lobes squeezed together.

(6) "Possession limit" means the maximum number of fish a person may hold in the field after two (2) or more days of fishing.

(7) "Release" means the [te] return of the fish:

(a) In the best possible physical condition;

(b) Immediately after removing the hook;

(c) To the water from which it was taken; and

(d) [Immediately after removing the hook, in the best physical condition possible, and] In a place where [no obstruction prevents] the fish's immediate escape shall not be prevented.

(8) "Single hook" means a hook with no more than ~~[only]~~ one (1) point.

~~(9) [(9)]~~ "Size limit" means the minimum legal length of a fish.

~~(10) [(9)]~~ "Slot limit" means protecting fish within a specified minimum and maximum size range.

Section 2. Statewide Size and Creel Limits. (1) Except as specified in Section 4 of this administrative regulation and by 301 KAR 1:180, persons fishing in public or private waters shall observe the following daily [ereel,] possession and size limits.

(a) Black bass: daily limit, six (6); possession limit, twelve (12).

1. Largemouth bass, smallmouth bass or Coosa bass: size limit, twelve (12) inches.

2. Kentucky bass: no size limit.

(b) Rock bass: daily limit, fifteen (15); possession limit, thirty (30); no size limit.

(c) Walleye and their hybrids: daily limit, ten (10); possession limit, twenty (20); size limit, fifteen (15) inches.

(d) Sauger: daily limit, ten (10); possession limit, twenty (20); no size limit.

(e) Muskellunge: daily and possession limit, two (2); size limit, thirty (30) inches.

(f) Chain pickerel: daily limit, five (5); possession limit, ten (10);

no size limit.

(g) White bass and yellow bass, singly or in combination: daily limit, thirty (30); possession limit, sixty (60); no size limit.

(h) Striped bass and their hybrids: daily and possession limit, five (5); size limit, fifteen (15) inches.

(i) Crappie: daily limit, thirty (30); possession limit, sixty (60); no size limit.

(j) Rainbow trout and brown trout, singly or in combination: daily and possession limit, eight (8), no more than three (3) of which shall be brown trout; no size limit.

(k) Brook trout: daily and possession limit, two (2); size limit, ten (10) inches.

(2) A person shall release grass carp caught from a lake owned or managed by the department. ~~[Persons shall not remove grass carp from a lake owned and managed by the department.]~~

(3) A person shall release fish: ~~[Persons [catching illegal fish] shall release fish:]~~ [immediately return the fish, in the best possible physical condition, to the water from which it was taken.]

(a) Below the minimum size limits established by this administrative regulation;

(b) Within a protected slot limit as established by this administrative regulation; or

(c) Of a particular species, when a [the] person has in his possession the [a] daily limit for that species as established by this administrative regulation[. in his possession].

(4) A person shall not remove any part of the head or tail of any fish for which there is a size or creel limit until he has completed fishing for the day and has left the water.

(5) A person who wishes ~~[Persons who wish]~~ to possess sport fish below the size limit or beyond the possession limit shall:

(a) Obtain the fish from a licensed fish propagator or other legal source; and

(b) Retain a receipt or other written proof that the fish were legally acquired.

(6) A person shall release trout unless he:

(a) Has a valid trout permit;

(b) Is exempted from trout stamp requirements by KRS 150.170; or

(c) Is fishing in a licensed pay lake stocked with trout by the lake operator. ~~[Persons not in possession of a valid trout permit shall release trout unless:~~

~~(a) They are exempted from trout stamp requirements by KRS 150.170; or~~

~~(b) They are fishing in licensed pay lakes stocked with trout by the pay lake operator.]~~

Section 3. Fishing Season. The fishing season shall be ~~[be]~~ open year round.

Section 4. Exceptions to Statewide Administrative Regulations. A person ~~[Persons]~~ fishing in the waters listed in this section shall observe the following special requirements ~~[administrative regulations]~~. Except as specified in this section, all other provisions of this administrative regulation shall apply to these bodies of water.

(1) Bad Branch, Letcher County: artificial baits with single hooks only shall be used.

(2) Barkley Lake.

(a) Largemouth bass and smallmouth bass:

1. Through February 28, 1997, size limit fourteen (14) inches, except that the daily limit may contain one (1) and the possession limit two (2) bass under fourteen (14) inches.

2. After February 28, 1997, size limits, fifteen (15) inches.

(b) Crappie: size limit, ten (10) inches.

(c) Sauger: size limit, fourteen (14) inches.

(3) Barren River Lake and the Barren River upstream from Barren River Lake.

(a) White bass, yellow bass, striped bass and their hybrids, singly

or in combination: daily limit, twenty (20); possession limit, forty (40); size limit, no more than five (5) fish in a daily limit or ten (10) fish in a possession limit shall be fifteen (15) inches or longer.

(b) Crappie: size limit, nine (9) inches.

(c) Largemouth bass and smallmouth bass: size limit, fifteen (15) inches. Daily limit may include no more than one (1) and the possession limit no more than two (2) fish less than fifteen (15) inches.

(4) Bert Combs Lake: a person ~~[persons]~~ shall not possess shad or use shad for bait.

(5) Boltz Lake: a person ~~[persons]~~ shall not possess shad or use shad for bait.

(6) Briggs Lake: a person ~~[persons]~~ shall not possess shad or use shad for bait.

(7) Buckhorn Lake: largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(8) Carpenter Lake: a person ~~[persons]~~ shall not possess shad or use shad for bait.

(9) Carr Fork Lake.

(a) Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(b) Crappie: size limit, nine (9) inches.

(10) Carter Caves Lake.

(a) Fishing **shall be** during daylight hours only.

(b) Largemouth bass: daily and possession limit, one (1) fish; size limit, twenty (20) inches.

(c) A person ~~[Persons]~~ shall not possess shad or use shad for bait.

(11) Cave Run Lake: largemouth bass and smallmouth bass: ~~[through February 20, 1996, size limit, fifteen (15) inches. After February 20, 1996,]~~ slot limit - a person ~~[persons]~~ may keep fish less than thirteen (13) or greater than sixteen (16) inches and shall release fish between thirteen (13) and sixteen (16) inches.

(12) Corinth Lake: a person ~~[persons]~~ shall not possess shad or use shad for bait.

(13) Cumberland Lake.

(a) Largemouth and smallmouth bass: size limit fifteen (15) inches.

(b) Striped bass: size limit, twenty-four (24) inches; daily and possession limit, two (2) fish.

(c) Crappie: size limit, ten (10) inches.

(14) Cumberland River downstream from Barkley Lake Dam.

(a) Striped bass: daily and possession limit, three (3).

(b) Sauger: size limit, fourteen (14) inches.

(15) Cumberland River.

(a) Through February 28, 1997, downstream from the Highway 61 bridge. Trout: slot limit - a person shall release trout between twelve (12) and twenty (20) inches. ~~[persons may keep fish less than twelve (12) or greater than twenty (20) inches and shall release fish between twelve (12) and twenty (20) inches in length; daily and possession limit, (4) four fish under twelve (12) inches and one (1) fish over twenty (20) inches. Persons shall not possess more than these trout limits while in this area, no matter where the fish were caught.]~~

(b) After February 28, 1997, from Wolfe Creek Dam downstream to the Kentucky-Tennessee state line. Brown trout: size limit, twenty (20) inches; creel limit, one (1).

(16) Cyprus AMAX and Robinson Forest Wildlife Management Areas.

(a) Through February 28, 1997:

1. On Starfire Lake:

a. Largemouth bass: size limit, twenty (20) inches; daily and possession limit, one (1).

b. Sunfish: daily and possession limit ten (10).

c. Channel catfish: size limit, fifteen (15) inches; daily and possession limit, four (4).

2. On impounded waters of the area, persons shall not fish:

a. Except during daylight hours.

b. From January 1 through June 30.

(b) After February 28, 1997:

1. On impounded waters of the area;

a. Largemouth bass: size limit, fifteen (15) inches; daily and possession limit, one (1);

b. Sunfish: daily and possession limit, ten (10);

c. Channel catfish: size limit, fifteen (15) inches; daily and possession limit, four (4).

2. Persons shall not fish on Starfire Lake between January 1 and May 31.

(17) ~~[(16)]~~ Dale Hollow Lake.

(a) Smallmouth bass: daily limit, two (2); size limit, eighteen (18) inches.

(b) Walleye and their hybrids: daily limit, ten (10); size limit, sixteen (16) inches.

(c) Sauger: daily limit, ten (10); size limit, fourteen (14) inches.

(d) Muskellunge: daily limit, one (1).

(e) Rainbow trout and lake trout.

1. Daily limit, April 1 - October 31: seven (7), no more than two (2) of which may be lake trout. No size limit.

2. Daily limit, November 1 - March 31: two (2); size limit, twenty-two (22) inches.

(18) ~~[(17)]~~ Dewey Lake.

(a) Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(b) White bass, yellow bass, striped bass and their hybrids, singly or in combination: daily and possession limit, five (5); size limit, fifteen (15) inches.

(19) ~~[(18)]~~ Dix River for two (2) miles downstream from Herrington Lake Dam.

(a) Artificial baits only.

(b) Brown trout: size limit, fifteen (15) inches.

(20) ~~[(19)]~~ Dix River upstream from Herrington Lake. White bass, yellow bass, striped bass and their hybrids, singly or in combination: daily limit, twenty (20); possession limit, forty (40); size limit: no more than five (5) in a daily limit or ten (10) fish in a possession limit shall be fifteen (15) inches ~~[long]~~ or longer.

(21) ~~[(20)]~~ Elkhorn Creek downstream from the confluence of the North and South forks. Largemouth bass and smallmouth bass: slot limit - a person shall release fish between twelve (12) and sixteen (16) inches. ~~[persons may keep fish less than twelve (12) or greater than sixteen (16) inches and shall release fish between twelve (12) and sixteen (16) inches.]~~ The daily limit shall not include more than two (2) fish greater than sixteen (16) inches long.

(22) ~~[(21)]~~ Elmer Davis Lake.

(a) Largemouth bass: slot limit - a person shall release fish between twelve (12) and sixteen (16) inches. ~~[persons may keep fish less than twelve (12) or greater than sixteen (16) inches and shall release fish between twelve (12) and sixteen (16) inches.]~~

(b) Persons shall not possess shad or use shad for bait.

(23) ~~[(22)]~~ Fishtrap Lake.

(a) Largemouth bass or smallmouth bass: size limit, fifteen (15) inches.

(b) White bass, yellow bass, striped bass and their hybrids, singly or in combination: daily and possession limit, five (5); size limit, fifteen (15) inches.

(24)(a) A person shall not possess shad or use shad for bait.

(b) Upper ~~[(23)]~~ Game Farm Lake:

1. ~~[(a)]~~ Largemouth bass and smallmouth bass: daily limit, two (2); size limit, fifteen (15) inches.

2. ~~[(b)]~~ Channel catfish: daily limit, three (3).

(c) Lower Game Farm Lake:

1. Through February 28, 1997, size and daily limits shall be the same as the Upper Game Farm Lake.

2. After February 28, 1997:

a. Persons thirteen (13) years or older shall not fish.

b. Daily limit, three (3) fish regardless of species. ~~[shall not possess shad or use shad for bait.]~~

(25) ~~[(24)]~~ Grayson Lake. Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(26) ~~[(25)]~~ Greenbo Lake. **A person** ~~[Persons]~~ shall not possess shad or use shad for bait.

(27) ~~[(26)]~~ Green River Lake. Crappie: size limit, nine (9) inches.

(28) ~~[(27)]~~ Guist Creek Lake. White bass, yellow bass, striped bass and their hybrids, singly or in combination: daily and possession limit, five (5); size limit, fifteen (15) inches.

(29) ~~[(28)]~~ Herrington Lake. White bass, yellow bass, striped bass and their hybrids, singly or in combination: daily limit, twenty (20); possession limit, forty (40); size limit: no more than five (5) in a daily limit or ten (10) fish in a possession limit shall be fifteen (15) inches long or longer.

(30) ~~[(29)]~~ Kentucky Lake and the canal connecting Kentucky and Barkley lakes.

(a) Largemouth bass and smallmouth bass:

1. Through February 28, 1997, size limit fourteen (14) inches, except that the daily limit may contain one (1) and the possession limit two (2) bass under fourteen (14) inches.

2. After February 28, 1997, size limit, fifteen (15) inches.

(b) Crappie: size limit, ten (10) inches.

(c) Sauger: size limit, fourteen (14) inches.

(31) Laurel Lake. After February 28, 1997, largemouth bass and smallmouth bass, size limit, fifteen (15) inches.

(32) ~~[(30)]~~ Lebanon City Lake. ~~[After February 20, 1996:]~~

(a) Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(b) Crappie: size limit, nine (9) inches; daily limit, fifteen (15).

(c) Bluegill and shellcrackers (singly or in aggregate): creel limit, thirty (30).

(d) Channel catfish: creel limit, five (5).

(33) ~~[(34)]~~ Leary Lake.

(a) Fishing **shall be** ~~[is permitted]~~ during daylight hours only.

(b) Largemouth bass: daily limit, one (1); size limit, fifteen (15) inches.

(c) Bluegill: daily limit, twelve (12).

(d) Channel catfish: daily limit, two (2).

(34) ~~[(32)]~~ Lincoln Homestead Lake.

(a) Fishing **shall be** ~~[is permitted]~~ during daylight hours only.

(b) Largemouth bass: daily limit, three (3); size limit, fifteen (15) inches.

(c) Bluegill and redear sunfish: daily limit, ten (10) fish over seven (7) inches, singly or in combination; no limit on fish less than seven (7) inches.

(d) Channel catfish: daily limit, three (3).

(e) **A person** ~~[Persons]~~ shall not possess shad or use shad for bait.

(35) ~~[(33)]~~ Lake Malone. Largemouth bass: ~~[through February 20, 1996, daily limit may include no more than two (2), and the possession limit no more than four (4), fish under twelve (12) inches. After February 20, 1996,]~~ slot limit - **a person** ~~[persons]~~ may keep fish less than twelve (12) or greater than fifteen (15) inches and shall release fish between twelve (12) and fifteen (15) inches.

(36) ~~[(34)]~~ Marion County Lake.

(a) Largemouth bass: size limit, fifteen (15) inches.

(b) **A person** ~~[Persons]~~ shall not possess shad or use shad for bait.

(37) ~~[(35)]~~ Martins Fork and its tributaries in Harlan County from the Left Fork upstream two and three-tenths (2.3) miles to the Cumberland Gap National Park boundary. Artificial baits with single hooks only **shall be used**.

(38) ~~[(36)]~~ Mauzy Lake. Largemouth bass; no size limit.

(39) ~~[(37)]~~ McNeely Lake. **A person** ~~[Persons]~~ shall not possess shad or use shad for bait.

(40) ~~[(38)]~~ Mill Creek Lake. **A person** ~~[Persons]~~ shall not possess

shad or use shad for bait.

(41) ~~[(39)]~~ Nolin River Lake.

(a) Largemouth bass and smallmouth bass: ~~[After February 20, 1996,]~~ size limit, fifteen (15) inches except that the daily limit may contain one (1) and the possession limit two (2) bass under fifteen (15) inches.

(b) Crappie: size limit, nine (9) inches.

(42) ~~[(40)]~~ Ohio River.

(a) Walleye, sauger and their hybrids: no size limit; daily limit, ten (10) fish, singly or in combination.

(b) White bass, yellow bass, striped bass and their hybrids: daily limit, thirty (30); no more than four (4) in a daily limit may be fifteen (15) inches long or longer.

(43) ~~[(41)]~~ Paintsville Lake. Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(44) ~~[(42)]~~ Parched Corn Creek, Wolfe County. Artificial baits with single hooks **shall be used** ~~[only]~~.

(45) Peabody Wildlife Management Area (Goose Lake, Island Lake or South Lake):

(a) Largemouth bass: size limit, twenty (20) inches; daily and possession limit, one (1).

(b) Bluegill: daily and possession limit, fifteen (15).

(c) Redbreast sunfish: daily and possession limit, fifteen (15).

(d) Channel catfish: size limit, fifteen (15) inches; daily and possession limit, two (2).

(e) Walleye: size limit, fifteen (15) inches; daily and possession limit, one (1).

(f) Crappie: daily and possession limit, ten (10).

(g) **A person** ~~[Persons]~~ shall not fish:

1. Except during daylight hours;

2. From October 16 through June 30 on South Lake or Island Lake, and, until February 28, 1997, on Goose Lake;

3. After February 28, 1997, from October 16 through the last day of February on Goose Lake.

(h) **A person** ~~[Persons]~~ shall not gig frogs.

(46) ~~[(43)]~~ Poor Fork and its tributaries in Letcher County downstream to the first crossing of Highway 392. Artificial baits with single hooks only.

(47) ~~[(44)]~~ Lake Reba.

(a) Largemouth bass and smallmouth bass: size limit, fifteen (15) inches.

(b) Persons shall not possess shad or use shad for bait.

(48) ~~[(45)]~~ Rough River Lake.

(a) Crappie: size limit, nine (9) inches.

(b) Largemouth bass and smallmouth bass: ~~[after February 20, 1996,]~~ size limit, fifteen (15) inches, except that the daily limit may contain one (1) and the possession limit two (2) bass under fifteen (15) inches.

(c) White bass: ~~for [after February 20, 1996, for]~~ size and creel limit purposes anglers shall consider fish of the Morone family with an unseparated, U-shaped rear tooth patch on the tongue to be white bass.

(d) Hybrid striped bass: ~~for [after February 20, 1996, for]~~ size and creel limit purposes anglers shall consider fish of the Morone family with a separated rear tooth patch on the tongue to be hybrid striped bass.

(49) ~~[(46)]~~ Shanty Hollow Lake.

(a) Largemouth bass: size limit, fifteen (15) inches.

(b) **A person** ~~[Persons]~~ shall not possess shad or use shad for bait.

(50) ~~[(47)]~~ Shillalah Creek, Bell County, outside the Cumberland Gap National Park. Artificial baits with single hooks **shall be used** ~~[only]~~.

**TOURISM DEVELOPMENT CABINET
Department of Fish and Wildlife Resources
(As Amended)**

301 KAR 3:028. Applying for disability hunting and fishing exemption [licenses].

RELATES TO: KRS 150.170, 150.175, 150.990

STATUTORY AUTHORITY: KRS 150.170(7), (8)

NECESSITY AND FUNCTION: KRS 150.170(7) and (8) authorize certain disabled persons to hunt and fish without a license. This administrative regulation is necessary to establish: (1) the procedure by which a person, including one (1) declared disabled by the U.S. Railroad Retirement Board, may obtain a disability exemption from purchasing a hunting or fishing license; (2) a standardized procedure for law enforcement officers to verify the exemption of a person in the field. [To specify procedures for those exempt from purchasing sport hunting or fishing licenses because of disabilities to obtain an exemption certificate to carry in lieu of a license. This administrative regulation is necessary to provide a standardized way for law enforcement officers to verify the license exempt status of persons encountered in the field. This amendment is necessary to add application procedures for persons declared disabled by the U. S. Railroad Retirement Board, and to require persons receiving disability certificates to include personal information on the certificate to facilitate identification.]

Section 1. Before hunting or fishing, a person exempted by KRS 150.170(7) and (8) [Persons exempt] from purchasing a sport hunting or sport fishing license shall:

(a) [Under the provisions of KRS 150.170(7) or (8) shall:

(1) Obtain a disability license exemption card from the department;

(b) Provide the following information on the spaces provided on the card:

1. Address, including city, state and zip code;

2. Eye color;

3. Hair color;

4. Sex;

5. Height; and

6. Weight.

(c) Sign the exemption card.

(2) An exempted person shall carry while hunting or fishing:

(a) The disability exemption card; and

(b) A driver's license or other proof of identity. [card from the department verifying their exempt status before engaging in an act for which a license is required; and]

(2) Complete the information requested on the card before hunting or fishing; and

(3) Carry this card, along with other proof of identity, while hunting or fishing.]

Section 2. To verify their exempt status, Kentucky residents:

(1) Declared totally and permanently disabled by the federal Social Security Administration shall submit to the department a letter of verification from their local federal Social Security office.

(2) Who have a military service-connected disability shall follow procedures established by KRS 150.170(7). [Who are at least fifty (50) percent disabled as the result of a military service-connected disability shall submit to the department a letter of verification from their regional VA representative.]

(3) Declared totally and permanently disabled by the Kentucky State Workers' Compensation Board shall:

(a) Obtain a Disability Workers Compensation Exemption form from the department.

(b) Complete the form and mail it to the address given on the form.

(4) Declared totally and permanently disabled by another state's workers' compensation board shall provide the department a letter, on that state board's letterhead, confirming the percentage of the disability.

(5) Declared totally and permanently disabled by the United States Railroad Retirement Board shall submit to the department a letter of verification from the United States Railroad Retirement Board, P.O. Box 3705, Louisville, Kentucky 40201.

(6) [Section 3:] Upon receipt of the verification required by [stipulated in] Section 2 of this administrative regulation, the department shall issue a card certifying the person is exempt from sport hunting or sport fishing license requirements.

Section 3. Duration of Disability Exemption. (1) Certification by the Social Security Administration, the United States Railroad Retirement Board, or a state worker's compensation board shall remain valid for three (3) years after issue.

(2) Certification by the Veterans Administration shall remain valid for the life of the applicant.

Section 4. Incorporation by Reference. (1) **The following material is incorporated by reference:**

(a) "Disability Exemption Verification" card, (1996); and

(b) "Disability Workers Compensation Exemption Form", (January 1, 1995) [edition, is incorporated by reference].

(2) **This material [it] may be inspected, copied, or obtained at the Department of Fish and Wildlife Resources, Division of Fiscal Control, #1 Game Farm Road, Frankfort, Kentucky, 40601, Monday through Friday, 8 a.m. through 4:30 p.m.**

TOURISM DEVELOPMENT CABINET
Department of Fish and Wildlife Resources
(As Amended)

301 KAR 4:200. Cyprus AMAX and Robinson Forest Wildlife Management Areas use requirements and restrictions.

RELATES TO: KRS ~~[150.170, 150.175,]~~ 150.250, 150.620, 150.990~~(2)~~

STATUTORY AUTHORITY: KRS 150.025(2), 150.620 ~~[13A.350, 150.015, 150.021, 150.170, 150.175, 150.240, 150.700]~~

NECESSITY AND FUNCTION: KRS 150.620 authorizes the department to provide for the protection, conservation, use and management of the lands, waters, and wildlife associated with the Cyprus AMAX Wildlife Management Area and Robinson Forest Wildlife Management Area by detailing requirements and restrictions for permit agents and users of these areas. This amendment is necessary to remove fishing restrictions, which are now included in 301 KAR 1:201; and remove the sections dealing with permit agents, since all license agents can now sell area permits.

Section 1. Definitions. (1) "The area" means the Cyprus AMAX Wildlife Management Area and the Robinson Forest Wildlife Management Area, those lands in Breathitt, Knott and Perry counties owned by the Cyprus AMAX Mineral Company or the University of Kentucky and managed by the department pursuant to agreements between the department, Cyprus AMAX Mineral Company and the University of Kentucky.

(2) "Group" means any family, organization or gathering using the area for a specific event.

(3) "Private inholding" means lands completely surrounded by the area but not owned by the University of Kentucky or the Cyprus-AMAX Mineral Company.

(4) "Security deposit" means a bond, irrevocable letter of credit from a financial institution, or benefits on a certificate of deposit irrevocably assigned to the department.

Section 2. Individual [User] Permits. A person [Persons] sixteen (16) years of age or older on the area for any purpose shall have in their possession a nontransferable individual [user] permit except:

(1) Employees, agents or persons under contract to Cyprus AMAX Mineral Company, the University of Kentucky or the department performing their official duties; or

(2) Persons on the area as a necessary part of their jobs or to protect public safety or well-being; or

(3) Persons on the area for educational purposes and accompanied by officials of the University of Kentucky; or

(4) Persons conducting research on the area with the written approval of the department, Cyprus AMAX Mineral Company or the University of Kentucky; or

(5) Persons hiking on the Boardinghouse Interpretive Trail from the mouth of Boardinghouse Branch to the Robinson Forest Fire Tower.

Section 3. Private Inholdings and Closed Watersheds. (1) Private inholdings shall be open to hunting or fishing only when the area is open to hunting or fishing.

(2) Persons shall not hunt, fish, train dogs or conduct field trials on lands owned by the University of Kentucky in the Clemons Fork, Coles Fork and Lewis Fork watersheds or in the Buckhorn Creek watershed below Hurricane Branch and above Lewis Fork.

Section 4. Event Permits. (1) A group of people who wish to use the area may apply for an event permit upon the application of one (1) member of the group. If the event permitted is granted, individual members of the group shall not be required to purchase an individual permit. [In lieu of individual user permits, a

person representing a group using the area may have in possession an event permit.]

(2) The event permit shall apply to all members of the group.

(3) An event permit shall specify:

(a) Its period of validity, not to exceed four (4) days;

(b) The activity in which the group will engage;

(c) The name of the group;

(d) The approximate number of persons in the group; and

(e) The name and address of the person representing the group.

(4) The department shall not issue event permits for activities in which game or fish are taken.

Section 5. Permit Applications. (1) Persons shall apply for individual or event permits on individual permit or event permit forms provided by the department.

(2) Persons shall not knowingly provide false information on permit applications.

(3) Fees.

(a) Individual permits: ten (10) dollars annually;

(b) Event permits: twenty-five (25) dollars per event.

(4) Persons applying by mail shall include a certified check or money order for the correct amount.

(5) Applicants shall provide all information required on the application form. The department shall return incomplete applications to the applicant.

(6) ~~Permits [issued before February 20, 1996, shall be valid through that date. After February 20, 1996, permits]~~ shall be valid from March 1 through the end of February of each year.

(7) The department may:

(a) Limit the number of event permits issued; or

(b) Assign specific locations for events; or

(c) Deny applications for events which would interfere with management objectives for the area or unduly interfere with other uses or users; or

(d) Revoke individual or event permits for violations of the terms of the application or this administrative regulation.

(8) The department shall keep all applications, waivers of liability and copies of permits for a minimum of two (2) years after expiration ~~[the permits expire]~~.

Section 6. ~~[Permit Replacement or Refund. (1) Persons who lose their permits may make a written request to the department for a duplicate and include a four (4) dollar replacement fee. The department shall issue a duplicate upon verification that a permit was purchased.~~

~~(2) The department shall issue refunds only to persons who have purchased multiple individual permits valid for the same period of time.~~

~~(3) The department shall issue refunds only to representatives of groups who have purchased multiple event permits for the same event.~~

~~(4) Persons wishing a refund for multiple permits shall make a written request to the department and enclose the permit for which a refund is sought.~~

~~(5) The department shall issue refunds if it can verify that multiple permits were issued.~~

Section 7. Prohibited Activities. Except for persons exempted from permit requirements by Section 2(1) through ~~[(2), (3), and]~~ (4) of this administrative regulation, persons on the area shall not:

(1) Swim for recreational purposes;

(2) Camp except in designated camping areas;

(3) Have a fire, except in designated camping areas;

(4) Operate motorized vehicles off existing roads or in areas designated by signs as closed to vehicular travel ~~[beyond where signs indicate vehicles are not allowed];~~

(5) Operate vehicles not licensed or legal for use on public

streets;

- (6) Block roads or gates;
- (7) Discharge firearms, except while hunting;
- (8) Construct structures or stands except portable deer stands, which hunters shall remove daily;
- (9) Use boats;
- (10) Hunt or fish in areas designated by signs as closed to hunting or fishing;
- (11) Enter areas designated by signs as no trespassing areas;
- (12) Disobey [Act contrary] to instructions from officials of the department, the University of Kentucky or the Cyprus AMAX Mineral Company.

Section 8. ~~[Fishing Restrictions. (1) Persons fishing on all impounded bodies of water on the area shall:~~

- ~~(a) Fish only from July 1 through December 31; and~~
- ~~(b) Fish only during daylight hours.~~

~~(2) Persons fishing on Starfire Lake shall abide by the following limits:~~

| Species | Creel Limit | Size Limit |
|-----------------|-------------|------------|
| Largemouth bass | 1 | 20" |

Section 9. ~~Permit Agent Qualifications, Issuing Fees, Issuance Requirements, and Reporting Requirements. (1) Event permits are available only from the department.~~

~~(2) The department may designate as permit agents to sell individual permits:~~

~~(a) The county clerks of Breathitt, Knott, Perry, Floyd, Lee or Letcher counties; or~~

~~(b) Businesses in Breathitt, Knott, Perry, Floyd, Lee or Letcher counties customarily open at least fifty-six (56) hours per week, year round.~~

~~(3) Businesses wishing to become permit agents shall:~~

~~(a) Complete an issuing agent application form and agreement; and~~

~~(b) Pay in advance for permits consigned; or~~

~~(c) Furnish a security deposit equal in value to the permits consigned.~~

~~(4) Permit agents.~~

~~(a) Shall retain an issuing fee of forty (40) cents from each permit sold.~~

~~(b) Shall not charge additional fees for issuing permits.~~

~~(c) Shall issue permits sequentially.~~

~~(d) Shall not knowingly record false information on the permit.~~

~~(e) Shall, on or before the tenth day of the month following the month of sale:~~

~~1. Report to the department the number of permits issued;~~

~~2. Remit monies collected, less the issuing fee; and~~

~~3. Send the department completed and signed permit applications.~~

~~(f) Shall, on or before March 25:~~

~~1. Report to the department the number of permits issued for the preceding year and the amount of money remitted; and~~

~~2. Return all unissued permits.~~

~~(g) Shall pay the department for unissued permits not returned.~~

~~(h) Shall file reports on forms supplied by the department.~~

~~(5) If the permit agent does not remit monies due, the department shall make collection through the agent's security deposit.~~

~~(6) If an error is made in issuing that cannot be clearly and legibly corrected, permit agents shall void the permit, issue a new one and return the voided permit in its entirety with the next monthly report.~~

Section 10. ~~Revoking Permit Agent Designations. (1) The department may revoke permit agent designations if:~~

~~(a) The permit agent is delinquent in submitting reports and monies four (4) times in a twelve (12) month period; or~~

~~(b) The permit agent fails to respond to a reminder notice and does not report and remit by the 25th of the month the report is due; or~~

~~(c) The permit agent's check will not clear the bank and the permit agent does not make restitution by a certified check, cashier's check or money order within five (5) working days of notification.~~

~~(d) The permit agent does not remit fees owed as a result of an audit.~~

~~(2) A permit agent whose designation is revoked shall not be eligible for reinstatement for a period of twelve (12) months.~~

~~(3) If a designation is revoked the department shall:~~

~~(a) Collect all unissued permits and unreported sales; and~~

~~(b) Collect all monies due through the permit agent's security deposit.~~

Section 11. ~~Audits. The department may audit the consignment, records and reports pertaining to the sale of permits without prior notice during the permit agent's regular business hours.~~

Section 12. ~~Material Incorporated by Reference. (1) The following forms are incorporated by reference:~~

~~(a) [Application for Appointment as Issuing Agent, Cyprus AMAX and Robinson Forest User Permit.~~

~~(b) Issuing Agent Agreement for Cyprus AMAX and Robinson Forest User Permits.~~

~~(c) Agreement For Access to Designated Cyprus AMAX - Robinson Forest Lands: Individual Permit, 1994.~~

~~(b) [(d)] Agreement for Access to Designated Cyprus AMAX - Robinson Forest Lands: Event Permit, 1994.~~

~~(2) This material may be obtained from, or examined or copied at, the offices of the Department of Fish and Wildlife Resources, #1 Game Farm Road, Frankfort, Kentucky, between the hours of 8 a.m. and 4:30 p.m. eastern time.~~

302 KAR 78:020. Use, sale and distribution of tobacco products.

RELATES TO: KRS 438.305 to 438.340 [Chapter 438, SB 137]

STATUTORY AUTHORITY: KRS 438.340 [SB 137]

NECESSITY, FUNCTION, AND CONFORMITY: KRS 438.305 to 438.340 [SB 137, enacted by the 1996 General Assembly, became effective March 5, 1996. SB 137] requires a seller of tobacco products to obtain proof of the age of a prospective buyer or recipient of tobacco products if he has reason to believe the prospective buyer or recipient is under eighteen (18) years old; [requires] the establishment of the types of documentation accepted as proof of age; and notification of the employees of a seller of tobacco products and of the public of the requirements of KRS 438.305 to 438.340 [SB 137].

Section 1. Proof of age shall be by a driver's license or nondriver identification card issued by a Kentucky Circuit Clerk.

Section 2. (1) A retail establishment selling tobacco products shall post a sign no smaller than five and one-half (5 1/2) inches in width

by eight and one-half (8 1/2) inches in length, in a conspicuous place in the establishment.

(2) The sign shall contain the following wording: WARNING: THE SALE OR DISTRIBUTION OF TOBACCO PRODUCTS TO ANY PERSON UNDER AGE EIGHTEEN IS PROHIBITED BY KENTUCKY LAW. KRS 438.310(1).

500 KAR 11:025. Quarterly reports.

RELATES TO: KRS 238.550, 238.570(1)

STATUTORY AUTHORITY: KRS 238.515(4), (9), 238.550, 238.570(1)

NECESSITY, FUNCTION, AND CONFORMITY: All licensed charitable organizations are required to remit one-half (1/2) of one (1) percent of gross receipts derived from charitable gaming. Quarterly reports are required of all licensed charitable organizations. This administrative regulation establishes the method and time of filing the quarterly reports and remitting payment of the quarterly fees due.

Section 1. Quarterly Reporting Period Defined. ~~[With the exception of the initial start up quarterly reporting period, which shall cover the time period from March 16, 1994, through September 30, 1994, and which shall be due on or before November 15, 1994,]~~ A quarterly report shall be filed by each licensed charitable organization no later than thirty (30) days following the close of each calendar year quarter.

Section 2. Quarterly Reports. ~~[(4)]~~ Quarterly reports shall be submitted on forms prescribed by the division and shall be signed by an authorized officer of the licensed charitable organization and, if prepared by an individual other than an authorized officer, by the preparer.

~~[(2) If a suborganization of the licensed charitable organization has conducted charitable gaming during the reporting period, the suborganization's earnings and activities shall be reported by the licensed charitable organization, but on a form separate from that of the parent organization.]~~

Section 3. Fees Due. The fees imposed by KRS 238.570(1) on gross gaming receipts of licensed charitable organizations shall be remitted by check or money order made payable to "Kentucky State Treasurer" at the time the quarterly reports are due.

Section 4. Late Fine [Fees]. (1) If the quarterly fee imposed by KRS 238.570(1) is not remitted when due, a fine [then a late fee] of twenty-five (25) dollars per day, not to exceed \$250 dollars per quarter, shall be imposed on the licensed charitable organization until the quarterly fee has been received by the division.

(2) The fine [late fee] imposed in subsection (1) of this section shall be paid within ten (10) days of receipt of an invoice from the division and shall be by check or money order made payable to "Kentucky State Treasurer".

Section 5. Incorporation by Reference. (1) The following reporting forms are incorporated by reference:

- (a) Form CG[-T]-QR, "Quarterly Activity Report (6/96 ~~(10/94)~~)".
- (b) Attachment A, "Charitable Gaming Accounting Summary (6/96 ~~(10/94)~~)".
- (c) Attachment B, "Report of All Prize Winners of \$600 or More

(6/96 ~~(10/94)~~)".

(d) Attachment C, "Special License Activity Report (6/96) ~~(Sub-organization Activity Report (10/94))~~".

(e) Attachment D, "Summary of Gaming Activity (6/96)".

(f) Attachment E, "Report of Charitable Contributions Made by Licensee (6/96)".

(2) These forms may be inspected, obtained or copied at the Division of Charitable Gaming, Justice Cabinet, 403 Wapping Street, Bush Building, Suite 100 ~~(Room 101)~~, Frankfort, Kentucky 40601-2639 ~~(2699)~~, 8 a.m. to 4:30 p.m., Monday through Friday.

**JUSTICE CABINET
Division of Charitable Gaming
(As Amended)**

500 KAR 11:030. Charity game ticket standards.

RELATES TO: KRS 238.545(1), (2)

STATUTORY AUTHORITY: KRS 238.515(2), (9), 238.545(1), (2)

NECESSITY AND FUNCTION: The Division of Charitable Gaming is authorized to establish reasonable standards for the conduct of charitable gaming and to establish certain standards for charity game ticket construction, distribution and rules of play. This administrative regulation establishes standards for the construction and distribution of charity game tickets and for the conduct of play of charity game tickets.

Section 1. Charity Game Ticket Construction Standards. The following standards shall govern the construction of charity game tickets:

(1) Charity game tickets shall be constructed so that concealed numbers, symbols, or winner protection features cannot be viewed or determined from the outside of the charity game ticket using a high intensity lamp of 500 watts, with or without utilizing a focusing lens.

(2) The deal shall be designed, constructed, glued and assembled in a manner to prevent determination of a winning or losing ticket without removing the tabs or otherwise uncovering the symbols or numbers as intended.

(3) Each charity game ticket in a deal shall bear the same serial number. Only one (1) serial number shall be used in a deal. No serial number used in a deal of charity game tickets shall be repeated by the same manufacturer on that same manufacturer's form within a three (3) year period.

(4) The numbers or symbols on a charity game ticket shall be fully visible in the window and shall be placed so that no part of a symbol or number remains covered when the tab is removed. Displacement of the symbol(s) to the left or right in a window may be used for increased game security. Additional security devices or methods, including a laminate underneath a window, may be used by a manufacturer.

(5) The window slits on each charity game ticket shall be perforated on the three (3) cut sides. All charity game tickets shall be glued on all four (4) edges and between each window. The glue shall be of sufficient strength and type to prevent the undetectable separation or delamination of the charity game ticket.

(6) The following information shall be printed on a charity game ticket measuring one and one-fourth (1 1/4) inches by two and one-fourth (2 1/4) inches or larger, unopened:

- (a) The name of the manufacturer, or its distinctive logo;
- (b) The name of the game;
- (c) The manufacturer's form number;
- (d) The price per individual charity game ticket, unless accompa-

nied by a flare with that information;

(e) The unique minimum five (5) digit game serial number, printed on the game information side of the charity game ticket; and

(f) The number of winners and respective winning numbers or symbols, and specific prize amounts, unless accompanied by a flare with that information.

(7) The following information shall be printed on a charity game ticket measuring less than one and one-fourth (1¼) inches by two and one-fourth (2¼) inches, unopened:

(a) The name of the manufacturer, or its distinctive logo; and

(b) The unique minimum five (5) digit game serial number, printed on the game information side of the charity game ticket.

Section 2. Randomization. The following randomization standards shall govern the manufacture of charity game tickets:

(1) The deal shall be assembled so that winning tickets are placed throughout the deal.

(2) The deal shall be assembled and packaged in a manner which prevents isolation of winning tickets from variations in size, the appearance of a cut edge, or other markings of the tickets.

(3) The deal shall be assembled and packaged in a manner which prevents detection of winning tickets through variations in printing graphics or colors.

(4) Winning charity game tickets shall be distributed and mixed among all other charity game tickets in a deal so as to eliminate any pattern between deals, or portions of deals, from which the location or approximate location of any winning charity game ticket may be determined.

(5) The charity game ticket deal shall be assembled so that no placement of winning or losing charity game tickets exists that allows the possibility of prize manipulation.

Section 3. Packaging and Distribution. (1) Each deal's package, box, or other container shall be sealed at the manufacturer's factory with a seal which includes a warning to the purchaser that the deal may have been tampered with if the package, box or other container was received by the purchaser with the seal broken.

(2) A deal's serial number shall be clearly and legibly placed on the outside of the deal's package, box or other container.

(3) Manufacturers shall seal or tape, with a tamper-resistant seal or tape, every entry point into a container of charity game tickets prior to shipment. The seal or tape shall be constructed to guarantee that should the container be opened or tampered with, such tampering or opening would be easily discernible.

Section 4. Flares. Every deal of charity game tickets shall contain a flare that has printed or affixed on it the following information:

(1) The name of the game;

(2) The manufacturer's name or logo;

(3) The manufacturer's form number;

(4) The ticket count;

(5) The prize structure that includes the number of winning charity game tickets by denomination, with their respective winning symbols or number combinations;

(6) The cost per play; and

(7) The game serial number.

Section 5. Tracking by Manufacturer. Every manufacturer of charity game tickets shall maintain records sufficient to track each deal of charity game tickets from the manufacturer to the next point of sale for thirty-six (36) months. The records shall be subject to inspection by division staff.

Section 6. Tracking by Distributor. Every distributor of charity game tickets shall maintain records sufficient to track each deal of charity game tickets from purchase by the distributor to the next point of sale for thirty-six (36) months. The records shall be subject to

inspection by division staff.

Section 7. Defects. (1) Should a defect in packaging or in the construction of a charity game ticket game be discovered by, or reported to the division, the division shall take immediate steps to notify the manufacturer of the game containing the alleged defect.

(2) Should the division, in consultation with the manufacturer, determine that a defect actually exists, and should the division determine that the defect affects game security or otherwise threatens public confidence in the game, the division may, with respect to deals for use still located within the Commonwealth of Kentucky, require the manufacturer to:

(a) Recall the deals affected that have not been sold at retail to licensed organizations;

(b) Recall the deals, by form number, from the distributor level; or

(c) Issue a total recall of all affected deals.

(3) In choosing and directing a particular recall from subsection (2) of this section, the division shall be guided in each circumstance by any combination of the following factors:

(a) The nature of the defect;

(b) Whether the defect affected game security;

(c) Whether the defect affected game playability;

(d) Whether the defect was limited to a specific number of deals of a particular form number;

(e) Whether the defect was easily detectable by a charitable gaming organization, ~~or a suborganization or subordinate organization thereof~~;

(f) Whether the defect was easily detectable by members of the general public;

(g) Whether the defect threatens public confidence in the game; or

(h) Whether the defect is capable of being used to adversely affect the fair play of the game.

Section 8. Rules of Play. The following rules of play govern the conduct and sale of charity game tickets:

(1) The flare described in Section 4 of this administrative regulation shall be posted by the licensed charitable organization in the vicinity of the deal and in full and complete view of the players while the deal is in play.

(2) Charity game tickets shall not be sold to the public from the original packing box or container.

(3) If a deal of charity game tickets is received in two (2) or more boxes, packages or containers, all of the charity game tickets from the boxes, packages or containers shall be placed out for play at the same time.

(4) No charity game tickets which have been marked, defaced, altered, tampered with or otherwise constructed in a manner which tends to deceive the public or affect the chances of winning or losing shall be placed into play.

(5) All winning charity game tickets shall have the winning symbol or number defaced or punched by an authorized representative of the charitable organization immediately after redemption.

(6) All winning charity game tickets with a prize value of fifty (50) dollars and above, all seal card winners with a prize value of fifty (50) dollars and above, and all unsold charity game tickets shall be retained by the licensed charitable organization for a period of twelve (12) months to allow auditing by the staff of the division.

(7) All used nonwinning charity game tickets and seal cards, and all winning and unsold charity game tickets and seal cards which have been retained for the required twelve (12) month period, shall be disposed of by burning, shredding, destroying or defacing in some manner to prevent reuse of any charity game ticket or seal card or any portion thereof.

(8) An authorized representative of the charitable organization conducting the event at which charity game tickets are sold shall verify the serial numbers or winner protections for all winning charity

game tickets redeemed.

(9) If a deal is not played to completion and there remain unsold winning charity game tickets, the licensed charitable organization conducting the gaming shall sell the remaining charity game tickets on the next appointed date for charitable gaming activities. If no future date is anticipated, the licensed charitable organization shall, after making every effort to sell the entire deal, consider the deal closed or completed, and shall retain all unsold charity game tickets as required in subsection (6) of this section. If no winning charity game tickets remain in the deal, the licensed charitable organization shall consider the deal closed or completed and shall retain unsold charity game tickets as required in subsection (6) of this section. Under no circumstances is a licensed charitable organization other than the licensed charitable organization which initiated the deal to complete play of the deal.

(10) If a seal card from a deal or deals is not played to completion, the licensed charitable organization shall sell the remaining charity game tickets necessary to play out the seal card on the next appointed date for charitable gaming activities. If no future date is anticipated, the licensed charitable organization shall, after making every effort to sell the entire deal, consider the deal closed or completed, and shall retain all unsold charity game tickets as required in subsection (6) of this section. Under no circumstances is a licensed charitable organization other than the licensed charitable organization which initiated the seal card from the deal to complete play of the deal or the seal card.

(11) No individual involved in any capacity in the conduct of a charitable gaming event at which charity game tickets are sold shall be permitted to purchase or play charitable game tickets.

(12) No charity game ticket shall be sold to the public at a price different than that printed on the charity game ticket or upon the flare which accompanies the charity game ticket.

Section 9. Automated Charity Game Ticket Dispensers. (1) Approval of a automated charity game ticket dispensers. No automated charity game ticket dispenser may be sold, leased or otherwise furnished to any person in the state unless a dispenser which is identical to the dispenser intended to be sold, leased or otherwise furnished has been first presented to the division by its manufacturer, at the manufacturer's expense, for review by the division or has been certified by an independent testing laboratory that the dispenser satisfies the manufacturing requirements set forth in subsection (2) of this section, and the dispenser has been approved by the division. If granted, approval extends only to the specific dispenser model approved, and any modification shall first be approved by the division. The division may keep the dispenser for further testing and evaluation for as long as the Division deems necessary.

(2) Manufacturing requirements. Each automated charity game ticket dispenser shall:

(a) Contain a three (3) prong ground and surge protector, and shall be capable of withstanding static electricity;

(b) Contain columns which accommodates different sized charity game tickets;

(c) Be constructed so that customers can see how many charity game tickets remain within the dispenser or have resettable counters visible to the customer indicating the number of charity game tickets left in each column of the dispenser;

(d) Have an outlet or tray to catch dispensed charity game tickets;

(e) Accurately dispense the correct number of charity game tickets;

(f) Contain one (1) or more player buttons on the front of the dispenser to dispense charity game tickets when pressed;

(g) Have a minimum of two (2) and a maximum of eight (8) columns in a separate locking compartment;

(h) Contain a luminated electronic display to display the value of the currency;

(i) Be capable, in the event a malfunction occurs or the electrical

power is interrupted after currency has been validated, of accurately redisplaying the value of the currency after the malfunction or power is restored;

(j) Not dispense any credits or redeem a winning charity game ticket;

(k) If using bill acceptors or similar devices that do not return change, clearly disclose that fact to the customer;

(l) Not have a video screen or produce audio sounds except for security alarms;

(m) Not resemble a slot machine or other gambling device;

(n) Contain the manufacturer's name, dispenser's serial number and model number, and date of manufacture, all of which shall be permanently affixed to the side of the dispenser;

(o) Have an on/off switch in an inconspicuous location on the exterior of the dispenser;

(p) Not record test sales of charity game tickets or currency acceptances on the dispenser's accounting meters;

(q) Contain a nonresettable accounting meter for total currency validated and for total of charity game tickets dispensed and shall be capable of retaining this information for six (6) months after power has been disconnected;

(r) Contain an EPROM microchip which holds the dispenser's programming code and which is identical in all respects to the manufacturer's EPROM microchip approved by the division;

(s) Contain a RAM or EPROM microchip equipped with a RAM microchip which shall maintain the same information as required in paragraph (q) of this subsection for six (6) months after power has been disconnected and which is installed with a tamper-proof seal inside the dispenser;

(t) Automatically discontinue operation when any non-resettable accounting meter, RAM microchip, or EPROM microchip is disconnected;

(u) Contain at least one (1) electronic currency validator which shall:

1. Only validate United States currency;

2. Not validate currency in denominations in excess of twenty (20) dollars;

3. Transmit the value of validated currency to the charity game ticket dispenser;

4. Be equipped with mechanisms to ensure that charity game tickets will not be dispensed unless the currency was validated and retained;

5. Be capable of preventing acceptance of known counterfeit currency;

6. Return any invalid currency to the player;

7. Have at least one (1) removable stacker box capable of stacking bills or a removable drop box contained in a separate locked compartment; and

8. Automatically discontinue accepting or validating currency if a malfunction occurs or if electrical power to the dispenser or currency validator is interrupted.

(3) Automated charity game ticket dispensing limitations. The following limitations apply to the use of automated charity game ticket dispensers:

(a) No charitable gaming organization shall use the dispenser until any previous user has removed its charity game tickets and money from the dispenser;

(b) Each charitable organization operating the dispenser shall place upon the dispenser an identification label which displays the organization's name and license number;

(c) The keys to open the locked doors to the dispenser's ticket dispensing area and cash box shall be solely in the possession and control of the designated chairperson of the charitable organization conducting the charitable gaming session;

(d) No person shall put out any charity game ticket deal in a dispenser unless the entire deal shall be sold solely from the dispenser. All charity game tickets in any one column shall have the

ADMINISTRATIVE REGISTER - 1938

same serial number. Each charity game ticket deal shall be placed in a minimum of two (2) columns to ensure randomization;

(e) No licensee may display, use or otherwise furnish a dispenser which has in any manner been tampered with or which otherwise may deceive the public or affect a person's chances of winning;

(f) No charity game ticket deal shall be placed in the dispenser until the entire deal of charity game tickets previously in the dispenser has been played out or permanently removed; and

(g) No charity game tickets once placed in the dispenser shall be removed from the dispenser, except for those charity game tickets actually played by consumers, removed by division representatives or law enforcement agencies, temporarily removed during necessary repair and maintenance or removed at the end of the gaming session.

(4) Inspection. The division or its authorized representatives may examine and inspect any automated charity game ticket dispenser. The examination and inspection shall include immediate access to the dispenser and unlimited inspection of all parts of the dispenser.

(5) Recordkeeping.

(a) Each licensed charitable organization shall maintain the following information in connection with its use of an automated charity game ticket dispenser:

1. Date of purchase or lease of each dispenser;
2. Model and serial number of each dispenser;
3. Purchase or lease price of each dispenser;
4. Name, address and license number of the distributor from whom the dispenser was purchased, leased or otherwise furnished; and

5. A record of all maintenance and repairs relating to the dispenser.

(b) Manufacturers and distributors shall maintain the following information in connection with each sale or lease of a dispenser:

1. Date of sale or lease;
2. Quantity sold or leased;
3. Cost per dispenser;
4. Model and serial number of each dispenser; and
5. Name, address and license number of the purchaser or lessee;

(c) All records, reports and receipts relating to dispenser sales, maintenance and repairs required to be maintained shall be retained for a period of three (3) years for examination by the division.

(6) Defects. If the division detects or discovers any defect or malfunction with the dispenser, which is not temporary in nature, that affects the integrity or security of the charity game ticket game, the division may direct the manufacturer, distributor or organization to cease the sale, lease or use of the dispenser, as applicable, and may require the manufacturer to correct the defect, malfunction or problem or recall the dispenser immediately upon notification by the division to the manufacturer. If the manufacturer, distributor or organization detects or discovers any defect or malfunction with the dispenser, which is not temporary in nature, such entity shall immediately remove the dispenser from use and notify the division of such action.

STATUTORY AUTHORITY: KRS 238.505(8) ~~[(9)]~~, 238.515(2), (9), 238.535

NECESSITY, FUNCTION, AND CONFORMITY: KRS 238.505(8) ~~[(9)]~~ authorizes a ~~[special]~~ charity fundraising event, such as a fair,

carnival, bazaar or festival, that is of short, definite and limited duration and requires licensure by the Division of Charitable Gaming. This administrative regulation ~~[further defines a special charity fundraising event, and]~~ establishes licensure requirements, prize amounts, duration and frequency.

Section 1. A special charitable fundraising event ~~[limited]~~ license shall be issued to a licensed charitable organization for the ~~[special]~~ charity fundraising event described in KRS 238.505(8) ~~[(9)]~~ if:

(1) The licensed charitable organization submits the satisfactorily completed CG-~~[T]~~-Schedule A ~~[referred to in 500 KAR 11:040 and 500 KAR 11:046];~~

(2) The total cash or fair market value of all prizes to be awarded at the event on games of chance does not exceed \$5,000, exclusive of charity game ticket prizes and bingo prizes awarded at a regularly scheduled bingo session, for which a change of location was approved by the division director pursuant to KRS 238.540(1); and

(3) The event does not last longer than five (5) continuous days.

Section 2. No more than two (2) special charity fundraising event licenses will be issued to any one (1) licensed charitable organization in one (1) year.

Section 3. There shall be no separate fee charged by the Division of Charitable Gaming for the issuance of a special charity fundraising event license.

Section 4. If special limited games are conducted at a ~~[special]~~ charity fundraising event, the licensed charitable organization shall also be licensed to hold the special limited games in accordance with KRS 238.545(4).

Section 5. If bingo is held at a ~~[special]~~ charity fundraising event licensed under Section 1(2) of this administrative regulation, the provisions of KRS 238.545(1) limiting the frequency and duration of bingo are inapplicable.

Section 6. A ~~[special]~~ charity fundraising event licensed under Section 1 of this administrative regulation may be held at a location other than the location specified on the charitable organization's license to conduct charitable gaming issued under KRS 238.535.

Section 7. Incorporation by Reference. (1) "CG-Schedule A, Application for Special Limited Charitable Gaming License/Special Charity Fundraising Event License (for use with Form CG-1) (6/96)", is incorporated by reference.

500 KAR 11:110. Keno.

RELATES TO: KRS 238.505(17)

STATUTORY AUTHORITY: KRS ~~[238.505(17)]~~, 238.515(2), (9), 238.545(4), 238.550(1)

NECESSITY AND FUNCTION: The Division of Charitable Gaming is authorized to establish circumstances under which "special limited

charitable games" will be conducted. This administrative regulation establishes standards for the conduct of Keno, establishes reporting requirements, and establishes standards for the use of Keno equipment.

Section 1. Recordkeeping and Reporting Requirements. (1) For a period of thirty-six (36) months following the last date of the special limited charitable games, the charitable organization shall maintain accurate records as to the conduct of the Keno games. The records shall include:

- (a) The information contained in the transaction log;
 - (b) Payout information for each game played;
 - (c) The number draw and time of the draw for each game played;
 - (d) Appropriate system parameter information including probable payout percentages and odds of winning for each game played;
 - (e) System exception information including voids and late pays for each game played; and
 - (f) The exception log.
- (2) Other Keno records. The charitable organization shall retain all outside copies of winning tickets of \$500 or more for a period of thirty-six (36) months following the date of the Keno games.
- (3) At least once during each day of the special limited charitable games, **the organization shall generate an updated shift report, and at the conclusion of each day generate a daily report** ~~the computer shall automatically update and generate a "daily game summary report"~~, which shall be retained for a period of thirty-six (36) months following the date of the Keno games.

Section 2. Conduct of the Game - Keno. The following rules govern the conduct of Keno.

- (1) All individuals involved in any way in the conduct of Keno shall be trained in the proper conduct of the game and the control of funds.
- (2) Participation.
 - (a) No person under the age of eighteen (18) shall play or conduct the game of Keno.
 - (b) No individual involved in any capacity in the conduct of Keno at a charitable gaming event shall be permitted to play Keno at the same event and on the same day in which such individual was involved in the conduct of Keno.
 - (3) Only computerized Keno games may be conducted. Brush or manual games are prohibited.
 - (4) No player shall have access to, or be allowed to activate, the Keno equipment. Each number selected by the player, along with the amount wagered and the total numbers played shall be entered into the computer, and an outside ticket shall be presented to the player. The inside ticket shall be retained for such period deemed necessary by the Keno manager.
 - (5) Players shall mark the inside ticket with their number selections or selection by quick pick is permissible.
 - (a) Concurrently with the generation of the outside ticket, the information on the outside ticket shall be recorded on the transaction log.
 - (b) If a ticket is voided, the void information shall be input in the computer, and the computer shall document the appropriate information pertaining to the voided wager. A void slip shall then be issued, which shall be retained with the outside tickets to serve as documentation of the transaction.
 - (6) If the Keno equipment breaks down or malfunctions during the selection of the winning numbers and the problem is not promptly corrected, players shall be refunded the amount wagered upon presenting their outside ticket.
 - (7) Once the Keno manager is satisfied that all tickets for a game have been issued, the game shall be closed and all players shall be so notified. No tickets may be written or voided after a game has been closed and the number selection process has begun. Controls shall exist to prevent the writing and voiding of tickets after a game

has been closed and after the number selection process has begun.

(8) The potential payout or prize for each different type of wager shall be made known to the players prior to their selecting numbers. This may be done through posting the potential payouts in a manner clearly visible to the players or through a printed schedule that is available at each location where Keno is played.

(9) No ticket, including a way ticket, may be purchased representing a wager of over five (5) dollars, except that a multirace ticket may be purchased for an amount over five (5) dollars if the wager for each game does not exceed five (5) dollars.

(10) A statement indicating any time restrictions for redeeming a winning ticket shall be visibly posted at each location where Keno is played or printed on the outside ticket or the schedule of prize payouts.

(11) The outside ticket that is given to the player shall contain the following information:

- (a) Date of the game;
- (b) Numbers chosen by the player;
- (c) Ticket sequence number;
- (d) Conditioning of the ticket;
- (e) Station number where the ticket was generated;
- (f) Game number; and
- (g) The name of the charitable organization.

(12) A draw ticket shall be prepared by the computer.

(13) A player shall wait until the last game wagered on has been called in order to collect any winnings. A player may be allowed to play fewer consecutive games than originally indicated, if approval has been obtained from the Keno manager and the voided wagers are properly documented in the transaction log.

Section 3. Winner Verification. Winning tickets shall be verified prior to payout and paid in the following manner:

- (1) Procedures shall be established to preclude payment of a ticket previously presented for payment, unclaimed winning tickets after a specified period of time, voided tickets, and tickets which have not been issued.
- (2) The sequence number of a ticket presented for payment shall be input into the computer, and the payment amount shall be generated by the computer and shall be given to the player.
- (3) No payouts shall be made unless a winning outside ticket has been presented. If the payout amount is not indicated on the outside ticket, a payout slip shall be issued.
- (4) The exception log shall be produced and maintained documenting any payments made on tickets which have not been authorized by the computer.
- (5) In addition to computer system approval, winning tickets of fifty (50) dollars through \$250 shall be verbally verified by the Keno manager, winning tickets of over \$250 require the signature of the Keno manager and winning tickets of \$1,000 or more require approval of the Keno manager evidenced by his signature, the performance of comparison of the winning customer outside ticket to the transaction log and a regrading of the customer copy using the payout schedule and draw information.

Section 4. Security Standards and Controls. Access to the area in which Keno workers operate shall be restricted to charitable organization workers and authorized equipment service personnel only. Access to the computer system shall be adequately restricted, and the computer and Keno supplies shall be maintained under lock and key while not in use. These keys shall be maintained only by the designated chairperson of the charitable organization.

Section 5. Keno Tournaments Prohibited. Tournaments, whereby players pay an entry fee for a certain amount to play a number of Keno games and where prizes are awarded from a pool of entry fees paid back to the players based on their scores, are prohibited. Keno leagues played in a similar fashion as Keno tournaments are also

prohibited.

Section 6. Progressive Keno Games Prohibited. Games with a prize payout that increases by a predetermined percentage or amount as each game is played if the prize has not been awarded in a previous game are also prohibited.

Section 7. Prize Payouts. (1) No individual prize valued in excess of \$25,000 may be awarded in any Keno game.

(2) Every charitable organization shall have sufficient funds available to pay every winner of its Keno games by the end of the business day following the date such winning ticket is verified. Every winning prize shall be paid in full to the winning player and shall not be paid over a period of time or through an annuity, unless such annuity is the prize.

(3) For any prizes valued at \$10,000 or more, the charitable organization shall have sufficient funds insured or guaranteed by:

(a) An insurance company licensed to transact business in Kentucky;

(b) Money deposited into an insured account maintained by a financial institution and held in escrow for these purposes;

(c) An irrevocable letter of credit issued by a financial institution; or

(d) A bond from a bonding company registered to do business in Kentucky.

(4) If two (2) or more tickets fulfill the requirements for winning the largest prize on the same game, the full prize shall be divided equally among the winning tickets subject to any prize payout limit per game. Applicable prize payout limits shall be legibly posted at each location where Keno is played and printed on the schedule of prize payouts.

(5) All unclaimed prizes shall be the property of the charitable organization.

(6) All winning tickets of \$500 or more shall be paid to the player by check and not in cash, made payable to the order of the player.

(7) If there are multiple players on the same winning ticket and the prize is \$500 or more, the prize payment shall also be paid by a single check and not in cash, made payable to the order of the players.

Section 8. Payout Structure. Each game of Keno shall be conducted in such a manner that the probable payout percentage for each game shall not exceed seventy-five (75) percent.

Section 9. Keno Equipment Maintenance and Standards. (1) An effective maintenance plan shall be established to service Keno equipment, including computer program updates, hardware servicing, and Keno number selection equipment.

(2) With the exception of routine maintenance, all Keno equipment maintenance shall be performed by the manufacturer's or distributor's authorized service personnel. Routine maintenance shall include clearing of ticket printer paper jams, changing printer heads and cutter bars, and changing paper tape, adding paper to the ticket printer or aligning the paper on the ticket printer.

(3) A manufacturer or distributor shall not offer or market any type of Keno equipment unless the equipment complies with the requirements contained in this section.

(4) The division shall have the authority to request the testing and approval of any Keno equipment at any time if deemed necessary in order to ensure fairness to the public and maintain the integrity of the game.

(5) Hardware requirements.

(a) All electrical and mechanical parts and design principles shall follow acceptable industrial codes in standards in both design and manufacture.

(b) Logic boards and software EPROM's shall be in a locked or sealed area within the machine or in a separate machine. No access to this area is allowed by persons other than the manufacturer's or

distributor's authorized service personnel. Any unauthorized tampering or entrance into the logic area is prohibited.

(c) All PROMs and EPROMs shall have unique serial numbers that may be used to identify the PROMs and EPROMs for approval and inspection purposes. All logic boards shall have unique serial numbers or model numbers for approval and inspection purposes.

(d) A machine shall have a nonremovable identification label externally attached to the machine which includes the name of the manufacturer, the serial number of the machine and the model or make of the machine.

(6) Machine protection and integrity.

(a) A surge protector that feeds all power to the equipment shall be installed.

(b) The operation of the Keno equipment shall be impervious to influences from the outside of the device, including electro-magnetic interference, electro-static interference, and radio frequency interference.

(c) All computer functions and programs shall be secured in a locked and protective housing.

(d) The design of the Keno equipment shall ensure that there are no readily accessible game function related points which would allow any input and that there is no access to input or output circuits unless it is necessary for the proper operation of the equipment. No switches or other controlling devices may be added to the machine that would cause the machine to operate in a manner other than in which it was designed to play.

(7) Software requirements.

(a) The logic of the hardware or software may not interfere with the random number generator software.

(b) The software shall meet the minimum internal control standards for the conduct of Keno.

(c) Machine programs shall be capable of detecting corruption and shall provide an error message due to failure of the program storage media and cause the machine to cease play until corrected.

(d) All programs residing in the equipment shall be contained in a storage media which is not alterable through any use of the circuitry or programming of the machine itself.

(8) Retention of game data.

(a) No Keno equipment shall have a mechanism whereby an error will cause the game data to automatically clear. Game data shall be maintained at all times regardless of whether the machine is being supplied with power.

(b) Game data shall be stored in such a way as to prevent loss of the data when replacing parts or modules during normal maintenance.

(9) Random number generator. Random number generator selection device. A random number generator shall reside on a PROM or EPROM secured in the logic board of the computer. The numbers selected by the random number generator for each game shall be stored in the computer's memory and be capable of being output to produce a draw ticket with no manual input of the numbers required. Each possible combination of numbers which produce winning or losing game outcomes shall be available for random selection at the initiation of each game. The random selection process shall not produce any patterns of game outcomes, or be dependent upon any previous number selections or game outcomes, the amount wagered, or upon the style or method of play.

(10) Printer.

(a) The numbers that the player selects shall be printed on the outside ticket.

(b) The printer mechanism shall have a paper-sensing device that upon sensing a "paper low" condition will allow the machine to finish printing the ticket and then prevent further ticket writing.

(c) Each machine shall recognize a printer power loss occurrence and cease play until power has been restored to the printer and the machine is capable of producing a valid ticket.

(d) Printed game data shall be printed in ink that will remain

ADMINISTRATIVE REGISTER - 1941

legible throughout the retention period required by Section 1 of this administrative regulation.

DOUG SAPP, Commissioner

APPROVED BY AGENCY: August 22, 1996

FILED WITH LRC: September 12, 1996 at 4 p.m.

PUBLIC HEARING: A public hearing on this administrative regulation shall be held on October 21, 1996, at 9 a.m. in the State Office Building Auditorium. Individuals interested in attending this hearing shall notify this agency in writing by October 14, 1996, five (5) days prior to the hearing, of their intent to attend. If no notification of intent to attend the hearing is received by that date, the hearing may be cancelled. This hearing is open to the public. Any person who attends will be given an opportunity to comment on this administrative regulation. Any disabled person desiring to attend or participate in this public hearing will be provided reasonable accommodation, if requested, at the time of notification of intent to attend. A transcript of the public hearing will not be made unless a written request for a transcript is made, with cost therefore to be borne by the requesting party. If you do not wish to be heard at the public hearing, you may submit comments on the proposed administrative regulation. Send written notification to be heard at the public hearing, or written comments on the proposed administrative regulation to the contact person.

CONTACT PERSON: Jack Damron or Tamela Biggs, Staff Attorneys, Department of Corrections, 2nd Floor, State Office Building, Frankfort, Kentucky 40601, (502) 564-2204, FAX: (502) 564-6494.

REGULATORY IMPACT ANALYSIS

Contact person: Tamela Biggs

(1) Type and number of entities affected: 146 employees of the correctional institutions, 410 inmates, and all visitors to state correctional institutions.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented: None

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented: None

(c) Compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: None

2. Second and subsequent years: None

(3) Effects on the promulgating administrative body:

- (a) Direct and indirect costs or savings:
 - 1. First year: None
 - 2. Continuing costs or savings: None
 - 3. Additional factors increasing or decreasing costs: None
- (b) Reporting and paperwork requirements: Policy revisions.
- (4) Assessment of anticipated effect on state and local revenues: None
- (5) Source of revenue to be used for implementation and enforcement of administrative regulation is the funds budgeted for this 1996-1998 biennium.
- (6) Economic impact, including effects of economic activities arising from administrative regulation, on:
 - (a) Geographical area in which administrative regulation will be implemented: None
 - (b) Kentucky: None
- (7) Assessment of alternative methods; reasons why alternatives were rejected: None
- (8) Assessment of expected benefits:
 - (a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: None
 - (b) State whether a detrimental effect on environment and public health would result if not implemented: None
 - (c) If detrimental effect would result, explain detrimental effect: N/A
- (9) Identify any statute, administrative regulation or government policy which may be in conflict, overlapping, or duplication: None
- (a) Necessity of proposed administrative regulation if in conflict: N/A
- (b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: N/A
- (10) Any additional information or comments: None
- (11) TIERING: Is tiering applied? No. Tiering was not appropriate in this administrative regulation because the administrative regulation applies equally to all those individuals or entities regulated by it. Disparate treatment of any person or entity subject to this administrative regulation could raise questions of arbitrary action on the part of the agency. The "equal protection" and "due process" clauses of the 14th Amendment of the U.S. Constitution may be implicated as well as Sections 2 and 3 of the Kentucky Constitution.

PUBLIC PROTECTION AND REGULATION CABINET
Department of Alcoholic Beverage Control
(As Amended)

804 KAR 13:010. Tobacco enforcement and administration.

RELATES TO: KRS Chapter 13B, 438.310, SB 137, EO 96-619
 STATUTORY AUTHORITY: KRS 438.340, EO 96-619
 NECESSITY, FUNCTION, AND CONFORMITY: SB 137, enacted by the 1996 General Assembly, became effective March 5, 1996. SB 137 requires a seller of tobacco products to obtain proof of the age of a prospective buyer recipient of tobacco products if he has reason to believe the prospective buyer or recipient is under eighteen (18) years old; requires the establishment of the types of documentation accepted as proof of age, notification of the employees of a seller of tobacco products of the requirements of SB 137, administrative proceedings in the enforcement of SB 137, and the collection of statistics relating to the illegal sale to minors of tobacco products and enforcement of SB 137.

Section 1. Definition. "Department" means the Department of Alcoholic Beverage Control.

Section 2. Administration. The department shall be the administrative agency for hearing violations of KRS 438.305 to 438.340.

Section 3. Enforcement. (1) The department shall record and investigate complaints relating to violations of KRS 438.305 to 438.340.

(2) The department shall prepare an annual survey from data obtained from the annual inspection directed by KRS 438.330(1). The survey shall be prepared to determine the existing level of tobacco sales to minors. A copy of the report shall be submitted to the Department of Agriculture. ~~[The department shall enforce the provisions of KRS 438.305 to 438.340 by random inspection conducted by duly qualified enforcement officers and agents of the department.]~~

~~(3) The department may employ underage buyers to participate in enforcement activities. The participation of the underage buyers shall be contingent upon a written consent and release from his or her parents or legal guardian, and upon the completion of enforcement training to be conducted by the department.~~

~~(4) The department shall conduct annually random base line sampling to determine the existing level of tobacco sales to minors on or before June 30 of each fiscal year. A copy of the annual survey shall be submitted to the Department of Agriculture.]~~

~~(3) [(5)]~~ The result of the annual survey may be inspected, copied or obtained at the office of the Department of Agriculture, Capital Plaza Tower, 7th Floor, 500 Mero Street, Frankfort, Kentucky 40601, 8 a.m. to 4:30 p.m., Monday through Friday, excepting state holidays.

Section 4. Procedures. (1) A person found to be violation of KRS 438.305 to 438.340 may be cited by the department. Any administrative citation shall conform to the requirements of KRS Chapter 13B.

(2) A person receiving an administrative citation pursuant to KRS 438.305 to 438.340 may request an administrative hearing, to be conducted by the department, to contest the allegation in the citation. The department may, in its discretion, employ one (1) or more hearing officers to conduct the administrative hearings. All administrative hearings shall be governed by KRS Chapter 13B.

(3) A fine levied pursuant to an administrative citation shall be prepayable within thirty (30) days of issuance of the citation. A person not wishing to contest the allegations in the citation may resolve the charge by mailing a check or money order in the amount set forth in the citation, payable to the Kentucky State Treasurer, to the hearing agency name and address set forth in the citation.

(4) Disposition of juvenile records. The department shall preserve the confidentiality of all juvenile records by maintaining ~~[Juvenile records shall be maintained in]~~ a separate filing system, under lock and key, with access limited to the parties and their legal counsel. ~~[Juvenile records shall be destroyed one (1) year after the case is conducted, with all avenues of appeal exhausted.]~~ The department shall maintain statistical summaries of case information, including date of buy, geographical location of buy, name and address of retail seller, date of purchase, date of birth and gender of underage buyer, and disposition of case. Statistical summaries relating to underage buyers shall not identify the underage buyer by name.

(5) Physical evidence seized in the course of administrative violations of KRS 438.305 to 438.340 shall be maintained by the department in a secured evidentiary storage facility. ~~[The department may destroy evidence related to a case thirty one (31) days after the case is concluded, with all avenues of appeal exhausted.]~~

~~[Section 5. Appeal. A person aggrieved by the final ruling of the department may appeal such ruling to the Franklin Circuit Court, Frankfort, Kentucky 40601 within thirty (30) days of the rendition of such ruling.]~~

LAURA DOUGLAS, Secretary
GREG GINTER, Commissioner

CABINET FOR HEALTH SERVICES
Department for Public Health
Division of Health Systems Development
(As Amended)

902 KAR 14:070. License procedures and fee schedule for ambulance providers [and tiered response emergency medical services].

RELATES TO: KRS 211.950 to 211.956, ~~[211.958,]~~ 216B.010 to 216B.130, 216B.990

STATUTORY AUTHORITY: KRS Chapter 13B, 211.952, 216B.020(4), 216B.042, 216B.095, 216B.105, 216B.410, EO 96-862, 1996 Ky. Acts ch. 233

NECESSITY AND FUNCTION: Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources and places the Department for Public Health and its programs under the Cabinet for Health Services. KRS 216B.042 and 216B.105 requires [mandate] that the Cabinet for Health Services [Human Resources] regulate health facilities and health services. KRS 211.952 requires the cabinet to establish [transfers the responsibility for licensing ambulance providers defined in KRS 211.950 to] a single lead agency within the Department for Public Health, with the responsibility for promulgating administrative regulations for licensing, inspecting, and regulating ambulance providers. [Health Services, Cabinet for Human Resources]. This administrative regulation provides specific requirements for obtaining and maintaining a license to operate an ambulance service [or a tiered response emergency medical service] and establishes the fee schedule for a license.

Section 1. Definitions. (1) "Advanced life support (ALS)" means ~~[an ambulance provider which:~~

~~(a) Utilizes] certified and licensed emergency medical professionals who [to] provide prehospital medical care such as:~~

(a) [4-] Basic life support services;

(b) [2-] Advanced airway management such as endotracheal intubation;

(c) [3-] Defibrillation; and

(d) [4-] Administration of intravenous fluids and pharmaceuticals under the authority of a physician medical director[; and

~~(b) Meets the requirements established in 902 KAR 14:080, Sections 1 through 10 and is licensed by the cabinet to provide health care and transportation on an emergency and nonemergency basis to persons who:~~

~~1. Are sick, injured, or otherwise incapacitated; and~~

~~2. May require immediate stabilization and continued medical response and intervention during transit or upon arrival at the patient's destination to safeguard the patient's life or physical well being[.]~~

(2) "Ambulance service" means an ambulance provider as defined in KRS 211.950(2) and 211.952(2)(c)1, 2, 3, and 4. ["Air ambulance provider" means a basic life support or ALS air ambulance service which meets the requirements of 902 KAR 14:090 and is licensed by the cabinet to provide basic, advanced, or basic or advanced specialized levels of emergency and non-emergency health care and transportation.]

(3) "Basic life support" (BLS) means ~~[a basic life support ambulance provider which:~~

~~(a) Utilizes at least two (2)] certified or licensed emergency medical personnel who [to] provide prehospital medical care such as:~~

(a) [1-] First aid;

(b) [2-] Cardiopulmonary resuscitation;

(c) [3-] Airway management;

(d) [4-] Cervical spine control;

(e) [5-] Breathing assistance;

(f) [6-] Hemorrhage control; and

(g) [7-] Basic patient movement procedures[; and

~~(b) Meets the requirements established in 902 KAR 14:080, Sections 1 through 7 and 8, when applicable, and is licensed by the cabinet to provide health care and transportation on an emergency and nonemergency basis to persons who:~~

~~1. Are sick, injured, or otherwise incapacitated; and~~

~~2. May require immediate stabilization and continued medical response and intervention during transit or upon arrival at the patient's destination to safeguard the patient's life or physical well being[.]~~

(4) "Continuing education" means the provision of information or training within the scope of an individual's level of certification.

(5) "Licensing agency" means the Cabinet for Health Services [Human Resources], Department for Public Health [Health Services].

(6) "Nonemergency health transportation (NEHT)" means an ambulance provider which meets the requirements of 902 KAR 14:060 and is licensed by the cabinet to provide health care transportation on a scheduled basis to individuals whose impaired health condition requires special transportation considerations, supervision, or handling but does not indicate a need for emergency medical treatment during transit or emergency medical treatment upon arrival at the final destination. NEHT providers shall not transport a patient who requires basic or advanced life support or a patient who has in place a temporary invasive device or equipment such as an intravenous administration device or airway maintenance device, excluding urinary catheters, or a patient who requires close observation or monitoring preceding or following an invasive technique.

(7) "Specialized ground ambulance provider" means a Class I, Class III, [BLS or ALS ground] or air ambulance provider which ~~[meets the requirements of 902 KAR 14:080, Section 11 or 902 KAR 14:090 and]~~ is licensed by the cabinet to provide health care and transportation on an emergency or nonemergency scheduled basis that:

~~(a) May be unavailable to the general public; and~~

~~(b) Has specialized or limited functions such as interfacility transfer of critical patients who may require special consideration of:~~

~~1. Equipment requirements;~~

~~2. Personnel requirements; or~~

~~3. Hours of operation.~~

~~[(8) "Tiered response emergency medical (TREM) services" means a specialized nontransportation ALS emergency medical service which shares staff and equipment with a licensed ALS or BLS ambulance provider through a written agreement for operation within a specific geographic service area.]~~

Section 2. Licenses. (1) A person shall not establish a BLS or ALS ground ambulance service, BLS or ALS air ambulance service, or NEHT service~~[; or a TREM service]~~ in Kentucky without first obtaining a certificate of need, except as provided in Section 5 of this administrative regulation, [from the Kentucky Health Policy Board (referred to as the board)] and shall not operate a BLS or ALS air or ground ambulance service, or NEHT service~~[; or TREMS]~~ without first obtaining a Kentucky Ambulance License, Form EMS-2 (12/94), incorporated by reference, from the licensing agency.

(2) Effective July 15, 1996, the licensing agency shall not license a new BLS or ALS ground ambulance service.

(3) Effective December 31, 1996, the licensing agency shall not license a new NEHT service.

(4) Effective July 15, 1996, the following classes of ambulance providers shall be licensed: Class I, Class II, Class III, Air, or NEHT. A person shall not establish a Class I, Class II, Class III, or air ambulance service in Kentucky without first obtaining a certificate of

need, except as provided in Section 5 of this administrative regulation, and shall not operate a Class I, Class II, Class III, or air ambulance service without first obtaining a Kentucky Ambulance License, Form EMS-2 (6/96), incorporated by reference, from the licensing agency.

(5) The license shall be conspicuously posted in a public area of the facility.

(6) An ambulance provider shall file an application with the Department for Public Health, Emergency Medical Services Branch, 275 East Main Street, Frankfort, Kentucky 40621 in accordance with the following schedule:

(a) An ambulance provider licensed prior to July 15, 1996 shall file ~~(a)~~ a "Kentucky Application for Ambulance Service Licensing", Form EMS-1 (10/94), incorporated by reference.

(b) An ambulance provider licensed after July 15, 1996 shall file a "Kentucky Application for Ambulance Service Licensing", Form EMS-1 (6/96), incorporated by reference.

(c) An ambulance provider licensed as a NEHT service prior to December 31, 1996 shall file ~~(c)~~ an "Application for License to Operate a Nonemergency Health Transportation Service", Form EMS-1N (12-94), incorporated by reference ~~(c)~~ ~~shall be filed with the Department for Health Services, Emergency Medical Services Branch, 275 East Main Street, Frankfort, Kentucky 40621.~~

(7) ~~(4)~~ An applicant for a license shall, as a condition precedent to licensing or relicensing, be in compliance with applicable administrative regulations under 902 KAR Chapter 14.

(8) ~~(6)~~ The licensee shall, as a condition of licensing or relicensing, be in compliance with the reporting requirements established by the licensing agency ~~and the board~~, unless otherwise exempted by statute:

(9) ~~(6)~~ The licensee shall maintain and submit completed reports required by:

(a) KRS 216B.410;

(b) 902 KAR 14:080 ~~[44:040]~~, Section 3(2)(a);

(c) 902 KAR 14:082, Section 3(2)(a) ~~[44:050, Section 6]~~;

(d) 902 KAR 14:084; or

(e) 902 KAR 14:090, Section 10; and

(f) The licensing agency ~~or~~

~~(e) The Kentucky Health Policy Board.~~

(10) ~~(7)~~ A license shall expire one (1) year following the date of issuance, unless otherwise provided in the license certificate.

(11) ~~(8)~~ A license may be renewed upon payment of the prescribed fee and compliance with the provisions for licensing.

(12) ~~(9)~~ A license to operate shall be issued only for the person, service area, and premises, including the number of ambulances named in the application, and shall not be transferable.

(13) ~~(10)~~ A new application shall be filed if a change of ownership occurs. A change of ownership for licenses shall be deemed to occur if more than fifty (50) percent of an existing facility, capital stock, or voting rights of a corporation is purchased, transferred, leased, or acquired by comparable arrangement by one (1) person from another.

(14) ~~(11)~~ Upon filing a new application for a license due to change of ownership, the new license shall be automatically issued for the remainder of the current licensure period. No additional fee shall be charged for the remainder of the licensure period.

(15) ~~(12)~~ There shall be full disclosure to the licensing agency of the changes, such as name and address, of:

(a) A person having direct or indirect ownership interest of ten (10) percent or more in the service;

(b) Officers and directors of the corporation, if a service is organized as a corporation; and

(c) Partners, if a provider is organized as a partnership.

Section 3. Licensing Inspections. (1) Compliance with licensing administrative regulations may ~~shall~~ be ascertained through on-site inspections of the provider by representatives of the licensing agency.

(2) Representatives of the licensing agency shall have access to the service during hours the service operates.

(3) A regulatory violation identified during an inspection ~~(the inspections)~~ shall be transmitted in writing to the provider by the licensing agency.

(4)(a) The provider shall submit a written plan for the elimination or correction of the regulatory violations to the licensing agency within ten (10) days of receipt of the statement of violation.

(b) The plan shall specify the date by which the violation shall be corrected.

(5)(a) Following a review of the plan, the licensing agency shall notify the provider in writing of the acceptability of the plan. The licensing agency may conduct a follow-up visit to verify compliance with the plan.

(b) If a portion or all of the plan is unacceptable, the licensing agency shall specify the reasons for the unacceptability. The provider shall modify or amend the plan and resubmit it to the licensing agency within ten (10) days after receipt of notice that the plan is unacceptable.

(6) Unannounced inspections may be conducted on complaint allegations, follow-up visits, and ~~annual~~ relicensing inspections. Inspections shall be conducted utilizing the procedures outlined under this section.

(7) The licensing agency may deny, revoke, modify, or suspend the license of a provider which:

(a) Fails to submit, amend, or modify a plan of correction in order to eliminate or correct regulatory violations;

(b) Fails to eliminate or correct regulatory violations;

(c) Falsifies an application for licensing;

(d) Tampers with, alters, or changes a license issued by the licensing agency;

(e) Attempts to obtain or obtains a license by fraud, forgery, deception, misrepresentation, or subterfuge;

(f) Provides false or misleading advertising;

(g) Falsifies, or causes to be falsified, a patient record or ambulance run report;

(h) Provides an unauthorized level of service;

(i) Has a history of staff violations which have resulted in disciplinary action under 902 KAR 13:020 and 13:090;

(j) Fails to provide the licensing agency or its representative with true information upon request, or obstructs an investigation regarding alleged or confirmed violations of administrative regulations promulgated under:

1. KRS 211.950 to 211.958;

2. KRS 211.960 to 211.968;

3. KRS 211.990(5); and

4. KRS 216B; and

5. KRS 311.654; or

(k) Issues a check for a license on an invalid account or an account with insufficient funds to pay the fee specified in Section 4 of this administrative regulation.

(8) The licensing agency may issue an order directing a provider to immediately cease and desist operating an ambulance, or providing services, if the licensing agency has reasonable cause to believe that an ambulance or service is unsafe or is being operated in an unsafe or unprofessional manner that is likely to cause harm or create imminent danger to the health and safety of the public.

(9) The licensing agency ~~or the board~~ may deny, revoke, modify, or suspend the license of an ambulance provider if an owner of the service is convicted of obtaining a fee by:

1. Fraud or misrepresentation; or

2. Submitting fraudulent or misleading claims for reimbursement to individuals, private insurance companies, or governmental agencies;

(10) The licensing agency shall provide notice and an opportunity for an administrative hearing related to denial, revocation, modification, or suspension of a license in accordance with the provisions ~~(c)~~

ADMINISTRATIVE REGISTER - 1945

1. Policies and administrative regulations of the board; and
2. Provisions of KRS 216B.105.

Section 4. Fee Schedule. The annual licensing fee, including renewals, shall be as follows:

- (1) Nonvolunteer ambulance providers ~~[and T-REM service]~~: eighty (80) dollars;
- (2) Volunteer ambulance providers ~~[and T-REM service]~~ in which a majority of the ambulance runs are made by attendants who do not receive compensation for their work: twenty (20) dollars.

Section 5. Licensing Without a Certificate of Need. (1) A person proceeding to alleviate emergency circumstances pursuant to 900 KAR 6:010, Section 9, may be granted a temporary license to operate an ambulance service in Kentucky pending the approval or disapproval of his application for a certificate of need. The temporary license shall expire forty-five (45) days after notice of approval of the certificate of need or thirty (30) days after notice of disapproval of certificate of need.

(2) An ambulance service owned and operated by a city government which provides services in coterminous cities outside the ambulance service's designated service area pursuant to KRS 216B.020(4) may be licensed in accordance with the provisions of this administrative regulation without a certificate of need as if they had a certificate of need.

Section 6. Material Incorporated by Reference. The following material is incorporated by reference and may be inspected, obtained, or copied at the Office of the Commissioner, Department for Public Health [Services], 275 East Main Street, Frankfort, Kentucky 40621, 8 a.m. until 4:30 p.m., Monday through Friday:

- (1) Kentucky Ambulance License, Form EMS-2 (12/94).
- (2) Kentucky Application for Ambulance Service Licensing, Form EMS-1 (10/94).
- (3) Application for License to Operate a Nonemergency Health Transportation Service, Form EMS-1N (12/94).
- (4) Kentucky Ambulance License, Form EMS-2 (6/96).
- (5) Kentucky Application for Ambulance Service Licensing, Form EMS-1 (6/96).

RICE C. LEACH, Commissioner

JOHN MORSE, Secretary

APPROVED BY AGENCY: July 8, 1996

FILED WITH LRC: July 12, 1996 at 4 p.m.

CABINET FOR HEALTH SERVICES
Department for Public Health
Division of Health Systems Development
(As Amended)

902 KAR 14:080. Class I [Basic and advanced life support] ground ambulance providers.

RELATES TO: KRS 211.950 to 211.956 ~~[211.958]~~, 216B.010 to 216B.130, 216B.990(1), (2)

STATUTORY AUTHORITY: KRS 211.952, **216B.020(4)**, 216B.042, **216B.095**, EO 96-862, 1996 Ky. Acts ch. 233

NECESSITY AND FUNCTION: Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources and places the Department for Public Health and its programs under the Cabinet for Health Services. KRS 216B.042 requires [mandates] that the Cabinet for Health Services regulate [Human Resources promulgate administrative regulations and set standards related to licensing] health facilities and health services. KRS 211.952(2)(c) requires the cabinet to promulgate administrative regulations for the licensing, inspection, and regulation of ambulance providers. [transferred the

responsibility for licensing, regulating and inspecting ambulance providers defined in KRS 211.950 from the Division of Licensing and Regulation in the Office of Inspector General to a single lead agency within the Department for Health Services, Cabinet for Human Resources.] This administrative regulation provides for the minimum licensing requirements for Class I [basic or advanced] ground ambulance providers.

Section 1. Definitions. (1) "Advanced life support (ALS)" means a Class I ground ambulance provider which:

(a) Utilizes certified and licensed emergency medical professionals to provide prehospital medical care such as:

1. Basic life support services (BLS);
2. Advanced airway management such as endotracheal intubation;
3. Defibrillation;
4. Administration of intravenous fluids and pharmaceuticals under the authority of a physician; and

(b) Meets the requirements established in Sections 1 through 10 of this administrative regulation and is licensed by the cabinet to provide health care and transportation on an emergency basis ~~[to persons who:~~

1. Are sick, injured, or otherwise incapacitated; and
2. May require immediate stabilization and continued medical response and intervention during transit or upon arrival at the patient's destination to safeguard the patient's life or physical well being].

(2) "Back-up ambulance" means an ambulance as defined in KRS 211.950 which complies with the requirements of Section 4(5) through (9) of this administrative regulation, and is licensed by the cabinet to provide emergency care and transportation if:

(a) One (1) of the licensed primary ambulances is not in service; and

(b) All of the primary ambulances are on runs and extreme circumstances dictate its use.

(3) "BLS" means a ground ambulance provider which:

(a) Utilizes at least two (2) certified or licensed emergency medical personnel to provide prehospital medical care such as:

1. First aid;
2. Cardiopulmonary resuscitation;
3. Airway management;
4. Cervical spine control;
5. Breathing assistance;
6. Hemorrhage control; and
7. Basic patient movement procedures; and

(b) Meets the requirements established in Sections 1 through 7 and Section 8, if applicable, of this administrative regulation and is licensed by the cabinet to provide health care and transportation on an emergency basis ~~[to persons who:~~

1. Are sick, injured, or otherwise incapacitated; and
2. May require immediate stabilization and continued medical response and intervention during transit or upon arrival at the patient's destination to safeguard the patient's life or physical well being].

(4) "Continuing education" means the provision of information or training within the scope of an individual's level of certification.

(5) "CPR" means cardiopulmonary resuscitation as conforming to the basic rescuer course of the American Heart Association; the National Safety Council; or the basic life support professional rescuer course of the American Red Cross, which shall include as a minimum one (1) and two (2) person CPR, airway obstruction, and airway adjuncts for adults, children, and infants.

(6) "Dispatch center" means the location where:

(a) Incoming calls are initially received requesting an ambulance; and

(b) Contact is made with the ambulance provider for direction to the patient scene.

(7) "Emergency medical technician (EMT)" means a person certified pursuant to 902 KAR 13:010 through 13:100.

(8) "Emergency medical technician-first responder" means a person certified pursuant to 902 KAR 13:110.

(9) "Employee" means ambulance provider medical personnel who may be paid or volunteer, full time or part time.

(10) "Interfacility care" means BLS or ALS emergency or nonemergency health care provided to a patient during ambulance transportation between two (2) health care facilities.

(11) "Licensing agency" means the Cabinet for Health Services ~~(Human Resources)~~, Department for Public Health ~~(Health Services)~~.

(12) "Paramedic (EMT-P)" means a person certified pursuant to 201 KAR 9:101 through 9:136.

(13) "Prehospital care" means emergency health care provided to a patient before and during ambulance transportation to a hospital.

(14) "Primary ambulance" means an on ground ambulance as defined in KRS 211.950(1) which is licensed by the cabinet to be a principle vehicle utilized by an ambulance provider for the provision of:

- (a) Emergency care and transportation; or
- (b) Nonemergency runs.

(15) "Response time" means the time from which a call is received at the dispatch center, until an ambulance arrives at the patient scene.

(16) "Provider" means a Class I ground ambulance provider as defined in KRS 211.950(2), and 211.952(1)(c)2.

(17) "Sharps" means a portion, or the whole unit, of medical supplies used in treatment procedures that may puncture the skin (e.g., needles, glass ampules, etc.).

(18) ~~(17)~~ "Specialized ground ambulance provider" means a Class I [BLS or ALS] ground ambulance provider which meets the requirements of Section 11 of this administrative regulation and is licensed by the cabinet to provide health care and transportation on a emergency or scheduled basis that:

- (a) May be unavailable to the general public; and
- (b) Has specialized or limited functions such as interfacility transfer of critical patients who may require special consideration of:
 - 1. Equipment requirements;
 - 2. Personnel requirements;
 - 3. Hours of operation.

~~(18) "Tiered response emergency medical (TREM) service" means a specialized nontransportation ALS emergency medical service which shares staff and equipment with a licensed ALS or BLS ambulance provider through a written agreement for operation within a specific geographic service area.]~~

Section 2. Class I Ground Ambulance Licensing Requirements.

(1) The following licensing requirements shall apply to Class I [BLS and ALS ground ambulance] providers:

(a) A person shall not provide, advertise, or profess to engage in the provision of Class I [BLS, ALS], or specialized Class I [BLS or ALS] emergency medical care or transportation that originates in Kentucky without having first obtained a certificate of need and a license from the cabinet [licensing agency].

(b) An ambulance provider shall comply with local, state, and federal statutes and regulations.

(c) The license shall be displayed in a prominent place at the service base station. The following information shall be included on the license:

- 1. Identity and location of the base station;
- 2. Number and location of substations, if any, to be operated by the licensee;
- 3. Designation of the specific geographic area to be served by the licensee, allowing for a maximum of thirty (30) minutes initial response time for ninety-five (95) percent of the population within the service area for all emergency calls. The provider shall not be precluded from responding to calls outside of its geographic service

area when providing:

- a. Mutual aid to another ambulance provider;
- b. Disaster assistance;
- c. Nonemergency transfers from damaged or closed health facilities; or
- d. Interfacility care to residents of its service area, who are patients in facilities outside of its service area, for the purpose of returning the patients to their home service area or transporting them to another health facility;

4. Designation of the levels of care which the ambulance provider shall be authorized to provide (i.e., BLS or ALS, or specialized BLS or ALS); and

5. Designation of the number of primary ~~[and back-up]~~ ambulances to be operated by the ~~[BLS or ALS ambulance]~~ provider.

(d) ~~[Upon the effective date of this administrative regulation,]~~ No new or replacement back-up ambulances shall be licensed. A ~~[(e) Effective January 1, 1996, each ambulance]~~ provider with currently licensed back-up ambulances shall, upon application for renewal of the license, declare the total number of ambulances to be operated with no distinction made between primary and back-up vehicles. This total shall not exceed the total number of ambulances previously licensed.

(f) Each ambulance licensed shall be staffed, equipped, and available to respond to emergency ~~[and nonemergency]~~ calls at all times.

(g) ~~[As a minimum,]~~ Each ambulance provider shall provide the licensing agency with the serial number and license tag number of each ambulance licensed.

(h) The licensee shall:

- 1. Notify the licensing agency of any change in the number, type, or use of the ambulances to be operated; and
- 2. Meet the following requirements:

a. An ambulance shall not be operated until after the licensing agency has been notified and has verified, through a physical inspection, that it meets the requirements of this administrative regulation. If the ambulance represents an expansion of service (e.g., an increase in the number of ambulances), the licensing agency shall verify that a certificate of need has been granted prior to the inspection; and

b. The licensing agency shall be notified, on the next licensing agency business day, following disposition of any prior approved ambulance operated by the ambulance provider (i.e., discontinued from service, change in use by the same ownership, or sale to another identified licensed ambulance provider).

(i) The licensing agency procedures shall not preclude the ambulance provider from utilizing a replacement ambulance on a temporary basis if a previously approved ambulance is out of service for maintenance. The following requirements shall apply:

1. The licensing agency shall be immediately notified (or on the next business day) by phone of the need for an ambulance provider to operate a temporary replacement unit. Within five (5) days, the ambulance provider shall send the licensing agency:

a. Written notice of the make, model, license number, and vehicle identification number; and

b. Assurances that the temporary replacement ambulance meets the [unit will be staffed and equipped in accordance with] requirements of this administrative regulation;

2. A temporary replacement ambulance shall not be utilized for more than thirty (30) days unless the licensing agency has verified, through a physical inspection, that it meets the requirements of this administrative regulation.

3. If the ambulance provider plans to utilize the replacement ambulance for more than thirty (30) days, the ~~[ambulance]~~ provider shall notify the licensing agency of the anticipated length of time the replacement will be in use; and

4. ~~[3.]~~ The licensing agency shall be notified if the replaced unit is back in service.

(j) The licensing agency shall maintain identifying records on all ambulances according to established procedures.

(2) A licensed Class I [BLS or ALS ground ambulance] provider shall have on file proof of professional and vehicular liability insurance.

(3) The following situations shall be exempt from the provisions of this administrative regulation:

(a) First aid or transportation provided in accordance with KRS 216B.020(2)(f);

(b) A vehicle serving as an ambulance during a major catastrophe;

(c) An ambulance operated by the United States government; ~~and~~

(d) An ambulance from an out-of-state licensed ambulance provider making a nonemergency run originating from a Kentucky facility for the purpose of returning a patient who is not a Kentucky resident to his state of residence;

(e) A person proceeding to alleviate emergency circumstances pursuant to 900 KAR 6:010, Section 9; and

(f) An ambulance service owned and operated by a city government which provides services in coterminous cities outside the ambulance service's designated service area pursuant to KRS 216B.020(4).

Section 3. Class I [BLS and ALS Ground Ambulance] Management Requirements. A Class I [An] ambulance provider shall:

(1) Establish lines of authority (i.e., an organizational chart) to include the designation of an:

(a) Administrator responsible for assuring compliance with this administrative regulation during the daily operation of the service; and

(b) A designee who shall serve if necessary in the absence of the administrator.

(2) Maintain adequate records and reports at the ambulance service base station to be made available for review as deemed necessary by the cabinet, including:

(a) An original, microfilm, electronic equivalent as authorized under KRS 216B.410(1), or similar copy procedure of EMS run form, EHS-8A "Kentucky Emergency Medical Service Ambulance Run Report", for all runs originating in Kentucky.

1. Copies of completed run report forms shall be kept as required by KRS 216B.410(1) and guidelines established by the licensing agency in a manner of confidentiality and safekeeping for a minimum of five (5) years from the date on which the service was rendered, or in the case of a minor, until five (5) years after the minor reaches eighteen (18) years of age; and

2. The third copy of the run form, or an electronic equivalent, shall be forwarded to the cabinet within thirty (30) days following the end of the month in which the run occurred.

(b) Personnel files on each ambulance driver and attendant shall be maintained for:

1. A minimum of five (5) years, or longer if specified in local government archives approved schedules, following termination or retirement from employment; or

2. Five (5) years following the demise of the employee.

(c) Individual ambulance driver and attendant personnel files shall, as a minimum, contain evidence of:

1. Training;

2. Experience;

3. Current credentials including proof of CPR certification, or EMT or paramedic certification with corresponding numbers and expiration dates, or nursing or physician license;

4. Current and valid driver's license;

5. A preemployment criminal and Department of Transportation driver's records check for each individual added to the service ~~[after the effective date of this administrative regulation];~~

6. Health records to include:

a. Written evidence of a preemployment health assessment

having been conducted by a physician or a licensed advanced registered nurse practitioner (ARNP) stating the employee is capable of performing assigned job duties; and

b. Health records which ~~[at a minimum]~~ meet the requirements of KRS 216B.410(3).

(3) Maintain and follow written administrative, personnel, medical, and other operational policies and procedures that are reviewed on an annual basis by the ambulance provider in order to assess their effectiveness. The policies and procedures shall be developed to include the following [minimum] areas:

(a) Organizational structure, staffing, and allocation of responsibility and accountability;

(b) Ambulance service mutual aid agreements and agreements with other ambulance providers;

(c) Personnel performance guidelines; and

(d) A plan to assure that a continuing education program shall be provided for its staff. The program shall include:

1. Evidence of continuing education for staff regarding acquired immune deficiency syndrome (AIDS) and infection control, including the handling of infectious waste in accordance with Centers for Disease Control guidelines.

2. A plan for response to, and the protection and decontamination of, the patient, ambulance, equipment, and staff if called upon to transport a patient exposed to hazardous chemicals;

3. A plan for assessing all other staff continuing education needs, with a coordinated development of methods to meet those needs; and

4. The maintenance of training rosters or other written records to support continuing education conducted by, or at the request of, the licensee.

(e) A plan for the quality assessment of patient care including a periodic review of ambulance run report forms, and evaluation of staff performance related to patient care.

(f) Policies and procedures concerning:

1. Vehicle maintenance;

2. Standard operating procedures (SOPS);

3. Patient protocols;

4. Ambulance response;

5. Transport limitations; and

6. Patient destination.

Section 4. Class I [BLS and ALS Ground Ambulance] Operating Requirements. (1) A Class I [BLS or ALS] ambulance provider shall provide emergency care and transportation on a twenty-four (24) hour, seven (7) days a week, basis. This provision may be met through a call system or by a written mutual aid agreement with another Kentucky licensed Class I ambulance provider. The following priorities shall be followed for establishing a mutual aid agreement:

(a) A Class I provider which is licensed to serve the same service area;

(b) A Class I ground ambulance provider which serves part of the same service area or a contiguous service area.

(2) A Class I ground ambulance provider may also enter into additional mutual aid agreements with other Kentucky licensed Class I ground ambulance providers on an occasional basis to meet the needs of its service area for providing scheduled nonemergency transportation.

(3) If a Class I ground ambulance provider is unable to respond to an emergency call, the provider shall activate their mutual aid agreement with the closest available Class I ground ambulance provider.

(4) If a Class I ground ambulance provider receives and declines a request for an emergency interfacility transfer, the licensee shall activate its mutual aid agreement. If none of the mutual aid partners are willing or able to accept the emergency interfacility transfer, any Kentucky licensed Class I ground ambulance provider may accept the transfer.

(5) A provider who accepts a transfer outside of its service area

shall require documentation from the facility or the provider licensed for the service area indicating that a good faith effort was made to utilize the provider licensed for the area.

(6) ~~((2))~~ If a Class I [BLS or ALS licensed] ambulance provider also makes nonemergency runs, at least [a minimum of] one (1) ambulance shall be held in reserve by the licensee to respond to emergency calls within the geographic service area of the licensee. ~~[The licensee may enter into a written mutual aid agreement with another licensed BLS or ALS ambulance provider as a means to meet this requirement. If the only remaining ambulance of a licensee is being held in reserve for emergency prehospital runs, the licensee shall activate its mutual aid agreement if it receives and declines an emergency interfacility transfer request.]~~

(7) ~~((3))~~ In areas where fire departments, rescue squads, or other organizations provide first response to medical emergencies, in order to provide for the coordinated delivery of emergency medical services and the orderly transfer of patients to the ambulance service upon their arrival, the Class I [BLS or ALS] ambulance provider [which responds to medical emergencies for that area] shall enter into a mutual aid agreement with the first response organization. These agreements shall be in writing and shall address the following:

(a) The type of mutual aid assistance to be provided (e.g., ALS or BLS medical care, ~~[ambulance service, tiered]~~ ALS or BLS medical first response, extrication);

(b) Response personnel including levels of training and provisions for joint in-service training where appropriate;

(c) Response vehicles including unit identifiers and the station or location from which the vehicles will be operated;

(d) How and what manner the mutual aid agreement shall [will] be activated including dispatch and notification procedures;

(e) Radio and other communications procedures between the ambulance provider and the other response agency;

(f) On-scene coordination and scene control including medical direction when several agencies respond to same incident;

(g) Exchange of patient information, records, and reports;

(h) Terms of the agreement including effective date and provision for amendment or termination.

(8) ~~((4))~~ Ambulances used in the provision of Class I [BLS or ALS] ambulance services shall:

(a) Be maintained in good operating condition and in full repair;

(b) Be designed to provide for the medical care and transportation of patients;

(c) Comply fully with ambulance design criteria contained in "Federal Specifications for Ambulances", KKK-A-1822 D (11/94) (GSA federal specifications) in effect at the time the ambulance is manufactured, except for color and provider identification.

(d) Comply with KRS 189.910 through 189.950 regarding the use of lights and siren.

(9) ~~((5))~~(a) The Class I [BLS or ALS] ambulance provider shall require that a certification decal or sticker be supplied by the manufacturer of newly purchased ambulances, indicating that the ambulance met GSA federal specifications on the date it was manufactured. The certification decal shall be located on a permanent surface, such as in the ambulance oxygen tank compartment, or as later identified in a GSA federal specification revision.

(b) A Class I [BLS or ALS] ambulance provider shall require, for units that are later modified, the conversion company to supply a letter to verify the modification meets or exceeds the GSA federal specification requirements, except for color or provider identification, as incorporated in the GSA federal specifications on the ambulance original date of manufacture.

(10) ~~((6))~~ In addition to the GSA federal specifications, the following state licensing requirements shall be maintained:

(a) The heating system shall maintain a temperature of not less than sixty-five (65) degrees Fahrenheit in the driver and patient compartments in winter weather conditions;

(b) The air conditioning system shall maintain a temperature of

not more than eighty-five (85) degrees Fahrenheit in the driver and patient compartments in summer weather conditions; and

(c) The name of the ambulance provider shall appear on the exterior surface of the ambulance.

(11) ~~((7))~~(a) A preventive maintenance program for each ambulance and its equipment shall be developed and implemented to keep them in optimum working order to protect the health and safety of the patient and ambulance personnel.

(b) Documentation shall be maintained by the ambulance provider to support evidence of periodic inspections or calibrations required for maintenance and operation of the ambulance and its equipment.

(12) ~~((8))~~ The interior of the ambulance and its equipment shall be checked after each use to ensure that they are kept and maintained in a clean and sanitary condition, unless precluded by emergency conditions.

(13) ~~((9))~~ Nothing in this administrative regulation shall be construed to prevent a licensed Class I [BLS or ALS ambulance] provider from providing medical [tiered] first response emergency prehospital care [medical service] at or below the level for which they are licensed through the utilization of the following:

(a) Designated, provider owned response vehicles;

(b) Provider or personally owned supervisor vehicles;

(c) Employee personally owned vehicles.

(14) ~~((10))~~ The licensed Class I [BLS or ALS ground ambulance] provider shall determine the minimum equipment required for tiered response vehicles operating under their license.

(15) Class I medical [(11) BLS or ALS ground ambulance service tiered] first response vehicles shall be operated in accordance with the provisions of KRS 189.910 to 189.950.

(16) ~~((12))~~ Vehicles used to provide medical [tiered] first response [emergency medical] services shall be insured by the employee or through the insurance policies of the Class I [BLS or ALS ground ambulance] provider.

(17) ~~((13))~~ A communications system shall be developed, coordinated, and maintained by each ambulance provider. The communication system shall meet the following requirements:

(a) If a local or regional dispatch center or 911 arrangement exists for all or part of the service area of a provider, the ambulance provider shall have a signed affiliation agreement with the dispatch center for coordination of emergency calls. If an ambulance provider is unable to secure a written affiliation agreement with the dispatch center, the ambulance provider shall have on file proof of a good faith attempt to obtain an affiliation agreement;

(b) A Class I ambulance [BLS and ALS ambulances] shall be equipped with two (2) way radio communication equipment capable, under normal conditions, of contacting the ambulance dispatch center and the receiving hospital;

(c) A minimum of one (1) portable communication device per ambulance, on the ambulance radio frequency, shall be provided for personnel if away from the ambulance;

(d) A Class I [BLS or ALS ambulance] provider shall have an acceptable plan to assure that all calls are promptly answered, and runs are dispatched in an expedient manner in accordance with subsection (1) of this section; and

(e) An ambulance provider shall provide orientation to all drivers and attendants related to communication protocols that have been established by the service.

(18) ~~((14))~~(a) In accordance with policies and procedures of the Class I [BLS or ALS ambulance] provider concerning patient destination and ambulance response and transport limitations, a patient shall be transported to:

1. The hospital emergency room of the patient's choice; or

2. The hospital emergency room chosen by the patient's physician.

(b) Nothing in this subsection shall preclude Class I [BLS or ALS ambulance] provider personnel from transporting a patient to:

1. A hospital emergency room other than the one (1) chosen by

the patient or his doctor, or an appropriate emergency medical facility chosen by the attendant, if the attendant determines that it shall be necessary in order to save the patient's life or limb.

2. A hospital emergency room or emergency medical facility other than the one (1) chosen by the patient or his physician if the Class I [ambulance] provider is operating under an approved local or regional diversion plan or medical triage protocols developed in conjunction with a consortium of physicians, hospitals, and ambulance providers, and which has been approved by the Kentucky Emergency Medical Services Council under KRS 211.952(5).

(c) The Kentucky emergency medical service ambulance run report form (EHS-8A) shall require ambulance service personnel to state:

1. The name and city of the hospital to which the patient was transported; and
2. If the destination was chosen by the:
 - a. Patient;
 - b. Patient's physician; or
 - c. Medical service personnel. If the destination was chosen by the medical service personnel, the attendant shall document the medical necessity on the form's case narrative section.

Section 5. Basic Life Support Personnel. (1) A BLS Class I [ground-ambulance] provider shall be staffed to provide, at least [as a minimum] two (2) attendants for each run. One (1) attendant shall remain with the patient at all times during transport;

(2) There shall be no more patients, personnel, and other persons than can be safely secured by means of seat safety belts or similar devices in the ambulance during transportation; and

(3) All personnel shall be capable of performing their job duties, and shall not cause the patient or other personnel any undue jeopardy.

(4) [As a minimum] The driver on each BLS or ALS ambulance run shall:

- (a) Be at least eighteen (18) years of age, with current motor vehicle operator's license;
- (b) Have at least two (2) years of licensed driver/operator experience;

(c) Complete a defensive driving training program that is developed by the ambulance provider or in conjunction with another agency or organization. The defensive driving training program shall be repeated for each driver at least every four (4) years.

1. [As a minimum] The training program shall consist of four (4) hours review of driving a vehicle under emergency conditions;

2. Documentation shall be available to support training in at least the following areas:

a. Review of KRS 189.910 through 189.950 regarding emergency vehicles.

b. Forward and back-up driving maneuvers in a controlled situation, such as in an obstacle course designed specifically for this purpose.

c. Review of defensive driving techniques and procedures by hands-on experience or exposure by visual aids, such as video tapes, slides, or planned demonstrations.

(5) One (1) ambulance attendant on each prehospital emergency or nonemergency BLS ground ambulance run shall be certified or licensed for one (1) of the following levels:

- (a) Emergency medical technician (EMT);
- (b) Paramedic;
- (c) Registered nurse (RN) licensed by the Kentucky Board of Nursing (KBN); or
- (d) Physician licensed by the Kentucky Board of Medical Licensure (KBML).

(6) The second ambulance attendant, who may also be the driver, [as a minimum] shall have certification or licensing for one (1) of the following levels:

- (a) EMT-first responder;

(b) EMT;

(c) Paramedic;

(d) RN licensed by the KBN; or

(e) Physician licensed by the KBML.

(7) Personnel who on occasion may serve as an attendant or a driver shall meet the qualifications for both roles. Documentation shall be required in personnel files for personnel who:

(a) Serve as drivers only in a three (3) person crew; and

(b) Do not render any type of first aid or medical treatment; or

(c) Serve as attendants only.

(8) Ambulance personnel required to meet patient needs for interfacility or facility-to-home patient transports may be determined by the attending physician and the initiating facility, in conjunction with the ambulance service staff.

(9) A Class I ground ambulance service may provide nonemergency transportation to individuals for whom no medical care is required or indicated during transport and for whom no emergency medical treatment is provided at the final destination. If a Class I provider [ground-ambulance service] chooses to make such runs, the ambulance run report form must be completed for each run to show that no medical care was required or indicated. For such runs, the ambulance shall be staffed by a minimum of one (1) person, who may also be the driver, licensed or certified for one (1) of the following levels:

(a) EMT-first responder;

(b) EMT;

(c) Paramedic; or

(d) Licensure as a registered nurse by the KBN or as a physician by the KBML.

Section 6. Equipment and Supplies. A Class I ground ambulance used in the provision of emergency care and ambulance transportation shall carry and maintain, in full operational order, the following minimum equipment and supplies:

(1) Suction, ventilation, and blood pressure equipment.

(a) Fixed and portable suction apparatus including:

1. Rigid tonsillar catheters; and

2. Flexible catheters in the sizes six French (6F), 8F, 10F and 14F;

(b) Disposable bag-valve-mask ventilation units in 250 ml, and 1000 ml with oxygen reservoir with adult and infant size masks (capable of use with oxygen);

(c) Nasopharyngeal and oropharyngeal airways in newborn, infant, child, and adult sizes; and

(d) Adult, obese adult, infant, and child sphygmomanometer cuffs with stethoscope. A permanently mounted sphygmomanometer shall not satisfy this requirement.

(2) Oxygen equipment.

(a) Fixed and portable oxygen tanks with a filled, minimum size D, secured spare portable cylinder;

(b) Pressure gauge and flow rate regulator (range of zero to fifteen (15) liters per minute);

(c) Oxygen humidifier and attachment for use on the fixed oxygen tank;

(d) Adaptor and tubing;

(e) Transparent simple oxygen masks for adults, and children, and infants [-and infants];

(f) Transparent nonrebreather oxygen masks for adults and children[-and infants]; and

(g) Nasal cannulas for adults, children, and infants.

(3) Bandages and tape.

(a) [Minimum of] Two (2) sterile universal dressings at least ten (10) inches by thirty (30) inches, compactly folded and packaged;

(b) [Minimum of] Twenty-five (25) sterile gauze pads, four (4) inches by four (4) inches;

(c) [Minimum of] Ten (10) soft roller self-adhering bandages, various sizes;

- (d) ~~Minimum of~~ Four (4) rolls of adhesive tape, minimum of two (2) sizes;
- (e) ~~Minimum of~~ Ten (10) triangular bandages with large safety pins; and
- (f) ~~Minimum of~~ Two (2) sterile burn sheets.
- (4) Miscellaneous supplies.
 - (a) Eye protector pads and shields;
 - (b) ~~Minimum of~~ One (1) roll of aluminum foil, or an occlusive substitute approved by the licensing agency;
 - (c) Shears for bandages;
 - (d) Hand held flashlight capable of providing adequate lighting to assess a scene or a patient away from the ambulance;
 - (e) ~~Minimum of~~ Two (2) penlights;
 - (f) ~~Minimum of~~ Two (2) sterile obstetrical kits;
 - (g) One (1) bottle of syrup of ipecac (with current expiration date) or one (1) bottle of activated charcoal (if in suspension, shall have current expiration date); ~~and~~
 - (h) Sterile irrigation fluids with current expiration date, if stocked on the ambulance, shall be obtained and maintained according to local, state, and federal statutes and regulations;

(i) Thermometer.

(5) Splints and immobilization devices.

- (a) Lower extremity traction splint, or equivalent as approved by the cabinet, for use in EMT training;
- (b) Splints for arm, leg, and foot (e.g., inflatable air splints, padded boards, ladder splints, or acceptable substitute approved by the cabinet);
- (c) Immobilization devices.
 - 1. Short spine board or other acceptable extrication device, as determined by the cabinet; and
 - 2. Long spine board with cervical immobilization accessories;
 - 3. An orthopedic "scoop" stretcher or other full-body immobilization device as determined by the cabinet.
- (d) Rigid, stiff cervical collars in large, medium, small adult, no-neck, and pediatric sizes;
- (e) A short spine board or an acceptable substitute, as determined by the cabinet, shall be provided for administering CPR.
- (6) Safety supplies and equipment.
 - (a) ~~Minimum of~~ Two (2) five (5) pound size, ABC multipurpose fire extinguishers, approved by Underwriters Laboratory, Coast Guard, or Factory Mutual. One (1) shall be located in the driver compartment and the other located in the patient compartment;
 - (b) Multiposition stretcher with wheels and a mechanism to secure the stretcher while in transit;
 - (c) ~~Minimum of~~ One (1) pocket mask with an isolation valve per patient attendant;
 - (d) ~~Minimum of~~ One (1) clean scrub gown (or substitute, such as disposable coveralls), disposable mask, and gloves per patient attendant;
 - (e) ~~Minimum of~~ One (1) particulate filter face mask per attendant meeting federal standards set by the Occupational Safety and Health Administration (OSHA) and one (1) face mask per patient meeting OSHA standards for use during transport of patients known to be infected with tuberculosis;
 - (f) A means of cleansing the hands shall be provided, such as the provision of a solution or disposable towelettes;
 - (g) Hospital type disinfectants;
 - (h) Plastic bags for disposal of waste materials;
 - (i) Puncture resistant containers for disposal of sharp objects, if sharps are carried;
 - (j) ~~A minimum of~~ Two (2) clean blankets, sheets, and pillowcases;
 - (k) Tissues or similar substitute; and
 - (l) An emesis container or similar substitute.
- (7) Additional medical supplies and equipment desired for storage in the ambulance for authorized persons responding to the scene who are licensed or certified to provide medical skills that require training

beyond the authorized EMT level may be considered for approval by the cabinet. For eligibility, the ambulance provider shall include documentation to assure a system of accountability for the storage and handling of the additional medical supplies and equipment. The cabinet shall have the authority to deny approval of the arrangement if it is determined that the arrangement shall not be in the best interest of quality patient medical care or safety of the patient and personnel.

Section 7. Extrication and Other Rescue Equipment. (1) ~~For response to trauma scenes;~~ A Class I ~~ground ambulance~~ provider shall provide and maintain in full operational order the following minimum light access and extrication equipment on the ambulance:

- (a) ~~Minimum of~~ Two (2) pairs of eye protection goggles;
 - (b) ~~Minimum of~~ Two (2) pairs of heavy work gloves;
 - (c) ~~Minimum of~~ Two (2) hard hats;
 - (d) ~~Minimum of~~ One (1) spring loaded window punch or acceptable substitute; and
 - (e) ~~Minimum of~~ Six (6) reflective triangles, at least ten (10) inches in height, flares, or equivalent warning devices.
- (2)(a) For response to trauma scenes, a ground ambulance provider shall, ~~as a minimum,~~ provide one (1) vehicle, which need not be an ambulance, equipped with the following fully operational, more extensive access and extrication equipment:
- 1. ~~Minimum of~~ Two (2) fifty (50) foot long seven-sixteenths (7/16) or one-half (1/2) inch static or dynamic nylon ropes;
 - 2. ~~Minimum of~~ One (1) pair of pliers, vise grip;
 - 3. ~~Minimum of~~ One (1) wrench, with adjustable, stable open end;
 - 4. ~~Minimum of~~ One (1) set of screw drivers, four (4) sizes, regular blade;
 - 5. ~~Minimum of~~ One (1) set of screw drivers, four (4) sizes, Phillips type;
 - 6. ~~Minimum of~~ One (1) double action tin snip;
 - 7. ~~Minimum of~~ One (1) crow bar with pinch point;
 - 8. ~~Minimum of~~ One (1) hacksaw with twelve (12) blades; and
 - 9. ~~Minimum of~~ One (1) hammer, three (3) pound size;
 - 10. ~~Minimum of~~ One (1) fire axe;
 - 11. ~~Minimum of~~ One (1) wrecking bar;
 - 12. ~~Minimum of~~ One (1) bolt cutter, with ~~a minimum of~~ one and one-fourth (1 1/4) inch jaw opening;
 - 13. ~~Minimum of~~ One (1) four (4) ton porta-power jack and spreader tool;
 - 14. ~~Minimum of~~ One (1) shovel, short handle, with pointed blade;
 - 15. ~~Minimum of~~ One (1) shovel, long handle, with pointed blade;
 - 16. ~~Minimum of~~ One (1) come-along tool; and
 - 17. ~~Minimum of~~ Two (2) fire proof blankets.
- (b) A Class I ~~ground ambulance~~ provider which has a written agreement for this provision with a rescue squad, fire department, or an emergency service agency that meets the requirement established by the cabinet, shall not be required to provide the more extensive access and extrication equipment on the ambulance.

Section 8. ~~Ambulance Provider~~ Medical Directors. (1) An ALS Class I ~~ambulance~~ provider shall have a written agreement with a physician medical director.

(2) An ALS Class I ~~ambulance~~ provider shall provide evidence that the medical director shall:

- (a) Be a physician licensed by the KBML;
- (b) Meet the qualifications specified in 201 KAR 9:171, Section 2(6). Evidence shall be on file to verify that the qualifications of the medical director have been reviewed by the KBML to assure compliance with 201 KAR 9:171, Section 2(6);
- (c) Have completed a residency program in emergency medicine approved by the Accreditation Committee for Graduate Education or be a physician who holds, or is in the process of completing, certification in advanced cardiac life support, and certification in advanced trauma life support or basic trauma life support, or have on

file written approval from the KBML;

(d) Assume responsibilities in accordance with 201 KAR 9:171, Sections 2(1) through (5); and

(e) Assume other responsibilities as agreed upon between the medical director and the director of the ambulance service.

Section 9. Class I ALS [~~Ground Ambulance~~] Providers. (1) A Class I [~~ALS~~] ALS provider shall meet the requirements of Sections 1 through 8 of this administrative regulation. It shall also meet the following additional requirements:

(a) Evidence shall be on file to verify that the ALS written medical protocols have been reviewed by the KBML.

(b) ALS services shall be provided on a twenty-four (24) hour, seven (7) days a week basis. This provision may be met through a call system or by a written mutual aid agreement with another Kentucky licensed Class I ALS provider.

(c) In order to foster development of full-time ALS coverage in counties where ALS services have not been previously available, the licensing agency may grant a waiver of the twenty-four (24) hour, seven (7) day a week requirement to a new ALS provider.

(d) A waiver of this requirement shall not exceed a period of twelve (12) months. If requested by the ALS provider, and approved by the licensing agency, additional waivers may be granted for just cause, such as inability to obtain certified paramedics.

(2) In addition to the BLS equipment required in Section 6 of this administrative regulation, at the point of patient contact and transportation, a Class I [~~ALS~~] ALS provider shall carry on each vehicle, and maintain in full operational order, the supplies and equipment as provided for in protocols established in subsection 1(a) of this section and shall include the following:

(a) An endotracheal intubation set consisting of :

1. Laryngoscope handle in adult and pediatric sizes;

2. Straight laryngoscope blades in sizes 0, 1, and 2;

3. Curved laryngoscope blades in sizes 3 and 4;

4. Extra batteries and bulbs for blades and handles; and

5. Endotracheal tubes for oral and nasal placement in adult and pediatric sizes (uncuffed tube sizes 3.0, 3.5, 4.0, 4.5, 5.0, and 5.5; and cuffed tube sizes 5.5, 6.0, 6.5, 7.0, 7.5, and 8.0);

(b) Stylettes in adult and pediatric sizes;

(c) Magill forceps in adult and pediatric sizes;

(d) One-half (1/2) inch wide twill tape or equivalent for securing endotracheal tubes;

(e) Water soluble lubricant for lubrication of endotracheal and nasotracheal tubes;

(f) Bite block;

(g) A portable monitor defibrillator that:

1. Is capable of displaying a visual display of cardiac electrical activity;

2. Is capable of providing a hard copy of cardiac electrical activity measure;

3. Is capable of delivering direct current energy over a variable range which is suitable for pediatric and adult usage;

4. Has adult and pediatric external paddle electrodes capable of utilization for immediate monitoring of heart activity and delivery of countershock in both the adult and pediatric patient;

5. Is capable of being operated from internal rechargeable batteries;

6. Has synchronized countershock capability for cardioversion. This requirement applies only to equipment purchased after the effective date of this administrative regulation;

7. Has a patient monitoring cable which has the following accessories:

a. Electrode paste or gel or equivalent;

b. Electrode pads or equivalent for use with the patient monitoring cable; and

c. One (1) additional roll of paper for hard copy printout.

(h) Needles, sterile, disposable: minimum of three (3) sizes shall

be maintained in eighteen (18) to twenty-five (25) gauge;

(i) Syringes, disposable: minimum three (3) sizes shall be maintained in 1cc to 30cc sizes;

(j) Appropriate containers for the collection of blood samples;

(k) Tourniquet appropriate for use with venipuncture procedure;

(l) Dextrostix (r) or equivalent for the measure of blood glucose levels;

(m) Disposable, individually packaged antiseptic wipes;

(n) Intravenous fluids, macrodrip and microdrip fluid sets, extension sets and accessory items;

(o) Intravenous catheter over needle devices in twelve (12) to (24) gauge;

(p) Butterfly needles in nineteen (19) and twenty-three (23) gauge;

(q) Intraosseous needles;

(r) Pediatric drug dosage tape or equivalent which shall provide easy reference for pediatric and infant treatment and drug dosages;

(s) Nasogastric tubes in size 5F, 8F pediatric sizes, sizes 10 to 18 French adult, and sizes 50 or 60 cc catheter tipped syringes or equivalent;

(t) Water soluble lubricant; and

(u) Infant or neonate suction apparatus.

(3) A Class I [~~ALS~~] ALS provider shall stock and maintain drugs and medications as required by:

(a) Protocols established in accordance with Section 8 of this administrative regulation; and

(b) Local, state, and federal statutes and regulations;

(4) Controlled drugs shall be stored in a locked compartment or equivalent approved by the cabinet. An ambulance provider which stores and utilizes controlled substances shall have protocols approved by the cabinet's drug control branch.

(5) With the exception of the supplies or equipment listed in subsection (2)(p), (q), (r), and (u) of this section, and supplies and equipment listed in subsection (2), (3), and (4) of this section which require specific sizes to accommodate adult, pediatric, and infant patients, nothing in this administrative regulation shall be construed to require a Class I [~~ALS~~] ALS provider to maintain the equipment required in subsections (2), (3) and (4) of this section if the equipment is not required by the medical protocols of the ALS Class I ground ambulance provider.

Section 10. Advanced Life Support Personnel. (1) Each licensed Class I ALS ambulance shall be staffed according to the requirements of 201 KAR 9:171, Section 5.

(2) If medical first [~~tiered~~] response emergency medical service vehicles are utilized by the Class I ALS provider, the vehicles shall:

(a) Be staffed by a minimum of one (1) person who has minimum training and current certification as a paramedic.

(b) Have available the minimum equipment and supplies required by Sections 6, 7, and 9 of this administrative regulation. This may be accomplished through the coordinated response of an ambulance from a separate ambulance provider under the provisions of a written mutual aid agreement on file with both providers.

Section 11. Class I Specialized [~~BLS and ALS~~] Providers. (1) A Class I [~~BLS or ALS ground ambulance~~] provider which does not provide prehospital emergency care to the general public, such as industrial based providers, neonatal transfers, and interfacility transfers requiring BLS or ALS shall be licensed as a Class I specialized [~~ground ambulance~~] provider.

(2) A BLS Class I specialized [~~ground ambulance~~] provider which complies with Sections 1 through 7, and 8 if applicable, of this administrative regulation, if applicable, and an ALS Class I specialized [~~ground ambulance~~] provider which complies with Sections 8 and 9 of this administrative regulation, may, with prior approval by the licensing agency, be allowed certain variances.

(3) A specialized license shall specify the limitations of the

provider which have been approved by the cabinet;

(4) In reference to Section 4(1) of this administrative regulation, a Class I specialized [~~ground-ambulance~~] provider shall not be required to provide emergency care and ambulance transportation on a twenty-four (24) hour, seven (7) days a week basis.

(5) In reference to Section 4(16) [(14)](a) of this administrative regulation, a Class I specialized [~~ground-ambulance~~] provider shall not be required to have an affiliation agreement with a local or regional dispatch center or 911 service.

(6) A BLS Class I specialized ground ambulance provider shall be required to meet the equipment, supplies, and personnel requirements as listed in Sections 6 and 7 of this administrative regulation, with certain variations as approved by the cabinet.

(7) An ALS Class I specialized ground ambulance provider shall be required to meet the equipment, supplies, and personnel requirements as listed in Sections 6, 7, and 9 of this administrative regulation, with certain variations as approved by the cabinet.

(8) A Class I specialized [~~emergency-care~~] provider desiring variations in equipment, supplies, or personnel shall submit the requests in writing for consideration and approval by the cabinet.

Section 12. Material Incorporated by Reference. The following material is incorporated by reference and may be inspected, obtained, or copied at the Office of the Commissioner, Department for Public Health [Services], 275 East Main Street, Frankfort, Kentucky 40621, 8 a.m. to 4:30 p.m., Monday through Friday.

(1) Form EHS-8A, "Kentucky Emergency Medical Service Ambulance Run Report," (2/91).

RICE C. LEACH, Commissioner

JOHN MORSE, Secretary

APPROVED BY AGENCY: July 8, 1996

FILED WITH LRC: July 12, 1996 at 4 p.m.

CABINET FOR FAMILIES AND CHILDREN
Department for Social Services
(As Amended)

905 KAR 1:360. Private child care levels of care.

RELATES TO: KRS 199.640-199.670, 605.090, 610.110

STATUTORY AUTHORITY: KRS 194.050, 199.641, EO 96-862

NECESSITY, FUNCTION, AND CONFORMITY: KRS 199.641 authorizes the cabinet to establish the rate of reimbursement for child-caring facilities which is consistent with the level of service provided. Executive Order 96-862, effective July 2, 1996, reorganizes the Cabinet for Human Resources and places the Department for Social Services and the Child Welfare Program under the Cabinet for Families and Children. This administrative regulation establishes a four (4) level reimbursement system based on the needs of the child with a reimbursement rate for each level. The function of this administrative regulation shall be to establish procedures whereby each child shall be evaluated to assure classification in the appropriate level of care.

Section 1. Definitions. (1) "Commissioner" means the Commissioner or designee of the Department for Social Services.

(2) "Department" means the Department for Social Services as defined in KRS 199.641.

(3) "Gatekeeper" means the department or agent responsible for making a clinical determination of the level of care necessary to meet a child's treatment and service needs.

(4) "Referral packet" means the required forms to be submitted to the gatekeeper and private child care providers to determine level

of care and placement and contains the following forms:

(a) DSS-886, Private Child Care Client Inter-Agency Referral;

(b) DSS-886A, Application for Referral to Private Child Care;

(c) Achenbach Child Behavior Checklist; and, if a child has been assessed for youth services[;

~~(d) DSS-881, Social History Needs Assessment].~~

(5) "Utilization review" means during a child's placement each child's case records and existing documentation shall be examined to identify the child's current level of functioning and assign the appropriate level of care.

Section 2. Levels of Care. The department shall establish a four (4) level reimbursement system based on the needs of a child in care.

(1) Level I children require a routine home environment which provides maintenance, guidance and supervision to meet the needs of the child and ensures the emotional and physical well-being of the child. The rate for Level I shall be forty-five (45) dollars per day.

(2) Level II children may engage in nonviolent antisocial acts, but be capable of meaningful interpersonal relationships and require supervision in a structured supportive setting with counseling available from professional or paraprofessional staff, educational support, and services designed to improve developmental or normalized social skills. The rate for Level II shall be sixty-five (65) dollars per day.

(3) Level III children have both physical and emotional needs and may be at moderate risk for causing harm to themselves and others and require a structured supportive setting with therapeutic counseling available by professional staff and physical, environmental, and treatment programs designed to improve social, emotional, and educational adaptation behavior. The rate for Level III shall be \$135 per day.

(4) Level IV children require a highly structured program with twenty-four (24) hour supervision and a specialized setting which can safely and effectively care for severe and chronic medical conditions complicated by behavioral disorders or emotional disturbance. The rate for Level IV shall be \$180 per day.

Section 3. Role of the Gatekeeper. The gatekeeper shall be responsible for:

(1) Assessing each child-caring facility to determine what levels of care are provided;

(2) Evaluating each child referred by the department or currently in a child-caring facility to determine classification in the appropriate level of care;

(3) Reevaluating each child within six (6) months after placement in a facility, and every three (3) months thereafter, at which time the child may be reassigned to another level of care or recommended for placement outside the level of care system:

(a) If a child is reassigned to a lower level by the gatekeeper and the child is remaining in the same child-caring facility, the rate for the lower level shall be effective thirty (30) days from the date of the reassigned level. If the child is placed in another child-caring facility, the rate for the lower level shall be effective on the day the child is placed.

(b) If a child is reassigned to a higher level by the gatekeeper and the child is remaining in the same child-caring facility, the rate for the higher level shall be effective the day after the reassigned level is made. If the child is placed in another child-caring facility, the rate shall be effective on the day the child is placed.

(c) If, after the first six (6) months and before the next scheduled utilization review, the child-caring facility determines a child may be transitioned to a lower level of care, the rate for the current assigned level shall remain in effect until the next scheduled utilization review. If the lower level of care is therapeutic foster care, independent living, or other alternative placement, the facility shall notify the department.

(d) If the child-caring facility determines a child is beyond the facility's capacity to provide care, or there is new information

previously not considered by the gatekeeper, a request for a redetermination may be made to the gatekeeper prior to the next utilization review;

1. After a redetermination is completed by the gatekeeper, the facility and department shall be notified of the results.

2. If the child-caring facility disagrees with a redetermination made by the gatekeeper, a request for dispute resolution shall be submitted in writing to the department as governed by Section 6 of this administrative regulation.

(4) Monitoring each placement for quality assurance as part of the reevaluation for each child within six (6) months of the placement and every three (3) months thereafter. The gatekeeper shall:

(a) Review the extent to which services provided are in compliance with the child's treatment plan;

(b) Determine if changes in the child's needs are reflected in the child's treatment plan; and

(c) Advise the Division of Licensing and Regulation of discrepancies; and

(5) Maintaining an information system for children served which shall include, but not be limited to:

- (a) Placement history;
- (b) Facility placement;
- (c) Cost of services;
- (d) Length of treatment; and
- (e) Discharge outcomes.

Section 4. Provider Requirements. (1) Providers in the levels of care reimbursement plan shall be licensed under 905 KAR 1:300. Providers shall comply with 905 KAR 1:300, Section 8, Youth treatment center, if providing intensive treatment oriented services.

(2) The provider shall demonstrate its ability to provide services, either directly or by contract, appropriate to the assigned level for that child and shall include:

(a) Room and board including any activity contributing to housing, food, clothing, school supplies, or personal incidentals;

(b) Clinical services include the evaluation and treatment of emotional disorders, mental illness and substance abuse and are directed to the identification and alleviation of disability or distress, related thereto, experienced by a child which follows specific treatment plans targeted to identified problems; and

(c) Support services which include:

1. The identification of resources needed by a child and the coordination of services provided by a range of agencies or professionals;

2. Services which allow a child to cope with the disability or distress [maintain a positive level of functioning];

3. Services which provide access to improving the educational or vocational status of the child; and

4. Services which provide essential elements of daily living.

Section 5. Referral Process. (1) When the family service worker determines a need to place a child with a child-caring facility, a referral packet shall be completed and a copy submitted to the gatekeeper.

(2) The gatekeeper shall determine the appropriate level of care needed, using a needs assessment consistent with one (1) of the four (4) levels, and return the completed DSS-886 Private Child Care Client Inter-Agency Referral Form, to the family service worker within three (3) working days of receipt of the referral packet.

(3) Upon notification of the assigned level of care, the family service worker shall forward the referral packet to potential child-caring facilities.

(4) Once a child-caring facility accepts a child for placement, the family service worker shall complete the DSS-114, Schedule of Payment, herein incorporated by reference, and on the pre-arranged date of placement, transport the child to the facility.

(5) On a monthly basis, the child-caring facility shall submit to the gatekeeper and family service worker a copy of the child's record or a narrative summary including:

- (a) Information regarding the child's adjustment;
- (b) Services provided to both the child and family;
- (c) Progress made toward returning the child home; and
- (d) Future plans for the child.

Section 6. Dispute Resolution. A child-caring facility may request a dispute resolution to a determination made by the gatekeeper in the application of the provisions of this administrative regulation.

(1) A written notice of dispute shall be submitted to the commissioner no later than thirty (30) days after a child-caring facility is notified of a level of care determination. The notice of dispute shall:

- (a) Specify the action being disputed;
- (b) Specify the reasons the child-caring facility believes the level of care determination is unwarranted;
- (c) Include documentation the child-caring facility considers relevant to support the dispute; and
- (d) Specify alternative determinations or actions that may be taken.

(2) The commissioner shall cause the dispute to be reviewed and evaluated and shall:

(a) Notify the facility of the date, time and place for the informal conference within thirty (30) days of the receipt of the notice of dispute. The informal conference with the child-caring facility shall be conducted according to the following procedures:

1. The commissioner shall preside over the informal conference with the child-caring facility.

2. The proceedings shall be recorded.

3. The child-caring facility or an [his] authorized representative may present oral arguments or documentation which are considered relevant to support the facility's contention regarding the assigned level of care.

4. The department staff and the gatekeeper shall explain the department's decision regarding the assigned level of care.

5. The commissioner may question the participants and may permit questions or discussions among participants if that may contribute to reaching a decision regarding the assigned level of care under dispute.

(b) Issue a written decision on the dispute, including findings of fact and conclusions of law, no later than thirty (30) days after the informal conference.

Section 7. Administrative Hearing Process. If the child-caring facility disagrees with the commissioner's decision on the dispute, the facility has the right to an administrative hearing held in accordance with KRS Chapter 13B. The notice of hearing shall comply with KRS 13B.050.

Section 8. Material Incorporated by Reference. (1) The following forms are herein incorporated by reference.

(a) DSS-114, Schedule of Payment, revised July, 1996;

(b) DSS-886, Private Child Care Client Inter-Agency Referral Form, revised March 1996;

(c) DSS-886A, Application for Referral to Private Child Care, revised September 1996 [July, 1993]; and

(d) [DSS-881, Social History/Needs Assessment, revised January, 1993; and

(e)] Achenbach Child Behavior Checklist (CBCL), revised January, 1995.

(2) Material incorporated by reference may be inspected and copied at the Department for Social Services, 6th Floor, 275 East Main Street, Frankfort, Kentucky 40621. Office hours are 8 a.m. to 4:30 p.m.

VIOLA MILLER, Acting Commissioner

ADMINISTRATIVE REGISTER - 1954

ADMINISTRATIVE REGULATIONS AMENDED AFTER PUBLIC HEARING
OR RECEIPT OF WRITTEN COMMENTS

FINANCE AND ADMINISTRATION CABINET
Department for Administration
(Amended After Hearing)

200 KAR 5:025. Memoranda of agreement and memoranda of understanding by state agencies.

RELATES TO: KRS Chapter 45A

STATUTORY AUTHORITY: KRS 45A.035, 45A.045(2), 45A.050(5)

NECESSITY, FUNCTION, AND CONFORMITY: The Finance and Administration Cabinet needs to supervise state agencies acting under its delegated authority from MOAs and MOUs. The benefits expected from this administrative regulation are two (2)-fold: to allow the Finance and Administration Cabinet to monitor their delegation of authority to an agency and to enable the Finance and Administration Cabinet to monitor an agency's use of MOAs and MOUs. This administrative regulation will be implemented by requiring a state agency to report annually on all MOAs and MOUs used by that agency and to follow guidelines for use of MOAs and MOUs.

Section 1. Memorandum of agreement (MOA) shall be defined as an agreement for services rendered to a state agency as defined in KRS 45A.690(1)(d)1-6 [3], and shall include program administration contracts, but shall not apply to purchases of commodities and supplies.

Section 2. By January 1, 1997, all state agencies with active MOAs shall provide the Finance and Administration Cabinet, Department for Administration with a report on each MOA. The report shall be submitted annually thereafter to the department by September 1 of each year, beginning September, 1997, and shall set out the following information: the name of the party with whom the agency entered the MOA; the type of service to be rendered under the MOA; the cost of the MOA to the agency to date; the projected total cost of the MOA to the agency; and the date the last payment was made under the MOA. The report shall contain information as of January 1 of 1997 and as of September 1 of each year thereafter [the first working day of each month and shall be submitted to the department by the fifth working day of each month]. The report shall be in an electronic format approved by the department prior to its use by the agency.

Section 3. Memorandum of understanding (MOU) shall be defined as a contract or agreement used whenever there is a joint project or undertaking by any state agency and another entity or entities, either government or private. The terms of a MOU shall set out the rights, duties and responsibilities of each entity in relation to the project or undertaking and the other entities. The term "joint entity or undertaking" shall include capital construction projects. The MOU shall specify the monetary liability of each entity and shall provide for the return of a specific dollar amount of state funds in the event that the project or undertaking is not begun, or other specific prerequisites are not completed by dates certain.

Section 4. By January 1, 1997, all state agencies with active MOUs shall provide the Secretary of the Finance and Administration Cabinet with a report of each active MOU. The report shall be submitted annually thereafter to the secretary by September 1 of each year, beginning September, 1997, and shall set out the following information: the name of the party or parties with whom the agency entered the MOU; the type of service to be rendered under the MOU;

the duties and responsibilities of each party under the MOU; any "flag" dates listed in the MOU by which certain action is to be completed and whether these dates have been met; the cost of the MOU to the agency to date; the projected total cost of the MOU to the agency; and the date the last payment was made under the MOU. The report shall contain information as of January 1 and September 1 of 1997 and as of September 1 of each year thereafter [the first working day of each month and shall be submitted to the secretary by the fifth working day of each month]. The report shall be in an electronic format approved by the department prior to its use by the agency.

Section 5. This administrative regulation shall not discharge an agency's responsibility to obtain all other necessary statutory and regulatory approvals applicable to the MOA or MOU.

Section 6. This administrative regulation shall not apply to memoranda of agreement or memoranda of understanding entered into by the Kentucky Transportation Cabinet pursuant to KRS Chapters 176 and 177.

JOHN MCCARTY, Secretary

REGULATORY IMPACT ANALYSIS

Contact Person: Karen A. Powell

(1) Type and number of entities affected: This administrative regulation affects state agencies using MOAs and MOUs delegated by the Finance and Administration Cabinet.

(2) Direct and indirect costs or savings on the:

(a) Cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received. There is no anticipated cost or savings on the cost of living and employment in the geographical area in which the administrative regulation will be implemented.

(b) Cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received. This administrative regulation poses no anticipated cost on business in the geographical area in which it will be implemented.

(c) Compliance, reporting and paperwork requirements of those affected, including factors increasing or decreasing costs (note any effects upon competition) for the:

1. First year following implementation: The agencies utilizing MOAs and MOUs will need to comply annually with written reports to the Secretary of Finance and Administration updating the status of those memoranda for their duration. The reports will provide the information specified in the administrative regulation. The costs for this compliance should be a minimal investment of time.

2. Second and subsequent years: In following years, the compliance costs of this regulation should remain stable.

(3) Effects on the promulgating administrative body:

(a) Direct and indirect costs or savings:

1. First year: The primary savings from this regulation will be resources preserved due to keener oversight of state government agencies utilizing MOAs and MOUs.

2. Continuing costs or savings: Prolonged agency accountability to the Finance Cabinet could continue to save state funds into the future.

3. Additional factors increasing or decreasing costs: No other factors are known at this time.

(b) Reporting and paperwork requirements: The Finance and Administration Cabinet will need to evaluate the agency reports to monitor the delegation of authority under MOAs and MOUs.

(4) Assessment of anticipated effect on state and local revenues: No impact is expected on state or local revenues.

(5) Source of revenue to be used for implementation and enforcement of administrative regulation: The budgets of the affected agencies will supply the revenue to implement and enforce this administrative regulation.

(6) To the extent available from the public comments received, the economic impact, including effects of economic activities arising from administrative regulation, on:

(a) Geographical area in which administrative regulation will be implemented: No impact is expected.

(b) Kentucky: No impact is expected.

(7) Assessment of alternative methods; reasons why alternatives were rejected: At the Notice of Intent hearing, a representative of the Transportation Cabinet suggested that the Transportation Cabinet should only make the required reports to the Finance and Administration Cabinet when an MOA is executed and terminated, rather than an annual report of all active MOAs. The regulation's intent, however, is to allow the Finance and Administration Cabinet to exercise appropriate oversight of active MOAs throughout their existence, not just at execution and termination. In order to fulfill this intent, agencies must make the required reports annually. The alternative was rejected.

(8) Assessment of expected benefits:

(a) Identify effects on public health and environmental welfare of the geographical area in which implemented and on Kentucky: No impact is expected.

(b) State whether a detrimental effect on environment and public health would result if not implemented: No impact would result.

(c) If detrimental effect would result, explain detrimental effect: Inapplicable

(9) Identify any statute, rule, administrative regulation or government policy which may be in conflict, overlapping, or duplication: To the best knowledge of the Division of Purchases and the Division of Contracting and Administration, no statutes, administrative regulations, or government policies conflict, overlap, or duplicate this administrative regulation.

(a) Necessity of proposed regulation if in conflict: Inapplicable

(b) If in conflict, was effort made to harmonize the proposed administrative regulation with conflicting provisions: Inapplicable

(10) Any additional information or comments: None

(11) TIERING: Is tiering applied? Yes. Section 6 of this regulation exempts the Kentucky Transportation Cabinet from the MOA and MOU requirement because the Transportation Cabinet has independent authority to enter into certain MOAs and MOUs pursuant to KRS Chapters 176 and 177.

**NATURAL RESOURCES AND
ENVIRONMENTAL PROTECTION CABINET
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)**

401 KAR 31:005. Definitions related to 401 KAR Chapter 31.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10, 261.1, 401 KAR Chapter 31

STATUTORY AUTHORITY: KRS 224.10-100

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-510 and establishes the general provisions applicable to generators of hazardous waste. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative

regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 31 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfarm and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste

resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the

combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; ~~or [and]~~

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action require-

ments under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure ~~[and postclosure]~~ cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

~~(58) ["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).]~~

~~(59)~~ "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

~~(59)~~ ~~(60)~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

~~(60)~~ ~~(61)~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

~~(61)~~ ~~(62)~~ "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

~~(d)~~ That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) [(63)] "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) [(64)] "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) [(65)] "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) [(66)] "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ["Disposal" shall have the meaning specified in KRS 224.01-010.

(69)] "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) [(70)] "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) [(71)] "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) [(72)] "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) [(73)] "Draft permit" shall have the same meaning as "proposed permit".

(73) [(74)] "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) [(75)] "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) [(76)] "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) [(77)] "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by **401 KAR 34:275. [this administrative regulation.]**

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (**for example** [e.g.], one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

~~(113) ["Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.]~~

~~(114) "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.~~

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(119) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.]~~

~~[(119) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit for use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impound-

ment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) [(122)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

[(123)] "Hazardous waste" shall have the meaning specified in KRS 224.01-040.]

(125) [(124)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) [(125)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) [(126)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) [(127)] "In existence" shall have the same meaning as "existing."

(129) [(128)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) [(129)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) [(130)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) [(131)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) [(132)] "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) [(133)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient

pressure.

(135) [(134)] "In vapor service" shall have the same meaning as "in gas service".

(136) [(135)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(136)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(137)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(138)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(139)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(140)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(141)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

(a) Cement kilns;

(b) Lime kilns;

(c) Aggregate kilns;

(d) Phosphate kilns;

(e) Coke ovens;

(f) Blast furnaces;

(g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

(h) Titanium dioxide chloride process oxidation reactors;

(i) Methane reforming furnaces;

(j) Pulp liquor recovery furnaces;

(k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or

(m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(142)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(143)] "Injection well" means a well into which fluids are

injected to achieve subsurface emplacement.

(145) [(144)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(145)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(146)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(147)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(148)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

[(150)] "IUC well" means a ~~underground injection control well as provided in 40 CFR Part 144.~~

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) **"Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.**

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

[(158)] "Landfill" means a ~~disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.~~

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats,

calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) **"Manifest" shall have the meaning specified in KRS 224.01-010.**

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

[(170)] "Manifest" ~~shall have the meaning specified in KRS 224.01-010.~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is

stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) "New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.

(180) "New tank component" shall have the same meaning as "new tank system."

(181) [(180)] "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for ~~hazardous waste~~ waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 ~~[40 CFR Part 264]~~.

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units

or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) **"Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.**

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which

solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

~~(266) [(265)] "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.~~

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-010.]~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means :

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;

2. What pretreatment, if any, is required;

3. The optimal process conditions needed to achieve the desired treatment;

4. The efficiency of a treatment process for a specific waste or wastes; or

5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

(289) ~~[(289)]~~ "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-010.]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) ~~[(292)]~~ "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) ~~[(293)]~~ "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) ~~[(294)]~~ "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) ~~[(295)]~~ "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

(a) Batteries as described in Section 2 of 401 KAR 43:010;

(b) Pesticides as described in Section 3 of 401 KAR 43:010;

(c) Thermostats as described in Section 4 of 401 KAR 43:010; and

(d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) ~~[(296)]~~ "Universal waste handler":

(a) Means:

1. A generator of universal waste; or

2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a

foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update I, November 15, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

[(314) "Waste" shall have the meaning specified in KRS 224.01-010.]

(316) [(314)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(315)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel

ADMINISTRATIVE REGISTER - 1968

without containers or labels.

~~[(318)] "Water" or "Waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]~~

~~(320) [(319)]~~ "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

~~(321) [(320)]~~ "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

~~(322) [(321)]~~ "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

~~(323) [(322)]~~ "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

~~(324) [(323)]~~ "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives. These changes are consistent with KRS 13A.222 requirements.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 31. These terms are assimilated from existing federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 31, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 31:040. Lists of hazardous wastes.

RELATES TO: KRS 224.01, 224.40, 224.43, 224.46, 224.99, 40 CFR 261 Subpart D

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-510(3), 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: KRS 224.46-510(3) requires the cabinet to identify the characteristics of and to list hazardous wastes. This chapter identifies and lists hazardous waste. This administrative regulation establishes the lists of hazardous wastes. **This administrative regulation is equivalent to federal standards established in 40 CFR 261 Subpart D except for the addition of Section 5 of this administrative regulation, which contains nerve and blister agents as required by KRS 224.50-130.**

Section 1. General Applicability and Delisting Procedures. (1) A waste is a hazardous waste if it is listed in any section of this administrative regulation unless it has been excluded from that list under 401 KAR 31:060 and 31:070.

(2) The cabinet shall indicate the basis for listing the classes or types of wastes listed in this administrative regulation by employing one (1) or more of the following Hazard Codes:

| Hazard Code | Class or Type of Waste |
|-------------|-------------------------------|
| (I) | Ignitable waste |
| (C) | Corrosive waste |
| (R) | Reactive waste |
| (E) | Toxicity characteristic waste |
| (H) | Acute hazardous waste |
| (T) | Toxic waste |

ADMINISTRATIVE REGISTER - 1970

401 KAR 31:160 identifies the constituent which caused the cabinet to list the waste as a toxicity characteristic waste (E) or toxic waste (T) in Sections 2 and 3 of this administrative regulation.

(3) Each hazardous waste listed in this administrative regulation is assigned an EPA Hazardous Waste Number, which precedes the name of the waste. This number shall be used in complying with the notification requirements of KRS 224.46-510 and the recordkeeping and reporting requirements under 401 KAR Chapters 32 to 40.

(4) The following hazardous wastes listed in Section 2 or 3 of this administrative regulation are subject to the exclusion limits for acutely hazardous wastes established in Section 5 of 401 KAR 31:010: EPA Hazardous Waste Nos. F020, F021, F022, F023, F026, and F027.

Section 2. Hazardous Wastes from Nonspecific Sources. (1) Hazardous wastes from nonspecific sources are:

| Industry and EPA Hazardous Waste No. | Hazardous Waste | Hazard Code | | |
|---|--|----------------|------|---|
| Generic: F001 | The following spent halogenated solvents used in degreasing: tetrachloroethylene, trichloroethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; all spent solvent mixtures/blends used in degreasing containing, before use, a total of ten (10) percent or more (by volume) of one (1) or more of the above halogenated solvents or those solvents listed in F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. | (T) | F005 | mixtures/blends containing, before use, one (1) or more of the above nonhalogenated solvents, and, a total of ten (10) percent or more (by volume) of one (1) or more of those solvents listed in F001, F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. The following spent nonhalogenated solvents: cresols and cresylic acid, and nitrobenzene; all spent solvent mixtures/blends containing, before use, a total of ten (10) percent or more (by volume) of one (1) or more of the above nonhalogenated solvents or those solvents listed in F001, F002, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (T) |
| F002 | The following spent halogenated solvents: tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, orthodichlorobenzene, trichlorofluoromethane, and 1,1,2-trichloroethane; all spent solvent mixtures/blends containing, before use, a total of ten (10) percent or more (by volume) of one (1) or more of the above halogenated solvents or those solvents listed in F001, F004, or F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. | (T) | F006 | The following spent nonhalogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten (10) percent or more (by volume) of one (1) or more of the above nonhalogenated solvents, or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (I,T) |
| | | | F007 | Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. (T) |
| | | | F008 | Spent cyanide plating bath solutions from electroplating operations. (R,T) |
| F003 | The following spent nonhalogenated solvents: xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/blends containing, before use, only the above spent nonhalogenated solvents; and all spent solvent | (I)[*] | F009 | Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process. (R,T) |
| | | | F010 | Spent stripping and cleaning bath solutions from electroplating operations where cyanides are used in the process. (R,T) |
| | | | | Quenching bath residues from oil baths from metal heat treating operations where cyanides are used in the process. (R,T) |

ADMINISTRATIVE REGISTER - 1971

| | | | | |
|------|---|-------|------|---|
| F011 | Spent cyanide solutions from salt bath pot cleaning from metal heat treating operations. | (R,T) | | those having carbon chain lengths ranging from one (1) to and including five (5), with varying amounts and positions of chlorine substitution. (This listing does not include wastewaters, wastewater treatment sludges, spent catalysts, and wastes listed in Sections 2 and 3 of this administrative regulation.) |
| F012 | Quenching wastewater treatment sludges from metal heat treating operations where cyanides are used in the process. | (T) | | |
| F019 | Wastewater treatment sludges from the chemical conversion coating of aluminum except from zirconium phosphating in aluminum can washing when such phosphating is an exclusive conversion coating process. | (T) | F025 | Condensed light ends, spent filters and filter aids, and spent desiccant wastes from the production of certain chlorinated aliphatic hydrocarbons, by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one (1) to and including five (5), with varying amounts and positions of chlorine substitution. |
| F020 | Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenol, or of intermediates used to produce their pesticide derivatives. (This listing does not include wastes from the production of Hexachlorophene from highly purified 2,4,5-trichlorophenol.) | (H) | F026 | Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzene under alkaline conditions. |
| F021 | Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of pentachlorophenol or of intermediates used to produce its derivatives. | (H) | F027 | Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing Hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.) |
| F022 | Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzenes under alkaline conditions. | (H) | F028 | Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. F020, F021, F022, F023, F026, and F027. |
| F023 | Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenols. (This listing does not include wastes from equipment used only for the production or use of Hexachlorophene from highly purified 2,4,5-trichlorophenol.) | (H) | F032 | Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that currently use or have previously used chlorophenolic formulations (except potentially cross-contaminated wastes that have had the F032 waste code deleted in accordance with Section 6 of this administrative regulation or potentially cross-contaminated wastes that are otherwise currently regulated as hazardous wastes (For example, F034 or F035), and where the generator does not resume or initiate use of chlorophenolic formulations). This listing does not include |
| F024 | Process wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor clean-out wastes, from the production of certain chlorinated aliphatic hydrocarbons by free radical catalyzed processes. These chlorinated <u>aliphatic</u> hydrocarbons are | (T) | | |

ADMINISTRATIVE REGISTER - 1972

| | | | |
|------|---|-----|---|
| F034 | <p>K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote or pentachlorophenol.</p> <p>Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that use creosote formulations. This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote or pentachlorophenol.</p> | (T) | <p>in <u>dissolved air filtration (DAF)</u> units. Sludges generated in stormwater units that do not receive dry weather flow, sludges generated from noncontact once-through cooling waters segregated for treatment from other process or oily cooling waters, sludges and floats generated in aggressive biological treatment units as defined in subsection (2) of this section (including sludges and floats generated in one (1) or more additional units after wastewaters have been treated in aggressive biological treatment units) and F037, K048, and K051 wastes are not included in this listing.</p> |
| F035 | <p>Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that use inorganic preservatives containing arsenic or chromium. This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote or pentachlorophenol.</p> | (T) | <p>F039 Leachate (liquids that have percolated through land disposal wastes) resulting from the disposal of more than one (1) restricted waste classified as hazardous under this administrative regulation. (Leachate resulting from the disposal of one (1) or more of the following EPA Hazardous Wastes and no other hazardous wastes retains its EPA Hazardous Waste Number: F020, F021, F022, F026, F027, and F028.).</p> |
| F037 | <p>Petroleum refinery primary oil/water/solids separation sludge - Any sludge generated from the gravitational separation of oil/water/solids during the storage or treatment of process wastewaters and oily cooling wastewaters from petroleum refineries. Such sludges include, but are not limited to, those generated in: oil/water/solids separators; tanks and impoundments; ditches and other conveyances; sumps; and stormwater units receiving dry weather flow. Sludge generated in stormwater units that do not receive dry weather flow, sludges generated from noncontact once-through cooling waters segregated for treatment from other process or oily cooling waters, sludges generated in aggressive biological treatment units as defined in subsection (2)(b) of this section (including sludges generated in one (1) or more additional units after wastewaters have been treated in aggressive biological treatment units) and K051 wastes are not included in this listing.</p> | (T) | <p>[*(1, T) shall be used to specify mixtures containing ignitable and toxic constituents.]</p> |
| F038 | <p>Petroleum refinery secondary (emulsified) oil/water/solids separation sludge - Any sludge and float generated from the physical and chemical separation of oil/water/solids in process wastewaters and oily cooling wastewaters from petroleum refineries. Such wastes include, but are not limited to, all sludges and floats generated in: induced air flotation (IAF) units, tanks and impoundments, and all sludges generated</p> | (T) | <p>(2) Listing specific definitions.</p> <p>(a) For the purposes of the F037 and F038 listings, oil/water/solids is defined as oil and water and solids.</p> <p>(b)1. For the purposes of the F037 and F038 listings, aggressive biological treatment units are defined as units which employ one (1) of the following four treatment methods: activated sludge; trickling filter; rotating biological contactor for the continuous accelerated biological oxidation of wastewaters; or high-rate aeration. High-rate aeration is a system of surface impoundments or tanks, in which intense mechanical aeration is used to completely mix the wastes, enhance biological activity; and</p> <p>a. The unit employs a minimum of six (6) <u>horse power [hp]</u> per million gallons of treatment volume, and either:</p> <p>b. The hydraulic retention time of the unit is no longer than five (5) days; or</p> <p>c. The hydraulic retention time is no longer than thirty (30) days and the unit does not generate a sludge that is a hazardous waste by the toxicity characteristic.</p> <p>2. Generators and treatment, storage and disposal facilities have the burden of proving that their sludges are exempt from listing as F037 and F038 wastes under this definition. Generators and treatment, storage and disposal facilities shall maintain, in their operating or other on-site records, documents and data sufficient to prove that:</p> <p>a. The unit is an aggressive biological treatment unit as defined in this subsection; and</p> <p>b. The sludges sought to be exempted from the definitions of F037 or F038 were actually generated in the aggressive biological treatment unit.</p> <p>(c)1. For the purposes of the F037 listing, sludges are considered to be generated at the moment of deposition in the unit, where deposition is defined as at least a temporary cessation of lateral particle movement.</p> <p>2. For the purposes of the F038 listing:</p> <p>a. Sludges are considered to be generated at the moment of deposition in the unit, where deposition is defined as at least a temporary cessation of lateral particle movement; and</p> |

ADMINISTRATIVE REGISTER - 1973

b. Floats are considered to be generated at the moment they are formed in the top of the unit.

Section 3. Hazardous Wastes from Specific Sources. Hazardous wastes from specific sources are:

Industry and EPA

| Hazardous Waste No. | Hazardous Waste | Hazard Code |
|---------------------|-----------------|-------------|
|---------------------|-----------------|-------------|

Wood Preservation:

| | | |
|------|---|-----|
| K001 | Bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote or pentachlorophenol. | (T) |
|------|---|-----|

Inorganic Pigments:

| | | |
|------|--|-----|
| K002 | Wastewater treatment sludge from the production of chrome yellow and orange pigments. | (T) |
| K003 | Wastewater treatment sludge from the production of molybdate orange pigments. | (T) |
| K004 | Wastewater treatment sludge from the production of zinc yellow pigments. | (T) |
| K005 | Wastewater treatment sludge from the production of chrome green pigments. | (T) |
| K006 | Wastewater treatment sludge from the production of chrome oxide green pigments (anhydrous and hydrated). | (T) |
| K007 | Wastewater treatment sludge from the production of iron blue pigments. | (T) |
| K008 | Oven residue from the production of chrome oxide green pigments. | (T) |

Organic Chemicals:

| | | |
|------|---|-------|
| K009 | Distillation bottoms from the production of acetaldehyde from ethylene. | (T) |
| K010 | Distillation side cuts from the production of acetaldehyde from ethylene. | (T) |
| K011 | Bottom stream from the wastewater stripper in the production of acrylonitrile. | (R,T) |
| K013 | Bottom stream from the acetonitrile column in the production of acrylonitrile. | (R,T) |
| K014 | Bottoms from the acetonitrile purification column in the production of acrylonitrile. | (T) |
| K015 | Still bottoms from the distillation of benzyl chloride. | (T) |
| K016 | Heavy ends or distillation residues from the production of carbon tetrachloride. | (T) |
| K017 | Heavy ends (still bottoms) from the purification column in the production of epichlorohydrin. | (T) |
| K018 | Heavy ends from the fractionation column in ethyl chloride production. | (T) |

| | | |
|------|--|--------|
| K019 | Heavy ends from the distillation of ethylene dichloride in ethylene dichloride production. | (T) |
| K020 | Heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production. | (T) |
| K021 | Aqueous spent antimony catalyst waste from fluoromethanes production. | (T) |
| K022 | Distillation bottom tars from the production of phenol/acetone from cumene. | (T) |
| K023 | Distillation light ends from the production of phthalic anhydride from naphthalene. | (T) |
| K024 | Distillation bottoms from the production of phthalic anhydride from naphthalene. | (T) |
| K025 | Distillation bottoms from the production of nitrobenzene by the nitration of benzene. | (T) |
| K026 | Stripping still tails from the production of methylethyl pyridines. | (T) |
| K027 | Centrifuge and distillation residues from toluene diisocyanate production. | (R, T) |
| K028 | Spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane. | (T) |
| K029 | Waste from the product steam stripper in the production of 1,1,1-trichloroethane. | (T) |
| K030 | Column bottoms or heavy ends from the combined production of trichloroethylene and perchloroethylene. | (T) |
| K083 | Distillation bottoms from aniline production. | (T) |
| K085 | Distillation or fractionation column bottoms from the production of chlorobenzenes. | (T) |
| K093 | Distillation light ends from the production of phthalic anhydride from orthoxylene. | (T) |
| K094 | Distillation bottoms from the production of phthalic anhydride from ortho-xylene. | (T) |
| K095 | Distillation bottoms from the production of 1,1,1-trichloroethane. | (T) |
| K096 | Heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane. | (T) |
| K103 | Process residues from aniline extraction from the production of aniline. | (T) |
| K104 | Combined wastewater streams generated from nitrobenzene/aniline production. | (T) |
| K105 | Separated aqueous stream from the reactor product washing step in the production of chlorobenzenes. | (T) |
| K107 | Column bottoms from product separation from the production of 1,1-dimethyl-hydrazine (UDMH) from carboxylic acid hydrazines. | (C, T) |
| K108 | Condensed column overheads from product separation and condensed reactor vent gases from the | (I, T) |

ADMINISTRATIVE REGISTER - 1974

| | | | | | |
|------|---|-------|------|--|-------|
| | production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides. | | | <u>excluding neutralization and biological sludges, generated during the treatment of wastewaters from the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups.</u> | |
| K109 | Spent filter cartridges from product purification from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides. | (T) | | | |
| K110 | Condensed column overheads from intermediate separation from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides. | (T) | K156 | Organic waste (including heavy ends, still bottoms, light ends, spent solvents, filtrates, and decantates) from the production of carbamates and carbamoyl oximes. | (T) |
| K111 | Product wash waters from the production of dinitrotoluene via nitration of toluene. | (C,T) | K157 | Wastewaters (including scrubber waters, condenser waters, washwater, and separation waters) from the production of carbamates and carbamoyl oximes. | (T) |
| K112 | Reaction by-product water from the drying column in the production of toluenediamine via hydrogenation of dinitrotoluene. | (T) | K158 | Bag house dusts and filter/separation solids from the production of carbamates and carbamoyl oximes. | (T) |
| K113 | Condensed liquid light ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene. | (T) | K159 | Organics from the treatment of thiocarbamate wastes. | (T) |
| K114 | Vicinals from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene. | (T) | K160 | Solids (including filter wastes, separation solids, and spent catalysts) from the production of thiocarbamates and solids from the treatment of thiocarbamate wastes. | (T) |
| K115 | Heavy ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene. | (T) | K161 | Purification solids (including filtration, evaporation, and centrifugation solids), bag house dust and floor sweepings from the production of dithiocarbamate acids and their salts. | (R,T) |
| K116 | Organic condensate from the solvent recovery column in the production of toluene diisocyanate via phosgenation of toluenediamine. | (T) | | Inorganic Chemicals: | |
| K117 | Wastewater from the reactor vent gas scrubber in the production of ethylene dibromide via bromination of ethene. | (T) | K071 | Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used. | (T) |
| K118 | Spent adsorbent solids from purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene. | (T) | K073 | Chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using graphite anodes in chlorine production. | (T) |
| K136 | Still bottoms from the purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene. | (T) | K106 | Wastewater treatment sludge from the mercury cell process in chlorine production. | (T) |
| K149 | <u>Distillation bottoms from the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups, (This waste does not include still bottoms from the distillation of benzyl chloride).</u> | (T) | | Pesticides: | |
| K150 | <u>Organic residuals, excluding spent carbon adsorbent, from the spent chlorine gas and hydrochloric acid recovery processes associated with the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixture of these functional groups.</u> | (T) | K031 | By-product salts generated in the production of MSMA and cacodylic acid. | (T) |
| K151 | <u>Wastewater treatment sludges,</u> | (T) | K032 | Wastewater treatment sludge from the production of chlordane. | (T) |
| | | | K033 | Wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane. | (T) |
| | | | K034 | Filter solids from the filtration of hexachlorocyclopentadiene in the production of chlordane. | (T) |
| | | | K035 | Wastewater treatment sludges generated in the production of creosote. | (T) |
| | | | K036 | Still bottoms from toluene reclamation distillation in the production of disulfoton. | (T) |
| | | | K037 | Wastewater treatment sludges from | (T) |

~~K151 Wastewater treatment sludges, (T) excluding neutralization and biological sludges, generated during the treatment of wastewaters from the production of alpha-(or-methyl)-chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups.]~~

Section 4. Discarded Commercial Chemical Products, Off-specification Species, Container Residues, and Spill Residues Thereof. The following materials or items are hazardous wastes if and when they are discarded or intended to be discarded as described in Section 2(1)(b)1 of 401 KAR 31:010; when they are mixed with waste oil or used oil or other material and applied to the land for dust suppression or road treatment; when they are otherwise applied to the land in lieu of their original intended use or when they are contained in products that are applied to the land in lieu of their original intended use; when in lieu of their original intended use; they are produced for use as (or as a component of) a fuel, distributed for use as a fuel, or burned as a fuel:

(1) Any commercial chemical product or manufacturing chemical intermediate having the generic name listed in subsection (5) or (6) of this section.

(2) Any off-specification commercial chemical product or manufacturing chemical intermediate which, if it met specifications, would have the generic name listed in subsection (5) or (6) of this section.

(3) Any residue remaining in a container or in an inner liner removed from a container that has held any commercial chemical product or manufacturing chemical intermediate having the generic name listed in subsection (5) or (6) of this section, unless the container is empty as defined in Section 7(2) of 401 KAR 31:010.

(4) Any residue or contaminated soil, water, or other debris resulting from the cleanup of a spill into or on any land or water of any commercial chemical product or manufacturing chemical intermediate having the generic name listed in subsection (5) or (6) of this section, or any residue or contaminated soil, water, or other debris resulting from the cleanup of a spill into or on any land or water of any off-specification chemical **product and manufacturing chemical** intermediate which, if it met specification, would have the generic name listed in subsection (5) or (6) of this section.

(5) The commercial chemical products, manufacturing chemical intermediates or off-specification commercial chemical products or **manufacturing chemical intermediates** referred to in subsections (1) to (4) of this section, are identified as acute hazardous wastes (H) and are subject to the conditionally exempt small [limited] quantity generator exclusion in Section 5 of 401 KAR 31:010.

(NOTE: The primary hazardous properties of these materials have been indicated by the letters T (Toxicity), and R (Reactivity). Absence of a letter indicates that the compound is only listed for acute toxicity.) These wastes and their corresponding EPA Hazardous Waste Numbers are:

*CAS number given for parent compound only

(6) The commercial chemical products, manufacturing chemical intermediates, or off-specification commercial chemical products referred to in subsections (1) to (4) of this section, are identified as toxic wastes (T), unless otherwise designated, and are subject to the conditionally exempt small [limited] quantity generator exclusion in Section 5[(1), (6), and (7)] of 401 KAR 31:010.

(NOTE: The primary hazardous properties of these materials have been indicated by the letters T (Toxicity), R (Reactivity), I (Ignitability) and C (Corrosivity). Absence of a letter indicates that the compound is only listed for toxicity.) These wastes and their corresponding EPA Hazardous Waste Numbers are:

Section 5. Nerve and Blister Agents. The following substances are listed as hazardous wastes:

| Kentucky Waste Number | Substance | Chemical Abstracts Number |
|-----------------------|---|---------------------------|
| N001 | GB (isopropyl methyl phosphonofluoridate) (H) | 107-44-8 |
| N002 | VX (O-ethyl-S-(2-diisopropyl-aminoethyl)-methyl phosphonothiolate) (ri) | 50782-69-9 |
| N003 | H (bis(2-chloroethyl) sulfide) and related compounds (H) | 505-60-2 |

Section 6. Deletion of Certain Hazardous Waste Codes Following Equipment Cleaning and Replacement. (1) Wastes from wood preserving processes at plants that do not resume or initiate use of chlorophenolic preservatives shall not meet the listing definition of F032 once the generator has met all of the requirements of subsections (2) and (3) of this section. These wastes may, however, continue to meet another hazardous waste listing description or may exhibit one (1) or more of the hazardous waste characteristics.

(2) Generators shall either clean or replace all process equipment that may have come into contact with chlorophenolic formulations or constituents thereof, including, but not limited to, treatment cylinders, sumps, tanks, piping systems, drip pads, fork lifts, and trams, in a manner that minimizes or eliminates the escape of hazardous waste or constituents, leachate, contaminated drippage, or hazardous waste decomposition products to the ground water, surface water, or atmosphere.

(a) Generators shall do one (1) of the following:

1. Prepare and follow an equipment cleaning plan and clean equipment in accordance with this section;
2. Prepare and follow an equipment replacement plan and replace equipment in accordance with this section; or
3. Document cleaning and replacement in accordance with this section, carried out after termination of use of chlorophenolic

preservations.

(b) Cleaning requirements.

1. Generators shall prepare and sign a written equipment cleaning plan that describes:

- a. The equipment to be cleaned;
- b. How the equipment will be cleaned;
- c. The solvent to be used in cleaning;
- d. How solvent rinses will be tested; and
- e. How cleaning residues will be disposed.

2. Equipment shall be cleaned as follows:

- a. Remove all visible residues from process equipment;
- b. Rinse process equipment with an appropriate solvent until dioxins and dibenzofurans are not detected in the final solvent rinse.

3. Analytical requirements.

[a-] Rinses shall be tested in accordance with SW-846, Method 8290, incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010.

[b- "Not detected" means at or below the lower method calibration limit (MCL) in Method 8290, Table 1-]

4. The generator shall manage all residues from the cleaning process as F032 waste.

(c) Replacement requirements.

1. Generators shall prepare and sign a written equipment replacement plan that describes:

- a. The equipment to be replaced;
- b. How the equipment will be replaced; and
- c. How the equipment will be disposed.

2. The generator shall manage the discarded equipment as F032 waste.

(d) Documentation requirements. Generators shall document that previous equipment cleaning or replacement was performed in accordance with this section and occurred after cessation of use of chlorophenolic preservatives.

(3) The generator shall maintain the following records documenting the cleaning and replacement as part of the facility's operating record:

- (a) The name and address of the facility;
- (b) Formulations previously used and the date on which their use ceased in each process at the plant;
- (c) Formulations currently used in each process at the plant;
- (d) The equipment cleaning or replacement plan;
- (e) The name and address of any persons who conducted the cleaning and replacement;
- (f) The dates on which cleaning and replacement were accomplished;
- (g) The dates of sampling and testing;
- (h) A description of the sample handling and preparation techniques, including techniques used for extraction, containerization, preservation, and chain-of-custody of the samples;
- (i) A description of the tests performed, the date the tests were performed, and the results of the tests;
- (j) The name and model numbers of the instrument(s) used in performing the tests;
- (k) QA/QC documentation; and
- (l) The following statement signed by the generator or his authorized representative:

I certify under penalty of law that all process equipment required to be cleaned or replaced under Section 6 of 401 KAR 31:040 was cleaned or replaced as represented in the equipment cleaning and replacement plan and accompanying documentation. I am aware that there are significant penalties for providing false information, including the possibility of fine or imprisonment.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Manage-

ment, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221.

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This proposed amendments affect owners and operators of hazardous waste facilities dealing with organic chemicals, and coking.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: There will be no additional costs in adopting these amendments. However, the cabinet will have increased workloads in order to process all new entities that will be regulated by the amendments of this regulation. The only savings will be from any EPA grants received by having this amendment meeting their standards.

2. Continuing costs or savings: No additional costs or savings will occur after all new entities are processed.

3. Additional factors increasing or decreasing costs: None

b. Reporting and paperwork requirements: The amendments made will require no new paperwork or reporting burden.

4. Assessment of anticipated effect on state and local revenues: There will be no effect on state or local revenue from the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: Partial funding from EPA grants are anticipated to pay increased costs due to increased work in the implementation of and enforcement of these standards.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: No alternative changes were considered. These amendments were changed to meet federal standards.

8. Assessment of expected benefits of the administrative regulation: Kentucky industries will receive indirect savings from the adoption of these amendments.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The effects on public health and environmental welfare will improve with the adoption and implementation of these amendments.

b. State whether a detrimental effect on the environment and public health would result if not implemented: There are no detrimental effects.

c. If detrimental effect would result, explain detrimental effect: There are no detrimental effects.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, administrative regulations, or policies that conflict with, overlap, or duplicate the proposed amendment.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: There are no additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Yes, tiering was used based on the amount of chemicals generated, consistent with federal standards, to reflect the need to protect human health and the environment.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes that include the identification of hazardous wastes. These changes are necessary to maintain consistency between the state and federal programs. A variety of additions and a few exclusions have been made to clarify the hazardous waste list. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that is the owner or operator of any hazardous waste facility that deals with organic chemicals or coking.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies that own or operate hazardous waste facilities that deal with organic chemicals or coking will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to

compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 31:060. Rulemaking petitions for hazardous waste.

RELATES TO: KRS 224.10, 224.40, 224.43, 224.46, 224.50, 224.99, 40 CFR 260 Subpart C

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-510(3)

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-510(3) and to establish the procedures to add a testing or analytical method to 401 KAR Chapters 31, 34, or 35 or to exclude a waste at a particular site or facility from Section 3 of 401 KAR 31:010 or the lists of hazardous wastes in 401 KAR 31:040. This administrative regulation is equivalent to federal standards established in 40 CFR Part 260.20 through 260.23 except for: Section 1(2)(e) of this administrative regulation, which requires persons requesting to delist a hazardous waste to submit a fee as provided in KRS 224.46-014; Section 3 of this administrative regulation, which was added to clarify that delisted waste is subject to solid waste requirements; Section 4 of this administrative regulation, which was added to allow the cabinet to repeal a delisting if it is found that the submitted information was erroneous or fraudulent; and Section 5 of this administrative regulation, which was added to clarify requirements for delisting approval.

Section 1. General Procedures. (1) Any person may petition the cabinet to modify or revoke any provision in 401 KAR Chapters 30 through 38, and 43. This administrative regulation sets forth requirements for petitions to add a testing or analytical method to 401 KAR Chapters 31, 34, or 35 ~~[30 through 37]~~ ~~[31, 34, or 35]~~ or to exclude a waste or waste-derived material at a particular facility from Section 3 of 401 KAR 31:010 or the lists of hazardous wastes in 401 KAR 31:040. Section 7 of this administrative regulation sets forth additional requirements for petitions to amend 401 KAR Chapter 43 to include additional hazardous wastes or categories of hazardous wastes as a universal waste.

(2) Each petition shall be submitted to the cabinet by certified mail and shall include:

- (a) The petitioner's name and address;
- (b) A statement of the petitioner's interest in the proposed action;
- (c) A description of the proposed action, including (where appropriate) suggested regulatory language;
- (d) A statement of the need and justification for the proposed action, including any supporting tests, studies, or other information; and

(e) A check payable to the Kentucky State Treasurer in the amount required by 401 KAR Chapter 39.

(3) The cabinet shall make a tentative decision to grant or deny a petition. If the tentative decision is to deny, the cabinet shall notify the petitioner. If the tentative decision is to grant the petition, the cabinet shall propose an amendment to 401 KAR 31:070, and file the proposed amendment with the Legislative Research Commission pursuant to KRS Chapter 13A.

Section 2. Petitions to Amend 401 KAR Chapter 31 to Exclude a Waste Produced at a Particular Facility. (1) Any person seeking to exclude a waste at a particular generating facility from the lists in 401

KAR 31:040 may petition for an amendment to the administrative regulation under this section and Section 1 of this administrative regulation. To be successful:

(a) The petitioner shall demonstrate to the satisfaction of the cabinet that the waste produced by a particular generating facility does not meet any of the criteria under which the waste was listed as a hazardous waste or an acutely hazardous waste; and

(b) Based on a complete application the cabinet shall determine, where it has a reasonable basis to believe that factors (including additional constituents) other than those for which the waste was listed will cause the waste to be a hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste. A waste which is so excluded, however, still may be a hazardous waste by operation of 401 KAR 31:030.

(2) The procedures in this section and Section 1 of this administrative regulation may also be used to petition the cabinet for a regulatory amendment to exclude from Section 3(1)(b)2 or (3) of 401 KAR 31:010, a waste which is described in these subsections and is either a waste listed in 401 KAR 31:040, or is derived from a waste listed in 401 KAR 31:040. This exclusion may only be issued for a particular generating, storage, treatment, or disposal facility. The petitioner shall make the same demonstration as required by subsection (1) of this section. Where the waste is a mixture of solid waste and one (1) or more listed hazardous wastes or is derived from one (1) or more hazardous wastes, his demonstration shall be made with respect to the waste mixture as a whole; analysis shall be conducted for not only those constituents of the listed waste(s) contained within the mixture but also for factors (including additional constituents) that could cause the waste mixture to be a hazardous waste. A waste which is so excluded may still be a hazardous waste in accordance with 401 KAR 31:030.

(3) If the waste is listed with codes "I," "C," "R," or "E" in 401 KAR 31:040:

(a) The petitioner shall show that the waste does not exhibit the relevant characteristic for which the waste was listed as defined in Sections 2, 3, 4, or 5 of 401 KAR 31:030 using any applicable methods prescribed therein. The petitioner also shall show that the waste does not exhibit any of the other characteristics defined in Sections 2, 3, 4, or 5 of 401 KAR 31:030 using any applicable methods prescribed therein; and

(b) Based on a complete application, the cabinet shall determine, where it has a reasonable basis to believe that factors (including additional constituents) other than those for which the waste was listed shall cause the waste to be hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste. A waste which is so excluded, however, still may be a hazardous waste by operation of 401 KAR 31:030.

(4) If the waste is listed with code "T" in 401 KAR 31:040:

(a) The petitioner shall demonstrate that the waste:

1. Does not contain the constituent or constituents (as defined in 401 KAR 31:160) that caused the cabinet to list the waste, using the appropriate test methods prescribed in 401 KAR 31:120; or

2. Although containing one (1) or more of the hazardous constituents (as defined in 401 KAR 31:160) that caused the cabinet to list the waste, does not meet the criterion of 40 CFR 261.11(a)(3), ~~[(4999)]~~ when considering the factors used by the cabinet in 40 CFR 261.11(a)(3)(i) to (xi), ~~[(4999)]~~ under which the waste was listed as hazardous; and

(b) Based on a complete application, the cabinet shall determine, where it has a reasonable basis to believe that factors (including additional constituents) other than those for which the waste was listed could cause the waste to be a hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste; and

(c) The petitioner shall demonstrate that the waste does not exhibit any of the characteristics defined in Sections 2, 3, 4 and 5 of 401 KAR 31:030 using any applicable methods prescribed therein;

(d) A waste which is so excluded, however, still may be a

hazardous waste by operation of 401 KAR 31:030.

(5) If the waste is listed with the code "H" in 401 KAR 31:040:

(a) The petitioner shall demonstrate that the waste does not meet criterion of subsection (1)(b) of 401 KAR 31:020; and

(b) Based on a complete application, the cabinet shall determine, where it has a reasonable basis to believe that additional factors (including additional constituents) other than those for which the waste was listed will cause the waste to be a hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste; and

(c) The petitioner shall demonstrate that the waste does not exhibit any of the characteristics defined in Sections 2, 3, 4, and 5 of 401 KAR 31:030 using any applicable methods prescribed therein;

(d) A waste which is so excluded, however, still may be a hazardous waste by operation of 401 KAR 31:030.

(6) Demonstration samples shall consist of enough representative samples, but in no case less than four (4) samples, taken over a period of time sufficient to represent the variability or the uniformity of the waste.

(7) Each petition shall include, in addition to the information required by Section 1(2) of this administrative regulation:

(a) The name and address of the laboratory facility performing the sampling or tests of the waste;

(b) The names and qualifications of the persons sampling and testing the waste;

(c) The dates of sampling and testing;

(d) The location of the generating facility;

(e) A description of the manufacturing processes or other operations and feed materials producing the waste and an assessment of whether such processes, operations, or feed materials can or might produce a waste that is not covered by the demonstration;

(f) A description of the waste and an estimate of the average and maximum monthly and annual quantities of waste covered by the demonstration;

(g) Pertinent data on and discussion of the factors delineated in the respective criterion for listing a hazardous waste, where the demonstration is based on the factors in Section 2(1)(c) of 401 KAR 31:020;

(h) A description of the methodologies and equipment used to obtain the representative samples;

(i) A description of the sample handling and preparation techniques, including techniques used for extraction, containerization and preservation of the samples;

(j) A description of the tests performed (including results);

(k) The names and model numbers of the instruments used in performing the tests; and

(l) The following statement signed by the generator of the waste or his authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(8) After receiving a petition for an exclusion, the cabinet may request any additional information which the cabinet may reasonably require to evaluate the petition.

(9) An exclusion shall only apply to the waste generated at the individual facility covered by the demonstration and shall not apply to waste from any other facility.

(10) The cabinet may exclude only the part of the waste for which the demonstration is submitted where the cabinet has reason to believe that variability of the waste justifies a partial exclusion.

Section 3. Requirements for Excluded Wastes. Upon approval by the cabinet of a petition to exclude waste from a particular facility, the

excluded waste shall thereby be listed as a solid waste and be subject to the requirements for solid waste disposal in 401 KAR Chapter 47 and the conditions as specified in the approved exclusion.

Section 4. Repeal or Modification of an Exclusion. The cabinet shall repeal or modify an exclusion granted to any generator or petitioner for a waste or to any generator or petitioner for an equivalent testing or analytical method whenever:

(1) The cabinet has obtained information, which was not available at the time the petition for exclusion was granted, which leads the cabinet to believe that reasonable probability exists that the waste:

(a) Was erroneously excluded from administrative regulation in accordance with Section 2 of this administrative regulation;

(b) Shall be regulated as a hazardous waste because it contains a hazardous constituent which was listed as a hazardous waste subsequent to approval of a petition to delist the waste at a particular facility; or

(c) Shall be regulated as a hazardous waste because new studies or analysis have been performed which indicate the waste meets the definition of a hazardous waste in KRS 224.01-010.

(2) The cabinet has obtained information, which was not available at the time the petition for an equivalent testing or analytical method was granted, which leaves the cabinet to believe that reasonable probability exists that the equivalent testing or analytical method was erroneously approved in accordance with Section 6 of this administrative regulation.

(3) The cabinet has obtained information that a petition for an exclusion or an equivalent testing or analytical method was incomplete, inaccurate, or based on erroneous data or calculations.

(4) The cabinet has obtained information from any other agency of state or federal government, including the EPA, that the waste shall be regulated as a hazardous waste consistent with the Resource Conservation and Recovery Act (PL 94-580), as amended (including PL 98-616, the 1984 Hazardous and Solid Waste Amendments), and pursuant to KRS Chapter 224.

(5) The cabinet has obtained information from any other agency of a state or the federal government, including the EPA, that the testing or analytical method is not equal to or superior to the corresponding method prescribed in 401 KAR Chapter 31, 34, 35, or 37 in terms of its sensitivity, accuracy, and precision.

Section 5. Requirements for Approval. In accordance with Section 3 of 401 KAR 30:020, the cabinet shall not approve a petition to exclude a waste at a particular facility unless:

(1) Exclusion of the waste is consistent with the requirements in KRS 224.46-510(3);

(2) Petitioning fees have been paid in accordance with 401 KAR 39:020; and

(3) All the requirements of this administrative regulation are satisfied.

Section 6. Petitions for Equivalent Testing or Analytical Methods.

(1) Any person seeking to add a testing or analytical method to 401 KAR Chapter 31, 34, 35, or 37 may petition for a regulatory amendment under this section and Section 1 of this administrative regulation. To be successful, the person shall demonstrate to the satisfaction of the cabinet that the proposed method is equal to or superior to the corresponding method prescribed in 401 KAR Chapter 31, 34, 35, or 37 in terms of its sensitivity, accuracy, and precision (reproducibility).

(2) Each petition shall include, in addition to the information required by Section 1(2) of this administrative regulation:

(a) A full description of the proposed method, including all procedural steps and equipment used in the method;

(b) A description of the types of wastes or waste matrices for which the proposed method may be used;

(c) Comparative results obtained from using the proposed method

with those obtained from using the relevant or corresponding methods prescribed in 401 KAR Chapter 31, 34, 35, or 37;

(d) An assessment of any factors which may interfere with, or limit the use of, the proposed method; and

(e) A description of the quality control procedures necessary to ensure the sensitivity, accuracy, and precision of the proposed method.

(3) After receiving a petition for an equivalent method, the cabinet may request any additional information on the proposed method which is reasonably required to evaluate the method.

(4) If the cabinet amends the hazardous waste administrative regulations to permit use of a new testing method, the method shall be referenced in Section 3 of 401 KAR 30:010.

Section 7. Petitions to Amend 401 KAR Chapter 43 to Include Additional Hazardous Wastes. (1) Any person seeking to add a hazardous waste or a category of hazardous waste to the universal waste regulations of 401 KAR Chapter 43 shall petition for a regulatory amendment under Section 1 of this administrative regulation and 401 KAR 43:070.

(2)(a) The petitioner shall demonstrate to the satisfaction of the cabinet that regulation under the universal waste regulations of 401 KAR Chapter 43:

1. Is appropriate for the waste or category of waste;

2. Will improve management practices for the waste or category of waste; and

3. Will improve implementation of the hazardous waste program.

(b) The petition shall include the information required by Section 1(2) of this administrative regulation.

(c) The petition shall also address as many of the factors listed in Section 2 of 401 KAR 43:070 as are appropriate for the waste or category of waste addressed in the petition.

(3) The cabinet shall grant or deny the petition using the factors listed in Section 2 of 401 KAR 43:070. The decision shall be based on the weight of evidence showing that regulation under 401 KAR Chapter 43 is appropriate for the waste or category of waste, will improve management practices for the waste or category of waste, and will improve implementation of the hazardous waste program.

(4) The cabinet may request additional information needed to evaluate the merits of the petition.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221.

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This proposed amendment affects generators of hazardous waste that wish to include additional waste as universal waste.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

ADMINISTRATIVE REGISTER - 1989

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The combined effect of adopting the federal standards will result in an increased workload on existing staff. Partial funding via EPA is anticipated to cover extra costs associated with the extra workload.

2. Continuing costs or savings: Until the processing is complete for all entities, there will be an increased workload for those in the agency.

3. Additional factors increasing or decreasing costs: There are no additional factors increasing or decreasing costs, because the changes are consistent with federal standards.

b. Reporting and paperwork requirements: There will be more paperwork, since additional petitions may be submitted requesting the cabinet to include additional hazardous waste as a universal waste.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: Partial funding from EPA grants are anticipated to help in the enforcement and implementation of these standards.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: No alternatives were considered. These changed are consistent with federal standards.

8. Assessment of expected benefits of the administrative regulation: There will be some benefits for Kentucky industries because they will receive indirect savings with the adoption of these amendments.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The effects on public health and the environment will improve with the adoption and implementation of these amendments.

b. State whether a detrimental effect on the environment and public health would result if not implemented: If not implemented, the environment and public health would not be threatened. c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict with, overlap, or duplicate the proposed amendment.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Yes, tiering was used. This administrative regulation allows an entity to request that a hazardous waste be considered as a universal waste, which is subject to fewer requirements.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air

pollution.

2. State compliance standards: The proposed amendments adopt changes that include standards for hazardous waste facilities that are to be included as universal waste. These changes are necessary to maintain consistency between the state and federal programs. Additions have been made which clarify the applicability of technical standards to hazardous waste facilities. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that generates hazardous waste that wishes to include additional waste as universal waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies affected by this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 32:005. Definitions related to 401 KAR Chapter 32.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10
STATUTORY AUTHORITY: KRS 224.10-100

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-510 and establishes the general provisions applicable to generators of hazardous waste. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative

regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 32 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfill and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste

resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a) 1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the

combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; or ~~and~~

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action require-

ments under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure ~~and postclosure~~ cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~"Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~

(59) "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

(59) ~~(60)~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

(60) ~~(61)~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) ~~(62)~~ "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) ~~(63)~~ "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) ~~(64)~~ "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) ~~(65)~~ "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) ~~(66)~~ "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) **"Disposal" shall have the meaning specified in KRS 224.01-010.**

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ~~"Disposal" shall have the meaning specified in KRS 224.01-010.~~

(69) ~~(70)~~ "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) ~~(70)~~ "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) ~~(71)~~ "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) ~~(72)~~ "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) ~~(73)~~ "Draft permit" shall have the same meaning as "proposed permit".

(73) ~~(74)~~ "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) ~~(75)~~ "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) ~~(76)~~ "Elementary neutralization unit" means a device which:
(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) ~~(77)~~ "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by 401 KAR 34:275. [this administrative regulation.]

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:
1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (for example [e-g-], one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

(113) ~~"Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

~~[(114)] "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.~~

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(118)] "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~[(119)] "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit for use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impound-

ment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) ~~[(122)]~~ "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

~~[(123)] "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]~~

(125) ~~[(124)]~~ "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) ~~[(125)]~~ "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) ~~[(126)]~~ "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) ~~[(127)]~~ "In existence" shall have the same meaning as "existing."

(129) ~~[(128)]~~ "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) ~~[(129)]~~ "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) ~~[(130)]~~ "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) ~~[(131)]~~ "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) ~~[(132)]~~ "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) ~~[(133)]~~ "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient

pressure.

(135) [(134)] "In vapor service" shall have the same meaning as "in gas service".

(136) [(135)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(136)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(137)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(138)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(139)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(140)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(141)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

- (a) Cement kilns;
- (b) Lime kilns;
- (c) Aggregate kilns;
- (d) Phosphate kilns;
- (e) Coke ovens;
- (f) Blast furnaces;

(g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

(h) Titanium dioxide chloride process oxidation reactors;

(i) Methane reforming furnaces;

(j) Pulp liquor recovery furnaces;

(k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or

(m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(142)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(143)] "Injection well" means a well into which fluids are

injected to achieve subsurface emplacement.

(145) [(144)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(145)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(146)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(147)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(148)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

[(150) "IUC well" means a underground injection control well as provided in 40 CFR Part 144.]

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

[(158) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.]

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats,

calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) **"Manifest" shall have the meaning specified in KRS 224.01-010.**

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170) "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is

stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) **"Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.**

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) **"New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.**

(180) "New tank component" shall have the same meaning as "new tank system."

(181) ~~[(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

ADMINISTRATIVE REGISTER - 1997

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for hazardous [solid] waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 [40 CFR Part 264].

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

- (219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.
- (220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.
- (221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.
- (222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.
- (223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.
- (224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.
- (225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.
- (226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).
- (227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.
- (228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.
- (229) "Recovered material" shall have the meaning specified in KRS 224.01-010.
- (230) "Recyclable materials" means hazardous wastes that are recycled.
- (231) "Recycled" means a material that is used, reused, or reclaimed.
- (232) "Recycling" shall have the meaning specified in KRS 224.01-010.
- (233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.
- (234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.
- (235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.
- (236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.
- (237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.
- (238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.
- (239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.
- (240) "Resource recovery" means the recovery of material or energy from waste.
- (241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.
- (242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.
- (243) "Saturated zone" shall have the same meaning as "zone of saturation".
- (244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.
- (245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.
- (246) "Secretary" shall have the meaning specified in KRS 224.01-010.
- (247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.
- (248) "Separator tank" means a device used for separation of two immiscible liquids.
- (249) "Sewage system" shall have the meaning specified in KRS 224.01-010.
- (250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.
- (251) **"Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.**
- (252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.
- ~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~
- (253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.
- (254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.
- (255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which

solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

(266) ~~[(265)]~~ "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-010.]~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) **"Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").**

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means:

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;

2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;
4. The efficiency of a treatment process for a specific waste or wastes; or
5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

(289) [(288)] "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

[(289)] "Treatment" shall have the meaning specified in KRS 224.01-010.]

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) [(292)] "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) [(293)] "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) [(294)] "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) [(295)] "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

- (a) Batteries as described in Section 2 of 401 KAR 43:010;
- (b) Pesticides as described in Section 3 of 401 KAR 43:010;
- (c) Thermostats as described in Section 4 of 401 KAR 43:010;

and

(d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) [(296)] "Universal waste handler":

(a) Means:

1. A generator of universal waste; or
2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a

foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update I, November 15, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

[(314)] "Waste" shall have the meaning specified in KRS 224.01-010.]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel

without containers or labels.

[(318)] "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(319)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(321)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

| Am. | Amended |
|-----------------|---|
| C | Corrosive waste |
| CAA | Clean Air Act, as amended |
| CFR | Code of Federal Regulations |
| cm | Centimeter |
| cm ² | Centimeter squared |
| CO | Carbon monoxide |
| CO ₂ | Carbon dioxide |
| CWA | Clean Water Act, as amended |

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives that would achieve compliance with KRS 13A.222.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated and managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 32. These terms are assimilated from existing federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 32, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

**NATURAL RESOURCES AND
ENVIRONMENTAL PROTECTION CABINET**
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)

401 KAR 33:005. Definitions related to 401 KAR Chapter 33.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10
STATUTORY AUTHORITY: KRS 224.10-100

NECESSITY, FUNCTION, AND CONFORMITY: KRS 224.46-510 requires the cabinet to promulgate administrative regulations establishing standards applicable to transporters of hazardous waste regarding recordkeeping and compliance with a manifest system. The chapter establishes standards for transporters of hazardous waste. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 33 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding

surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfill and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters

30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the

preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; ~~or~~ **and**

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste

is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure [and postclosure] cost estimates" means the

most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~

(59) "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

(59) ~~(60)~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

(60) ~~(61)~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) ~~(62)~~ "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) ~~(63)~~ "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) ~~(64)~~ "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) ~~(65)~~ "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) ~~(66)~~ "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS

224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ~~["Disposal"] shall have the meaning specified in KRS 224.01-010.~~

~~(69)~~ "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

~~(69)~~ ~~[(70)]~~ "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

~~(70)~~ ~~[(71)]~~ "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

~~(71)~~ ~~[(72)]~~ "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

~~(72)~~ ~~[(73)]~~ "Draft permit" shall have the same meaning as "proposed permit".

~~(73)~~ ~~[(74)]~~ "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

~~(74)~~ ~~[(75)]~~ "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

~~(75)~~ ~~[(76)]~~ "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

~~(76)~~ ~~[(77)]~~ "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

~~(77)~~ ~~[(78)]~~ "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

~~(78)~~ ~~[(79)]~~ "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

~~(79)~~ ~~[(80)]~~ "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

~~(80)~~ ~~[(81)]~~ "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

~~(81)~~ ~~[(82)]~~ "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

~~(82)~~ ~~[(83)]~~ "Ephemeral stream" means a stream which flows only

in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

~~(83)~~ ~~[(84)]~~ "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by **401 KAR 34:275**. ~~[this administrative regulation.]~~

~~(84)~~ ~~[(85)]~~ "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

~~(85)~~ ~~[(86)]~~ "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

~~(86)~~ ~~[(87)]~~ "Existing component" shall have the same meaning as "existing tank system."

~~(87)~~ ~~[(88)]~~ "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

~~(88)~~ ~~[(89)]~~ "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

~~(89)~~ ~~[(90)]~~ "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

~~(90)~~ ~~[(91)]~~ "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

~~(91)~~ ~~[(92)]~~ "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

~~(92)~~ ~~[(93)]~~ "Face amount" means the total amount the insurer is obligated to pay under the policy.

~~(93)~~ ~~[(94)]~~ "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (**for example** ~~[(94)]~~, one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

~~(113) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

~~(114)~~ "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.

~~(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(118) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~(119) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit for use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which

hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) [(+22)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

[(+23)] "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]

(125) [(+24)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) [(+25)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) [(+26)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) [(+27)] "In existence" shall have the same meaning as "existing."

(129) [(+28)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) [(+29)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) [(+30)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) [(+31)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) [(+32)] "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) [(+33)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(135) [(+34)] "In vapor service" shall have the same meaning as "in gas service".

(136) [(+35)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(+36)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(+37)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(+38)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials,

or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(+39)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(+40)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(+41)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

(a) Cement kilns;

(b) Lime kilns;

(c) Aggregate kilns;

(d) Phosphate kilns;

(e) Coke ovens;

(f) Blast furnaces;

(g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

(h) Titanium dioxide chloride process oxidation reactors;

(i) Methane reforming furnaces;

(j) Pulp liquor recovery furnaces;

(k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or

(m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(+42)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(+43)] "Injection well" means a well into which fluids are injected to achieve subsurface emplacement.

(145) [(+44)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(+45)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(+46)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(+47)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(+48)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

[(160)] "IUC well" means a underground injection control well as provided in 40 CFR Part 144.

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

[(159)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.]

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the

terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) "Manifest" shall have the meaning specified in KRS 224.01-010.

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

[(170)] "Manifest" shall have the meaning specified in KRS 224.01-010.]

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

[(175)] "Monitoring" means the act of systematically inspecting and

collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) **"New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.**

~~(180)~~ "New tank component" shall have the same meaning as "new tank system."

~~(181) [(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility

or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) **"Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.**

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCa section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCa section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for hazardous [solid] waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 [40 CFR Part 261].

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation

level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial

measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) **"Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.**

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

(266) ~~[(265)]~~ "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-010.]~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) **"Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of**

thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means:

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;

4. The efficiency of a treatment process for a specific waste or wastes; or

5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to

transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

~~(289) [(288)]~~ "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-010.]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) ~~[(292)]~~ "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) ~~[(293)]~~ "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) ~~[(294)]~~ "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) ~~[(295)]~~ "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

- (a) Batteries as described in Section 2 of 401 KAR 43:010;
- (b) Pesticides as described in Section 3 of 401 KAR 43:010;
- (c) Thermostats as described in Section 4 of 401 KAR 43:010;

and

- (d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) ~~[(296)]~~ "Universal waste handler":

(a) Means:

1. A generator of universal waste; or
2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) ~~[(297)]~~ "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) ~~[(298)]~~ "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) ~~[(299)]~~ "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) ~~[(300)]~~ "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower

aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(304)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applica-

ble standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update I, November 16, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

[(314)] "Waste" shall have the meaning specified in KRS 224.01-010.]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

[(318)] "Water" or "Waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(318)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(319)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(320)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(321)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(322)] "Zone of saturation" means that part of the earth's

ADMINISTRATIVE REGISTER - 2015

crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

| | |
|-----------------|---|
| Am. | Amended |
| C | Corrosive waste |
| CAA | Clean Air Act, as amended |

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: No requirements have been imposed to affect costs and savings.

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives.

8. Assessment of expected benefits of the administrative

regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that are hazardous waste transporters.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 33. These terms are assimilated from existing federal and state regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be

determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 33, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 34:005. Definitions related to 401 KAR Chapter 34.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10, 264.141, 264.1031, 264.1051, 264.1081

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: This chapter establishes standards for new hazardous waste sites or facilities, as required by KRS 224.46-520 and 224.46-530. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 34 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same

type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfarm and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO

concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a) 1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

- (31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.
- (32) "Certificate" shall have the meaning specified in KRS 224.46-810.
- (33) "Certification" means a statement of professional opinion based upon knowledge and belief.
- (34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.
- (35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.
- (36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.
- (37) "Closure" shall have the meaning specified in KRS 224.01-010.
- (38) "Component" means either the tank or ancillary equipment of a tank system.
- (39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.
- (40) "Conditionally exempt small quantity generator" means:
- (a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; or ~~and~~
 - (b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.
- (41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.
- (42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.
- (43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.
- (44) "Constituent" shall have the same meaning as "hazardous waste constituent."
- (45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.
- (46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.
- (47) "Contaminate" means introduce a substance that would cause:
- (a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;
 - (b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or
- (c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.
- (48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.
- (49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.
- (50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.
- (51) "Control device shutdown" means the cessation of operation of a control device for any purpose.
- (52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.
- (53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.
- (54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.
- (55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.
- (56) "Current closure ~~and postclosure~~ cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.
- (57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.
- (58) ~~["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~
- ~~(59)~~ "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).
- ~~(59)~~ ~~[(60)]~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.
- ~~(60)~~ ~~[(61)]~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However,

the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) [(62)] "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) [(63)] "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) [(64)] "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) [(65)] "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) [(66)] "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ["Disposal" shall have the meaning specified in KRS 224.01-010.]

(69) "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) [(70)] "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) [(71)] "Domestic sewage" means untreated sanitary wastes

that pass through a sewer system.

(71) [(72)] "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) [(73)] "Draft permit" shall have the same meaning as "proposed permit".

(73) [(74)] "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) [(75)] "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) [(76)] "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) [(77)] "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by **401 KAR 34:275, [this administrative regulation.]**

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (**for example** [e.g.], one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

(113) [~~"Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~]

(114) "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

(118) [~~"Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational~~]

procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(119) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit for use tank system.]

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) [(422)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

[(123) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]

(125) [(424)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) [(425)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) [(426)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) [(427)] "In existence" shall have the same meaning as "existing."

(129) [(428)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) [(429)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) [(430)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) [(431)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) [(432)] "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) [(433)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(135) [(434)] "In vapor service" shall have the same meaning as "in gas service".

(136) [(435)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(436)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(437)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(438)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(439)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(440)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(441)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

(a) Cement kilns;

(b) Lime kilns;

(c) Aggregate kilns;

- (d) Phosphate kilns;
 - (e) Coke ovens;
 - (f) Blast furnaces;
 - (g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);
 - (h) Titanium dioxide chloride process oxidation reactors;
 - (i) Methane reforming furnaces;
 - (j) Pulping liquor recovery furnaces;
 - (k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;
 - (l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or
 - (m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.
- (143) [(142)] "Infrared incinerator"** means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.
- (144) [(143)] "Injection well"** means a well into which fluids are injected to achieve subsurface emplacement.
- (145) [(144)] "Inner liner"** means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.
- (146) [(145)] "Installation inspector"** means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.
- (147) [(146)] "Interim status"** means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.
- (148) [(147)] "Intermittent stream"** means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.
- (149) [(148)] "International shipment"** means the transportation of hazardous waste into or out of the jurisdiction of the United States.
- (150) [(149)] "Internal floating roof"** means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.
- [(150)] "IUC well" means a underground injection control well as provided in 40 CFR Part 144.]**
- (151) "Karst terrain"** means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.
- (152) "Key personnel"** shall have the meaning specified in KRS 224.01-010.
- (153) "Lab pack"** means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.
- (154) "Lamp"** means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic

spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

[(158)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.]

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or

facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) **"Manifest" shall have the meaning specified in KRS 224.01-010.**

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170) "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) **"Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.**

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) **"New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.**

(180) "New tank component" shall have the same meaning as "new tank system."

(181) ~~[(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management

unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for hazardous [solid] waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 [40 CFR Part 261].

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land

used in connection with the waste facility or activity.

(251) **"Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.**

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

~~[(265) "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed, or stored elsewhere.]~~

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-010.]~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial

business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the

requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means :

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;
4. The efficiency of a treatment process for a specific waste or wastes; or
5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

(289) ~~[(289)]~~ "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-010.]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

~~[(292)]~~ (293) "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally

below the surface of and covered by the ground.

(294) [(293)] "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) [(294)] "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) [(295)] "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

- (a) Batteries as described in Section 2 of 401 KAR 43:010;
- (b) Pesticides as described in Section 3 of 401 KAR 43:010;
- (c) Thermostats as described in Section 4 of 401 KAR 43:010;

and

- (d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) [(296)] "Universal waste handler":

(a) Means:

- 1. A generator of universal waste; or
- 2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

- 1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or
- 2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

- (a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

- (b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment,

device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update 1, November 16, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

[(314)] "Waste" shall have the meaning specified in KRS 224.01-040-]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the

ADMINISTRATIVE REGISTER - 2028

following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

[(319) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(318)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(321)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

ADMINISTRATIVE REGISTER - 2029

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in this chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: No requirements have been imposed to affect costs and savings.

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated and managed and type of manage-

ment activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 34. These terms are assimilated from existing federal state and regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 34, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 34:060. Groundwater protection.

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 224.50, 224.70, 224.99

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520

NECESSITY, FUNCTION, AND CONFORMITY: KRS 224.46-520 requires that persons engaging in the storage, treatment, and disposal of hazardous waste obtain a permit. KRS 224.46-520 requires the cabinet to establish standards for these permits, to establish minimum standards for closure for all facilities and the post-closure monitoring and maintenance of hazardous waste disposal facilities. This chapter establishes minimum standards for hazardous waste sites or facilities. This administrative regulation establishes the minimum groundwater protection standards for new hazardous waste sites or facilities. This administrative regulation is equivalent to federal standards established in 40 CFR 264 Subpart F except for: language that has been added to clarify federal intent; Section 5 of this administrative regulation, which references MCLs found in 401 KAR Chapter 8 to provide consistency with federal policy and other Kentucky environmental programs; Section 8(3) of this administrative regulation, which establishes a minimum two inch monitoring well requirement appropriate for Kentucky's unique environment; and Sections 8(11) and 13 of this administrative regulation, which provide for and establish forms to provide monitoring information for Kentucky's groundwater database.

Section 1. Applicability. (1)(a) Except as provided in subsection (2) of this section, the requirement in this administrative regulation apply to owners and operators of facilities that treat, store, or dispose of hazardous waste. The owner or operator shall satisfy the requirements of paragraph (b) of this subsection for all wastes (or constituents thereof) contained in solid waste management units at the facility regardless of the time at which waste was placed in such units.

(b) All solid waste management units shall comply with the requirements in Section 12 of this administrative regulation. A surface impoundment, waste pile, land treatment unit or landfill that receives hazardous waste after July 26, 1982 (hereinafter referred to as a "regulated unit") shall comply with the requirements of Sections 2 through 11 of this administrative regulation in lieu of Section 12 of this administrative regulation for purposes of detecting, characterizing and responding to releases to the uppermost aquifer. The financial responsibility requirements of Section 12 of this administrative regulation apply to regulated units.

(2) The owner or operator's regulated unit or units are not subject to administrative regulation for releases into the uppermost aquifer under this administrative regulation if:

(a) The owner or operator is exempted under Section 1 of 401 KAR 34:010; or

(b) He operates a unit which the cabinet finds:

1. Is an engineered structure;
2. Does not receive or contain liquid waste or wastes containing free liquids;
3. Is designed and operated to exclude liquid, precipitation, and other run-on and run-off;
4. Has both inner and outer layers of containment enclosing the waste;
5. Has a leak detection system built into each containment layer;
6. The owner or operator shall provide continuing operation and maintenance of these leak detection systems during the active life of the unit and the closure and postclosure care periods; and
7. To a reasonable degree of certainty, shall not allow hazardous constituents to migrate beyond the outer containment layer prior to the end of the postclosure care period.

(c) The cabinet finds pursuant to 401 KAR 34:220, Section 8(4) that the treatment zone of a land treatment unit that qualifies as a regulated unit does not contain levels of hazardous constituents that are above background levels of those constituents by an amount that is statistically significant, and if an unsaturated zone monitoring program meeting the requirements of 401 KAR 34:220, Section 6, has not shown a statistically significant increase in hazardous constituents below the treatment zone during the operating life of the unit. An

exemption under this subsection can only relieve an owner or operator of responsibility to meet the requirements of this administrative regulation during the postclosure care period; [or]

(d) The cabinet finds that there is no potential for migration of liquid from a regulated unit to the uppermost aquifer during the active life of the regulated unit (including the closure period) and the postclosure care period specified under 401 KAR 34:070, Section 8. This demonstration shall be certified by a qualified geologist or geotechnical engineer. In order to provide an adequate margin of safety in the prediction of potential migration of liquid, the owner or operator shall base any predictions made under this paragraph on assumptions that maximize the rate of liquid migration; or

(e) He designs and operates a pile in compliance with 401 KAR 34:210, Section 1(3).

(3) This administrative regulation applies during the active life of the regulated unit (including the closure period). After closure of the regulated unit, this administrative regulation:

(a) Does not apply if all waste, waste residues, contaminated containment system components, and contaminated subsoils are removed or decontaminated at closure;

(b) Applies during the postclosure care period under Section 8 of 401 KAR 34:070 if the owner or operator is conducting a detection monitoring program under Section 9 of this administrative regulation; or

(c) Applies during the compliance period under Section 7 of this administrative regulation if the owner or operator is conducting a compliance monitoring program under Section 10 of this administrative regulation or a corrective action program under Section 11 of this administrative regulation.

(4) This administrative regulation may apply to miscellaneous units when necessary to comply with Sections 2 through 4 of 401 KAR 34:250.

Section 2. Required Programs. (1) Owners and operators subject to this administrative regulation shall conduct a monitoring and response program as follows:

(a) Whenever hazardous constituents under Section 4 of this administrative regulation from a regulated unit are detected at the compliance point under Section 6 of this administrative regulation, the owner or operator shall institute a compliance monitoring program under Section 10 of this administrative regulation. Detected means statistically significant evidence of contamination as described in Section 9(6) of this administrative regulation;

(b) Whenever the groundwater protection standard under Section 3 of this administrative regulation is exceeded, the owner or operator shall institute a corrective action program under Section 11 of this administrative regulation. Exceeded means statistically significant evidence of increased contamination as described in Section 10(4) of this administrative regulation;

(c) Whenever hazardous constituents under Section 4 of this administrative regulation from a regulated unit exceed concentration limits under Section 5 of this administrative regulation in groundwater between the compliance point under Section 6 of this administrative regulation and the downgradient facility property boundary, the owner or operator shall institute a corrective action program under Section 11 of this administrative regulation; or

(d) In all other cases, the owner or operator shall institute a detection monitoring program under Section 9 of this administrative regulation.

(2) The cabinet shall specify in the facility permit the specific elements of the monitoring and response program. The cabinet may include one (1) or more of the programs identified in subsection (1) of this section in the facility permit as may be necessary to protect human health and the environment and shall specify the circumstances under which each of the programs shall be required. In deciding whether to require the owner or operator to be prepared to institute a particular program, the cabinet shall consider the potential adverse

effects on human health and the environment that might occur before final administrative action on a permit modification application to incorporate such a program shall be taken.

Section 3. Groundwater Protection Standard. The owner or operator shall comply with conditions specified in the facility permit that are designed to ensure the hazardous constituents under Section 4 of this administrative regulation detected in the groundwater from a regulated unit do not exceed the concentration limits under Section 5 of this administrative regulation in the uppermost aquifer underlying the waste management area beyond the point of compliance under Section 6 of this administrative regulation during the compliance period under Section 7 of this administrative regulation. The cabinet shall establish this groundwater protection standard in the facility permit when hazardous constituents have been detected in the groundwater.

Section 4. Hazardous Constituents. (1) The cabinet shall specify in the facility permit the hazardous constituents to which the groundwater protection standard of Section 3 of this administrative regulation applies. Hazardous constituents are constituents identified in 401 KAR 31:170 that have been detected in groundwater in the uppermost aquifer underlying a regulated unit and that are reasonably expected to be in or derived from waste contained in a regulated unit, unless the cabinet has excluded them under subsection (2) of this section.

(2) The cabinet shall exclude a 401 KAR 31:170 constituent from the list of hazardous constituents specified in the facility permit if it [he] finds that the constituent is not capable of posing a substantial present or potential hazard to human health or the environment. In deciding whether to grant an exemption, the cabinet shall consider the following:

- (a) Potential adverse effects on groundwater quality, considering:
 1. The physical and chemical characteristics of the waste in the regulated unit, including its potential for migration;
 2. The hydrogeological characteristics of the facility and surrounding land;
 3. The quantity of groundwater and the direction of groundwater flow;
 4. The proximity and withdrawal rates of groundwater users;
 5. The current and future uses of groundwater in the area;
 6. The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;
 7. The potential for health risks caused by human exposure to waste constituents;
 8. The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;
 9. The persistence and permanence of the potential adverse effects; and

(b) Potential adverse effects of hydraulically connected surface water quality, considering:

1. The volume and physical and chemical characteristics of the waste in the regulated unit;
2. The hydrogeological characteristics of the facility and surrounding land;
3. The quantity and quality of groundwater, and the direction of groundwater flow;
4. The patterns of rainfall in the region;
5. The proximity of the regulated unit to surface waters;
6. The current and future uses of surface waters in the area and any water quality standards established for those surface waters;
7. The existing quality of surface water, including other sources of contamination and the cumulative impact on surface water quality;
8. The potential for health risks caused by human exposure to waste constituents;
9. The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and
10. The persistence and permanence of the potential adverse

effects.

(3) In making any determination under subsection (2) of this section about the use of groundwater in the area around the facility, the cabinet shall consider any identification of underground sources of drinking water and exempted aquifers made under 40 CFR 144.7 or as designated by the cabinet.

Section 5. Concentration Limits. (1) The cabinet shall specify in the facility permit concentration limits in the groundwater for hazardous constituents established under Section 4 of this administrative regulation. The concentration of a hazardous constituent:

(a) Must not exceed the background level of that constituent in the groundwater at the time that limit is specified in the permit; or

(b) For any of the constituents listed in 401 KAR Chapter 8 [Table 4], shall not exceed the respective **MCL** value listed [given] in 401 KAR Chapter 8 [that Table] if the background level of the constituent is below the **MCL** value given in 401 KAR Chapter 8 and the owner or operator has utilized appropriate sampling methods capable of detecting the constituent values listed in 401 KAR Chapter 8 [Table 4]; or

(c) Shall not exceed an alternate limit established by the cabinet under subsection (2) of this section.

(2) The cabinet shall establish an alternate concentration limit for a hazardous constituent if he finds that the constituent shall not pose a substantial present or potential hazard to human health or the environment as long as the alternate concentration limit is not exceeded. In establishing alternate concentration limits, the cabinet shall consider the following factors:

(a) Potential adverse effects on groundwater quality, considering:

[TABLE 4]

MAXIMUM CONCENTRATION OF CONSTITUENTS FOR GROUNDWATER PROTECTION

| Constituent | Maximum Concentration |
|--|-----------------------|
| Arsenic | 0.05 mg/l |
| Barium | 1.0 mg/l |
| Cadmium | 0.01 mg/l |
| Chromium | 0.05 mg/l |
| Lead | 0.05 mg/l |
| Mercury | 0.002 mg/l |
| Selenium | 0.01 mg/l |
| Silver | 0.05 mg/l |
| Endrin (1,2,3,4,10,10-hexachloro-4,7-epoxy-1,4,4a,5,6,7,8,9a-octahydro-1,4-endo, endo-5,8-dimethanonaphthalene) | 0.0002 mg/l |
| Lindane (1,2,3,4,5,6-hexachloro-cyclohexane, gamma isomer) | 0.004 mg/l |
| Methoxychlor (1,1,1-Trichloro-2,2-bis (p-methoxyphenyl) ethane)) | 0.1 mg/l |
| Toxaphene (C ₁₂ H ₁₀ Cl ₈ , Technical-chlorinated camphene, 67-69 percent chlorine) | 0.005 mg/l |
| 2,4-D (2,4-Dichlorophenoxyacetic acid) | 0.1 mg/l |
| 2,4,5-TP Silvex (2,4,5-Trichlorophenoxypropionic acid) | 0.01 mg/l |

1. The physical and chemical characteristics of the waste in the regulated unit, including its potential for migration;
2. The hydrogeological characteristics of the facility and surrounding land;
3. The quantity of groundwater and the direction of groundwater

flow;

4. The proximity and withdrawal rates of groundwater users;
5. The current and future uses of groundwater in the area;
6. The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;
7. The potential for health risks caused by human exposure to waste constituents;
8. The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;
9. The persistence and permanence of the potential adverse effects; and

(b) Potential adverse effects of hydraulically connected surface water quality, considering:

1. The volume and physical and chemical characteristics of the waste in the regulated unit;
2. The hydrogeological characteristics of the facility and surrounding land;
3. The quantity and quality of groundwater, and the direction of groundwater flow;
4. The patterns of rainfall in the region;
5. The proximity of the regulated unit to surface waters;
6. The current and future uses of surface waters in the area and any water quality standards established for those surface waters;
7. The existing quality of surface water, including other sources of contamination and the cumulative impact on surface water quality;
8. The potential for health risks caused by human exposure to waste constituents;
9. The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and
10. The persistence and permanence of the potential adverse effects.

(3) In making any determination under subsection (2) of this section about the use of groundwater in the area around the facility, the cabinet shall consider any identification of underground sources of drinking water and exempted aquifers made under 40 CFR 144.7 or as designated by the cabinet.

Section 6. Point of Compliance. (1) The cabinet shall specify in the facility permit the point of compliance at which the groundwater protection standard of Section 3 of this administrative regulation applies and at which monitoring shall be conducted. The point of compliance is a vertical surface located at the hydraulically downgradient limit of the waste management area that extends down into the uppermost aquifer underlying the regulated units.

(2) The waste management area is the limit projected in the horizontal plane of the area on which waste shall be placed during the active life of a regulated unit.

(a) The waste management area includes horizontal space taken up by any liner, dike, or other barrier designed to contain waste in a regulated unit.

(b) If the facility contains more than one (1) regulated unit, the waste management area is described by an imaginary line circumscribing the several regulated units.

Section 7. Compliance Period. (1) The cabinet shall specify in the facility permit the compliance period during which the groundwater protection standard of Section 3 of this administrative regulation applies. The compliance period is the number of years equal to the active life of the waste management area (including any waste management activity prior to permitting, and the closure period).

(2) The compliance period begins when the owner or operator initiates a compliance monitoring program meeting the requirements of Section 10 of this administrative regulation.

(3) If the owner or operator is engaged in a corrective action program at the end of the compliance period specified in subsection (1) of this section, the compliance period is extended until the owner or operator can demonstrate that the groundwater protection standard

of Section 3 of this administrative regulation has not been exceeded for a period of three (3) consecutive years.

Section 8. General Groundwater Monitoring Requirements. The owner or operator shall comply with the requirements of this section for any groundwater monitoring program developed to satisfy Section 9, 10 or 11 of this administrative regulation:

(1) The groundwater monitoring system shall consist of a sufficient number of wells, installed at appropriate locations and depths to yield groundwater samples from the uppermost aquifer that:

(a) Represents the quality of back groundwater that has not been affected by leakage from a regulated unit.

1. A determination of background quality may include sampling of wells that are not hydraulically upgradient of the waste management area where:

a. Hydrogeologic conditions do not allow the owner or operator to determine what wells are hydraulically upgradient; and

b. Sampling at other wells shall provide an indication of background groundwater quality that is representative or more representative than that provided by the upgradient wells; and

(b) Represent the quality of groundwater passing the point of compliance; and

(c) Allows for the detection of contamination when hazardous waste or hazardous constituents have migrated from the waste management area to the uppermost aquifer.

(2) If a facility contains more than one (1) regulated unit, separate groundwater monitoring systems are not required for each regulated unit provided that provisions for sampling the groundwater in the uppermost aquifer shall enable detection and measurement at the compliance point of hazardous constituents from the regulated units that have entered the groundwater in the uppermost aquifer.

(3) All monitoring wells shall be cased in a manner that maintains the integrity of the monitoring-well bore hole and shall be at least two (2) inches in diameter. This casing shall be screened or perforated and packed with gravel or sand, where necessary, to enable collection of groundwater samples. The annular space (that is, [i.e.,] the space between the bore hole and well casing) above the sampling depth shall be sealed to prevent contamination of samples and the groundwater.

(4) The groundwater monitoring program shall include consistent sampling and analysis procedures that are designed to ensure monitoring results that provide a reliable indication of groundwater quality below the waste management area. At a minimum the program shall include procedures and techniques for:

(a) Sample collection;

(b) Sample preservation and shipment;

(c) Analytical procedures; and

(d) Chain of custody control.

(5) The groundwater monitoring program shall include sampling and analytical methods that are appropriate for groundwater sampling and that accurately measure hazardous constituents in groundwater samples.

(6) The groundwater monitoring program shall include a determination of the groundwater surface elevation each time groundwater is sampled.

(7) In detection monitoring or where appropriate in compliance monitoring, data on each hazardous constituent specified in the permit shall be collected from background wells and wells at the compliance points. The number and kinds of samples collected to establish background shall be appropriate for the form of statistical test employed, following generally accepted statistical principles. The sample size shall be as large as necessary to ensure with reasonable confidence that a contaminant release to groundwater from a facility shall be detected. The owner or operator shall determine an appropriate sampling procedure and interval for each hazardous constituent listed in the facility permit which shall be specified in the unit permit upon approval by the cabinet. This sampling procedure shall be:

(a) A sequence of at least four (4) samples, taken at an interval that assures, to the greatest extent technically feasible, that an independent sample is obtained, by reference to the uppermost aquifer's effective porosity, hydraulic conductivity, and hydraulic gradient, and the fate and transport characteristics of the potential contaminants; or

(b) An alternate sampling procedure proposed by the owner or operator and approved by the cabinet.

(8) The owner or operator shall specify one (1) of the statistical methods listed in paragraphs (a) through (e) of this subsection to be used in evaluating groundwater monitoring data for each hazardous constituent. The statistical method which the owner or operator specifies, if approved by the cabinet, shall be included in the unit permit. The statistical test chosen shall be conducted separately for each hazardous constituent in each well. Where practical quantification limits (PQL's) are used in any of the following statistical procedures to comply with subsection (9)(e) of this section, the PQL [pql] shall be proposed by the owner or operator and approved by the cabinet. Use of any of the following statistical methods shall be protective of human health and the environment and shall comply with the performance standards outlined in subsection (9) of this section. The statistical methods which an owner or operator may specify are:

(a) A parametric analysis of variance (ANOVA) followed by multiple comparisons procedures to identify statistically significant evidence of contamination. The method shall include estimation and testing of the contrasts between each compliance well's mean and the background mean levels for each constituent.

(b) An analysis of variance (ANOVA) based on ranks followed by multiple comparisons procedures to identify statistically significant evidence of contamination. The method shall include estimation and testing of the contrasts between each compliance well's median and the background median levels for each constituent.

(c) A tolerance or prediction interval procedure in which an interval for each constituent is established from the distribution of the background data, and the level of each constituent in each compliance well is compared to the upper tolerance or [et] prediction limit.

(d) A control chart approach that gives control limits for each constituent.

(e) Another statistical test method submitted by the owner or operator and approved by the cabinet.

(9) Any statistical method chosen under subsection (8) of this section for specification in the unit permit shall comply with the following performance standards, as appropriate:

(a) The statistical method used to evaluate groundwater monitoring data shall be appropriate for the distribution of chemical parameters or hazardous constituents. If the distribution of the chemical parameters or hazardous constituents is shown by the owner or operator to be inappropriate for a normal theory test, then the data shall be transformed or a distribution-free theory test shall be used. If the distributions for the constituents differ, more than one (1) statistical method may be needed.

(b) If an individual well comparison procedure is used to compare an individual compliance well constituent concentration with background constituent concentrations or a groundwater protection standard, the test shall be done at a Type I error level no less than 0.01 for each testing period. If a multiple comparisons procedure is used, the Type I error rate for each testing period shall be no less than 0.05; however, the Type I error of no less than 0.01 for individual well comparisons shall be maintained. This performance standard does not apply to tolerance intervals, prediction intervals, or control charts.

(c) If a control chart approach is used to evaluate groundwater monitoring data, the specific type of control chart and its associated parameter values shall be proposed by the owner or operator and shall be approved by the cabinet if it is protective of human health and the environment.

(d) If a tolerance interval or a prediction interval is used to

evaluate groundwater monitoring data, the levels of confidence and, for tolerance intervals, the percentage of the population that the interval shall contain, shall be proposed by the owner or operator and shall be approved by the cabinet if it finds these parameters to be protective of human health and the environment. These parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of concentration values for each constituent of concern.

(e) The statistical method shall account for data below the limit of detection with one (1) or more statistical procedures that are protective of human health and the environment. Any practical qualification limit (PQL [pql]) approved by the cabinet under subsection (8) of this section that is used in the statistical method shall be the lowest concentration level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operation conditions that are available to the facility.

(f) If necessary, the statistical method shall include procedures to control or correct for seasonal and spatial variability as well as temporal correlation in the data.

(10) Groundwater monitoring data collected in accordance with subsection (7) of this section, including actual levels of constituents, shall be maintained in the facility operating record. The cabinet shall specify in the permit when the data shall be submitted for review.

(11) The groundwater monitoring data may be submitted on Groundwater Sample Analysis form, DEP Form 8046 (August 1995), and Hazardous Waste Groundwater Report form, DEP Form 8046A (March 1996). These forms are incorporated by reference in Section 13 of this administrative regulation. The owner or operator may use their own document, provided the language is identical to that specified in DEP Form 8046 and DEP Form 8046A.

Section 9. Detection Monitoring Program. An owner or operator required to establish a detection monitoring program under this administrative regulation shall, at a minimum, discharge the following responsibilities:

(1) The owner or operator shall monitor for indicator parameters (for example, [e-g-] specific conductance, total organic carbon, or total organic halogen), waste constituents, or reaction products that provide a reliable indication of the presence of hazardous constituents in groundwater. The cabinet shall specify the parameters or constituents to be monitored in the facility permit, after considering the following factors:

(a) The types, quantities, and concentrations of constituents in wastes managed at the regulated unit;

(b) The mobility, stability, and persistence of waste constituents or their reaction products in the saturated and unsaturated zone beneath the waste management area;

(c) The detectability of indicator parameters, waste constituents, and reaction products in groundwater; and

(d) The concentrations or values and coefficients of variation of proposed monitoring parameters or constituents in the background groundwater quality.

(2) The owner or operator shall install a groundwater monitoring system at the compliance point as specified under Section 6 of this regulation. The groundwater monitoring system shall comply with Section 8(1)(b), (2) and (3) of this administrative regulation.

(3) The owner or operator shall conduct a groundwater monitoring program for each chemical parameter and hazardous constituent specified in the permit pursuant to subsection (1) of this section in accordance with Section 8(7) of this administrative regulation. The owner or operator shall maintain a record of groundwater analytical data as measured and in a form necessary for the determination of statistical significance under Section 8(8) of this administrative regulation.

(4) The cabinet shall specify the frequencies for collecting samples and conducting statistical tests to determine whether there is statistically significant evidence of contamination for any parameter

or hazardous constituent specified in the permit under subsection (1) of this section in accordance with Section 8(7) of this administrative regulation. A sequence of at least four (4) samples from each well (background and compliance wells) shall be collected at least semiannually during detection monitoring.

(5) The owner or operator shall determine the groundwater flow rate and direction in the uppermost aquifer as specified in the permit. This determination shall be made at least annually.

(6) The owner or operator shall determine whether there is statistically significant evidence of contamination for any chemical parameter of hazardous constituent specified in the permit pursuant to subsection (1) of this section at a frequency specified under subsection (4) of this section.

(a) In determining whether statistically significant evidence of contamination exists, the owner or operator shall use the method specified in the permit under Section 8(8) of this administrative regulation. These methods shall compare data collected at the compliance point to the background groundwater quality data.

(b) The owner or operator shall determine whether there is statistically significant evidence of contamination at each monitoring well at the compliance point within a reasonable period of time after completion of sampling. The cabinet shall specify in the facility permit what period of time is reasonable, after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of groundwater samples.

(7) If the owner or operator determines pursuant to subsection (6) of this section that there is statistically significant evidence of contamination for chemical parameters or hazardous constituents specified pursuant to subsection (1) of this section at any monitoring well at the compliance point, he or she shall:

(a) Notify the cabinet of this finding in writing within seven (7) days. The notification shall indicate what chemical parameters or hazardous constituents have shown statistically significant evidence of contamination;

(b) Immediately sample the groundwater in all monitoring wells and determine whether constituents in the list of 401 KAR 34:360 are present, and if so, in what concentration;

(c) For any 401 KAR 34:360 compounds found in the analysis pursuant to subsection (7)(b) of this section, the owner or operator may resample within one (1) month and repeat the analysis for those compounds detected. If the results of the second analysis confirm the initial results, then these constituents shall form the basis for compliance monitoring. If the owner or operator does not resample for the compounds found pursuant to subsection (7)(b) of this section, the hazardous constituents found during this initial 401 KAR 34:360 analysis shall form the basis for compliance monitoring;

(d) Within ninety (90) days, submit to the cabinet an application for a permit modification to establish a compliance monitoring program meeting the requirements of Section 10 of this administrative regulation. The application shall include the following information:

1. An identification of the concentration of any 401 KAR 34:360 constituent detected in the groundwater at each monitoring well at the compliance point;

2. Any proposed changes to the groundwater monitoring system at the facility necessary to meet the requirements of Section 10 of this administrative regulation;

3. Any proposed additions or changes to the monitoring frequency, sampling and analysis procedures or methods, or statistical methods used at the facility necessary to meet the requirements of Section 10 of this administrative regulation;

4. For each hazardous constituent detected at the compliance point, a proposed concentration limit under Section 5(1)(a) or (b) of this administrative regulation, or a notice of intent to seek an alternate concentration limit under Section 5(2) of this administrative regulation; and

(e) Within 180 days, submit to the cabinet:

1. All data necessary to justify an alternate concentration limit

sought under Section 5(2) of this administrative regulation; and

2. An engineering feasibility plan for a corrective action program necessary to meet the requirement of Section 11 of this administrative regulation, unless:

a. All hazardous constituents identified under subsection (7)(b) of this section are listed in 401 KAR Chapter 8 [Table 1 of Section 5 of this administrative regulation] and their concentrations do not exceed the respective values given in that chapter [table]; or

b. The owner or operator has sought an alternative concentration limit under Section 5(2) of this administrative regulation for every hazardous constituent identified under subsection 7(b) of this section.

(f) If the owner or operator determines, pursuant to subsection (6) of this section, that there is a statistically significant difference for chemical parameters or hazardous constituents specified pursuant to subsection (1) of this section at any monitoring well at the compliance point, he or she may demonstrate that a source other than a regulated unit caused the contamination or that the detection is an artifact caused by an error in sampling, analysis, or statistical evaluation or natural variation in the groundwater. The owner or operator may make a demonstration under this subsection in addition to, or in lieu of, submitting a permit modification application under subsection (7)(d) of this section; however, the owner or operator is not relieved of this requirement to submit a permit modification application within the time specified in subsection (7)(d) of this section unless the demonstration made under this subsection successfully shows that a source other than a regulated unit caused the increase, or that the increase resulted from error in sampling, analysis, or evaluation. In making a demonstration under this paragraph, the owner or operator shall:

1. Notify the cabinet in writing within seven (7) days of determining statistically significant evidence of contamination at the compliance point that he intends to make a demonstration under this subsection;

2. Within ninety (90) days, submit a report to the cabinet which demonstrates that a source other than a regulated unit caused the contamination or that the contamination resulted from error in sampling, analysis, or evaluation;

3. Within ninety (90) days, submit to the cabinet an application for a permit modification to make any appropriate changes to the detection monitoring program facility; and

4. Continue to monitor in accordance with the detection monitoring program established under this section.

(8) If the owner or operator determines that the detection monitoring program no longer satisfies the requirements of this section, he shall, within ninety (90) days, submit an application for a permit modification to make any appropriate changes to the program.

Section 10. Compliance Monitoring Program. An owner or operator required to establish a compliance monitoring program under this administrative regulation shall, at a minimum, discharge the following responsibilities:

(1) The owner or operator shall monitor the groundwater to determine whether all regulated units are in compliance with the groundwater protection standard under Section 3 of this administrative regulation. The cabinet shall specify the groundwater protection standard in the facility permit, including:

(a) A list of the hazardous constituents identified under Section 4 of this administrative regulation;

(b) Concentration limits under Section 5 of this administrative regulation for each of those hazardous constituents;

(c) The compliance point under Section 6 of this administrative regulation; and

(d) The compliance period under Section 7 of this administrative regulation.

(2) The owner or operator shall install a groundwater monitoring system at the compliance point as specified under Section 6 of this administrative regulation. The groundwater monitoring system shall

comply with Section 8(1)(b), (2) and (3) of this administrative regulation.

(3) The cabinet shall specify the sampling procedures and statistical methods appropriate for the constituents and the facility, consistent with Section 8(7) and (8) of this administrative regulation.

(a) The owner or operator shall conduct a sampling program for each chemical parameter or hazardous constituent in accordance with Section 8(7) of this administrative regulation.

(b) The owner or operator shall record groundwater analytical data as measured and in form necessary for the determination of statistical significance under Section 8(8) of this administrative regulation for the compliance period of the facility.

(4) The owner or operator shall determine whether there is statistically significant evidence of increased contamination for any chemical parameter or hazardous constituent specified in the permit, pursuant to subsection (1) of this section, at a frequency specified under subsection (6) of this section.

(a) In determining whether statistically significant evidence of increased contamination exists, the owner or operator shall use the method(s) specified in the permit under Section 8(8) of this administrative regulation. The method(s) shall compare data collected at the compliance point(s) to a concentration limit developed in accordance with Section 5 of 401 KAR 34:060.

(b) The owner or operator shall determine whether there is statistically significant evidence of increased contamination at each monitoring well at the compliance point within a reasonable time period after completion of sampling. The cabinet shall specify that time period in the facility permit, after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of groundwater samples.

(5) The owner or operator shall determine the groundwater flow rate and direction in the uppermost aquifer as specified in the permit and which shall be no less frequently than at least annually.

(6) The cabinet shall specify the frequencies for collecting samples and conducting statistical tests to determine statistically significant evidence of increased contamination in accordance with Section 8(7) of this administrative regulation. A sequence of at least four (4) samples from each well (background and compliance wells) shall be collected at least semiannually during the compliance period of the facility.

(7) The owner or operator shall analyze samples from all monitoring wells at the compliance point for all constituents contained in 401 KAR 34:360 at least annually to determine whether additional hazardous constituents are present in the uppermost aquifer and, if so, at what concentration, pursuant to procedures in Section 9(6) of this administrative regulation. If the owner or operator finds 401 KAR 34:360 constituents in the groundwater that are not already identified in the permit as monitoring constituents, the owner or operator may resample within one (1) month and repeat the 401 KAR 34:360 analysis. If the second analysis confirms the presence of new constituents, the owner or operator shall report the concentration of these additional constituents to the cabinet within seven (7) days after the completion of the second analysis and add them to the monitoring list. If the owner or operator chooses not to resample, then he or she shall report the concentrations of these additional constituents to the cabinet within seven (7) days after completion of the initial analysis and shall add them to the monitoring list.

(8) If the owner or operator determines, pursuant to subsection (4) of this section, that any concentration limits under Section 5 of this administrative regulation are being exceeded at any monitoring well at the point of compliance, he or she shall:

(a) Notify the cabinet of this finding in writing within seven (7) days. The notification shall indicate what concentration limits have been exceeded.

(b) Submit to the cabinet an application for a permit modification to establish a corrective action program meeting the requirements of Section 11 of this administrative regulation within 180 days, or within

ninety (90) days if an engineering feasibility study has been previously submitted to the cabinet under Section 9(8)(e) of this administrative regulation. The application shall at a minimum include the following information:

1. A detailed description of corrective actions that shall achieve compliance with the groundwater protection standard specified in the permit under subsection (1) of this section; and

2. A plan for a groundwater monitoring program that shall demonstrate the effectiveness of the corrective action. Such a groundwater monitoring program may be based on a compliance monitoring program developed to meet the requirements of this section.

(9) If the owner or operator determines, pursuant to subsection (4) of this section, that the groundwater concentration limits under this section are being exceeded at any monitoring well at the point of compliance, he or she may demonstrate that a source other than a regulated unit caused the contamination or that the detection is an artifact caused by an error in sampling, analysis or statistical evaluation or natural variation in the groundwater. In making a demonstration under this subsection, the owner or operator shall:

(a) Notify the cabinet in writing within seven (7) days that he intends to make a demonstration under this subsection;

(b) If appropriate, within ninety (90) days, submit a report to the cabinet which demonstrates that a source other than a regulated unit caused the standard to be exceeded or that the apparent noncompliance with the standards resulted from error in sampling, analysis, or evaluation;

(c) Within ninety (90) days, submit to the cabinet an application for a permit modification to make any appropriate changes to the compliance monitoring program at the facility; and

(d) Continue to monitor in accordance with the compliance monitoring program established under this section.

(10) If the owner or operator determines that the compliance monitoring program no longer satisfies the requirements of this section, he shall, within ninety (90) days, submit an application for a permit modification to make any appropriate changes to the program.

Section 11. Corrective Action Program. An owner or operator required to establish a corrective action program under this administrative regulation shall, at a minimum, discharge the following responsibilities:

(1) The owner or operator shall take corrective action to ensure that regulated units are in compliance with the groundwater protection standard under Section 3 of this administrative regulation. The cabinet shall specify the groundwater protection standard in the facility permit, including:

(a) A list of the hazardous constituents identified under Section 4 of this administrative regulation;

(b) Concentration limits under Section 5 of this administrative regulation for each of those hazardous constituents;

(c) The compliance point under Section 6 of this administrative regulation; and

(d) The compliance period under Section 7 of this administrative regulation.

(2) The owner or operator shall implement a corrective action program that prevents hazardous constituents from exceeding their respective concentration limits at the compliance point by removing the hazardous waste constituents or treating them in place. The permit shall specify the specific measures that shall be taken.

(3) The owner or operator shall begin corrective action within a reasonable time period after the groundwater protection standard is exceeded. The cabinet shall specify that time period in the facility permit. If a facility permit includes a corrective action program in addition to a compliance monitoring program, the permit shall specify when the corrective action shall begin and such a requirement shall operate in lieu of Section 10(9)(b) of this administrative regulation.

(4) In conjunction with a corrective action program, the owner or

operator shall establish and implement a groundwater monitoring program to demonstrate the effectiveness of the corrective action program. Such a monitoring program may be based on the requirements for a compliance monitoring program under Section 10 of this administrative regulation and shall be as effective as that program in determining compliance with the groundwater protection standard under Section 3 of this administrative regulation and in determining the success of a corrective action program under subsection (5) of this section, where appropriate.

(5) In addition to the other requirements of this section, the owner or operator shall conduct a corrective action program to remove or treat in place any hazardous constituents under Section 4 of this administrative regulation that exceed concentration limits under Section 5 of this administrative regulation in groundwater:

(a) Between the compliance point under Section 6 of this administrative regulation and the downgradient property boundary; and

(b) Beyond the facility boundary, where necessary to protect [preject] human health and the environment, unless the owner or operator demonstrates to the satisfaction of the cabinet that, despite the owner's or operator's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such action. The owner or operator is not relieved of all responsibility to clean up a release that has migrated beyond the facility boundary where off-site access is denied. On-site measures to address such releases shall be determined on a case-by-case basis.

(c) Corrective action measures under this subsection shall be initiated and completed within a reasonable period of time as specified by the cabinet considering the extent of contamination.

(d) Corrective action measures under this subsection may be terminated upon approval of the cabinet once the concentration of hazardous constituents under Section 4 of this administrative regulation is reduced to levels below their respective concentration limits under Section 5 of this administrative regulation.

(6) The owner or operator shall continue corrective action measures during the compliance period to the extent necessary to ensure that the groundwater protection standard is not exceeded. If the owner or operator is conducting corrective action at the end of the compliance period, he shall continue that corrective action for as long as necessary to achieve compliance with the groundwater protection standard. The owner or operator may terminate corrective action measures taken beyond the period equal to the active life of the waste management area (including the closure period) if he can demonstrate to the satisfaction of the cabinet based on data from the groundwater monitoring program under subsection (4) of this section, that the groundwater protection standard of Section 3 of this administrative regulation has not been exceeded for a period of three (3) consecutive years.

(7) The owner or operator shall report in writing to the cabinet on the effectiveness of the corrective action program. The owner or operator shall submit these reports at least semiannually on a schedule determined by the cabinet.

(8) If the owner or operator determines that the corrective action program no longer satisfies the requirements of this section, he shall, within ninety (90) days, submit an application for a permit modification to make any appropriate changes to the program.

Section 12. Corrective Action for Solid Waste Management Units.

(1) The owner or operator of a facility or any person seeking a permit or any person closing a facility for the treatment, storage or disposal of hazardous waste shall institute corrective action as necessary to protect human health and the environment for all releases of hazardous waste or constituents from any solid waste management unit at the facility, regardless of the time at which waste was placed in such unit.

(2) Corrective action shall be specified in the permit in accordance with this section and 401 KAR 34:287. The permit shall contain

schedules of compliance for such corrective action (where such corrective action cannot be completed prior to issuance of the permit or closure of the facility) and assurances of financial responsibility for completing such corrective action.

(3) The owner or operator shall implement corrective actions beyond the facility property boundary, where necessary to protect human health and the environment, unless the owner or operator demonstrates to the satisfaction of the cabinet that, despite the owner's or operator's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such actions. The owner or operator is not relieved of all responsibility to clean up a release that has migrated beyond the facility boundary where off-site access is denied. On-site measures to address such releases shall be determined on a case-by-case basis. Assurances of financial responsibility for such corrective action shall be provided. These financial responsibility assurances shall be approved by the cabinet.

Section 13. Incorporation by Reference. (1) The following documents are hereby incorporated by reference:

(a) Groundwater Sample Analysis form, DEP Form 8046 (August 1995); and

(b) Hazardous Waste Groundwater Report form, DEP Form 8046A (March 1996).

(2) The documents referenced in subsection (1) of this section are available for inspection and copying, subject to copyright law, at the Hazardous Waste Branch, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-6716, from 8 a.m. to 4:30 p.m., eastern time, Monday through Friday, excluding state holidays.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of all hazardous waste facilities.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First Year: The agency will have extra costs due to the increased workloads of existing staff in order to process the newly regulated entities.

2. Continuing costs or savings: Not applicable.

3. Additional factors increasing or decreasing costs: There are no additional costs.

b. Reporting and paperwork requirements: There are no additional

paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are anticipated to pay for the implementation and enforcement of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no alternatives to consider. These changes are consistent with federal standards.

8. Assessment of expected benefits of the administrative regulation: The expected benefit is consistency with federal requirements.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the Cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes applicable to hazardous waste storage, treatment, and disposal facilities. The changes are necessary to maintain consistency between state and federal programs. Additions have been made to clarify the applicability of the standards. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a

local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste facilities.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the Cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the Cabinet to establish a comprehensive program for the proper management of hazardous waste. Agencies that manage hazardous waste will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 34:120. Liability requirements.

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 224.99, 40 CFR 264.147

STATUTORY AUTHORITY: KRS 224.46-505, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-505, 224.46-520, and 224.46-530 and to establish the liability requirements for hazardous waste sites or facilities. This administrative regulation is equivalent to federal standards established in 40 CFR Part 264.147 except for: Section 1(1)(b) of this administrative regulation, which adds a reference to applicable statutory requirements; Sections 1(7) and 2(8) of this administrative regulation, which provide a historical reference to determine prior compliance; Section 5 of this administrative regulation, which is modified to maintain consistency with KRS 224.46-520; and this administrative regulation provides state forms equivalent to federal mechanisms for financial assurance.

Section 1. Coverage for Sudden Accidental Occurrences. An owner or operator of a hazardous waste treatment, storage, or disposal facility, or a group of such facilities, shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by sudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator shall have and maintain liability coverage for sudden or accidental occurrences in the amount of at least \$1,000,000 per occurrence with an annual aggregate of at least \$2,000,000, exclusive of legal defense costs. This liability coverage may be demonstrated as specified in subsections (1) to (6) of this section:

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this section.

(a) Each insurance policy shall be amended by attachment of the Hazardous Waste Facility Liability Endorsement or evidenced by a Hazardous Waste Facility Certificate of Liability Insurance. The Hazardous Waste Facility Liability Endorsement shall be executed on DEP Form 6035K incorporated by reference in Section 4 of 401 KAR 34:080. The Certificate of Liability Insurance shall be on DEP Form 6035L [using the forms by these titles] incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator shall submit an originally signed duplicate of the endorsement or the certificate of insurance to the cabinet. If requested by the cabinet, the owner or operator shall provide an originally signed duplicate of the insurance policy. An owner or operator of a new facility shall submit the originally signed duplicate of the Hazardous Waste Facility Liability Endorsement or the Hazardous Waste Facility Certificate of Liability Insurance to the cabinet at least sixty (60) days before the date on which hazardous waste is first received for treatment, storage or disposal. The insurance shall be effective before this initial receipt of hazardous waste.

(b) Each primary insurance policy shall be issued by an insurer which, at a minimum, is authorized to transact primary insurance in Kentucky except as KRS 304.11-030 provides otherwise. Each excess insurance policy shall be issued by an insurer which, at a minimum, is authorized to provide insurance as an excess or surplus lines insurer in one (1) state.

(2) An owner or operator may meet the requirements of this administrative regulation by passing a financial test or using the corporate guarantee for liability coverage as specified in Sections 6 and 7 of this administrative regulation.

(3) An owner or operator may meet the requirements of this section by obtaining a letter of credit for liability coverage as specified in Section 8 of this administrative regulation.

(4) An owner or operator may meet the requirements of this section by obtaining a surety bond for liability coverage as specified in Section 9 of this administrative regulation.

(5) An owner or operator may meet the requirements of this section by obtaining a trust fund for liability coverage as specified in Section 10 of this administrative regulation.

(6) An owner or operator may demonstrate the required liability coverage through use of combinations of the financial test, insurance, the corporate guarantee, letter of credit, surety bond, and trust fund [of insurance, financial test, guarantee, fund], except that the owner or operator may not combine a financial test covering part of the liability coverage requirement with a guarantee unless the financial statement of the owner or operator is not consolidated with the financial statement of the guarantor. The amounts of coverage demonstrated shall total at least the minimum amounts required by this section. If the owner or operator demonstrates the required coverage through the use of a combination of financial assurances under this subsection, the owner or operator shall specify at least one (1) such assurance as "primary" coverage and shall specify other assurance as "excess" coverage.

(7) An owner or operator shall notify the cabinet in writing within thirty (30) days whenever:

(a) ~~A claim for bodily injury or property damages caused by the operation of a hazardous waste treatment, storage, or disposal facility is made against the owner or operator;~~

(b) ~~Whenever~~ A claim results in a [the] reduction in [of] the amount of financial assurance for liability coverage [under this section] provided by a financial instrument authorized by subsection (1) to (6) of this section; [or]

(b) A Certification of Valid Claim for bodily injury or property damages caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is entered between the owner or operator and third-party claimant for liability coverage under subsections (1) through (6) of this section; or

(c) A final court order establishing a judgment for bodily injury or

property damage caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is issued against the owner or operator or against an instrument that is providing financial assurance for liability coverage under subsection (1) to (6) of this section.

(8) Notwithstanding any other provisions of this chapter, an owner or operator using liability insurance to satisfy the requirements of this administrative regulation may use, until October 16, 1982, a hazardous waste facility liability endorsement or certificate of liability insurance that does not certify that the insurer is licensed to transact the business of insurance, or eligible as an excess or surplus lines insurer, in one (1) or more states.

Section 2. Coverage for Nonsudden Accidental Occurrences. An owner or operator of a surface impoundment, landfill, land treatment facility, facility for land disposal as specified in KRS 224.01-010 or miscellaneous unit for disposal that is used to manage hazardous waste, or a group of such facilities, shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by nonsudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator shall have and maintain additional liability coverage for nonsudden accidental occurrences in the amount of at least \$3,000,000 per occurrence with an annual aggregate of at least \$6,000,000, exclusive of legal defense costs. An owner or operator who is required to comply with the requirements of this section may combine the required per-occurrence coverage levels for sudden and nonsudden accidental occurrences into a single per-occurrence level, and combine the required annual aggregate coverage levels for sudden and nonsudden accidental occurrences into a single annual aggregate level. Owners and operators who combine coverage levels for sudden and nonsudden accidental occurrences must maintain liability coverage in the amount of at least \$4 million per occurrence and \$8 million annual aggregate. This liability coverage may be demonstrated as specified in subsections (1) to (6) of this section:

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this section.

(a) Each insurance policy shall be amended by attachment of the Hazardous Waste Facility Liability Endorsement or evidenced by a ~~[Hazardous Waste Facility]~~ Certificate of Liability Insurance. The Hazardous Waste Facility Liability Endorsement shall be executed on DEP Form 6035K incorporated by reference in Section 4 of 401 KAR 34:080. The Certificate of Liability Insurance shall be on DEP Form 6035L [using the forms by these titles] incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator shall submit an originally signed duplicate of the endorsement or the certificate of insurance to the cabinet. If requested by the cabinet, the owner or operator shall provide an originally signed duplicate of the insurance policy. An owner or operator of a new facility shall submit the originally signed duplicate of the Hazardous Waste Facility Liability Endorsement or the Certificate of Liability Insurance to the cabinet at least sixty (60) days before the date on which hazardous waste is first received for treatment, storage or disposal. The insurance shall be effective before this initial receipt of hazardous waste.

(b) Each primary insurance policy shall be issued by an insurer which, at a minimum, is authorized to transact primary insurance in Kentucky except as KRS 304.11-030 provides otherwise. Each excess insurance policy shall be issued by an insurer which, at a minimum, is authorized to provide insurance as an excess or surplus lines insurer in one (1) state.

(2) An owner or operator may meet the requirements of this administrative regulation by passing a financial test or using the corporate guarantee for liability coverage as specified in Sections 6 and 7 of this administrative regulation.

(3) An owner or operator may meet the requirements of this section by obtaining a letter of credit for liability coverage as specified in Section 8 of this administrative regulation.

(4) An owner or operator may meet the requirements of this section by obtaining a surety bond for liability coverage as specified in Section 9 of this administrative regulation.

(5) An owner or operator may meet the requirements of this section by obtaining a trust fund for liability coverage as specified in Section 10 of this administrative regulation.

(6) An owner or operator may demonstrate the required liability coverage through use of combinations of the financial test, insurance, the corporate guarantee, letter of credit, surety bond, and trust bond, except that the owner or operator may not combine a financial test covering part of the liability coverage requirement with a guarantee unless the financial statement of the owner or operator is not consolidated with the financial statement of the guarantor. The amounts of coverage demonstrated shall total at least the minimum amounts required by this section. If the owner or operator demonstrates the required coverage through the use of a combination of financial assurances under this subsection, the owner or operator shall specify at least one (1) such assurance as "primary" coverage and shall specify other assurance as "excess" coverage.

(7) An owner or operator shall notify the cabinet in writing within thirty (30) days whenever:

(a) ~~A claim for bodily injury or property damages caused by the operation of a hazardous waste treatment, storage, or disposal facility is made against the owner or operator;~~

(b) ~~Whenever~~ A claim results in a the reduction in of the amount of financial assurance for liability coverage under this section provided by a financial instrument authorized by subsections (1) to (6) of this section; or

(b) A Certification of Valid Claim for bodily injury or property damages caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is entered between the owner or operator and third-party claimant for liability coverage under subsections (1) through (6) of this section; or

(c) A final court order establishing a judgment for bodily injury or property damage caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is issued against the owner or operator or ~~against~~ an instrument that is providing financial assurance for liability coverage under subsections (1) to (6) of this section.

(8) For existing facilities, the required liability coverage for nonsudden accidental occurrences shall be demonstrated by the dates listed below. The total sales or revenues of the owner or operator in all lines of business, in the fiscal year preceding the effective date of these administrative regulations, shall determine which of the dates apply. If the owner and operator of a facility are two (2) different parties, or if there is more than one (1) owner or operator, the sales or revenues of the owner or operator with the largest sales or revenues shall determine the date by which the coverage shall be demonstrated. The dates are as follows:

(a) For an owner or operator with sales or revenues totaling \$10,000,000 or more, February 24, 1983.

(b) For an owner or operator with sales or revenues greater than \$5,000,000 but less than \$10,000,000, February 24, 1984.

(c) All other owners or operators, February 24, 1985.

(9) Notwithstanding any other provisions of this chapter, an owner or operator using liability insurance to satisfy the requirements of this administrative regulation may use, until October 16, 1982, a hazardous waste facility liability endorsement or certificate of liability insurance that does not certify that the insurer is licensed to transact the business of insurance, or eligible as an excess or surplus lines insurer, in one (1) or more states.

Section 3. Adjustments by the Cabinet. If the cabinet determines that the levels of financial responsibility required by Sections 1 and 2 of this administrative regulation are not consistent with the degree and duration of risks associated with treatment, storage, or disposal

at any facility or group of facilities, the cabinet may increase the level of financial responsibility required under Sections 1 and 2 of this administrative regulation as may be necessary to protect human health and the environment. This adjusted level shall be based on the cabinet's assessment of the degree and duration of risks associated with the ownership or operation of each facility or group of such facilities. If the cabinet determines that there is a significant risk to human health and the environment from nonsudden accidental occurrences from the operations of a facility that is not a surface impoundment, landfill, or land treatment facility, the cabinet may require that the owner or operator of the facility comply with Section 2 of this administrative regulation. An owner or operator shall furnish to the cabinet, within a reasonable time, any information which the cabinet requests to determine whether cause exists for such adjustments of the level or type of coverage. Any adjustment of the level or type of [required] coverage for a facility that has a permit shall be treated as a permit modification under Section 2(1)(e) of 401 KAR 38:040 and Section 2 of 401 KAR 38:050.

Section 4. Request for a Variance. If an owner or operator can demonstrate to the satisfaction of the cabinet that the increased level of financial responsibility required by Section 1 or 2 of this administrative regulation is not consistent with the degree and duration of risk associated with the treatment, storage, or disposal at each facility or group of facilities, the owner or operator may obtain a variance from the cabinet. The cabinet shall not grant any requests for a variance which seek to decrease the level of financial responsibility below the minimums required by KRS 224.46-520(3)(c). If granted, the variance shall take the form of an adjusted level of required liability coverage, such level to be based on the cabinet's assessment of the degree and duration of risk associated with the ownership or operation of each facility or group of facilities. The cabinet may require an owner or operator who requests a variance to provide such technical and engineering information as is deemed necessary by the cabinet to determine a level of financial responsibility other than that required by Sections 1 and 2 of this administrative regulation. Any request for a variance for a permitted facility shall be treated as a request for a permit modification under Section 2(1)(e) of 401 KAR 38:040 and Section 2 of 401 KAR 38:050.

Section 5. Period of Coverage. An owner or operator shall continuously provide liability coverage for a facility as required by this administrative regulation until certification of termination pursuant to the requirements of KRS 224.46-520.

Section 6. Liability Self-insurance. (1) An owner or operator may satisfy the requirements of this administrative regulation by demonstrating that he passes a financial test as specified in this section. To pass this test the owner or operator shall demonstrate that the level of self-insurance does not exceed ten (10) percent of equity and shall meet the criteria of either paragraph (a) or (b) of this subsection:

(a) The owner or operator shall have:

1. Net working capital and tangible net worth each at least six (6) times the amount of liability coverage to be demonstrated by this test; and

2. Tangible net worth of at least \$10 million; and

3. Assets in the United States amounting to either, at least, ninety (90) percent of his total assets or at least six (6) times the sum of the appropriate liability coverage to be demonstrated by this test.

(b) The owner or operator shall have:

1. A current rating for his most recent bond issuance of AAA, AA, A or BBB as issued by Standard and Poor's or Aaa, Aa, A, or Baa as issued by Moody's; and

2. Tangible net worth of at least \$10 million; and

3. Tangible net worth at least six (6) times the amount of the liability coverage to be demonstrated by this test; and

4. Assets located in the United States amounting to either, at

least, ninety (90) percent of his total assets or at least six (6) times the amount of the liability coverage to be demonstrated by this test.

(2) The phrase "amount of liability coverage" as used in subsection (1) of this section refers to the annual aggregate amounts for which coverage is required under Sections 1 and 2 of this administrative regulation.

(3) To demonstrate that he meets this test, the owner or operator shall submit the following three (3) items to the cabinet:

(a) A letter signed by the owner's or operator's chief financial officer and executed on the form entitled Letter from Chief Financial Officer to Demonstrate Liability Coverage or to Demonstrate Liability Coverage and Assurance of Closure or Postclosure Care, DEP Form 6035G, as incorporated by reference in Section 14 of 401 KAR 34:080. If the owner or operator is using the financial test to demonstrate both assurance for closure or postclosure, as specified in Section 8 of 401 KAR 34:090, Section 8 of 401 KAR 34:100, Section 7 of 401 KAR 35:090 or Section 7 of 401 KAR 35:100 and liability coverage, he shall submit the letter on the form entitled Letter from Chief Financial Officer to Demonstrate Liability Coverage or to Demonstrate Liability Coverage and Assurance of Closure or Postclosure Care, DEP Form 6035G, as incorporated by reference in Section 4 of 401 KAR 34:080 to cover both forms of financial responsibility;

(b) A copy of the independent certified public accountant's report on examination of the owner's or operator's financial statements for the latest completed fiscal year; and

(c) A special report from the owner's or operator's independent certified public accountant to the owner or operator stating that:

1. He has compared the data which the letter from the chief financial officer specifies as having been derived from the independently audited, year-end financial statements for the latest fiscal year with the amounts in such financial statements; and

2. In connection with that procedure, no matters came to his attention which caused him to believe that the specified data should be adjusted.

(4) An owner or operator of a new facility shall submit the items specified in subsection (3) of this section to the cabinet at least sixty (60) days before the date on which hazardous waste is first received for treatment, storage or disposal.

(5) After the initial submission of items specified in subsection (3) of this section, the owner or operator shall send updated information to the cabinet within ninety (90) days after the close of each succeeding fiscal year. This information shall consist of all three (3) items specified in subsection (3) of this section.

(6) If the owner or operator no longer meets the requirements of subsection (1) of this section, he shall obtain insurance, a letter of credit, a surety bond, a trust fund, or a corporate guarantee for the entire amount of required liability coverage as specified in this administrative regulation. Evidence of liability coverage (insurance) shall be submitted to the cabinet within ninety (90) days after the end of the fiscal year for which the year-end financial data show that the owner or operator no longer meets the test requirements.

(7) The cabinet may, based on a reasonable belief that the owner or operator may no longer meet the requirements of subsection (1) of this section, require reports of financial condition at any time from the owner or operator in addition to those specified in subsection (3) of this section. If the cabinet finds, on the basis of such reports or other information, that the owner or operator no longer meets the requirements of subsection (1) of this section, the owner or operator shall provide liability insurance as specified in this administrative regulation within thirty (30) days after notification of such a finding.

(8) The cabinet may disallow use of this test on the basis of qualifications in the opinion expressed by the independent certified public accountant in his report on examination of the owner's or operator's financial statements (see subsection (3)(c) of this section). An adverse opinion or a disclaimer of opinion shall be cause for disallowance. The cabinet shall evaluate other qualifications on an

individual basis. The owner or operator shall provide liability insurance for the entire amount of liability coverage as specified in this administrative regulation within thirty (30) days after notification of the disallowance.

Section 7. Corporate Guarantee for Liability Coverage. (1) Subject to subsection (2) of this section, an owner or operator may meet the requirements of this administrative regulation by obtaining a written guarantee, referred to as Corporate Guarantee for Liability Coverage. The guarantor shall be the direct or higher-tier parent corporation of the owner or operator, a firm whose parent corporation is also the parent corporation of the owner or operator, or a firm with a "substantial business relationship" as defined in Section 1 of 401 KAR 34:005 [34:090] with the owner or operator. The guarantor shall meet the requirements for owners or operators in Section 6(1) to (8) of this administrative. The [wording of the] Corporate Guarantee for Liability Coverage shall be executed on DEP Form 6035H2 [the form entitled "Corporate Guarantee for Closure or Postclosure Care", as] incorporated by reference in Section 4 of 401 KAR 34:080. A certified copy of the Corporate Guarantee for Liability Coverage shall accompany the items sent to the cabinet as specified in Section 6(3) of this administrative regulation. One (1) of these items shall be the letter from the guarantor's chief financial officer. If the guarantor's parent corporation is also the parent corporation of the owner or operator, this letter shall describe the value received in consideration of the guarantee. If the guarantor is a firm with a "substantial business relationship" with the owner or operator, this letter shall describe this "substantial business relationship" and the value received in consideration of the guarantee. The terms of the Corporate Guarantee for Liability Coverage shall provide that:

(a) If the owner or operator fails to satisfy a judgment based on a determination of liability for bodily injury or property damage to third parties caused by sudden or nonsudden accidental occurrences (or both as the case may be), arising from the operation of facilities covered by this Corporate Guarantee for Liability Coverage, or fails to pay an amount agreed to in settlement of claims arising from or alleged to arise from such injury or damage, the guarantor shall do so up to the limits of coverage.

(b) The Corporate Guarantee for Liability Coverage shall remain in force unless the guarantor sends notice of cancellation by certified mail to the owner or operator and to the cabinet. This guarantee may not be terminated unless and until the cabinet approves alternate liability coverage complying with this administrative regulation or 401 KAR 35:120.

(2)(a) In the case of corporations incorporated in the United States, a Corporate Guarantee for Liability Coverage may be used to satisfy the requirements of this administrative regulation only if the Attorney General or insurance commissioner of the state in which the guarantor is incorporated, each state in which a facility covered by the guarantee is located and in the state in which it has its principle place of business, have submitted a written statement to the director that a Corporate Guarantee for Liability Coverage executed as described in this administrative regulation and incorporated by reference in Section 4 of 401 KAR 34:080 is a legally valid and enforceable obligation in that state and in Kentucky.

(b) In the case of corporations incorporated outside of the United States, a Corporate Guarantee for Liability Coverage may be used to satisfy the requirements of this section only if the non-United States corporation has identified a registered agent for service of process in each state in which a facility covered by the guarantee is located and in the state in which it has its principle place of business, and the attorney general or insurance commissioner of each state in which a facility covered by the guarantee is located, and the state in which the guarantor corporation has its principle place of business, and the Department of Law or the Insurance Commissioner of the Commonwealth of Kentucky has submitted a written statement to the director that a Corporate Guarantee for Liability Coverage executed as

described in this section ~~[and Section 1(2) of 401 KAR 34:080]~~ is a legally valid and enforceable obligation in that state and in Kentucky.

(c) A corporate guarantee may be used to satisfy the requirements of this administrative regulation only if the assets to be collected are located in the United States. Failure to provide the written statement referenced in paragraphs (a) and (b) of this subsection shall be grounds for denial of the instrument.

Section 8. Letter of Credit for Liability Coverage. (1) An owner or operator may satisfy the requirements of this administrative regulation by obtaining an irrevocable stand-by letter of credit that conforms to the requirements of this section and submitting a copy of the letter of credit to the cabinet. The irrevocable standby letter of credit may be submitted on either DEP Form 6035Q or DEP 6035N. The Irrevocable Standby Letter of Credit to Demonstrate Liability Coverage, DEP Form 6035Q and the Irrevocable Standby Letter of Credit to Demonstrate Liability Coverage with Standby Trust Agreement, DEP Form 6035N are incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator may use his own document, provided the language is identical to that specified in either DEP Form 6035Q or 6035N. If the owner or operator chooses to establish a trust fund as described in subsection (4) of this section, DEP Form 6035N should be submitted along with the standby trust agreement as specified in subsection (5) of this section.

(2) The financial institution issuing the letter of credit shall be an entity that has the authority to issue letters of credit and whose letter of credit operations are regulated and examined by a federal or state agency.

(3) A letter of credit may be used to satisfy the requirements of this administrative regulation only if the assets to be collected are located in the United States. Failure to provide the written statement referenced in subsections (1) and (2) of this section shall be grounds for denial of the instrument.

(4) An owner or operator who uses a letter of credit to satisfy the requirements of this section may also establish a standby trust fund. Under the terms of such a letter of credit all amounts paid pursuant to a draft by the trustee of the standby trust shall be deposited by the issuing institution into the standby trust in accordance with instructions from the trustee. The trustee of the standby trust fund shall be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(5) The standby trust shall be submitted on DEP Form 6035R (the form) entitled "[Irrevocable] Standby Trust Agreement for Letter of Credit Demonstrating Liability Coverage [with Cover Letter for Letter of Credit]", as incorporated by reference in Section 4 of 401 KAR 34:080, and submitted with the Irrevocable Standby Letter of Credit to Demonstrate Liability Coverage with Standby Trust Agreement, DEP Form 6035N.

Section 9. Surety Bond for Liability Coverage. (1) An owner or operator may satisfy the requirements of this administrative regulation by obtaining a Payment Bond to Demonstrate Liability Coverage ~~[surety bond]~~ that conforms to the requirements of this section and submitting a copy of the bond to the cabinet.

(2) The surety company issuing the bond shall be among those listed as acceptable sureties on federal bonds in the most recent Circular 570 of the U.S. Department of the Treasury.

(3) A Payment Bond to Demonstrate Liability Coverage ~~[surety bond]~~ may be used to satisfy the requirements of this administrative regulation only if the assets to be collected are located in the United States. Failure to provide the written statement referenced in subsection (4) of this section shall be grounds for denial of the instrument.

(4) A Payment Bond to Demonstrate Liability Coverage ~~[surety bond]~~ may be used to satisfy the requirements of this section only if the attorney general or insurance commissioner of the state in which the surety is incorporated, and each state in which a facility covered

by the Payment Bond to Demonstrate Liability Coverage ~~[surety bond]~~ is located have provided a written statement to the cabinet that a Payment Bond to Demonstrate Liability Coverage ~~[surety bond]~~ executed as described in this section and executed on DEP Form 6035Q ~~(the form)~~ incorporated by reference in Section 4 of 401 KAR 34:080 is legally valid and enforceable obligation in that state.

Section 10. Trust Fund for Liability Coverage. (1) An owner or operator may satisfy the requirements of this administrative regulation by establishing a trust fund that conforms to the requirements of this section and submitting an originally signed duplicate of the Trust Agreement to Demonstrate Liability Coverage, executed on DEP Form 6035P, incorporated by reference in Section 4 of 401 KAR 34:080. ~~[to the cabinet]~~

(2) The trustee shall be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(3) The trust fund for liability coverage shall be funded for the full amount of the liability coverage to be provided by the trust fund before it may be relied upon to satisfy the requirements of this section. If at any time after the trust fund is created the amount of funds in the trust fund is reduced below the full amount of the liability coverage to be provided, the owner or operator, by the anniversary date of the establishment of the fund must either add sufficient funds to the trust fund to cause its value to equal the full amount of liability coverage to be provided, or obtain other financial assurance as specified in this section to cover the difference. ~~[For purposes of this subsection, "the full amount of the liability coverage to be provided" means the amount of coverage for sudden and/or nonsudden occurrences required to be provided by the owner or operator by this section, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.]~~

(4) A trust fund may be used to satisfy the requirements of this administrative regulation only if the assets to be collected are located in the United States. ~~[Notwithstanding any other provisions of this part, an owner or operator using liability insurance to satisfy the requirements of this section may use, until October 16, 1992, a hazardous waste facility liability endorsement or certificate of liability insurance that does not certify that the insurer is licensed to transact the business of insurance, or eligible as an excess or surplus lines insurer, in one or more states.]~~

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of hazardous waste facilities.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public

comments received, for the:

1. First year following implementation: No public comments were received.
2. Second and subsequent years: No public comments were received.
3. Effects on the promulgating administrative body:
 - a. Direct and indirect costs or savings:
 1. First year: The existing staff will have an increased workload in order to process the newly regulated entities. The increase in workload will also increase costs.
 2. Continuing costs or savings: Once the new entities are processed, there should not be any extra costs.
 3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.
 - b. Reporting and paperwork requirements: There are no extra reporting requirements.
4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state or local revenues.
5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are to be used for the implementation and enforcement of the regulation.
6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:
 - a. Geographical area in which administrative regulation will be implemented: No public comments were received.
 - b. Kentucky: No public comments were received.
7. Assessment of alternative methods; reasons why alternatives were rejected: No alternatives were considered. These changes are consistent with federal standards and clarify the procedure for demonstrating liability coverage.
8. Assessment of expected benefits of the administrative regulation: These changes are consistent with federal standards and clarify the procedure for demonstrating liability coverage.
- 9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable.
- b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.
- c. If detrimental effect would result, explain detrimental effect: Not applicable.
10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, policies, or regulations that conflict, overlap, or duplicate this regulation.
 - a. Necessity of proposed regulation if in conflict: Not applicable.
 - b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.
11. Any additional information or comments: No additional comments.
12. TIERING: Is tiering applied? Yes, tiering was used. This administrative regulation applies to hazardous waste facilities, consistent with federal standards, to protect human health and the environment.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.
2. State compliance standards: The proposed amendments adopt changes including hazardous waste sites or facilities. The changes are necessary to maintain consistency between state and federal programs. Additions and exclusions have been made to clarify the

applicability of the standards. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste facilities.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the Cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the Cabinet to establish a comprehensive program for the proper management of hazardous waste. Agencies that manage hazardous waste facilities will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 34:281. Air emission standards for tanks, surface impoundments, and containers.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR Part 264 Subpart CC

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-520 and 224.46-530 and to establish air emissions standards for tanks, surface impoundments, and containers. This administrative regulation is equivalent to federal standards established in 40 CFR 264 Subpart CC except the date of compliance listed in Section 1 of this administrative regulation has been changed to reflect the original effective date of this administrative regulation.

Section 1. Applicability. (1) The requirements of this administrative regulation apply to owners and operators of all facilities that treat, store, or dispose of hazardous waste in tanks, surface impoundments, or containers subject to either 401 KAR 34:180, 34:190, or 34:200 except as Section 1 of 401 KAR 34:010 and subsection (2) of this section provide otherwise.

(2) The requirements of this administrative regulation do not apply to the following hazardous waste management units at the facility:

(a) A hazardous waste management unit that holds hazardous waste placed in the unit before the effective date of this administrative regulation [June 6, 1996], and in which no hazardous waste is added to the unit on or after this date.

(b) A container that has a design capacity less than or equal to 0.1 m³ (26.4 gallons).

(c) A tank in which an owner or operator has stopped adding hazardous waste and the owner or operator has begun implementing or completed closure of the tank pursuant to an approved closure plan.

(d) A surface impoundment in which an owner or operator has stopped adding hazardous waste (except to implement an approved closure plan) and the owner or operator has begun implementing or completed closure of the surface impoundment pursuant to an approved closure plan.

(e) A hazardous waste management unit that is used solely for on-site treatment or storage of hazardous waste that is generated as the result of implementing remedial activities required under the corrective action authorities of KRS 224.01-400, or KRS 224.46-530.

(f) A hazardous waste management unit that is used solely for the management of radioactive mixed waste in accordance with all applicable regulations under the authority of the Atomic Energy Act and the Nuclear Waste Policy Act.

(3) For the owner and operator of a facility subject to this administrative regulation and who received a final permit under KRS 224.46-520 prior to the effective date of this administrative regulation [June 6, 1996], the requirements of this administrative regulation shall be incorporated into the permit when the permit is reissued in accordance with the requirements of Section 12 of 401 KAR 38:050 or reviewed in accordance with the requirements of Section 5(4) of 401 KAR 38:040. Until such date when the owner and operator receives a final permit incorporating the requirements of this administrative regulation, the owner and operator is subject to the requirements of 401 KAR 35:281.

(4) The requirements of this administrative regulation, except for the recordkeeping requirements specified in Section 9(9) of this administrative regulation, shall not apply to a tank or container used for the management of hazardous waste generated by organic peroxide manufacturing and its associated laboratory operations when the owner or operator of the unit meets all of the following conditions:

(a) The owner or operator identifies that the tank or container receives hazardous waste generated by an organic peroxide manufacturing process producing more than one functional family of organic peroxides or multiple organic peroxides within one functional family, that one or more of these organic peroxides, could potentially undergo self-accelerating thermal decomposition at or below ambient temperatures, and that organic peroxides are the predominant products manufactured by the process. For the purpose of meeting the conditions of this paragraph, "organic peroxide" means an organic compound that contains the bivalent -O-O- structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

(b) The owner or operator prepares documentation, in accordance with the requirements of Section 9(9) of this administrative regulation, explaining why an undue safety hazard would be created if air emission controls specified in Sections 4, 6, and 7 of this administrative regulation are installed and operated on the tanks and containers used at the facility to manage the hazardous waste generated by the

organic peroxide manufacturing process or processes meeting the conditions of paragraph (a) of this subsection.

(c) The owner or operator notifies the cabinet in writing that hazardous waste generated by an organic peroxide manufacturing process or processes meeting the conditions of paragraph (a) of this subsection are managed at the facility in tanks or containers meeting the conditions of paragraph (b) of this subsection. The notification shall state the name and address of the facility, and be signed and dated by an authorized representative of the facility owner or operator.

(5) For the purposes of this administrative regulation, the abbreviations in parentheses apply to equations used in 401 KAR 35:281.

Section 2. Standards: General. (1) This section applies to the management of hazardous waste in tanks, surface impoundments, and containers subject to this administrative regulation.

(2) The owner or operator shall control air emissions from each hazardous waste management unit in accordance with standards specified in Sections 4 through 7 of this administrative regulation, as applicable to the hazardous waste management unit, except as provided for in subsection (3) of this section.

(3) A hazardous waste management unit is exempted from standards specified in Section 4 through 7 of this administrative regulation provided that all hazardous waste placed in the hazardous waste management unit is determined by the owner or operator to meet either of the following conditions:

(a) The average volatile organic (VO) concentration of the hazardous waste at the point of waste origination is less than 100 parts per million by weight (ppmw). The average VO concentration shall be determined by the procedures specified in Section 3(1) of this administrative regulation.

(b) The organic content of the hazardous waste has been reduced by an organic destruction or removal process that achieves any one of the following conditions:

1. A process that removes or destroys the organics contained in the hazardous waste to a level such that the average VO concentration of the hazardous waste at the point of waste treatment is less than the exit concentration limit (C_T) established for the process. The average VO concentration of the hazardous waste at the point of waste treatment and the exit concentration limit for the process shall be determined using the procedures specified in Section 3(2) of this administrative regulation.

2. A process that removes or destroys the organics contained in the hazardous waste to a level such that the organic reduction efficiency (R) for the process is equal to or greater than 95 percent, and the average VO concentration of the hazardous waste at the point of waste treatment is less than 50 ppmw. The organic reduction efficiency for the process and the average VO concentration of the hazardous waste at the point of waste treatment shall be determined using the procedures specified in Section 3(2) of this administrative regulation.

3. A process that removes or destroys the organics contained in the hazardous waste to a level such that the actual organic mass removal rate (MR) for the process is greater than the required organic mass removal rate (RMR) established for the process. The required organic mass removal rate and the actual organic mass removal rate for the process shall be determined using the procedures specified in Section 3(2) of this administrative regulation.

4. A biological process that destroys or degrades the organics contained in the hazardous waste, such that either of the following conditions is met:

a. The organic reduction efficiency (R) for the process is equal to or greater than 95 percent, and the organic biodegradation efficiency (R_{bio}) for the process is equal to or greater than ninety-five (95) percent. The organic reduction efficiency and the organic biodegradation efficiency for the process shall be determined in accordance with

the procedures specified in Section 3(2) of this administrative regulation.

b. The total actual organic mass biodegradation rate (MR_{bio}) for all hazardous waste treated by the process is equal to or greater than the required organic mass removal rate (RMR). The required organic mass removal rate and the actual organic mass biodegradation rate for the process shall be determined using the procedures specified in Section 3(2) of this administrative regulation.

5. A process that removes or destroys the organics contained in the hazardous waste and meets all of the following conditions:

a. All of the materials entering the process are hazardous wastes.

b. From the point of waste origination through the point where the hazardous waste enters the process, the hazardous waste is continuously managed in hazardous waste management units that use air emission controls in accordance with the standards specified in Sections 4 through 7 of this administrative regulation, as applicable to the hazardous waste management unit.

c. The average VO concentration of the hazardous waste at the point of waste treatment is less than the lowest average VO concentration at the point of waste origination determined for each of the individual hazardous waste streams entering the process or 100 ppmw, whichever value is lower. The average VO concentration of each individual hazardous waste stream at the point of waste origination shall be determined using the procedure specified in Section 3(1) of this administrative regulation. The average VO concentration of the hazardous waste at the point of waste treatment shall be determined using the procedure specified in Section 3(2) of this administrative regulation.

6. A hazardous waste incinerator for which the owner or operator has either:

a. Been issued a final permit under 401 KAR Chapter 38, and designs and operates the unit in accordance with the requirements of 401 KAR 34:240; or

b. Has certified compliance with the interim status requirements of 401 KAR 35:240.

7. A boiler or industrial furnace for which the owner or operator has either:

a. Been issued a final permit under 401 KAR Chapter 38, and designs and operates the unit in accordance with the requirements of 401 KAR 36:020 and 36:025; or

b. Has certified compliance with the interim status requirements of 401 KAR 36:020.

(4) When a process is used for the purpose of treating a hazardous waste to meet one of the sets of conditions specified in subsections (3)(b)1 through (5) of this section, each material removed from or exiting the process that is not a hazardous waste but has an average VO concentration equal to or greater than 100 ppmw shall be managed in a hazardous waste management unit in accordance with the requirements of subsection (2) of this section.

(5) The cabinet may at any time perform or request that the owner or operator perform a waste determination for a hazardous waste managed in a tank, surface impoundment, or container exempted from using air emission controls under the provisions of this section as follows:

(a) The waste determination for average VO concentration of a hazardous waste at the point of waste origination shall be performed using direct measurement in accordance with the applicable requirements of Section 3(1) of this administrative regulation. The waste determination for a hazardous waste at the point of waste treatment shall be performed in accordance with the applicable requirements of Section 3(2) of this administrative regulation.

(b) In a case when the owner or operator is requested to perform the waste determination, the cabinet may elect to have an authorized representative observe the collection of the hazardous waste samples used for the analysis.

(c) In a case when the results of the waste determination performed or requested by the cabinet do not agree with the results

of a waste determination performed by the owner or operator using knowledge of the waste, then the results of the waste determination performed in accordance with the requirements of paragraph (a) of this subsection shall be used to establish compliance with the requirements of this administrative regulation.

(d) In a case when the owner or operator has used an averaging period greater than 1 hour for determining the average VO concentration of a hazardous waste at the point of waste origination, the cabinet may elect to establish compliance with this administrative regulation by performing or requesting that the owner or operator perform a waste determination using direct measurement based on waste samples collected within a one (1) hour period as follows:

1. The average VO concentration of the hazardous waste at the point of waste origination shall be determined by direct measurement in accordance with the requirements of Section 3(1) of this administrative regulation.

2. Results of the waste determination performed or requested by the cabinet showing that the average VO concentration of the hazardous waste at the point of waste origination is equal to or greater than 100 ppmw shall constitute noncompliance with this administrative regulation except in a case as provided for in subparagraph 3 of this paragraph.

3. For the case when the average VO concentration of the hazardous waste at the point of waste origination previously has been determined by the owner or operator using an averaging period greater than one (1) hour to be less than 100 ppmw but because of normal operating process variations the VO concentration of the hazardous waste determined by direct measurement for any given one (1) hour period may be equal to or greater than 100 ppmw, information that was used by the owner or operator to determine the average VO concentration of the hazardous waste (for example, test results, measurements, calculations, and other documentation) and recorded in the facility records in accordance with the requirements of Sections 3(1) and 9 of this administrative regulation shall be considered by the cabinet together with the results of the waste determination performed or requested by the cabinet in establishing compliance with this administrative regulation.

Section 3. Waste Determination Procedures. (1) Waste determination procedure for average (VO) concentration of a hazardous waste at the point of waste origination.

(a) An owner or operator shall determine the average VO concentration at the point of waste origination for each hazardous waste placed in hazardous waste management units exempted under the provisions of Section 2(3)(a) of this administrative regulation from using air emission controls in accordance with standards specified in Sections 4 through 7 of this administrative regulation, as applicable to the hazardous waste management unit.

(b) The VO concentration at the point of waste origination for a hazardous waste shall be determined in accordance with the procedures specified in Sections 4(1)(b) through (f) of 401 KAR 35:281.

(2) Waste determination procedures for treated hazardous waste.

(a) An owner or operator shall perform the applicable waste determinations for each treated hazardous waste placed in hazardous waste management units exempted under the provisions of Section 2(3)(b) of this administrative regulation from using air emission controls in accordance with standards specified in Sections 4 through 7 of this administrative regulation, as applicable to the hazardous waste management unit.

(b) The waste determination for a treated hazardous waste shall be performed in accordance with the procedures specified in Section 4(2)(b) through (j) of 401 KAR 35:281, as applicable to the treated hazardous waste.

(3) Procedure to determine the maximum organic vapor pressure of a hazardous waste in a tank.

(a) An owner or operator shall determine the maximum organic

vapor pressure for each hazardous waste placed in tanks using air emission controls in accordance with standards specified in Section 4(3) of this administrative regulation.

(b) The maximum organic vapor pressure of the hazardous waste shall be determined in accordance with the procedures specified in Section 4(3)(b) through (d) of 401 KAR 35:281.

Section 4. Standards: Tanks. (1) This section applies to owners and operators of tanks subject to this administrative regulation into which any hazardous waste is placed except for the following tanks:

(a) A tank in which all hazardous waste entering the tank meets the conditions specified in Section 2(3) of this administrative regulation; or

(b) A tank used for biological treatment of hazardous waste in accordance with the requirements of Section 2(3)(b)4 of this administrative regulation.

(2) The owner or operator shall place the hazardous waste into one of the following tanks:

(a) A tank equipped with a cover (for example, a fixed roof) that is vented through a closed-vent system to a control device in accordance with the requirements specified in subsection (4) of this section;

(b) A tank equipped with a fixed roof and internal floating roof in accordance with the requirements of Section 11 of this administrative regulation;

(c) A tank equipped with an external floating roof in accordance with the requirements of Section 11 of this administrative regulation; or

(d) A pressure tank that is designed to operate as a closed system such that the tank operates with no detectable organic emissions at all times that hazardous waste is in the tank except as provided for in subsection (7) of this section.

(3) As an alternative to complying with subsection (2) of this section, an owner or operator may place hazardous waste in a tank equipped with a cover (for example, a fixed roof) meeting the requirements specified in subsection (4)(a) of this section when the hazardous waste is determined to meet all of the following conditions:

(a) The hazardous waste is neither mixed, stirred, agitated, nor circulated within the tank by the owner or operator using a process that results in splashing, frothing, or visible turbulent flow on the waste surface during normal process operations;

(b) The hazardous waste in the tank is not heated by the owner or operator except during conditions requiring that the waste be heated to prevent the waste from freezing or to maintain adequate waste flow conditions for continuing normal process operations;

(c) The hazardous waste in the tank is not treated by the owner or operator using a waste stabilization process or a process that produces an exothermic reaction; and

(d) The maximum organic vapor pressure of the hazardous waste in the tank as determined using the procedure specified in Section 3(3) of this administrative regulation is less than the following applicable value:

1. If the tank design capacity is equal to or greater than 151 m³ (39,893 gallons), then the maximum organic vapor pressure shall be less than five and two-tenths (5.2) kPa (gauge);

2. If the tank design capacity is equal to or greater than seventy-five (75) m³ (19,814 gallons) but less than 151 m³, then the maximum organic vapor pressure shall be less than twenty-seven and six-tenths (27.6) kPa (gauge); or

3. If the tank design capacity is less than seventy-five (75) m³ (19,814 gallons), then the maximum organic vapor pressure shall be less than seventy-six and six-tenths (76.6) kPa (gauge).

(4) To comply with subsection (2)(a) of this section, the owner or operator shall design, install, operate, and maintain a cover that vents the organic vapors emitted from hazardous waste in the tank through a closed-vent system connected to a control device.

(a) The cover shall be designed and operated to meet the

following requirements:

1. The cover and all cover openings (for example, access hatches, sampling ports, and gauge wells) shall be designed to operate with no detectable organic emissions when all cover openings are secured in a closed, sealed position.

2. Each cover opening shall be secured in a closed, sealed position (for example, covered by a gasketed lid or cap) at all times that hazardous waste is in the tank except as provided for in subsection (6) of this section.

(b) The closed-vent system and control device shall be designed and operated in accordance with the requirements of Section 7 of this administrative regulation.

(5) The owner and operator shall install, operate, and maintain enclosed pipes or other closed-systems, the cabinet considers a drain system that meets the requirements of 40 CFR 61.346(a)(1) or 40 CFR 61.346(b)(1) through (b)(3) to be a "closed systems", to:

(a) Transfer all hazardous waste to the tank from another tank, surface impoundment, or container subject to this administrative regulation except for those hazardous wastes that meet the conditions specified in Section 2(3) of this administrative regulation; and

(b) Transfer all hazardous waste from the tank to another tank, surface impoundment, or container subject to this administrative regulation except for those hazardous wastes that meet the conditions specified in Section 2(3) of this administrative regulation.

(6) Each cover opening shall be secured in a closed, sealed position (for example, covered by a gasketed lid) at all times that hazardous waste is in the tank except when it is necessary to use the cover opening to:

(a) Add, remove, inspect, or sample the material in the tank;

(b) Inspect, maintain, repair, or replace equipment located inside the tank; or

(c) Vent gases or vapors from the tank to a closed-vent system connected to a control device that is designed and operated in accordance with the requirements of Section 7 of this administrative regulation.

(7) One (1) or more safety devices that vent directly to the atmosphere may be used on the tank, cover, closed-vent system, or control device provided each safety device meets all of the following conditions:

(a) The safety device is not used for planned or routine venting of organic vapors from the tank or closed-vent system connected to a control device; and

(b) The safety device remains in a closed, sealed position at all times except when an unplanned event requires that the device open for the purpose of preventing physical damage or permanent deformation of the tank, cover, closed-vent system, or control device in accordance with good engineering and safety practices for handling flammable, combustible, explosive, or other hazardous materials. An example of an unplanned event is a sudden power outage.

Section 5. Standards: Surface Impoundments. (1) This section applies to owners and operators of surface impoundments subject to this administrative regulation into which any hazardous waste is placed except for the following surface impoundments:

(a) A surface impoundment in which all hazardous waste entering the surface impoundment meets the conditions specified in Section 2(3) of this administrative regulation; or

(b) A surface impoundment used for biological treatment of hazardous waste in accordance with the requirements of Section 2(3)(b)4 of this administrative regulation.

(2) The owner or operator shall place the hazardous waste into a surface impoundment equipped with a cover (for example, an air-supported structure or a rigid cover) that is vented through a closed-vent system to a control device meeting the requirements specified in subsection (4) of this section.

(3) As an alternative to complying with subsection (2) of this section, an owner or operator may place hazardous waste in a

surface impoundment equipped with a floating membrane cover meeting the requirements specified in subsection (5) of this section when the hazardous waste is determined to meet all of the following conditions:

(a) The hazardous waste is neither mixed, stirred, agitated, nor circulated within the surface impoundment by the owner or operator using a process that results in splashing, frothing, or visible turbulent flow on the waste surface during normal process operations;

(b) The hazardous waste in the surface impoundment is not heated by the owner or operator; and

(c) The hazardous waste is not treated by the owner or operator using a waste stabilization process or a process that produces an exothermic reaction.

(4) To comply with subsection (2) of this section, the owner or operator shall design, install, operate, and maintain a cover that vents the organic vapors emitted from hazardous waste in the surface impoundment through a closed-vent system connected to a control device.

(a) The cover shall be designed and operated to meet the following requirements:

1. The cover and all cover openings (for example, access hatches, sampling ports, and gauge wells) shall be designed to operate with no detectable organic emissions when all cover openings are secured in a closed, sealed position.

2. Each cover opening shall be secured in the closed, sealed position (for example, covered by a gasketed lid or cap) at all times that hazardous waste is in the surface impoundment except as provided for in subsection (7) of this section.

3. The closed-vent system and control device shall be designed and operated in accordance with Section 7 of this administrative regulation.

(5) To comply with subsection (3) of this section, the owner or operator shall design, install, operate, and maintain a floating membrane cover that meets all of the requirements specified in Section 6(5)(a) through (d) of 401 KAR 35:281.

(6) The owner or operator shall install, operate, and maintain enclosed pipes or other closed-systems, the cabinet considers a drain system that meets the requirements of 40 CFR 61.346(a)(1) or 40 CFR 61.346(b)(1) through (b)(3) to be a "closed system", to:

(a) Transfer all hazardous waste to the surface impoundment from another tank, surface impoundment, or container subject to this administrative regulation except for those hazardous wastes that meet the conditions specified in Section 2(3) of this administrative regulation; and

(b) Transfer all hazardous waste from the surface impoundment to another tank, surface impoundment, or container subject to this administrative regulation except for those hazardous wastes that meet the conditions specified in Section 2(3) of this administrative regulation.

(7) Each cover opening shall be secured in the closed, sealed position (for example, a cover by a gasketed lid or cap) at all times that hazardous waste is in the surface impoundment except when it is necessary to use the cover opening to:

(a) Add, remove, inspect, or sample the material in the surface impoundment;

(b) Inspect, maintain, repair, or replace equipment located underneath the cover;

(c) Remove treatment residues from the surface impoundment in accordance with the requirements of Section 4 of 401 KAR 37:010; or

(d) Vent gases or vapors from the surface impoundment to a closed-vent system connected to a control device that is designed and operated in accordance with the requirements of Section 7 of this administrative regulation.

(8) One (1) or more safety devices that vent directly to the atmosphere may be installed on the cover, closed-vent system, or control device provided each device meets all of the following

conditions:

(a) The safety device is not used for planned or routine venting of organic vapors from the surface impoundment or the closed-vent system connected to a control device; and

(b) The safety device remains in a closed, sealed position at all times except when an unplanned event requires that the device open for the purpose of preventing physical damage or permanent deformation of the cover, closed-vent system, or control device in accordance with good engineering and safety practices for handling flammable, combustible, explosive, or other hazardous materials. An example of an unplanned event is a sudden power outage.

Section 6. Standards: Containers. (1) This section applies to the owners and operators of containers having design capacities greater than 0.1 m³ (26.4 gallons) subject to this administrative regulation into which any hazardous waste is placed except for a container in which all hazardous waste entering the container meets the conditions specified in Section 2(3) of this administrative regulation.

(2) An owner or operator shall manage hazardous waste in containers using the following procedures:

(a) The owner or operator shall place the hazardous waste into one of the following containers except when a container is used for hazardous waste treatment as required by paragraph (b) of this subsection:

1. A container that is equipped with a cover that operates with no detectable organic emissions when all container openings (for example, lids, bungs, hatches, and sampling ports) are secured in a closed, sealed position. The owner or operator shall determine that a container operates with no detectable emissions by testing each opening on the container for leaks in accordance with Method 21 in 40 CFR Part 60, Appendix A the first time any portion of the hazardous waste is placed into the container. If a leak is detected and cannot be repaired immediately, the hazardous waste shall be removed from the container and the container not used to meet the requirements of this subsection until the leak is repaired and the container is retested.

2. A container having a design capacity less than or equal to 0.46 m³ (121.5 gallons) that is equipped with a cover and complies with all applicable Department of Transportation regulations on packaging hazardous waste for transport under 49 CFR Subpart C.

a. A container that is managed in accordance with the requirements of 49 CFR Subpart C for the purpose of complying with this administrative regulation is not subject to any exceptions to the 49 CFR Subpart C regulations, except as noted in paragraph (a)2b of this subsection.

b. A lab pack that is managed in accordance with the requirements of 49 CFR Subpart C for the purpose of complying with this administrative regulation may comply with the exceptions for combination packagings specified in 49 CFR Subpart C.

3. A container that is attached to or forms a part of any truck, trailer, or railcar; and that has been demonstrated within the preceding 12 months to be organic vapor tight when all container openings are in a closed, sealed position (for example, the container hatches or lids are gasketed and latched). For the purpose of meeting the requirements of this subsection, a container is organic vapor tight if the container sustains a pressure change of not more than 750 pascals (0.11 psi) within 5 minutes after it is pressurized to a minimum of 4,500 pascals (0.65 psi). This condition is to be demonstrated using the pressure test specified in Method 27 of 40 CFR Part 60, Appendix A, and a pressure measurement device that has a precision of ± 2.5 mm water and that is capable of measuring above the pressure at which the container is to be tested for vapor tightness.

(b) An owner or operator treating hazardous waste in a container by either a waste stabilization process, any process that requires the addition of heat to the waste, or any process that produces an exothermic reaction shall meet the

following requirements:

1. Whenever it is necessary for the container to be open during the treatment process, the container shall be located inside an enclosure that is vented through a closed-vent system to a control device.

2. The enclosure shall be a structure that is designed and operated in accordance with the following requirements:

a. The enclosure shall be a structure that is designed and operated with sufficient airflow into the structure to capture the organic vapors emitted from the hazardous waste in the container and vent the vapors through the closed-vent system to the control device.

b. The enclosure may have permanent or temporary openings to allow worker access; passage of containers through the enclosure by conveyor or other mechanical means; entry of permanent mechanical or electrical equipment; or to direct airflow into the enclosure. The pressure drop across each opening in the enclosure shall be maintained at a pressure below atmospheric pressure such that whenever an open container is placed inside the enclosure no organic vapors released from the container exit the enclosure through the opening. The owner or operator shall determine that an enclosure achieves this condition by measuring the pressure drop across each opening in the enclosure. If the pressure within the enclosure is equal to or greater than atmospheric pressure then the enclosure does not meet the requirements of this section.

3. The closed-vent system and control device shall be designed and operated in accordance with the requirements of Section 7 of this administrative regulation.

(c) An owner or operator transferring hazardous waste into a container having a design capacity greater than 0.46 m³ (121.5 gallons) shall meet the following requirements:

1. Hazardous waste transfer by pumping shall be performed using a conveyance system that uses a tube (for example, pipe, hose) to add the waste into the container. During transfer of the waste into the container, the cover shall remain in place and all container openings shall be maintained in a closed, sealed position except for those openings through which the tube enters the container and as provided for in subsection (3) of this section. The tube shall be positioned in a manner such that either the:

a. Tube outlet continuously remains submerged below the waste surface at all times waste is flowing through the tube;

b. Lower bottom edge of the tube outlet is located at a distance no greater than two inside diameters of the tube or 15.25 cm (6 inches), whichever distance is greater, from the bottom of the container at all times waste is flowing through the tube; or

c. Tube is connected to a permanent port mounted on the bottom of the container so that the lower edge of the port opening inside the container is located at a distance equal to or less than 15.25 cm (6 inches) from the container bottom.

2. Hazardous waste transferred by a means other than pumping shall be performed such that during transfer of the waste into the container, the cover remains in place and all container openings are maintained in a closed, sealed position except for those openings through which the hazardous waste is added and as provided for in subsection (4) of this section.

(3) Each container opening shall be maintained in a closed, sealed position (for example, covered by a gasketed lid) at all times that hazardous waste is in the container except when it is necessary to use the opening to:

(a) Add, remove, inspect, or sample the material in the container;

(b) Inspect, maintain, repair, or replace equipment located inside the container; or

(c) Vent gases or vapors from a cover located over or enclosing an open container to a closed-vent system connected to a control device that is designed and operated in accordance with the requirements of Section 7 of this administrative regulation.

(4) One or more safety devices that vent directly to the atmosphere may be used on the container, cover, enclosure, closed-vent

system, or control device provided each device meets all of the following conditions:

(a) The safety device is not used for planned or routine venting of organic vapors from the container, cover, enclosure, or closed-vent system connected to a control device; and

(b) The safety device remains in a closed, sealed position at all times except when an unplanned event requires that the device open for the purpose of preventing physical damage or permanent deformation of the container, cover, enclosure, closed-vent system, or control device in accordance with good engineering and safety practices for handling flammable, combustible, explosive, or other hazardous materials. An example of an unplanned event is a sudden power outage.

Section 7. Standards: Closed-vent Systems and Control Devices.

(1) This section applies to each closed-vent system and control device installed and operated by the owner or operator to control air emissions in accordance with standards of this administrative regulation.

(2) The closed-vent system shall meet the following requirements:

(a) The closed-vent system shall route the gases, vapors, and fumes emitted from the hazardous waste in the hazardous waste management unit to a control device that meets the requirements specified in subsection (3) of this section.

(b) The closed-vent system shall be designed and operated in accordance with the requirements specified in Section 4(11) of 401 KAR 34:275.

(c) If the closed-vent system contains one or more bypass devices that may be used to divert all or a portion of the gases, vapors, or fumes from entering the control device, the owner or operator shall meet the following requirements:

1. For each bypass device except as provided for in subparagraph 2 of this paragraph, the owner or operator shall either:

a. Install, calibrate, maintain, and operate a flow indicator at the inlet to the bypass device that indicates at least once every 15 minutes whether gas, vapor, or fume flow is present in the bypass device; or

b. Secure a valve installed at the inlet to the bypass device in the closed position using a car-seal or a lock-and-key type configuration. The owner or operator shall visually inspect the seal or closure mechanism at least once every month to verify that the valve is maintained in the closed position.

2. Low leg drains, high point bleeds, analyzer vents, open-ended valves or lines, and safety devices are not subject to the requirements of subparagraph 1 of this paragraph.

(3) The control device shall meet the following requirements:

(a) The control device shall be one of the following devices:

1. A control device designed and operated to reduce the total organic content of the inlet vapor stream vented to the control device by at least 95 percent by weight;

2. An enclosed combustion device designed and operated in accordance with the requirements of Section 4(3) of 401 KAR 34:275; or

3. A flare designed and operated in accordance with the requirements of Section 4(4) of 401 KAR 34:275.

(b) The control device shall be operating at all times when gases, vapors, or fumes are vented from the hazardous waste management unit through the closed-vent system to the control device.

(c) The owner or operator using a carbon adsorption system to comply with paragraph (a) of this subsection shall operate and maintain the control device in accordance with the following requirements:

1. Following the initial startup of the control device, all activated carbon in the control device shall be replaced with fresh carbon on a regular basis in accordance with the requirements of Section 4(7) or (8) of 401 KAR 34:275.

2. All carbon removed from the control device shall be managed

in accordance with the requirements of Section 4(13) of 401 KAR 34:275.

(d) An owner or operator using a control device other than a thermal vapor incinerator, flare, boiler, process heater, condenser, or carbon adsorption system to comply with subsection (3)(a) of this section shall operate and maintain the control device in accordance with the requirements of Section 4(10) of 401 KAR 34:275.

(e) The owner or operator shall demonstrate that a control device achieves the performance requirements of subsection (3)(a) of this section as follows:

1. An owner or operator shall demonstrate using either a performance test as specified in subparagraph 3 of this paragraph or a design analysis as specified in subparagraph 4 of this paragraph the performance of each control device except for the following:

- a. A flare;
- b. A boiler or process heater with a design heat input capacity of 44 megawatts or greater;
- c. A boiler or process heater into which the vent stream is introduced with the primary fuel;
- d. A boiler or process heater burning hazardous waste for which the owner or operator has been issued a final permit under 401 KAR Chapter 38 and designs and operates the unit in accordance with the requirements of 401 KAR 36:020; or
- e. A boiler or process heater burning hazardous waste for which the owner or operator has certified compliance with the interim status requirements of 401 KAR 36:020.

2. An owner or operator shall demonstrate the performance of each flare in accordance with the requirements specified in Section 4(5) of 401 KAR 34:275.

3. For a performance test conducted to meet the requirements of subparagraph 1 of this paragraph, the owner or operator shall use the test methods and procedures specified in Section 5(3)(a) through (d) of 401 KAR 34:275.

4. For a design analysis conducted to meet the requirements of subparagraph 1 of this paragraph, the design analysis shall meet the requirements specified in Section 6(2)(d)3 of 401 KAR 34:275.

5. The owner or operator shall demonstrate that a carbon adsorption system achieves the performance requirements of subsection (3)(a) of this section based on the total quantity of organics vented to the atmosphere from all carbon adsorption system equipment that is used for organic adsorption, organic desorption or carbon regeneration, organic recovery, and carbon disposal.

(f) If the owner or operator and the cabinet do not agree on a demonstration of control device performance using a design analysis then the disagreement shall be resolved using the results of a performance test performed by the owner or operator in accordance with the requirements of subparagraph 3 of this paragraph. The cabinet may choose to have an authorized representative observe the performance test.

Section 8. Inspection and Monitoring Requirements. (1) This section applies to an owner or operator using air emission controls in accordance with the requirements of Sections 4 through 7 of this administrative regulation.

(2) Each cover used in accordance with requirements of Sections 4 through 6 of this administrative regulation shall be visually inspected and monitored for detectable organic emissions by the owner or operator using the procedure specified in Section 9(6)(a) through (g) of 401 KAR 35:281 except as follows:

(a) An owner or operator is exempted from performing the cover inspection and monitoring requirements specified in Section 9(6)(a) through (g) of 401 KAR 35:281 for the following tank covers:

- 1. A tank internal floating roof that is inspected and monitored in accordance with the requirements of Section 11 of this administrative regulation; or
- 2. A tank external floating roof that is inspected and monitored in accordance with the requirements of Section 11 of this administrative

regulation.

(b) If a tank is buried partially or entirely underground, an owner or operator is required to perform the cover inspection and monitoring requirements specified in Section 9(6)(a) through (g) of 401 KAR 35:281 only for those portions of the tank cover and those connections to the tank cover or tank body (for example fill ports, access hatches, gauge wells, etc.) that extend to or above the ground surface and can be opened to the atmosphere.

(c) An owner or operator is exempted from performing the cover inspection and monitoring requirements specified in Section 9(6)(a) through (g) of 401 KAR 35:281 for a container that meets all requirements specified in either Section 6(2)(a)2 or 3 of this administrative regulation.

(d) An owner or operator is exempted from performing the cover inspection and monitoring requirements specified in Section 9(6)(a) through (g) of 401 KAR 35:281 for an enclosure used to control air emissions from containers in accordance with the requirements of Section 6(2)(b) of this administrative regulation.

(3) Each closed-vent system used in accordance with the requirements of Section 7 shall be inspected and monitored by the owner or operator in accordance with the procedure specified in Section 4(11) of 401 KAR 34:275.

(4) Each control device used in accordance with the requirements of Section 7 of this administrative regulation shall be inspected and monitored by the owner or operator in accordance with the procedures specified in Section 4(6) and (9) of 401 KAR 34:275.

(5) The owner or operator shall develop and implement a written plan and schedule to perform all inspection and monitoring requirements of this section. The owner or operator shall incorporate this plan and schedule into the facility inspection plan required under Section 6 of 401 KAR 34:020.

Section 9. Recordkeeping Requirements. (1) Each owner or operator of a facility subject to requirements in this administrative regulation shall record and maintain the following information as applicable:

(a) Documentation for each cover installed on a tank in accordance with the requirements of Section 4(2)(b) or (c) of this administrative regulation that includes information prepared by the owner or operator or provided by the cover manufacturer or vendor describing the cover design, and certification by the owner or operator that the cover meets the applicable design specifications as listed in Section 11(3) of 401 KAR 35:281.

(b) Documentation for each floating membrane cover installed on a surface impoundment in accordance with the requirements of Section 5(3) of this administrative regulation that includes information prepared by the owner or operator or provided by the cover manufacturer or vendor describing the cover design, and certification by the owner or operator that the cover meets the specifications listed in Section 6(5) of 401 KAR 35:281.

(c) Documentation for each enclosure used to control air emissions from containers in accordance with the requirements of Section 6(2)(b)1 of this administrative regulation that includes information prepared by the owner or operator or provided by the manufacturer or vendor describing the enclosure design, and certification by the owner or operator that the enclosure meets the specifications listed in Section 6(2)(b)2 of this administrative regulation.

(d) Documentation for each closed-vent system and control device installed in accordance with the requirements of Section 7 of this administrative regulation that includes:

- 1. Certification that is signed and dated by the owner or operator stating that the control device is designed to operate at the performance level documented by a design analysis as specified in subparagraph 2 of this paragraph or by performance tests as specified in subparagraph 3 of this paragraph when the tank, surface impoundment, or container is or would be operating at capacity or the

highest level reasonably expected to occur.

2. If a design analysis is used, then design documentation as specified in Section 6(2)(d) of 401 KAR 34:275. The documentation shall include information prepared by the owner or operator or provided by the control device manufacturer or vendor that describes the control device design in accordance with Section 6(2)(d)3 of 401 KAR 34:275 and certification by the owner or operator that the control equipment meets the applicable specifications.

3. If performance tests are used, then a performance test plan as specified in Section 6(2)(c) of 401 KAR 34:275 and all test results.

4. Information as required by Section 6(3)(a) and (b) of 401 KAR 34:275.

(e) Records for all Method 27 tests of 40 CFR Part 60, Appendix A, performed by the owner or operator for each container used to meet the requirements of Section 6(2)(a)3 of this administrative regulation.

(f) Records for all visual inspections conducted in accordance with the requirements of Section 8 of this administrative regulation.

(g) Records for all monitoring for detectable organic emissions conducted in accordance with the requirements of Section 8 of this administrative regulation.

(h) Records of the date of each attempt to repair a leak, repair methods applied, and the date of successful repair.

(i) Records for all continuous monitoring conducted in accordance with the requirements of Section 8 of this administrative regulation.

(j) Records of the management of carbon removed from a carbon adsorption system conducted in accordance with Section 7(3)(c)2 of this administrative regulation.

(k) Records for all inspections of each cover installed on a tank in accordance with the requirements of Section 4(2)(b) or (c) of this administrative regulation that includes information as listed in Section 11(3) of this administrative regulation.

(2) An owner or operator electing to use air emission controls for a tank in accordance with the conditions specified in Section 4(3) of this administrative regulation shall record the following information:

(a) Date and time each waste sample is collected for direct measurement of maximum organic vapor pressure in accordance with Section 3(3) of this administrative regulation.

(b) Results of each determination of the maximum organic vapor pressure of the waste in a tank performed in accordance with Section 3(3) of this administrative regulation.

(c) Records specifying the tank dimensions and design capacity.

(3) An owner or operator electing to use air emission controls for a tank in accordance with the requirements of Section 11 of this administrative regulation shall record the information required by Section 11(3) of this administrative regulation.

(4) An owner or operator electing not to use air emission controls for a particular tank, surface impoundment, or container subject to this administrative regulation in accordance with the conditions specified in Section 2(3) of this administrative regulation shall record the information used by the owner or operator for each waste determination (for example, test results, measurements, calculations, and other documentation) in the facility operating log. If analysis results for waste samples are used for the waste determination, then the owner or operator shall record the date, time, and location that each waste sample is collected in accordance with applicable requirements of Section 3 of this administrative regulation.

(5) An owner or operator electing to comply with requirements in accordance with Section 2(3)(b)5 or 6 of this administrative regulation shall record the identification number for the incinerator, boiler, or industrial furnace in which the hazardous waste is treated.

(6) An owner or operator designating a cover as unsafe to inspect and monitor pursuant to Section 9(6)(e) of 401 KAR 35:281 or difficult to inspect and monitor pursuant to Section 9(6)(f) of 401 KAR 35:281 shall record in a log that is kept in the facility operating record the following information:

(a) A list of identification numbers for tanks with covers that are

designated as unsafe to inspect and monitor in accordance with the requirements of Section 9(6)(e) of 401 KAR 35:281, an explanation for each cover stating why the cover is unsafe to inspect and monitor, and the plan and schedule for inspecting and monitoring each cover.

(b) A list of identification numbers for tanks with covers that are designated as difficult to inspect and monitor in accordance with the requirements of Section 9(6)(f) of 401 KAR 35:281, an explanation for each cover stating why the cover is difficult to inspect and monitor, and the plan and schedule for inspecting and monitoring each cover.

(7) All records required by subsections (1) through (6) of this section except as required in subsections (1)(a) through (d) of this section shall be maintained in the operating record for a minimum of three (3) years. All records required by subsection (1)(a) through (d) of this section shall be maintained in the operating record until the air emission control equipment is replaced or otherwise no longer in service.

(8) The owner or operator of a facility that is subject to this administrative regulation and to the control device standards in 40 CFR Part 60, Subpart VV or 40 CFR Part 61, Subpart V may elect to demonstrate compliance with the applicable sections of this administrative regulation by documentation either pursuant to this administrative regulation, or pursuant to the provisions of 40 CFR Part 60, Subpart VV or 40 CFR Part 61, Subpart V, to the extent that the documentation required by 40 CFR Parts 60 or 61 duplicates the documentation required by this section.

(9) For each tank or container not using air emission controls specified in Sections 4 through 7 of this administrative regulation in accordance with the conditions specified in Section 1(4) of this administrative regulation, the owner or operator shall record and maintain the following information:

(a) A list of the individual organic peroxide compounds manufactured at the facility that meet the conditions specified in Section 1(4)(a) of this administrative regulation.

(b) A description of how the hazardous waste containing the organic peroxide compounds identified in paragraph (a) of this subsection are managed at the facility in tanks and containers. This description shall include:

1. For the tanks used at the facility to manage this hazardous waste, sufficient information shall be provided to describe for each tank: a facility identification number for the tank; the purpose and placement of this tank in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste managed in the tanks.

2. For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to describe: a facility identification number for the container or group of containers; the purpose and placement of this container, or group of containers, in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste handled in the containers.

(c) An explanation of why managing the hazardous waste containing the organic peroxide compounds identified in subsection (9)(a) of this section in the tanks and containers as described in subsection (9)(b) of this section would create an undue safety hazard if the air emission controls, as required under Sections 4 through 7 of this administrative regulation, are installed and operated on these hazardous waste management units. The explanation shall include the following information:

1. For tanks used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the tanks would affect the tank design features and facility operating procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the tanks; and why installation of safety devices on the required air emission controls, as allowed under Section 4(7) of this administrative regulation, will not address those situations in which evacuation of tanks equipped with these air emission controls

is necessary and consistent with good engineering and safety practices for handling organic peroxides.

2. For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the containers would affect the container design features and handling procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the containers; and why installation of safety devices on the required air emission controls, as allowed under Section 6(4) of this administrative regulation, will not address those situations in which evacuation of containers equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

Section 10. Reporting Requirements. (1) Each owner or operator managing hazardous wastes in a tank, surface impoundment, or container exempted from using air emission controls under the provisions of Section 2(3) of this administrative regulation shall report to the cabinet each occurrence when hazardous waste is placed in the hazardous waste management unit in noncompliance with the conditions specified in Section 2(3)(a) or (b) of this administrative regulation, as applicable. Examples of such occurrences include placing in the hazardous waste management unit a hazardous waste having an average VO concentration equal to or greater than 100 ppmw at the point of waste origination; or placing in the hazardous waste management unit a treated hazardous waste that fails to meet the applicable conditions specified in Section 2(3)(b)1 through 5 of this administrative regulation. The owner or operator shall submit a written report within fifteen (15) calendar days of the time that the owner or operator becomes aware of the occurrence. The written report shall contain the EPA identification number, facility name and address, a description of the noncompliance event and the cause, the dates of the noncompliance, and the actions taken to correct the noncompliance and prevent reoccurrence of the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(2) Each owner or operator using air emission controls on a tank in accordance with the requirements Section 4(3) of this administrative regulation shall report to the cabinet each occurrence when hazardous waste is managed in the tank in noncompliance with the conditions specified in Section 4(3)(a) through (d) of this administrative regulation. The owner or operator shall submit a written report within fifteen (15) calendar days of the time that the owner or operator becomes aware of the occurrence. The written report shall contain the EPA identification number, facility name and address, a description of the noncompliance event and the cause, the dates of the noncompliance, and the actions taken to correct the noncompliance and prevent reoccurrence of the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(3) Each owner or operator using a control device in accordance with the requirements of Section 7 of this administrative regulation shall submit a semiannual written report to the cabinet excepted as provided for in subsection (4) of this section. The report shall describe each occurrence during the previous six (6) month period when a control device is operated continuously for twenty-four (24) hours or longer in noncompliance with the applicable operating values defined in Section 6(3)(d) of 401 KAR 35:275 or when a flare is operated with visible emissions as defined in Section 4(4) of 401 KAR 35:275. The written report shall include the EPA identification number, facility name and address, and an explanation why the control device could not be returned to compliance within 24 hours, and actions taken to correct the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(4) A report to the cabinet in accordance with the requirements of subsection(3) of this section is not required for a six (6) month period during which all control devices subject to this administrative

regulation are operated by the owner or operator such that during no period of twenty-four (24) hours or longer did a control device operate continuously in noncompliance with the applicable operating values defined in Section 6(3)(d) of 401 KAR 34:275 or a flare operate with visible emissions as defined in Section 4(4) of 401 KAR 34:275.

Section 11. Alternative Control Requirements for Tanks. (1) This section applies to owners and operators of tanks electing to comply with Section 4(2)(b) or (c) of this administrative regulation.

(a) The owner or operator electing to comply with Section 4(2)(b) of this administrative regulation shall design, install, operate, and maintain a fixed roof and internal floating roof that meet the requirements specified in Section 11(1)(a)1 through 9 of 401 KAR 35:281.

(b) The owner or operator electing to comply with Section 4(2)(c) of this administrative regulation shall design, install, operate, and maintain an external floating roof that meets the requirements specified in Section 11(1)(b)1 through 3 of 401 KAR 35:281.

(2) The owner or operator shall inspect and monitor the control equipment in accordance with the following requirements:

(a) For a tank equipped with a fixed roof and internal floating roof in accordance with the requirements of subsection (1)(a) of this section, the owner or operator shall perform the inspection and monitoring requirements specified in Section 11(2)(a) of 401 KAR 35:281.

(b) For a tank equipped with an external floating roof in accordance with the requirements of subsection (1)(b) of this section, the owner or operator shall perform the inspection and monitoring requirements specified in Section 11(2)(b) of 401 KAR 35:281.

(3) The owner or operator shall record the following information in the operating record in accordance with the requirements of Section 9(1)(a) and (k) of this administrative regulation:

(a) For a tank equipped with a fixed roof and internal floating roof in accordance with the requirements of subsection (1)(a) of this section, the owner or operator shall record the information listed in Section 11(3)(a) of 401 KAR 35:281.

(b) For a tank equipped with an external floating roof in accordance with the requirements of subsection (1)(b) of this section, the owner or operator shall record the information listed in Section 11(3)(b) of 401 KAR 35:281.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed regulation affects owners and operators of hazardous waste facilities that treat, store, or dispose of hazardous waste in tanks, surface impoundments, or containers.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

ADMINISTRATIVE REGISTER - 2051

1. First year following implementation: No public comments were received.
2. Second and subsequent years: No public comments were received.
3. Effects on the promulgating administrative body:
 - a. Direct and indirect costs or savings:
 1. First year: There will be no costs or savings.
 2. Continuing costs or savings: There will be no extra costs or savings.
 3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.
 - b. Reporting and paperwork requirements: There are not any additional paperwork or reporting requirements.
4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state or local revenues.
5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are anticipated to be used for the implementation and enforcement of the regulation.
6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:
 - a. Geographical area in which administrative regulation will be implemented: No public comments were received.
 - b. Kentucky: No public comments were received.
7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. This administrative regulation is consistent with federal standards.
8. Assessment of expected benefits of the administrative regulation: This administrative regulation provides consistency with federal standards.
 - 9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The implementation of this regulation will improve public health and the environment across the commonwealth.
 - b. State whether a detrimental effect on the environment and public health would result if not implemented: Yes, detrimental effects could occur without the implementation of this regulation.
 - c. If detrimental effect would result, explain detrimental effect: The air emissions subject to this regulation could harm human health and the environment without the implementation of this regulation.
10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.
 - a. Necessity of proposed regulation if in conflict: Not applicable.
 - b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.
11. Any additional information or comments: There are no additional comments.
12. TIERING: Is tiering applied? Yes, tiering was used. This administrative regulation applies to owners and operators of hazardous waste facilities that treat, store, or dispose of hazardous waste and is consistent with federal standards.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.
2. State compliance standards: The proposed regulation adopts changes that apply to air emission standards for tanks, surface impoundments, and containers. The regulation is necessary to maintain consistency between state and federal programs. The regulation clarifies the applicability of the standards. In addition, the

regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that stores, treats, or disposes of hazardous waste in tanks, surface impoundments, or containers.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies affected by this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 35:005. Definitions Related to 401 KAR Chapter 35.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10, 265.141, 265.1031, 265.1051, 265.1081

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-510 and establishes the general provisions applicable to generators of hazardous waste. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some

terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 35 shall have the meanings given in this section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfarm and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the

liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed;

however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; or ~~and~~

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that

acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or

over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure [and postclosure] cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~"Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~

(59) "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

(59) ~~(60)~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

(60) ~~(61)~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) ~~(62)~~ "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) ~~(63)~~ "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only

accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) ~~(64)~~ "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) ~~(65)~~ "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) ~~(66)~~ "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ~~"Disposal" shall have the meaning specified in KRS 224.01-010.~~

(69) "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) ~~(70)~~ "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) ~~(71)~~ "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) ~~(72)~~ "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) ~~(73)~~ "Draft permit" shall have the same meaning as "proposed permit".

(73) ~~(74)~~ "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) ~~(75)~~ "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) ~~(76)~~ "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) ~~(77)~~ "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) ~~(78)~~ "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) ~~(79)~~ "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered

in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by 401 KAR 34:275. [this administrative regulation.]

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun;

or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-

deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (for example [e-g-], one (1) or more landfills, surface impoundments, or combinations of them.)

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the

solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

~~(113) ["Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

~~(114) "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.~~

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~(120) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste

management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) ~~(122)~~ "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

~~(123) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]~~

(125) ~~(124)~~ "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) ~~(125)~~ "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) ~~(126)~~ "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) ~~(127)~~ "In existence" shall have the same meaning as "existing."

(129) ~~(128)~~ "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) ~~(129)~~ "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) ~~(130)~~ "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) ~~(131)~~ "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) ~~(132)~~ "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) ~~(133)~~ "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(135) ~~(134)~~ "In vapor service" shall have the same meaning as "in gas service".

(136) ~~(135)~~ "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall

is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(136)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(137)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(138)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(139)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(140)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(141)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

- (a) Cement kilns;
- (b) Lime kilns;
- (c) Aggregate kilns;
- (d) Phosphate kilns;
- (e) Coke ovens;
- (f) Blast furnaces;

(g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

- (h) Titanium dioxide chloride process oxidation reactors;
- (i) Methane reforming furnaces;
- (j) Pulp liquor recovery furnaces;

(k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or

(m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(142)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(143)] "Injection well" means a well into which fluids are injected to achieve subsurface emplacement.

(145) [(144)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(145)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(146)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(147)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(148)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

(150) [(150)] "IUC well" means a ~~underground injection control well as provided in 40 CFR Part 144.~~

(151) [(151)] "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) [(152)] "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) [(153)] "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) [(154)] "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) [(155)] "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) [(156)] "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) [(157)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) [(158)] "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

(159) [(159)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(159) [(159)] "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) [(160)] "Leachate" means any liquid including any suspended

components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) "Manifest" shall have the meaning specified in KRS 224.01-010.

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170) "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) "New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.

(180) "New tank component" shall have the same meaning as "new tank system."

(181) ~~[(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device

to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit by rule, registered permit by rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the

requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for hazardous [solid] waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 [40 CFR Part 264].

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-

producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) "Storage" shall have the meaning specified in KRS 224.01-010.

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

(266) [(265)] "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed, or stored elsewhere.

[(266)] "Storage" shall have the meaning specified in KRS 224.01-010.]

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

[(278)] "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means :

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;
4. The efficiency of a treatment process for a specific waste or wastes; or

5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

(289) [(288)] "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

[(289) "Treatment" shall have the meaning specified in KRS 224.01-010.]

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) [(292)] "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) [(293)] "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) [(294)] "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) [(295)] "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

(a) Batteries as described in Section 2 of 401 KAR 43:010;

(b) Pesticides as described in Section 3 of 401 KAR 43:010;

(c) Thermostats as described in Section 4 of 401 KAR 43:010; and

(d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) [(296)] "Universal waste handler":

(a) Means:

1. A generator of universal waste; or

2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(314)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update 1, November 15, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

[(314)] "Waste" shall have the meaning specified in KRS 224.01-040.]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

[(318)] "Water" or "Waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(319)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or

tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(321)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

| Am. | Amended |
|-----------------|---|
| C | Corrosive waste |
| CAA | Clean Air Act, as amended |
| CFR | Code of Federal Regulations |
| cm | Centimeter |
| cm ² | Centimeter squared |
| CO | Carbon monoxide |
| CO ₂ | Carbon dioxide |
| CWA | Clean Water Act, as amended |

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: No requirements have been imposed to affect costs and savings.

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local

government? Yes. If yes, complete questions 2-4.

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 35. These terms are assimilated from existing state and federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 35, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

**NATURAL RESOURCES AND
ENVIRONMENTAL PROTECTION CABINET
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)**

401 KAR 35:050. Manifest system, recordkeeping and reporting (IS).

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 224.50, 224.99, 40 CFR 265 Subpart E

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-520 and to establish the manifest system, recordkeeping and reporting requirements for facilities. **This administrative regulation is equivalent to federal standards established in 40 CFR 265 Subpart E except for Section 4(2)(i) of this administrative regulation, which deletes unnecessary federal language; and Section 6 of this administrative regulation, which requires annual reporting to track transportation of manifested hazardous waste in compliance with KRS 224 Subchapter 46.**

Section 1. Applicability. The requirements in this administrative regulation apply to owners and operators of both on-site and off-site facilities, except as Section 1 of 401 KAR 35:010 provides otherwise. Sections 2, 3 and 7 of this administrative regulation do not apply to owners and operators of on-site facilities that do not receive any hazardous waste from off-site sources.

Section 2. Use of Manifest System. (1) If a facility receives hazardous waste accompanied by a manifest, the owner or operator (or his agent) shall:

(a) Sign and date each copy of the manifest to certify that the hazardous waste covered by the manifest was received;

(b) Note any significant discrepancies in the manifest (as defined in Section 3(1) of this administrative regulation) on each copy of the manifest;

(c) Immediately give the transporter at least one (1) copy of the signed manifest;

(d) Within thirty (30) days after the delivery, send a copy of the manifest to the generator; and

(e) Retain at the facility a copy of each manifest for at least three (3) years from the date of delivery.

(2) If a facility receives from a rail or water (bulk shipment) transporter hazardous waste which is accompanied by a shipping paper containing all the information required on the manifest (excluding the EPA identification numbers, generator's certification and signatures), the owner or operator (or his agent) shall:

(a) Sign and date each copy of the manifest or shipping paper (if the manifest has not been received) to certify that the hazardous waste covered by the manifest or shipping paper was received;

(b) Note any significant discrepancies (as defined in Section 3(1) of this administrative regulation) in the manifest or shipping paper (if the manifest has not been received) on each copy of the manifest or shipping paper;

(c) Immediately give the rail or water (bulk shipment) transporter at least one (1) copy of the manifest or shipping paper (if the manifest has not been received);

(d) Within thirty (30) days after the delivery, send a copy of the signed and dated manifest to the generator; however, if the manifest has not been received within thirty (30) days after delivery, the owner or operator (or his agent) shall send a copy of the shipping paper signed and dated to the generator; and

(e) Retain at the facility a copy of the manifest and shipping paper (if signed in lieu of the manifest at the time of delivery) for at least three (3) years from the date of delivery.

(3) Whenever a shipment of hazardous waste is initiated from a facility, the owner or operator of the facility shall comply with the requirements of 401 KAR Chapter 32.

Section 3. Manifest Discrepancies. (1) Manifest discrepancies are differences between the quantity or type of hazardous waste designated on the manifest or shipping paper, and the quantity or type of hazardous waste a facility actually receives.

(a) Significant discrepancies in quantity are:

1. For bulk waste, variations greater than ten (10) percent in weight; and

2. For batch waste, any variation in piece count, such as a discrepancy of one (1) drum in a truckload.

(b) Significant discrepancies in type are obvious differences which can be discovered by inspection or waste analysis, such as waste solvent substituted for waste acid, or toxic constituents not reported on the manifest or shipping paper.

(2) Upon discovering a significant discrepancy, the owner or operator shall attempt to reconcile the discrepancy with the waste generator or transporter (with telephone conversations). If the discrepancy is not resolved within fifteen (15) days after receiving the waste, the owner or operator shall immediately submit to the cabinet a letter describing the discrepancy and attempts to reconcile it, and a copy of the manifest or shipping paper at issue.

Section 4. Operating Record. (1) The owner or operator shall keep a written operating record at his facility.

(2) The following information shall be recorded, as it becomes available, and maintained in the operating record until closure of the facility:

(a) A description and the quantity of each hazardous waste received, and the method and date of its treatment, storage or disposal at the facility as required by 401 KAR 35:290;

(b) The location of each hazardous waste within the facility and the quantity at each location. For disposal facilities, the location and quantity of each hazardous waste shall be recorded on a map or diagram of each cell or disposal area. For all facilities, this information shall include cross-references to specific manifest document numbers, if the waste was accompanied by a manifest (see Section 9 of 401 KAR 35:070, Section 6 of 401 KAR 35:220 and Section 3 of 401 KAR 35:230 for related requirements);

(c) Records and results of waste analyses, **waste determi-**

nations, and trial tests performed as specified in Section 4 of 401 KAR 35:020, Section 4 of 401 KAR 35:190, Section 4 of 401 KAR 35:200, Section 3 of 401 KAR 35:210, Section 3 of 401 KAR 35:220, Section 7 of 401 KAR 35:230, Section 2 of 401 KAR 35:240, Section 3 of 401 KAR 35:250, Section 3 of 401 KAR 35:260, Section 4 of 401 KAR 35:281 ~~[and Sections 4(1) and 7 of 401 KAR 37:010]~~, Section 5 of 401 KAR 35:275, ~~[and]~~ Section 14 of 401 KAR 35:280, and Sections 4(1) and 7 of 401 KAR 37:010;

(d) Summary reports and details of all incidents that require implementing the contingency plan as specified in Section 7(10) of 401 KAR 35:040;

(e) Records and results of inspections as required by Section 6(4) of 401 KAR 35:020 (except these data need be kept only three (3) years);

(f) Monitoring, testing, or analytical data when ~~[and corrective action where]~~ required by 401 KAR 35:060; Section 10 of 401 KAR 35:020; Sections 2, 4, and 6 of 401 KAR 35:190; Sections 2, 3, and 5 of 401 KAR 35:200; Sections 9, 10, and 11 of 401 KAR 35:210; Sections 4, 5 and 7(4)(a) of 401 KAR 35:220; Sections 2, 11, and 12 of 401 KAR 35:230; Section 4 of 401 KAR 35:240; and Section 4 of 401 KAR 35:250; Sections 5(3) to (6) and 6 of 401 KAR 35:275; ~~[and]~~ Sections 14(4) to (9) and 15 of 401 KAR 35:280; and Sections 9, 10, and 11 of 401 KAR 35:281;

(g) All closure cost estimates under Section 1 of 401 KAR 35:090 and for disposal facilities, all postclosure cost estimates under Section 1 of 401 KAR 35:100;

(h) Records of the quantities (and date of placement) for each shipment of hazardous waste placed in land disposal units under an extension to the effective date of any land disposal restriction granted pursuant to Section 5 of 401 KAR 37:010, monitoring data required pursuant to a petition under 401 KAR 37:010, Section 6, or a certification under 401 KAR 37:010, Section 8, and the applicable notice required of a generator under 401 KAR 37:010, Section 7(1);

(i) For an off-site treatment facility, a copy of the notice, and the certification and demonstration if applicable, required of the generator or the owner or operator under Section 7 or 8 of 401 KAR 37:010;

(j) For an on-site treatment facility, the information contained in the notice and the certification and demonstration if applicable, required of the generator or the owner or operator under Section 7 or 8 of 401 KAR 37:010;

(k) For an off-site land disposal facility, a copy of the notice, and the certification and demonstration if applicable, required of the generator or owner or operator of a treatment facility under Section 7 or 8 of 401 KAR 37:010;

(l) For an on-site land disposal facility, the information contained in the notice (except the manifest number), and the certification and demonstration if applicable, required of the generator or the owner or operator under Section 7 or 8 of 401 KAR 37:010;

(m) For an off-site storage facility, a copy of the notice, and the certification and demonstration if applicable, required of the generator or the owner or operator under 401 KAR 37:010, Section 7 or 8; and

(n) For an on-site storage facility, the information contained in the notice (except the manifest number), and the certification and demonstration if applicable, required of the generator or the owner or operator of a treatment facility under Section 7 or 8 of 401 KAR 37:010.

Section 5. Availability, Retention, and Disposition of Records. (1) All records, including plans, required under this chapter shall be furnished upon request, and made available at all reasonable times for inspection, by any officer, employee or representative of the cabinet who is duly designated by the secretary.

(2) The retention period for all records required under this chapter is extended automatically during the course of any unresolved enforcement action regarding the site or facility or as requested by the cabinet.

(3) A copy of records of waste disposal locations and quantities

under Section 4(2)(b) of this administrative regulation shall be submitted to the cabinet and local land authority upon closure of the facility (see Section 9 of 401 KAR 35:070).

Section 6. Annual Report. The owner or operator shall prepare and submit a single copy of the Hazardous Waste Annual Report, DEP Form 7072-91, incorporated by reference in Section 5 of 401 KAR 32:040, [an annual report] to the cabinet by March 1 of each year. ~~The Hazardous Waste Annual Report [report form and instructions designated by the cabinet shall be used for this report. The annual report]~~ shall cover site or facility activities during the previous calendar year, ~~[and shall include at a minimum the following information:~~

~~(1) The EPA identification number, name and address of the facility;~~

~~(2) The calendar year covered by the report;~~

~~(3) For off-site facilities, the name and EPA identification number of each hazardous waste generator from which the facility received a hazardous waste during the year; for imported shipments, the name, number and address of the foreign generator;~~

~~(4) A description and the quantity of each hazardous waste the facility received during the year. For off-site facilities, this information shall be listed by EPA identification number of each generator;~~

~~(5) The method of treatment, storage or disposal for each hazardous waste;~~

~~(6) Monitoring data under Section 5(1)(b)2 and 3, and (2)(b) of 401 KAR 35:060, where required;~~

~~(7) Information on transportation, the use of the manifest, and other information from the manifest, as applicable;~~

~~(8) For generators who treat, store, or dispose of hazardous waste on-site, a description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated;~~

~~(9) For generators who treat, store, or dispose of hazardous waste on-site, a description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for the years prior to 1984; and~~

~~(10) The certification signed by the owner or operator of the facility or his authorized representative.]~~

Section 7. Unmanifested Waste Report. If a facility accepts for treatment, storage, or disposal any hazardous waste from an off-site source without an accompanying manifest, or without an accompanying shipping paper as described in Section 1(5)(b) of 401 KAR 33:020, and if the waste is not excluded from the manifest requirement by Section 5 of 401 KAR 31:010, then the owner or operator shall prepare and submit a single copy of a report to the cabinet within fifteen (15) days after receiving the waste. The unmanifested waste report shall be submitted on a form approved by the cabinet. Such report shall be designated "Unmanifested Waste Report" and shall include the following information:

(1) The EPA identification number, name and address of the facility;

(2) The date the facility received the waste;

(3) The EPA identification number, name and address of the generator and the transporter, if available;

(4) A description and the quantity of each unmanifested hazardous waste the facility received;

(5) The method of treatment, storage or disposal for each hazardous waste;

(6) The certification signed by the owner or operator of the facility or his authorized representative; and

(7) A brief explanation of why the waste was unmanifested, if known.

Section 8. Additional Reports. In addition to submitting the annual report and unmanifested waste reports described in Sections 6 and

7 of this administrative regulation, the owner or operator shall also report to the cabinet:

- (1) Releases, fires and explosions as specified in Section 7(10) of 401 KAR 35:040;
- (2) Groundwater contamination and monitoring data as specified in Sections 4 and 5 of 401 KAR 35:060;
- (3) Facility closure as specified in Section 6 of 401 KAR 35:070; and
- (4) As otherwise required by 401 KAR 35:275, 401 KAR 35:280, 401 KAR 35:281, and 401 KAR 35:290.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221.

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of on-site and off-site hazardous waste interim status facilities.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The existing staff of the agency will have an increased workload in order to process the newly regulated entities.

2. Continuing costs or savings: Once the new entities are processed, there will not be any extra costs.

3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.

b. Reporting and paperwork requirements: There are no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are anticipated to be used for the implementation and enforcement of the regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. These changes are consistent with federal standards.

8. Assessment of expected benefits of the administrative regulation: The expected benefit is consistency with the current

federal standards.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The public health and environmental welfare will improve across the commonwealth with the implementation of this regulation

b. State whether a detrimental effect on the environment and public health would result if not implemented: There would be detrimental effects if this regulation is not implemented.

c. If detrimental effect would result, explain detrimental effect: Human health and the environment could be threatened without the implementation of this regulation.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, duplicate, or overlap this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Yes, tiering was applied. This administrative regulation applies to on-site and off-site hazardous waste interim status facilities across the commonwealth, consistent with federal standards, to protect the environment and human health. Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes that apply to on-site and off-site hazardous waste interim status sites. The changes are necessary to maintain consistency between state and federal programs. Additions and exclusions have been made to clarify the applicability of the standards. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages on-site and off-site hazardous waste interim status facilities.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of

all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies affected by this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

ENVIRONMENTAL PROTECTION CABINET**
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)

401 KAR 35:120. Liability requirements (IS).

RELATES TO: KRS 224.10, 224.40, 224.43, 224.46, 224.99, 40 CFR 265.147

STATUTORY AUTHORITY: KRS 224.46-505, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-505, 224.46-520, and 224.46-530 relative to liability requirements for hazardous waste sites or facilities qualifying for interim status. This administrative regulation is equivalent to federal standards established in 40 CFR 265.147 except for: Section 2(1)(b) of this administrative regulation, which adds a reference to applicable statutory requirements; Sections 1(7) and 2(8) of this administrative regulation, which provide an historical reference to determine prior compliance; Section 5 of this administrative regulation, which is modified to maintain consistency with KRS 224.46-520; and this administrative regulation provides state forms equivalent to federal mechanisms for financial assurance.

Section 1. Coverage for Sudden Accidental Occurrences. An owner or operator of a hazardous waste treatment, storage, or disposal facility, or a group of such facilities, shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by sudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator shall have and maintain liability coverage for sudden accidental occurrences in the amount of at least \$1,000,000 per occurrence with an annual aggregate of at least \$2,000,000, exclusive of legal defense costs. This liability coverage may be demonstrated as specified in subsections (1) to (6) of this section.

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this section.

(a) Each insurance policy shall be amended by attachment of the Hazardous Waste Facility Liability Endorsement or evidenced by a Certificate of Liability Insurance. The Hazardous Waste Facility Liability Endorsement shall be executed on DEP Form 6035K ~~(the form)~~ incorporated by reference in Section 4 of 401 KAR 34:080. The Certificate of Liability Insurance shall be on DEP Form 6035L ~~(the form)~~ incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator shall submit an originally signed duplicate of the endorsement or the certificate of insurance to the cabinet. If request-

ed by the cabinet, the owner or operator shall provide an originally signed duplicate of the insurance policy.

(b) Each primary insurance policy shall be issued by an insurer which, at a minimum, is authorized to transact primary insurance in Kentucky except as KRS 304.11-030 provides otherwise. Each excess insurance policy shall be issued by an insurer which, at a minimum, is licensed to provide insurance as an excess or surplus lines insurer in one (1) state.

(2) An owner or operator may meet the requirements of this administrative regulation by passing a financial test or using the corporate guarantee for liability coverage as specified in Sections 6 and 7 of this administrative regulation.

(3) An owner or operator may meet the requirements of this section by obtaining a letter of credit for liability coverage as specified in Section 8 of this administrative regulation.

(4) An owner or operator may meet the requirements of this section by obtaining a surety bond for liability coverage as specified in Section 9 of this administrative regulation.

(5) An owner or operator may meet the requirements of this section by obtaining a trust fund for liability coverage as specified in Section 10 of this administrative regulation.

(6) An owner or operator may demonstrate the required liability coverage through use of combinations of the financial test, insurance, the corporate guarantee, letter of credit, surety bond, and trust fund, except that the owner or operator may not combine a financial test covering part of the liability coverage requirement with a guarantee unless the financial statement of the owner or operator is not consolidated with the financial statement of the guarantor. The amounts of coverage demonstrated shall total at least the minimum amounts required by this section. If the owner or operator demonstrates the required coverage through the use of a combination of financial assurances under this subsection, the owner or operator shall specify at least one (1) such assurance as "primary" coverage and shall specify other assurance as "excess" coverage.

(7) An owner or operator shall notify the cabinet in writing within thirty (30) days whenever:

(a) A claim results in a reduction in the amount of financial assurance for liability coverage provided by a financial instrument authorized by subsections (1) to (6) of this section; [for bodily injury or property damages caused by the operation of a hazardous waste treatment, storage, or disposal facility is made against the owner or operator or an instrument providing financial assurance for liability coverage under this section;]

(b) A Certification of Valid Claim for bodily injury or property damages caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is entered between the owner or operator and third-party claimant for liability coverage under subsections (1) through (6) of this section; or [The amount of financial assurance for liability coverage under this section provided by a financial instrument authorized by subsections (1) to (6) of this section is reduced; or]

(c) A final court order establishing a judgment for bodily injury or property damage caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is issued against the owner or operator or an instrument that is providing financial assurance for liability coverage under subsections (1) to (6) of this section.

(8) Notwithstanding any other provisions of this chapter, an owner or operator using liability insurance to satisfy the requirements of this administrative regulation may use, until October 16, 1982, a hazardous waste facility endorsement or certificate of liability insurance that does not certify that the insurer is licensed to transact the business of insurance or eligible as an excess or surplus lines insurer, in one (1) or more states.

Section 2. Coverage for Nonsudden Accidental Occurrences. An owner or operator of a surface impoundment, landfill, facility for land

disposal as specified in KRS 224.01-010, or land treatment facility which is used to manage hazardous waste, or a group of such facilities, shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by nonsudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator shall have and maintain additional liability coverage for nonsudden accidental occurrences in the amount of at least \$3,000,000 per occurrence with an annual aggregate of at least \$6,000,000, exclusive of legal defense costs. An owner or operator who is required to meet the requirements of this section may combine the required per-occurrence coverage levels for sudden and nonsudden accidental occurrences into a single per-occurrence level, and combine the required annual aggregate coverage levels for sudden and nonsudden accidental occurrences into a single annual aggregate level. Owners or operators who combine coverage levels for sudden and nonsudden accidental occurrences shall maintain liability coverage in the amount of at least \$4 million per occurrence and \$8 million annual aggregate. This liability coverage may be demonstrated as specified in subsections (1) to (6) of this section:

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this section.

(a) Each insurance policy shall be amended by attachment of the Hazardous Waste Facility Liability Endorsement or evidenced by a Certificate of Liability Insurance. The Hazardous Waste Facility Liability Endorsement shall be executed on DEP Form 6035K ~~(the form)~~ incorporated by reference in Section 4 of 401 KAR 34:080. The Certificate of Liability Insurance shall be executed ~~(in accordance with 401 KAR 34:176)~~ on DEP 6035L ~~(the form)~~ incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator shall submit an originally signed duplicate of the endorsement or the certificate of insurance to the cabinet. If requested by the cabinet, the owner or operator shall provide an originally signed duplicate of the insurance policy.

(b) Each primary insurance policy shall be issued by an insurer which, at a minimum is authorized to transact the business of primary insurance in Kentucky except as KRS 304.11-030 provides otherwise. Each excess insurance policy shall be issued by an insurer which, at a minimum is authorized to provide insurance as an excess or surplus lines insurer in one (1) state.

(2) An owner or operator shall notify the cabinet in writing within thirty (30) days whenever:

(a) A claim results in a reduction in the amount of financial assurance for liability coverage provided by a financial instrument authorized by subsections (1) to (6) of this section; [A claim for bodily injury or property damages caused by the operation of a hazardous waste treatment, storage, or disposal facility is made against the owner or operator or against an instrument providing financial assurance for liability coverage under this section;]

(b) A Certification of Valid Claim for bodily injury or property damages caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is entered between the owner or operator and third-party claimant for liability coverage under subsections (1) through (6) of this section; or [The amount of financial assurance for liability coverage under this section, provided by a financial instrument authorized by this subsection, is reduced; or]

(c) A final court order establishing a judgment for bodily injury or property damage caused by a sudden or nonsudden accidental occurrence arising from the operation of a hazardous waste treatment, storage, or disposal facility is issued against the owner or operator or ~~against~~ an instrument that is providing financial assurance for liability coverage under subsections (1) to (6) of this section.

(3) An owner or operator may meet the requirements of this administrative regulation by passing a financial test, or using the corporate guarantee for liability coverage as specified in Sections 6 and 7 of this administrative regulation.

(4) An owner or operator may meet the requirements of this

section by obtaining a letter of credit for liability coverage as specified in Section 8 of this administrative regulation.

(5) An owner or operator may meet the requirements of this section by obtaining a surety bond for liability coverage as specified in Section 9 of this administrative regulation.

(6) An owner or operator may meet the requirements of this section by obtaining a trust fund for liability coverage as specified in Section 10 of this administrative regulation.

(7) An owner or operator may demonstrate the required liability coverage through use of combinations of the financial test, insurance, the corporate guarantee, letter of credit, surety bond, and trust fund, except that the owner or operator may not combine a financial test covering part of the liability coverage requirement with a guarantee unless the financial statement of the owner or operator is not consolidated with the financial statement of the guarantor. The amounts of coverage demonstrated shall total at least the minimum amounts required by this section. **If the owner or operator demonstrates the required coverage through the use of a combination of financial assurance under this section, the owner or operator shall specify at least one (1) such assurance as "primary" coverage and shall specify other assurance as "excess" coverage.**

(8) The required liability coverage for nonsudden accidental occurrences shall be demonstrated by the dates listed below. The total sales or revenues of the owner or operator in all lines of business, in the fiscal year preceding October 8, 1982, shall determine which of the dates apply. If the owner and operator of a facility are two (2) different parties, or if there is more than one (1) owner or operator, the sales or revenues of the owner or operator with the largest sales or revenues shall determine the date by which the coverage shall be demonstrated. The dates are as follows:

(a) For an owner or operator with sales or revenues totaling \$10,000,000 or more, February 24, 1983.

(b) For an owner or operator with sales or revenues greater than \$5,000,000 but less than \$10,000,000, February 24, 1984.

(c) For all other owners or operators, February 24, 1985.

(9) Notwithstanding any other provisions of this chapter, an owner or operator using liability insurance to satisfy the requirements of this administrative regulation may use, until October 16, 1982, a hazardous waste facility endorsement or certificate of liability insurance that does not certify that the insurer is licensed to transact the business of insurance or eligible as an excess or surplus lines insurer, in one (1) or more states.

Section 3. Adjustments by the Cabinet. If the cabinet determines that the levels of financial responsibility required by Sections 1 and 2 of this administrative regulation are not consistent with the degree and duration of risks associated with treatment, storage, or disposal at any facility or group of facilities, the cabinet may increase the level of financial responsibility required under Sections 1 and 2 of this administrative regulation as may be necessary to protect human health and the environment. This adjusted level shall be based on the cabinet's assessment of the degree and duration of risks associated with the ownership or operation of each facility or group of facilities. In addition, if the cabinet determines that there is a significant risk to human health and the environment from nonsudden accidental occurrences resulting from the operations of a facility that is not a surface impoundment, landfill, or land treatment facility, the cabinet may require that the owner or operator of the facility comply with Section 2 of this administrative regulation. An owner or operator shall furnish to the cabinet, within a reasonable time, any information which the cabinet requests to determine whether cause exists for such adjustments of the level or type of coverage. Any adjustment of the level of required coverage for a facility that has a permit shall be treated as a permit modification under Section 2(1)(e) of 401 KAR 38:040 and subject to the procedures of Section 2 of 401 KAR 38:050. Notwithstanding any other provision, the cabinet may hold a public hearing at its discretion or whenever the cabinet finds, on the

basis of requests for a public hearing, a significant degree of public interest in a tentative decision to adjust the level or type of required coverage.

Section 4. Request for a Variance. If an owner or operator can demonstrate to the satisfaction of the cabinet that the increased level of financial responsibility required by Section 1 or 2 of this administrative regulation is not consistent with the degree and duration of risks associated with the treatment, storage, or disposal at each facility or group of facilities, the owner or operator may obtain a variance from the cabinet. The request for a variance shall be submitted to the cabinet in writing. The cabinet shall not grant any requests for a variance which seek to decrease the level of financial responsibility below the minimums required by KRS 224.46-520(3)(c). If granted, the variance shall take the form of an adjusted level of required liability coverage, such level to be based on the cabinet's assessment of the degree and duration of risks associated with the ownership or operation of each facility or group of facilities. The cabinet may require an owner or operator who requests a variance to provide such technical and engineering information as is deemed necessary by the cabinet to determine a level of financial responsibility other than that required by Sections 1 and 2 of this administrative regulation. Any request for a variance for a permitted facility shall be treated as a request for a permit modification under Section 2 of 401 KAR 38:040 and subject to the procedures of Section 2 of 401 KAR 38:050. Notwithstanding any other provision, the cabinet may hold a public hearing at its discretion or whenever the cabinet finds, on the basis of requests for a public hearing, a significant degree of public interest in a tentative decision to grant a variance.

Section 5. Period of Coverage. An owner or operator shall continuously provide liability coverage for a facility as required by this administrative regulation until certification of termination pursuant to the requirements of KRS 224.46-520.

Section 6. Liability Self-insurance. (1) An owner or operator may satisfy the requirements of this administrative regulation by demonstrating that he passes a financial test as specified in this section. To pass this test the owner or operator shall demonstrate that the level of self-insurance does not exceed ten (10) percent of equity and shall meet the criteria of either paragraph (a) or (b) of this subsection:

(a) The owner or operator shall have:

1. Net working capital and tangible net worth each at least six (6) times the amount of liability coverage to be demonstrated by this test; and

2. Tangible net worth of at least \$10 million; and

3. Assets in the United States amounting to either, at least, ninety (90) percent of his total assets or, at least six (6) times the amount of liability coverage to be demonstrated by this test.

(b) The owner or operator shall have:

1. A current rating for his most recent bond issuance of AAA, AA, A, or BBB as issued by Standard and Poor's or Aaa, Aa, A, or Baa as issued by Moody's; and

2. Tangible net worth of at least \$10 million; and

3. Tangible net worth at least six (6) times the amount of the liability coverage to be demonstrated by this test; and

4. Assets located in the United States amounting to either, at least, ninety (90) percent of his total assets or, at least, six (6) times the amount of the liability coverage to be demonstrated by this test.

(2) The phrase "amount of liability coverage" as used in subsection (1) of this section refers to the annual aggregate amounts for which coverage is required under Sections 1 and 2 of this administrative regulation.

(3) To demonstrate that he meets this test, the owner or operator shall submit the following three (3) items to the cabinet:

(a) A letter signed by the owner's or operator's chief financial officer and executed on the form entitled Letter from Chief Financial

Officer to Demonstrate Liability Coverage or to Demonstrate Liability Coverage and Assurance of Closure or Postclosure Care, DEP Form 6035G, incorporated by reference in Section 4 of 401 KAR 34:080. If an owner or operator is using the financial test to demonstrate both liability coverage and assurance for closure or postclosure care (as specified by Section 8 of 401 KAR 34:090, Section 8 of 401 KAR 34:100, Section 7 of 401 KAR 35:090, and Section 7 of 401 KAR 35:100), he shall submit the letter on the form entitled Letter from Chief Financial Officer to Demonstrate Liability Coverage or to Demonstrate Liability Coverage and Assurance of Closure or Postclosure Care, DEP Form 6035G, incorporated by reference in Section 4 of 401 KAR 34:080, to cover both forms for financial responsibility a separate letter is not required;

(b) A copy of the independent certified public accountant's report on examination of the owner's or operator's financial statements for the latest completed fiscal year; and

(c) A special report from the owner's or operator's independent certified public accountant to the owner or operator stating that:

1. He has compared the data which the letter from the chief financial officer specifies as having been derived from the independently audited, year-end financial statements for the latest fiscal year with the amounts in such financial statements; and

2. In connection with that procedure, no matters came to his attention which caused him to believe that the specified data should be adjusted.

(d) The owner or operator may obtain a one (1) time extension of the time allowed for submission of the documents specified in subsection (3) of this section if the fiscal year of the owner or operator ends during the ninety (90) days prior to the effective date of this administrative regulation and if the year-end financial statements for that fiscal year will be audited by an independent certified public accountant. The extension shall end no later than ninety (90) days after the end of the owner's or operator's fiscal year. To obtain the extension, the owner's or operator's chief financial officer is required to send a letter to the cabinet. This letter from the chief financial officer shall:

1. Request the extension;

2. Certify that he has grounds to believe that the owner or operator meets the criteria of the financial test;

3. Specify for each facility to be covered by the test the EPA identification number, name, address, the amount of liability coverage and, when applicable, current closure and postclosure cost estimates to be covered by the test;

4. Specify the date ending the owner's or operator's last complete fiscal year before the effective date of these administrative regulations;

5. Specify the date, no later than ninety (90) days after the end of such fiscal year, when he will submit the documents specified in subsection (3) of this section; and

6. Certify that the year-end financial statements of the owner or operator for such fiscal year will be audited by an independent certified public accountant.

(4) An owner or operator of a new facility shall submit the items specified in subsection (3) of this section to the cabinet at least sixty (60) days before the date on which hazardous waste is first received for treatment, storage or disposal.

(5) After the initial submission of items specified in subsection (3) of this section, the owner or operator shall send updated information to the cabinet within ninety (90) days after the close of each succeeding fiscal year. This information shall consist of all three (3) items specified in subsection (3) of this section.

(6) If the owner or operator no longer meets the requirements of subsection (1) of this section, he shall obtain insurance, a letter of credit, a surety bond, a trust fund, or a corporate guarantee for the entire amount of required liability coverage as specified in this administrative regulation. Evidence of liability coverage [insurance] shall be submitted to the cabinet within ninety (90) days after the end

of the fiscal year for which the year-end financial data show that the owner or operator no longer meets the test requirements.

(7) The cabinet may, based on a reasonable belief that the owner or operator may no longer meet the requirements of subsection (1) of this section, require reports of financial condition at any time from the owner or operator in addition to those specified in subsection (3) of this section. If the cabinet finds, on the basis of such reports or other information, that the owner or operator no longer meets the requirements of subsection (1) of this section, the owner or operator shall provide liability insurance as specified in this administrative regulation within thirty (30) days after notification of such a finding.

(8) The cabinet may disallow use of this test on the basis of qualifications in the opinion expressed by the independent certified public accountant in his report on examination of the owner's or operator's financial statements (see subsection (3)(c) of this section). An adverse opinion or a disclaimer of opinion shall be cause for disallowance. The cabinet shall evaluate other qualifications on an individual basis. The owner or operator shall provide liability insurance for the entire amount of liability coverage as specified in this administrative regulation within thirty (30) days after notification of the disallowance.

Section 7. Corporate Guarantee for Liability Coverage. (1) Subject to subsection (2) of this section, an owner or operator may meet the requirements of this administrative regulation by obtaining a written guarantee, referred to as Corporate Guarantee for Liability Coverage, [hereinafter referred to as "corporate guarantee."] The guarantor shall be the direct or higher-tier parent corporation of the owner or operator a firm whose parent corporation is also the parent corporation of the owner or operator, or a firm with a substantial business relationship with the owner or operator. The guarantor shall meet the requirements for owners or operators in Section 6(1) to (7) of this administrative regulation. The Corporate Guarantee for Liability Coverage shall be executed on DEP Form 6035H2 [the form] incorporated by reference in Section 4 of 401 KAR 34:080. A certified copy of the Corporate Guarantee for Liability Coverage shall accompany the items sent to the cabinet as specified in Section 6(3) of this administrative regulation. One (1) of these items shall be the letter from the guarantor's chief financial officer. If the guarantor's parent corporation is also the parent corporation of the owner or operator, this letter shall describe the value received in consideration of the guarantee. If the guarantor is a firm with a substantial business relationship with the owner or operator, this letter shall describe the substantial business relationship and the value received in consideration of the guarantee. The terms of the Corporate Guarantee for Liability Coverage shall provide that:

(a) If the owner or operator fails to satisfy a judgment based on a determination of liability for bodily injury or property damage to third parties caused by sudden or nonsudden accidental occurrences (or both as the case may be), arising from the operation of facilities covered by this Corporate Guarantee for Liability Coverage, or fails to pay an amount agreed to in settlement of claims arising from or alleged to arise from such injury or damage, the guarantor shall do so up to the limits of coverage.

(b) The Corporate Guarantee for Liability Coverage shall remain in force unless the guarantor sends notice of cancellation by certified mail to the owner or operator and to the cabinet. This guarantee may not be terminated unless and until the cabinet approves alternate liability coverage complying with 401 KAR 35:120 or this administrative regulation.

(2)(a) In the case of corporations incorporated in the United States, a Corporate Guarantee for Liability Coverage may be used to satisfy the requirements of this administrative regulation only if the Attorney General or insurance commissioner of the state in which the guarantor is incorporated, each state in which a facility covered by the guarantee is located and in the state in which it has its principle place of business, have submitted a written statement to the director that a

Corporate Guarantee for Liability Coverage executed as described in this administrative regulation and is a legally valid and enforceable obligation in that state and in Kentucky.

(b) In the case of corporations incorporated outside of the United States, a Corporate Guarantee for Liability Coverage may be used to satisfy the requirements of this section only if the non-U.S. corporation has identified a registered agent for service of process in each state in which a facility covered by the guarantee is located, and in the state in which it has its principle place of business, and the Attorney General or insurance commissioner of each state in which a facility covered by the guarantee is located, and the state in which the guarantor corporation has its principle place of business, and the cabinet's Department of Law or the insurance commissioner of Kentucky has submitted a written statement to the cabinet that a Corporate Guarantee for Liability Coverage executed as described in this section and is a legally valid and enforceable obligation in that state and in Kentucky.

(c) A corporate guarantee may be used to satisfy the requirements of this administrative regulation only if the assets to be collected are located in the United States. Failure to provide the written statement referenced in paragraphs (a) and (b) of this subsection shall be grounds for denial of the instrument.

Section 8. Letter of Credit for Liability Coverage. (1) An owner or operator may satisfy the requirements of this section by obtaining an irrevocable stand-by letter of credit that conforms to the requirements of this administrative regulation and submitting a copy of the letter of credit to the cabinet. The irrevocable standby letter of credit may be submitted on either DEP Form 6035Q or DEP 6035N. The Irrevocable Standby Letter of Credit to Demonstrate Liability Coverage, DEP Form 6035Q and the Irrevocable Standby Letter of Credit to Demonstrate Liability Coverage with Standby Trust Agreement, DEP Form 6035N are incorporated by reference in Section 4 of 401 KAR 34:080. The owner or operator may use his own document, provided the language is identical to that specified in either DEP Form 6035Q or 6035N. If the owner or operator chooses to establish a trust fund as described in subsection (4) of this section, DEP Form 6035N shall be submitted along with the standby trust agreement as specified in subsection (5) of this section.

(2) The financial institution issuing the letter of credit shall be an entity that has the authority to issue letters of credit and whose letter of credit operations are regulated and examined by the federal or state agency.

(3) The letter of credit shall be submitted on the form incorporated by reference in Section 4 of 401 KAR 34:080.

(4) An owner or operator who uses a letter of credit to satisfy the requirements of this section may also establish a standby trust fund. Under the terms of such a letter of credit, all amounts paid pursuant to a draft by the trustee of the standby trust will be deposited by the issuing institution into the standby trust in accordance with instructions from the trustee. The trustee of the standby trust fund shall be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(5) The standby trust shall be submitted on DEP Form 6035R entitled "Standby Trust Agreement for Letter of Credit Demonstrating Liability Coverage", [the form] incorporated by reference in Section 4 of 401 KAR 34:080.

Section 9. Surety Bond for Liability Coverage. (1) An owner or operator may satisfy the requirements of this section by obtaining a Payment Bond to Demonstrate Liability Coverage [surety bond] that conforms to the requirements of this administrative regulation and submitting a copy of the bond to the cabinet.

(2) The surety company issuing the bond shall be among those listed as acceptable sureties on Federal bonds in the most recent Circular 570 of the U.S. Department of the Treasury.

(3) The Payment Bond to Demonstrate Liability Coverage [letter

of credit] shall be submitted on the form incorporated by reference in Section 4 of 401 KAR 34:080.

(4) A Payment Bond to Demonstrate Liability Coverage [surety bond] may be used to satisfy the requirements of this section only if the attorney general or insurance commissioners of the state in which the surety is incorporated, and each state in which a facility covered by the Payment Bond to Demonstrate Liability Coverage [surety bond] is located have submitted a written statement to the cabinet that a Payment Bond to Demonstrate Liability Coverage [surety bond] executed on DEP Form 6035O [the form] incorporated by reference in Section 4 of 401 KAR 34:080 is a legally valid and enforceable obligation in that state.

Section 10. Trust Fund for Liability Coverage. (1) An owner or operator may satisfy the requirements of this section by establishing a trust fund that conforms to the requirements of this administrative regulation and submitting to the cabinet an originally signed duplicate of the Trust Agreement to Demonstrate Liability Coverage, executed on DEP Form 6035P, incorporated by reference in Section 4 of 401 KAR 34:080. [to the cabinet.]

(2) The trustee shall be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(3) The trust fund or liability coverage shall be funded for the full amount of the liability coverage to be provided by the trust fund before it may be relied upon to satisfy the requirements of this section. If at any time after the trust fund is created the amount of funds in the trust fund is reduced below the full amount of the liability coverage to be provided, the owner or operator, by the anniversary date of the establishment of the trust fund, shall either add sufficient funds to the trust fund to cause its value to equal the full amount of liability coverage to be provided, or obtain other financial assurance as specified in this administrative regulation to cover the difference. [For purposes of this administrative regulation, "the full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator by this administrative regulation, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.]

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221.

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of all hazardous waste sites or facilities that qualify for interim status.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments.
2. Second and subsequent years: No public comments.
3. Effects on the promulgating administrative body:
 - a. Direct and indirect costs or savings:
 1. First Year: There will be no costs or savings.
 2. Continuing costs or savings: Not applicable.
 3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.
- b. Reporting and paperwork requirements: There are no extra paperwork requirements.
4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.
5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are to be used for the implementation and enforcement of this regulation.
6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:
 - a. Geographical area in which administrative regulation will be implemented: No public comments were received.
 - b. Kentucky: No public comments were received.
7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. These changes are consistent with federal standards.
8. Assessment of expected benefits of the administrative regulation: These amendments are consistent with federal standards and clarify the procedure for demonstrating liability coverage.
- 9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: There are no effects on public health or the environment.
- b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.
- c. If detrimental effect would result, explain detrimental effect: Not applicable.
10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, policies, or regulations that conflict, overlap, or duplicate this regulation.
 - a. Necessity of proposed regulation if in conflict: Not applicable.
 - b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.
11. Any additional information or comments: No additional comments.
12. TIERING: Is tiering applied? Yes, tiering was used. This administrative regulation applies to owners and operators of hazardous waste facilities that qualify for interim status, consistent with federal standards, to protect human health and the environment. Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes including liability requirements for hazardous waste facilities who have interim status. These changes are necessary to maintain consistency between state and federal programs. Additions and exclusions have been made to clarify the applicability of the standards. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste sites or facilities that qualify for interim status.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies affected by this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 35:245. Containment buildings (IS).

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR Part 265 Subpart DD

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-520 and 224.46-530 and to establish minimum standards for containment buildings. **This administrative regulation is equivalent to federal standards established in 40 CFR 265 Subpart DD except the date of compliance has been changed to reflect the original effective date of this administrative regulation.**

Section 1. Applicability. The requirements of this administrative regulation apply to owners or operators who store or treat hazardous waste in units designed and operated under Section 2 of this administrative regulation. These provisions shall become effective on the effective date of this administrative regulation, although the owner

or operator may notify the cabinet of their intent to be bound by this administrative regulation at an earlier time. The owner or operator is not subject to the definition of land disposal in KRS 224.01-010 provided that the unit:

(1) Is a completely enclosed, self-supporting structure that is designed and constructed of manmade materials of sufficient strength and thickness to support themselves, the waste contents, and any personnel and heavy equipment that operate within the units, and to prevent failure due to pressure gradients, settlement, compression, or uplift, physical contact with the hazardous wastes to which they are exposed; climatic conditions; and the stresses of daily operation, including the movement of heavy equipment within the unit and contact of such equipment with containment walls;

(2) Has a primary barrier that is designed to be sufficiently durable to withstand the movement of personnel and handling equipment within the unit;

(3) If the unit is used to manage liquids, has:

(a) A primary barrier designed and constructed of materials to prevent migration of hazardous constituents into the barrier;

(b) A liquid collection system designed and constructed of materials to minimize the accumulation of liquid on the primary barrier; and

(c) A secondary containment system designed and constructed of materials to prevent migration of hazardous constituents into the barrier, with a leak detection and liquid collection system capable of detecting, collecting, and removing leaks of hazardous constituents at the earliest possible time, unless the unit has been granted a variance from the secondary containment system requirements under Section 2(2)(d) of this administrative regulation;

(4) Has controls as needed to prevent fugitive dust emissions to meet the no visible emission standard in Section 2(3)(a)4. of this administrative regulation; and

(5) Is designed and operated to ensure containment and prevent the migration of materials from the unit by personnel or equipment.

Section 2. Design and Operating Standards. (1) All containment buildings shall comply with the following design standards:

(a) The containment building shall be completely enclosed with a floor, walls, and a roof to prevent exposure to the elements, (for example, precipitation, wind, run-on), and to assure containment of managed wastes.

(b) The floor and containment walls of the unit, including the secondary containment system if required under subsection (2) of this section, shall be designed and constructed of materials of sufficient strength and thickness to support themselves, the waste contents, and any personnel and heavy equipment that operate within the unit, and to prevent failure due to pressure gradients, settlement, compression, or uplift, physical contact with the hazardous wastes to which they are exposed; climatic conditions; and the stresses of daily operation, including the movement of heavy equipment within the unit and contact of such equipment with containment walls. The unit shall be designed so that it has sufficient structural strength to prevent collapse or other failure. All surfaces to be in contact with hazardous wastes shall be chemically compatible with those wastes. The cabinet will consider standards established by professional organizations generally recognized by the industry such as the American Concrete Institute (ACI) and the American Society of Testing Materials (ASTM) in judging the structural integrity requirements of this subsection. If appropriate to the nature of the waste management operation to take place in the unit, an exception to the structural strength requirement may be made for light-weight doors and windows that meet these criteria:

1. They provide an effective barrier against fugitive dust emissions under subsection (3)(a)4 of this section; and

2. The unit is designed and operated in a fashion that assures that wastes will not actually come in contact with these openings.

(c) Incompatible hazardous wastes or treatment reagents shall not

be placed in the unit or its secondary containment system if they may cause the unit or secondary containment system to leak, corrode, or otherwise fail.

(d) A containment building shall have a primary barrier designed to withstand the movement of personnel, waste, and handling equipment in the unit during the operating life of the unit and appropriate for the physical and chemical characteristics of the waste to be managed.

(2) For a containment building used to manage hazardous wastes containing free liquids or treated with free liquids (the presence of which is determined by the paint filter test, a visual examination, or other appropriate means), the owner or operator shall include:

(a) A primary barrier designed and constructed of materials to prevent the migration of hazardous constituents into the barrier (for example a geomembrane covered by a concrete wear surface).

(b) A liquid collection and removal system to prevent the accumulation of liquid on the primary barrier of the containment building:

1. The primary barrier shall be sloped to drain liquids to the associated collection system; and

2. Liquids and waste shall be collected and removed to minimize hydraulic head on the containment system at the earliest practicable time that protects human health and the environment.

(c) A secondary containment system including a secondary barrier designed and constructed to prevent migration of hazardous constituents into the barrier, and a leak detection system that is capable of detecting failure of the primary barrier and collecting accumulated hazardous wastes and liquids at the earliest practicable time.

1. The requirements of the leak detection component of the secondary containment system are satisfied by installation of a system that is, at a minimum:

a. Constructed with a bottom slope of one (1) percent or more; and

b. Constructed of a granular drainage material with a hydraulic conductivity of 1×10^{-2} cm/sec or more and a thickness of twelve (12) inches (30.5 cm) or more, or constructed of synthetic or geonet drainage materials with a transmissivity of 3×10^{-5} m²/sec or more.

2. If treatment is to be conducted in the building, an area in which such treatment will be conducted shall be designed to prevent the release of liquids, wet materials, or liquid aerosols to other portions of the building.

3. The secondary containment system shall be constructed of materials that are chemically resistant to the waste and liquids managed in the containment building and of sufficient strength and thickness to prevent collapse under the pressure exerted by overlying materials and by any equipment used in the containment building. (Containment buildings can serve as secondary containment systems for tanks placed within the building under certain conditions. A containment building can serve as an external liner system for a tank, provided it meets the requirements of Section 4(4)(a) of 401 KAR 35:190. In addition, the containment building shall meet the requirements of Section 4(3)(a) and (b) of 401 KAR 35:190 to be considered an acceptable secondary containment system for a tank.)

(d) For existing units other than ninety (90) day generator units, the cabinet may delay the secondary containment requirement for up to two (2) years, based on a demonstration by the owner or operator that the unit substantially meets the standards of this administrative regulation. In making this demonstration, the owner or operator shall:

1. Provide written notice to the cabinet of their request within ninety (90) days of the effective date of this administrative regulation. This notification shall describe the unit and its operating practices with specific reference to the performance of existing containment systems, and specific plans for retrofitting the unit with secondary containment;

2. Respond to any comments from the cabinet on these plans within thirty (30) days; and

3. Fulfill the terms of the revised plans, if such plans are

approved by the cabinet.

(3) Owners or operators of all containment buildings shall:

(a) Use controls and practices to ensure containment of the hazardous waste within the unit; and, at a minimum:

1. Maintain the primary barrier to be free of significant cracks, gaps, corrosion, or other deterioration that may cause hazardous waste to be released from the primary barrier;

2. Maintain the level of the stored or treated hazardous waste within the containment walls of the unit so that the height of any containment wall is not exceeded;

3. Take measures to prevent the tracking of hazardous waste out of the unit by personnel or by equipment used in handling the waste. An area shall be designated to decontaminate equipment and any rinsate shall be collected and properly managed; and

4. Take measures to control fugitive dust emissions such that any openings (doors, windows, vents, cracks, etc.) exhibit no visible emissions (see 40 CFR Part 60, Appendix A, Method 22-Visual Determination of Fugitive Emissions from Material Sources and Smoke Emissions from Flares, incorporated by reference in 401 KAR 50:015 Section 1(1)(c)(1)qq). In addition, all associated particulate collection devices (for example, fabric filter, electrostatic precipitator) shall be operated and maintained with sound air pollution control practices. This state of no visible emissions shall be maintained effectively at all times during normal operating conditions, including when vehicles and personnel are entering and exiting the unit.

(b) Obtain certification by a qualified registered professional engineer that the containment building design meets the requirements of subsections (1) through (3) of this section. For units placed into operation prior to the effective date of this administrative regulation [~~February 18, 1993~~], this certification shall be placed in the facility's operating record (on-site files for generators who are not formally required to have operating records) no later than sixty (60) days after the date of initial operation of the unit. After the effective date of this administrative regulation [~~February 18, 1993~~], Professional Engineer certification will be required prior to operation of the unit.

(c) Throughout the active life of the containment building, if the owner or operator detects a condition that may lead to or has caused a release of hazardous waste, the owner or operator shall repair the condition promptly, in accordance with the following procedures.

1. Upon detection of a condition that has led to a release of hazardous waste (for example, upon detection of leakage from the primary barrier) the owner or operator shall:

a. Enter a record of the discovery in the facility operating record;

b. Immediately remove the portion of the containment building affected by the condition from service;

c. Determine what steps shall be taken to repair the containment building, remove any leakage from the secondary collection system, and establish a schedule for accomplishing the cleanup and repairs; and

d. Within seven (7) days after the discovery of the condition, notify the cabinet of the condition, and within fourteen (14) working days, provide a written notice to the cabinet with a description of the steps taken to repair the containment building, and the schedule for accomplishing the work.

2. The cabinet will review the information submitted, make a determination regarding whether the containment building shall be removed from service completely or partially until repairs and cleanup are complete, and notify the owner or operator of the determination and the underlying rationale in writing.

3. Upon completing all repairs and cleanup the owner or operator shall notify the cabinet in writing and provide a verification, signed by a qualified, registered professional engineer, that the repairs and cleanup have been completed according to the written plan submitted in accordance with subsection (3)(c)1d of this section.

(d) Inspect and record in the facility's operating record, at least once every seven (7) days, data gathered from monitoring equipment

and leak detection equipment as well as the containment building and the area immediately surrounding the containment building to detect signs of releases of hazardous waste.

(4) For a containment building that contains both areas with and without secondary containment, the owner or operator shall:

(a) Design and operate each area in accordance with the requirements enumerated in subsections (1) through (3) of this section;

(b) Take measures to prevent the release of liquids or wet materials into areas without secondary containment; and

(c) Maintain in the facility's operating log a written description of the operating procedures used to maintain the integrity of areas without secondary containment.

(5) The cabinet may waive requirements for secondary containment for a permitted containment building where the owner or operator demonstrates that the only free liquids in the unit are limited amounts of dust suppression liquids required to meet occupational health and safety requirements, and where containment of managed wastes and liquids can be assured without a secondary containment system.

Section 3. Closure and Postclosure Care. (1) At closure of a containment building, the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components (liners, etc.), contaminated subsoils, and structures and equipment contaminated with waste and leachate, and manage them as hazardous waste unless Section 3(4) of 401 KAR 31:010 applies. The closure plan, closure activities, cost estimates for closure, and financial responsibility for containment buildings shall meet all of the requirements specified in 401 KAR 35:070 and 35:080.

(2) If, after removing or decontaminating all residues and making all reasonable efforts to effect removal or decontamination of contaminated components, subsoils, structures, and equipment as required in subsection (1) of this section, the owner or operator finds that not all contaminated subsoils can be practicably removed or decontaminated, he shall close the containment facility and perform postclosure care in accordance with the closure and postclosure requirements of Section 4 of 401 KAR 35:230 that apply to landfills. In addition, for the purposes of closure, postclosure, and financial responsibility, such a containment building is then considered to be a landfill, and the owner or operator shall meet all of the requirements for landfills specified in 401 KAR 35:070 and 35:080.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of hazardous waste interim status facilities that store or treat hazardous waste in containment buildings.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any

effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: There are no costs or savings.

2. Continuing costs or savings: Not applicable.

3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.

b. Reporting and paperwork requirements: There are no additional paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state or local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are to be used for the implementation and enforcement of the regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. These changes are consistent with federal standards.

8. Assessment of expected benefits of the administrative regulation: These amendments provide consistency with current federal standards.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The implementation of this regulation will improve public health and the environment across the Commonwealth.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Detrimental effects could occur without the implementation of this regulation.

c. If detrimental effect would result, explain detrimental effect: Hazardous waste facilities that mismanage hazardous waste in containment buildings could cause harm to public health and the environment.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, policies, or regulations that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Yes, tiering was applied. This administrative regulation applies to owners and operators of hazardous waste interim status facilities that use containment buildings, consistent with federal standards, to protect human health and the environment. Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air

pollution.

2. State compliance standards: The proposed regulation adopts amendments that apply to storing or treating hazardous waste interim status facility. This regulation is necessary to maintain consistency between state and federal programs. This has been added to clarify the applicability of these amendments. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes. If yes, complete questions 2-4.

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that stores and treats hazardous waste in interim status containment buildings.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies affected by this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

401 KAR 36:005. Definitions related to 401 KAR Chapter 36.

RELATES TO: KRS 224.01, 224.10, 40 CFR 260.10

STATUTORY AUTHORITY: KRS 224.10-100

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-520 and 224.46-530. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky

statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 36 shall have the meanings given in this section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfill and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed

to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion

chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; or [and]

(b) A generator who generates acutely hazardous waste listed in

Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the

facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure ~~and postclosure~~ cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner or operator's chief financial officer (see 40 CFR 144.70(f)).~~

~~(59)~~ "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

~~(59)~~ ~~[(60)]~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

~~(60)~~ ~~[(61)]~~ "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

~~(61)~~ ~~[(62)]~~ "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

~~(d)~~ That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

~~(62)~~ ~~[(63)]~~ "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3)

of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) [(64)] "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) [(65)] "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) [(66)] "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ["Disposal" shall have the meaning specified in KRS 224.01-010.

(69) "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) [(70)] "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) [(71)] "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) [(72)] "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) [(73)] "Draft permit" shall have the same meaning as "proposed permit".

(73) [(74)] "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) [(75)] "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) [(76)] "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) [(77)] "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by **401 KAR 34:275**. ~~(this administrative regulation.)~~

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:
1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system

to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (for example [e.g.], one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing

from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

~~(113) ["Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

~~(114) "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.~~

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01-010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(118) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~[(119) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit for use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container

alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) [(422)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

[(123) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]

(125) [(424)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) [(425)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) [(426)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) [(427)] "In existence" shall have the same meaning as "existing."

(129) [(428)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) [(429)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) [(430)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) [(431)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) [(432)] "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) [(433)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(135) [(434)] "In vapor service" shall have the same meaning as "in gas service".

(136) [(435)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(436)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(437)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(438)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(439)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(440)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(441)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

(a) Cement kilns;

(b) Lime kilns;

(c) Aggregate kilns;

(d) Phosphate kilns;

(e) Coke ovens;

(f) Blast furnaces;

(g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

(h) Titanium dioxide chloride process oxidation reactors;

(i) Methane reforming furnaces;

(j) Pulp liquor recovery furnaces;

(k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or

(m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(442)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(443)] "Injection well" means a well into which fluids are injected to achieve subsurface emplacement.

(145) [(444)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction

materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) ~~[(145)]~~ "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) ~~[(146)]~~ "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) ~~[(147)]~~ "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) ~~[(148)]~~ "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) ~~[(149)]~~ "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

~~[(150)] "UC well" means a underground injection control well as provided in 40 CFR Part 144.]~~

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

~~[(159)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.]~~

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal

waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) "Manifest" shall have the meaning specified in KRS 224.01-010.

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170)] "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to

gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) "New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.

(180) "New tank component" shall have the same meaning as "new tank system."

(181) ~~[(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature

for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who

work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for ~~hazardous~~ ~~solid~~ waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 ~~[40 CFR Part 264]~~.

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or

whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a

liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) "Storage" shall have the meaning specified in KRS 224.01-010.

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

~~(266) [(265)] "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed, or stored elsewhere.~~

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-010.]~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic)

which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means:

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;

4. The efficiency of a treatment process for a specific waste or wastes; or

5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

~~[(289) "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.]~~

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-010;]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well").

~~[(293) "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.]~~

~~[(294) "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.]~~

~~[(295) "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.]~~

~~[(296) "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:~~

- (a) Batteries as described in Section 2 of 401 KAR 43:010;
- (b) Pesticides as described in Section 3 of 401 KAR 43:010;
- (c) Thermostats as described in Section 4 of 401 KAR 43:010;

and

(d) Spent lamps as described in Section 5 of 401 KAR 43:010.

~~[(297) "Universal waste handler":~~

(a) Means:

1. A generator of universal waste; or
2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections

4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030, disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter

of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010 [Third Edition, September 1986, as amended by Update I, November 16, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

~~[(314)] "Waste" shall have the meaning specified in KRS 224.01-010.]~~

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

~~[(318)] "Water" or "Waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]~~

ADMINISTRATIVE REGISTER - 2088

(320) [(349)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(324)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

| | |
|-----------------|---|
| Am. | Amended |
| C | Corrosive waste |
| CAA | Clean Air Act, as amended |
| CFR | Code of Federal Regulations |

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: No requirements have been imposed to affect costs and savings.

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes.

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 36. These terms are assimilated from existing state and federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 36, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 37:005. Definitions related to 401 KAR Chapter 37.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10, 268.2

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-505, 224.46-520

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-505 and 224.46-520 relative to land disposal restrictions. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 37 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank

bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfill and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part

B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or

forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; or ~~and~~

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR 34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure ~~and postclosure~~ cost estimates" means the most recent of the estimates prepared in accordance with Section

1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~

(59) "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

(59) [(60)] "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR 35:100.

(60) [(61)] "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) [(62)] "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) [(63)] "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) [(64)] "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) [(65)] "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) [(66)] "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ~~["Disposal" shall have the meaning specified in KRS 224.01-010.~~

(69) [(70)] "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) [(70)] "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) [(71)] "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) [(72)] "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) [(73)] "Draft permit" shall have the same meaning as "proposed permit".

(73) [(74)] "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) [(75)] "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) [(76)] "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) [(77)] "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in

response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by 401 KAR 34:275. ~~[this administrative regulation.]~~

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun;

or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (for example e.g., one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility

maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

(113) ~~"Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

(114) "Groundwater" means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.

(114) "Groundwater table" means the upper boundary of the

saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01.010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01.010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(118)] "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~[(119)] "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.]~~

(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.

(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.

(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling,

incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.

(124) [(122)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

~~[(123)] "Hazardous waste" shall have the meaning specified in KRS 224.01.010.]~~

(125) [(124)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the present.

(126) [(125)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(127) [(126)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).

(128) [(127)] "In existence" shall have the same meaning as "existing."

(129) [(128)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(130) [(129)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.

(131) [(130)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.

(132) [(131)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.

(133) [(132)] "In situ sampling systems" means nonextractive samplers or in-line samplers.

(134) [(133)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(135) [(134)] "In vapor service" shall have the same meaning as "in gas service."

(136) [(135)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(137) [(136)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.

(138) [(137)] "Incinerator" means any enclosed device that:

(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(b) Meets the definition of infrared incinerator or plasma arc incinerator.

(139) [(138)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under

uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(140) [(139)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(141) [(140)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.

(142) [(141)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

- (a) Cement kilns;
- (b) Lime kilns;
- (c) Aggregate kilns;
- (d) Phosphate kilns;
- (e) Coke ovens;
- (f) Blast furnaces;
- (g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);
- (h) Titanium dioxide chloride process oxidation reactors;
- (i) Methane reforming furnaces;
- (j) Pulp and liquor recovery furnaces;
- (k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;
- (l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or
- (m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(142)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(143)] "Injection well" means a well into which fluids are injected to achieve subsurface emplacement.

(145) [(144)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(145)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(146)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(147)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(148)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that

rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

[(150)] "IUC well" means a ~~underground injection control well as provided in 40 CFR Part 144.~~

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

[(159)] "Landfill" means a ~~disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.~~

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county, urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) "Manifest" shall have the meaning specified in KRS 224.01-010.

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170) "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air,~~

~~soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) "New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.

(180) "New tank component" shall have the same meaning as "new tank system."

~~[(181) [(180)] "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section 4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.~~

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 10, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit by rule, registered permit by rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using

a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for hazardous [solid] waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in 401 KAR Chapter 31 [40 CFR Part 264].

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the

drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforce-

able sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation

in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

(266) ~~[(265)]~~ "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.

~~[(266)] "Storage" shall have the meaning specified in KRS 224.01-010.~~

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) **"Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt,**

pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(279) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means:

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;
4. The efficiency of a treatment process for a specific waste or wastes; or
5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) **"Treatment" shall have the meaning specified in KRS 224.01-010.**

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable

for storage, or reduced in volume.

(289) [(289)] "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-040.]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) [(292)] "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) [(293)] "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) [(294)] "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) [(295)] "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

(a) Batteries as described in Section 2 of 401 KAR 43:010;

(b) Pesticides as described in Section 3 of 401 KAR 43:010;

(c) Thermostats as described in Section 4 of 401 KAR 43:010; and

(d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) [(296)] "Universal waste handler":

(a) Means:

1. A generator of universal waste; or

2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or

2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within

the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

(a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

(b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update 1, November 15, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

(314) [(314)] "Waste" shall have the meaning specified in KRS 224.01-010.]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) Is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

(318) [(318)] "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(319)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(321)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids; large and small, are

filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives that would achieve compliance with KRS 13A.222.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the

beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of hazardous waste generated or managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

AGENCY CONTACT: James Hale

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes.

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 37. These terms are assimilated from existing state and federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year

the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 37, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

**NATURAL RESOURCES AND
ENVIRONMENTAL PROTECTION CABINET
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)**

401 KAR 37:010. General provisions for land disposal restrictions.

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 224.70, 224.99, 40 CFR 268 Subparts A, B, Appendices IV to IX
STATUTORY AUTHORITY: KRS 224.10-100, 224.46-505, 224.46-520

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-505, 224.46-520, relative to land disposal restrictions. Applicability dates set forth in this administrative regulation are consistent with those adopted by USEPA. This administrative regulation reflects those federal dates to assure consistency with the federal program. Enforcement of applicable provisions preceding the effective date of this administrative regulation was the responsibility of USEPA. The cabinet assumed enforcement responsibility from USEPA upon the effective date of this administrative regulation. This administrative regulation is equivalent to federal standards established in 40 CFR 268 Subparts A and B and 40 CFR 268 Appendices IV, VI, VII, VIII, and X except for: Section 2(6)(d) of this administrative regulation, which includes spent lamps as a universal waste; Section 7(1) of this administrative regulation, which does not include federal language on tolling agreements that violates the statutory manifesting requirements of KRS 224 Subchapter 46; and Section 7(4)(a) of this administrative regulation, which adds language to specify what the notification shall include.

Section 1. Definitions Applicable to 401 KAR Chapter 37. The definitions previously found in this section have been relocated to the definition administrative regulation for this chapter, which is 401 KAR 37:005. [(1) When used in 401 KAR Chapter 37 the following terms have the meanings given below:

(a) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond which are listed under 401 KAR 37:110.

(b) "Hazardous constituent or constituents" means those constituents listed in 401 KAR 31:170.

(c) "Land disposal", as set forth in KRS 224.01-010, means placement in or on the land and includes, but is not limited, placement in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, underground mine or cave, or placement in a concrete vault or bunker intended for disposal purposes.

(d) "Nonwastewaters" are wastes that do not meet the criteria for wastewaters in paragraph (f) of this section.

(e) "Polychlorinated biphenyls" or "PCB" are halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1980.

(f) "Wastewaters" are wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1)

percent by weight total suspended solids (TSS), with the following exceptions:

1. ~~F001, F002, F003, F004, F005, wastewaters are solvent water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 2 of 401 KAR 37:040 in Table CCWE.~~

2. ~~K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated.~~

3. ~~K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.~~

(g) ~~"Inorganic solid debris" means nonfriable inorganic solids contaminated with D004-D011 hazardous wastes that are incapable of passing through a nine and five tenths (9.5) mm standard sieve; and that require cutting, or crushing and grinding in mechanical sizing equipment prior to stabilization; and, are limited to the following inorganic or metal materials:~~

1. ~~Metal slag (either dress or scoria);~~

2. ~~Classified slag;~~

3. ~~Glass;~~

4. ~~Concrete (excluding cementitious or pozzolanic stabilized hazardous wastes);~~

5. ~~Masonry and refractory bricks;~~

6. ~~Metal cans, containers, drums, or tanks;~~

7. ~~Metal nuts, bolts, pipes, pumps, valves, appliances, or industrial equipment;~~

8. ~~Scrap metal as defined in Section 1(3)(f) of 401 KAR 31:010.~~

(2) ~~All other terms have the meanings given under Section 1 of 401 KAR 30:010, Section 2 and 3 of 401 KAR 31:010 or Section 2 of 401 KAR 38:010.]~~

Section 2. Purpose, Scope and Applicability. (1) This chapter identifies hazardous wastes that are restricted from land disposal and defines those limited circumstances under which an otherwise prohibited waste may continue to be land disposed.

(2) Except as specifically provided otherwise in 401 KAR Chapter 31 or 37, the requirements of 401 KAR Chapter 37 apply to persons who generate or transport hazardous waste and owners and operators of hazardous waste treatment, storage, and disposal facilities.

(3) Prohibited wastes may continue to be land disposed as follows:

(a) Where persons have been granted an extension to the effective date of a prohibition under 401 KAR 37:030 or pursuant to Section 5 of this administrative regulation, with respect to those wastes covered by the extension;

(b) Where persons have been granted an exemption from a prohibition pursuant to a petition under Section 6 of this administrative regulation, with respect to those wastes and units covered by the petition;

(c) Wastes that are hazardous only because they exhibit a hazardous characteristic, and which are otherwise prohibited from land disposal under this chapter, are not prohibited from land disposal if the wastes:

1. Are disposed into a nonhazardous or hazardous injection well as defined in 40 CFR 144.6(a); and

2. Do not exhibit any prohibited characteristic of (or) hazardous waste at the point of injection; and

3. If at the point of generation the injected wastes include D001 High TOC subcategory wastes or D012 through D017 pesticide wastes that are prohibited under 40 CFR 148.17(c), those wastes have been treated to meet the treatment standards of Section 1 of 401 KAR 37:040 before injection.

(4) The requirements of this chapter shall not affect the availability of a waiver under Section 121(d)(4) of CERCLA.

(5) The following hazardous wastes are not subject to any

provision of 401 KAR Chapter 37:

(a) Waste generated by a conditionally exempt small quantity generator of less than 100 kilograms of nonacute hazardous waste or less than one (1) kilogram of acute hazardous waste per month as specified in Section 5 of 401 KAR 31:010;

(b) Waste pesticides that a farmer disposes of pursuant to Section 10 of 401 KAR 32:050;

(c) Wastes identified or listed as hazardous after November 8, 1984 for which EPA has not promulgated land disposal prohibitions or treatment standards.

(d) De minimis losses to wastewater treatment systems of commercial chemical product or chemical intermediates that are ignitable (D001), or corrosive (D002), or are organic constituents that exhibit the characteristic of toxicity (D012-D043), and that contain underlying hazardous constituents, are not considered to be prohibited wastes. De minimis is losses from normal material handling operations (for example, spills from the unloading or transfer of materials from bins or other containers, leaks from pipes, valves or other devices used to transfer materials); minor leaks of process equipment, storage tanks or containers; leaks from well-maintained pump packings and seals; sample purgings; relief device discharges; discharges from safety showers and rinsing and cleaning of personal safety equipment; and rinsate from empty containers or from containers that are rendered empty by that rinsing; or

(e) Land disposal prohibitions for hazardous characteristic wastes do not apply to laboratory wastes displaying characteristic of ignitability (D001) or corrosivity (D002), or organic toxicity (D012-D043), that are mixed with other plant wastewaters at facilities whose ultimate discharge is subject to regulation under the CWA (including wastewaters at facilities which have eliminated the discharge of wastewater), provided that the annualized flow of laboratory wastewater into the facility's headwork does not exceed one (1) percent, or provided that the laboratory wastes' combined annualized average concentration does not exceed one (1) part per million in the facility's headwork.

(6) Universal waste handlers and universal waste transporters are exempt from Section 7 of this administrative regulation and 401 KAR 37:050 for the hazardous wastes listed below. These handlers are subject to regulation under 401 KAR Chapter 43:

(a) Batteries as described in Section 2 of 401 KAR 43:010;

(b) Pesticides as described in Section 3 of 401 KAR 43:010;

(c) Thermostats as described in Section 4 of 401 KAR 43:010;
and

(d) Spent [mercury-containing] lamps as described in Section 5 of 401 KAR 43:010.

Section 3. Dilution Prohibited as a Substitute for Treatment. (1) Except as provided in subsection (2) of this section, no generator, transporter, handler, or owner or operator of a treatment, storage, or disposal facility shall in any way dilute a restricted waste or the residual from treatment of a restricted waste as a substitute for adequate treatment to achieve compliance with 401 KAR 37:040, to circumvent the effective date of a prohibition in 401 KAR 37:030, to otherwise avoid a prohibition in 401 KAR 37:030, or to circumvent a land disposal prohibition imposed by KRS 224.46-520 [RCRA Section 3004].

(2) Dilution of wastes that are hazardous only because they exhibit a characteristic in a treatment system which treats wastes subsequently discharged to a water of the United States pursuant to a permit issued under Section 402 of the CWA or which treats wastes for purposes of pretreatment requirements under Section 307 of the CWA is not impermissible dilution for purposes of this section unless a method has been specified as the treatment standard in Section 4 of 401 KAR 37:040, or unless the waste is a D003 reactive cyanide wastewater or nonwastewater.

Section 4. Treatment Surface Impoundment Exemption. (1)

Wastes which are otherwise prohibited from land disposal under 401 KAR Chapter 37 may be treated in a surface impoundment or series of impoundments provided that:

(a) Treatment of such wastes occurs in the impoundments;

(b) The following conditions are met:

1. Sampling and testing. For wastes with treatment standards in 401 KAR 37:040 or prohibition levels in 401 KAR 37:030 or KRS 224.46-520, the residues from treatment are analyzed, as specified in Section 7 of this administrative regulation or Section 4 of 401 KAR 37:030, to determine if they meet the applicable treatment standards or where no treatment standards have been established for the waste, the applicable prohibition levels. The sampling method specified in the waste analysis plan under Section 4 of 401 KAR 34:020 or Section 4 of 401 KAR 35:020 shall be designed so that representative samples of the sludge and the supernatant are tested separately rather than mixed to form homogeneous samples.

2. Removal. The following treatment residues (including any liquid waste) shall be removed at least annually: residues which do not meet the treatment standards of 401 KAR 37:040; residues which do not meet the prohibition levels established under 401 KAR 37:030 or imposed by statute (where no treatment standards have been established); residues which are from the treatment of wastes prohibited from land disposal under 401 KAR 37:030 (where no treatment standards have been established and no prohibition levels apply); or residues from managing listed wastes which are not delisted under Section 2 of 401 KAR 31:050. However, residues which are the subject of a valid certification under Section 8 of this administrative regulation made no later than a year after placement of the wastes in an impoundment are not required to be removed annually. If the volume of liquid flowing through the impoundment or series of impoundments annually is greater than the volume of the impoundment or impoundments, this flow-through constitutes removal of the supernatant for the purpose of this requirement.

3. Subsequent management. Treatment residues shall not be placed in any other surface impoundment for subsequent management unless the residues are the subject of a valid certification under Section 8 of this administrative regulation which allows disposal in surface impoundments meeting the requirements of Section 8(1) of this administrative regulation.

4. Recordkeeping. The procedures and schedule for the sampling of impoundment contents, the analysis of test data, and the annual removal of residues which do not meet the treatment standards, or prohibition levels (where no treatment standards have been established), or which are from the treatment of wastes prohibited from land disposal under 401 KAR 37:030 (where no treatment standards have been established and no prohibition levels apply), shall be specified in the facility's waste analysis plan as required under 401 KAR 34:020, Section 4, or 401 KAR 35:020, Section 4.

(c) The impoundment meets the design requirements of Section 2(3) of 401 KAR 34:200 or Section 10(1) of 401 KAR 35:200, regardless that the unit may not be new, expanded, or a replacement, and it is in compliance with applicable groundwater monitoring requirements of 401 KAR 34:060 or 401 KAR Chapter 35 unless:

1. It is exempted pursuant to Section 2(4) or (5) of 401 KAR 34:200, or to Section 10(3) or (4) of 401 KAR 35:200; or

2. Upon application by the owner or operator, the cabinet after notice and an opportunity to comment has granted a waiver of the requirements on the basis that the surface impoundment:

a. Has at least one (1) liner, and there is no evidence that such liner is leaking;

b. Is located more than one-quarter (1/4) mile from an underground source of drinking water; and

c. Is in compliance with generally applicable groundwater monitoring requirements for facilities with permits; or

3. Upon application by the owner or operator, the cabinet, after notice and an opportunity to comment, has granted a modification to the requirements on the basis of a demonstration that the surface

impoundment is located, designed, and operated so as to assure that there will be no migration of any hazardous constituent into ground-water or surface water at any future time.

(d) The owner or operator submits to the cabinet a written certification that the requirements of paragraph (c) of this subsection have been met and submits a copy of the waste analysis plan required under paragraph (b) of this subsection. The following certification is required:

I certify under penalty of law that the requirements of Section 4(1)(c) of 401 KAR 37:010 have been met for all surface impoundments being used to treat restricted wastes. I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(2) Evaporation of hazardous constituents as the principal means of treatment is not considered to be treatment for purposes of an exemption under this section.

Section 5. Procedures for Case-by-case Extensions to an Effective Date. (1) Any person who generates, treats, stores, or disposes of a hazardous waste may submit an application to the cabinet for an extension to the effective date of any applicable restriction established under 401 KAR 37:030. The applicant shall demonstrate the following:

(a) He has made a good-faith effort to locate and contract with treatment, recovery, or disposal facilities nationwide to manage his waste in accordance with the effective date of the applicable restriction established under 401 KAR 37:030;

(b) He has entered into a binding contractual commitment to construct or otherwise provide alternative treatment, recovery (recycling for example), or disposal capacity that meets the treatment standards specified in 401 KAR 37:040 or, where treatment standards have not been specified, such treatment, recovery, or disposal capacity is protective of human health and the environment;

(c) Due to circumstances beyond the applicant's control, such alternative capacity cannot reasonably be made available by the applicable effective date. This demonstration may include a showing that the technical and practical difficulties associated with providing the alternative capacity will result in the capacity not being available by the applicable effective date;

(d) The capacity being constructed or otherwise provided by the applicant will be sufficient to manage the entire quantity of waste that is the subject of the application;

(e) He provides a detailed schedule for obtaining required operating and construction permits or an outline of how and when alternative capacity will be available;

(f) He has arranged for adequate capacity to manage his waste during an extension and has documented in the application the location of all sites at which the waste will be managed; and

(g) Any waste managed in a surface impoundment or landfill during the extension period will meet the requirements of subsection (8)(b) of this section.

(2) An authorized representative signing an application described under subsection (1) of this section shall make the following certification:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(3) After receiving an application for an extension, the cabinet may request any additional information which it deems necessary to evaluate the application.

(4) An extension shall apply only to the waste generated at the individual facility covered by the application and shall not apply to

restricted waste from any other facility.

(5) On the basis of the information referred to in subsection (1) of this section, after notice and opportunity for comment, and after consultation with appropriate state agencies in all affected states, the cabinet may grant an extension of up to one (1) year from the effective date. The cabinet may renew this extension for up to one (1) additional year upon the request of the applicant if the demonstration required in subsection (1) of this section can still be made. In no event shall an extension continue beyond twenty-four (24) months from the applicable effective date specified in 401 KAR 37:030. The length of any extension authorized shall be determined by the cabinet based on the time required to construct or obtain the type of capacity needed by the applicant as described in the completion schedule discussed in subsection (1)(e) of this section. The cabinet shall give public notice of the intent to approve or deny a petition and provide an opportunity for public comment. The final decision on a petition shall be published in the Kentucky Administrative Register.

(6) Any person granted an extension under this section shall immediately notify the cabinet as soon as he has knowledge of any change in the conditions certified to in the application.

(7) Any person granted an extension under this section shall submit written progress reports at intervals designated by the cabinet. Such reports shall describe the overall progress made toward constructing or otherwise providing alternative treatment, recovery or disposal capacity; shall identify any event which may cause or has caused a delay in the development of the capacity; and shall summarize the steps taken to mitigate the delay. The cabinet may revoke the extension at any time if the applicant does not demonstrate a good-faith effort to meet the schedule for completion, if the cabinet denies or revokes any required permit, if conditions certified in the application change, or for any violation of this chapter.

(8) Whenever the cabinet establishes an extension to an effective date under this section, during the period for which such extension is in effect:

(a) The storage restrictions under Section 2(1) of 401 KAR 37:050 do not apply; and

(b) The hazardous waste may be disposed of in a landfill or surface impoundment unit only if the unit is in compliance with the following requirements:

1. The landfill, if in interim status, is in compliance with the requirements of 401 KAR 35:060 and Section 10(1), (3) and (4) of 401 KAR 35:230;

2. The landfill, if permitted, is in compliance with the requirements of 401 KAR 34:060 and Section 10(3), (4), and (5) of 401 KAR 34:230;

3. The surface impoundment, if in interim status, is in compliance with the requirements of 401 KAR 35:060 and Section 10(1), (3) and (4) of 401 KAR 35:200; [¶]

4. The surface impoundment, if permitted, is in compliance with the requirements of 401 KAR 34:060 and Section 10(3), (4), and (5) of 401 KAR 34:200; [¶]

5. The surface impoundment, if newly subject to hazardous waste regulation due to the promulgation of additional listings or characteristics for the identification of hazardous waste, is in compliance with the requirements of 401 KAR 35:060 within twelve (12) months of the promulgation of additional listings or characteristics of hazardous waste, and with the requirements of Section 10(1), (3), and (4) of 401 KAR 35:200 within forty-eight (48) months after the promulgation of additional listings or characteristics of hazardous waste. If a national capacity variance is granted, during the period the variance is in effect the surface impoundment, if newly subject to hazardous waste regulation due to the promulgation of additional listings or characteristics of hazardous waste, is in compliance with the requirement of 401 KAR 35:060 within twelve (12) months of the promulgation of additional listings or characteristics of hazardous waste, and with the requirements of Section 10(1), (3), and (4) of 401 KAR 35:200 within forty-eight (48) months after the promulgation of additional listings or

characteristics of hazardous waste; or

6. The landfill, if disposing of containerized liquid hazardous wastes containing PCB's at concentrations greater than or equal to fifty (50) ppm but less than 500 ppm, is also in compliance with 40 CFR 761.75 and 401 KAR Chapters 34 and 35.

(9) Pending a decision on the application the applicant is required to comply with all restrictions on land disposal under 401 KAR Chapter 37 once the effective date for the waste has been reached.

Section 6. Petitions to Allow Land Disposal of a Waste Prohibited Under 401 KAR 37:030. (1) Any person seeking an exemption from a prohibition under 401 KAR 37:030 for the disposal of a restricted hazardous waste in a particular unit or units shall submit a petition to the cabinet demonstrating, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous. The demonstration shall include the following components:

(a) An identification of the specific waste and the specific unit for which the demonstration will be made;

(b) A waste analysis to describe fully the chemical and physical characteristics of the subject waste;

(c) A comprehensive characterization of the disposal unit site including an analysis of background air, soil, and water quality;

(d) A monitoring plan that detects migration at the earliest practicable time; and

(e) Sufficient information to assure the cabinet that the owner or operator of a land disposal unit receiving restricted waste will comply with other applicable federal, state, and local laws.

(2) The demonstration referred to in subsection (1) of this section shall meet the following criteria:

(a) All waste and environmental sampling, test, and analysis data shall be accurate and reproducible to the extent that state-of-the-art techniques allow;

(b) All sampling, testing, and estimation techniques for chemical and physical properties of the waste and all environmental parameters shall have been approved by the cabinet;

(c) Simulation models shall be calibrated for the specific waste and site conditions, and verified for accuracy by comparison with actual measurements;

(d) A quality assurance and quality control plan that addresses all aspects of the demonstration shall be approved by the cabinet; and

(e) An analysis shall be performed to identify and quantify any aspects of the demonstration that contribute significantly to uncertainty. This analysis shall include an evaluation of the consequences of predictable future events, including, but not limited to, earthquakes, floods, severe storm events, droughts, or other natural phenomena.

(3) Each petition referred to in subsection (1) of this section shall include the following:

(a) A monitoring plan that describes the monitoring program installed at or around the unit to verify continued compliance with the conditions of the variance. This monitoring plan shall provide information on the monitoring of the unit or the environment around the unit. The following specific information shall be included in the plan:

1. The media monitored in the case where monitoring of the environment around the unit is required;

2. The type of monitoring conducted at the unit, in the cases where monitoring of the unit is required;

3. The location of the monitoring stations;

4. The monitoring interval (frequency of monitoring at each station);

5. The specific hazardous constituents to be monitored;

6. The implementation schedule for the monitoring program;

7. The equipment used at the monitoring stations;

8. The sampling and analytical techniques employed; and

9. The data recording and reporting procedures.

(b) Where applicable, the monitoring program described in

paragraph (a) of this subsection shall be in place for a period of time specified by the cabinet, as part of the approval of the petition, prior to receipt of prohibited waste at the unit.

(c) The monitoring data collected according to the monitoring plan specified under paragraph (a) of this subsection shall be sent to the cabinet according to a format and schedule specified and approved in the monitoring plan.

(d) A copy of the monitoring data collected under the monitoring plan specified under paragraph (a) of this subsection shall be kept on site at the facility in the operating record.

(e) The monitoring program specified under paragraph (a) of this subsection shall meet the following criteria:

1. All sampling, testing, and analytical data shall be approved by the cabinet and shall provide data that is accurate and reproducible.

2. All estimation and monitoring techniques shall be approved by the cabinet.

3. A quality assurance and quality control plan addressing all aspects of the monitoring program shall be provided to and approved by the cabinet.

(4) Each petition shall be submitted to the cabinet.

(5) After a petition has been approved, the owner or operator shall report any changes in conditions at the unit or the environment around the unit that significantly depart from the conditions described in the variance and affect the potential for migration of hazardous constituents from the units as follows:

(a) If the owner or operator plans to make changes to the unit design, construction, or operation, the change shall be proposed, in writing, and the owner or operator shall submit a demonstration to the cabinet at least thirty (30) days prior to making the change. The cabinet shall determine whether the proposed change invalidates the terms of the petition and shall determine the appropriate response. Any change shall be approved by the cabinet prior to being made.

(b) If the owner or operator discovers that a condition at the site which was modeled or predicted in the petition does not occur as predicted, this change shall be reported, in writing, to the cabinet within ten (10) days of discovering the change. The cabinet shall determine whether the reported change from the terms of the petition requires further action, which may include termination of waste acceptance and revocation of the petition, petition modifications, or other responses.

(6) If the owner or operator determines that there is migration of hazardous constituents from the unit, the owner or operator shall:

(a) Immediately suspend receipt of restricted waste at the unit;

(b) Notify the cabinet, in writing, within ten (10) days of the determination that the release has occurred; and

(c) Following receipt of the notification the cabinet shall determine, within sixty (60) days of receiving notification, whether the owner or operator can continue to receive prohibited waste in the unit and whether the variance is to be revoked. The cabinet shall also determine whether further examination of any migration is warranted under applicable provisions of 401 KAR Chapters 34 and 35.

(7) Each petition shall include the following statement signed by the petitioner or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this petition and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(8) After receiving a petition, the cabinet may request any additional information that reasonably may be required to evaluate the demonstration.

(9) If approved, the petition shall apply to land disposal of the specific restricted waste at the individual disposal unit described in the demonstration and shall not apply to any other restricted waste at that disposal unit, or to that specific restricted waste at any other

disposal unit.

(10) The cabinet shall give public notice in the Kentucky Administrative Register of the intent to approve or deny a petition and provide an opportunity for public comment. The final decision on a petition shall be published in the Kentucky Administrative Register.

(11) The term of a petition granted under this section shall be no longer than the term of the hazardous waste site or facility permit if the disposal unit is operating under a hazardous waste site or facility permit, or up to a maximum of ten (10) years from the date of approval provided under subsection (7) of this section if the unit is operating under interim status. In either case, the term of the granted petition shall expire upon the termination or denial of a hazardous waste site or facility permit, or upon the termination of interim status or when the volume limit of waste to be land disposed during the term of petition is reached.

(12) Prior to the cabinet's decision, the applicant is required to comply with all restrictions on land disposal under 401 KAR Chapter 37 once the effective date for the waste has been reached.

(13) The petition granted by the cabinet does not relieve the petitioner of his responsibilities in the management of hazardous waste under the hazardous waste management administrative regulations.

(14) Liquid hazardous wastes containing polychlorinated biphenyls at concentrations greater than or equal to 500 ppm are not eligible for an exemption under this section.

Section 7. Waste Analysis. (1) Except as specified in Section 3 of 401 KAR 37:030, if a generator's waste is listed in 401 KAR 31:040, [or Section 5 of 401 KAR 37:040,] the generator shall test his waste or test an extract [developed] using the Toxicity Characteristic Leaching Procedure, Method 1311 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", EPA Publication SW-846, incorporated in 40 CFR 260.11, adopted in Section 3 of 401 KAR 30:010, [test method described in 401 KAR 37:100,] or use knowledge of the waste to determine if the waste is restricted from land disposal under 401 KAR Chapter 37. Except as specified in Section 3 of 401 KAR 37:030, if a generator's waste exhibits one (1) or more of the characteristics set out in 401 KAR 31:030, the generator shall [must] test an extract using the Toxicity Characteristic Leaching Procedure, Method 1311 [test method described in Section 10(2)(f) of this administrative regulation], or use knowledge of the waste, to determine if the waste is restricted from land disposal under this chapter. If the generator determines that this waste exhibits the characteristic of ignitability (D001) (and is not in the high TOC Ignitable Liquids Subcategory or is not treated by CMBST or RORGS of Table 1 of Section 3 of 401 KAR 37:040), or the characteristic of corrosivity (D002), and is prohibited under Section 8 of 401 KAR 37:030, or the characteristic of organic toxicity (D012-D043) and is prohibited under Section 9 of 401 KAR 37:030, the generator shall determine the underlying hazardous constituents in the D001, D002, or D012-D043 waste.

(a) If a generator determines that he is managing a restricted waste under 401 KAR Chapter 37 and the waste does not meet the applicable treatment standards set forth in 401 KAR 37:040 or exceeds the applicable prohibition levels set forth in Section 3 of 401 KAR 37:030 or KRS 224.46-520, with each shipment of waste the generator shall notify the treatment or storage facility in writing [of the appropriate treatment standards set forth in 401 KAR 37:040 and any applicable prohibition levels set forth in Section 3 of 401 KAR 37:030 or KRS 224.46-520]. The notice shall include the following information:

1. EPA hazardous waste number;
2. The waste constituents that the treater will monitor, if monitoring will not include all regulated constituents, for wastes F001-F005, F039, D001, D002, and D012-D043 and in Section 3 of 401 KAR 37:030 or KRS 224.46-520. Generators shall also include whether the waste is a nonwastewater or wastewater and indicate the subcategory

of the waste (such as "D003 reactive cyanide"), if applicable; [The corresponding treatment standards for wastes F001-F005, F039, and wastes prohibited pursuant to Section 3 of 401 KAR 37:030 or Section 3004(d) of RCRA. Treatment standards for all other restricted wastes shall either be included, or be referenced by including on the notification the applicable wastewater, as defined in Section 2(6) of this administrative regulation or nonwastewater, as defined in Section 2(4) of this administrative regulation, category, the applicable subdivisions made within a waste code based on waste specific criteria (such as D003 reactive cyanides), and the applicable treatment standards of this chapter. Where the applicable treatment standards are expressed as specified technologies in Section 3 of 401 KAR 37:040, the applicable five (5) letter treatment code found in Table 1 of Section 3 of 401 KAR 37:040 also shall be listed on the notification;]

3. The manifest number associated with the shipment of waste; [and]

4. For hazardous debris, the contaminants subject to treatment as provided by Section 5(b) of 401 KAR 37:040 and the following statement: "This hazardous debris is subject to the alternative treatment standards of Section 5 of 401 KAR 37:040";

5. The waste analysis data, where available; and

6. The date the waste is subject to the prohibitions.

(b) If a generator determines that he is managing a restricted waste under 401 KAR Chapter 37, and determines that the waste can be land disposed without further treatment, with each shipment of waste he shall submit, to the treatment, storage, or land disposal facility, a notice and a certification stating that the waste meets applicable treatment standards set forth in 401 KAR 37:040 and the applicable prohibition levels set forth in Section 3 of 401 KAR 37:030 or KRS 224.46-520. Generators of hazardous debris that is excluded from the definition of hazardous waste under Section 3(6)(b) of 401 KAR 31:030 (that is, debris that the cabinet has determined does not contain hazardous waste) however, are not subject to these notification and certification requirements.

1. The notice shall include the following information:

a. EPA hazardous waste number;

b. The waste constituents that the treater will monitor, if monitoring will not include all regulated constituents, for wastes F001-F005, F039, D001, D002, and D012-D043 and Section 3 of 401 KAR 37:030 or KRS 224.46-520. Generators shall also include whether the waste is a nonwastewater or wastewater and indicate the subcategory of the waste (such as "D003 reactive cyanide"), if applicable; [The corresponding treatment standards for wastes F001-F005, F039, and wastes prohibited pursuant to Section 3 of 401 KAR 37:030 or Section 3004(d) of RCRA. Treatment standards for all other restricted wastes shall either be included, or be referenced by including on the notification the applicable wastewater (as defined in Section 2(6) of this administrative regulation) or nonwastewater (as defined in Section 2(4) of this administrative regulation) category, the applicable subdivisions made within a waste code based on waste specific criteria (such as D003 reactive cyanides), and the administrative regulation or administrative regulations in which the applicable treatment standard appear. Where the applicable treatment standards are expressed as specified technologies in Section 3 of 401 KAR 37:040, the applicable five (5) letter treatment code found in Table 1 of Section 3 of 401 KAR 37:040 also shall be listed on the notification;]

c. The manifest number associated with the shipment of waste; and

d. Waste analysis data, where available.

2. The certification shall be signed by an authorized representative and shall state the following:

I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with treatment standards specified in 401 KAR 37:040 and

all applicable prohibitions set forth in Section 4 of 401 KAR 37:030, ~~Section 4,~~ or KRS 224.46-520. I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

(c) If a generator's waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under Section 5 of this administrative regulation, an exemption under Section 6 of this administrative regulation, or nationwide capacity variance under 401 KAR 37:030), with each shipment of waste he shall submit a notice to the facility receiving his waste stating that the waste is not prohibited from land disposal. The notice shall include the following information:

1. EPA hazardous waste number;
2. The waste constituents that the treater will monitor, if monitoring will not include all regulated constituents, for wastes F001-F005, F039, D001, D002, and D012-D043. Generators shall also include whether the waste is a nonwastewater or wastewater and indicate the subcategory of the waste (such as "D003 reactive cyanide"), if applicable; [The corresponding treatment standards for wastes F001-F005, F039, and wastes prohibited pursuant to Section 3 of 401 KAR 37:030 or Section 3004(d) of RCRA. Treatment standards for all other restricted wastes shall either be included, or be referenced by including on the notification the applicable wastewater (as defined in Section 3(6) of this administrative regulation) or nonwastewater (as defined in Section 2(4) of this administrative regulation) category, the applicable subdivisions made within a waste code based on waste-specific criteria (such as D003 reactive cyanides), and the applicable treatment standards of this chapter. Where the applicable treatment standards are expressed as specified technologies in Section 3 of 401 KAR 37:040, the applicable five (5) letter treatment code found in Table 1 of Section 3 of 401 KAR 37:040 also shall be listed on the notification;]
3. The manifest number associated with the shipment of waste;
4. Waste analysis data, where available; ~~and~~
5. For hazardous debris when using the alternative treatment technologies provided by Section 5 of 401 KAR 37:040:
 - a. The contaminants subject to treatment, as described in Section 6(2) of 401 KAR 37:040; and
 - b. An indication that these contaminants are being treated to comply with Section 5 of 401 KAR 37:040.
6. For hazardous debris when using the treatment standards for the contaminating wastes in Section 1 of 401 KAR 37:040: the requirements described in paragraph (c)1, 2, 3, 4, and 7 of this subsection.
7. The date the waste is subject to the prohibitions.

(d) If a generator is managing a prohibited waste in tanks, ~~or~~ containers, or containment buildings regulated under Section 5 of 401 KAR 32:030, and is treating such waste in the tanks, ~~or~~ containers, or containment buildings to meet applicable treatment standards under 401 KAR 37:040, the generator shall develop and follow a written waste analysis plan that describes the procedures the generator shall carry out to comply with the treatment standards. (Generators treating hazardous debris under the alternative treatment standards of Table 1 of Section 6 of 401 KAR 37:040, however, are not subject to these waste analysis requirements.) The plan shall be kept on site in the generator's records, and the following requirements shall be met:

1. The waste analysis plan shall be based on a detailed chemical and physical analysis of a representative sample of the prohibited waste(s) being treated, and contain all information necessary to treat the waste(s) in accordance with the requirements of this chapter ~~part~~, including the selected testing frequency.
2. The plan shall be filed with the cabinet ~~(to implement 401 KAR Chapter 37 requirements)~~ a minimum of thirty (30) days prior to the treatment activity, with delivery verified.

3. Wastes shipped off site pursuant to this paragraph shall comply with the notification requirements of paragraph (b) of this subsection.

(e) If the generator determines whether the waste is restricted based solely on his knowledge of the waste, all supporting data used to make this determination shall be retained on-site in the generator's files. If a generator determines whether the waste is restricted based on testing this waste or an extract developed using the test method described in Section 1 of 401 KAR 37:100 all waste analysis data shall be retained on site in the generator's files.

(f) If a generator determines that he is managing a restricted waste that is excluded from the definition of hazardous or solid waste or exempt from 401 KAR 37:030, under Sections 2 to 6 of 401 KAR 31:010 subsequent to the point of generation, he shall place a one (1) time notice stating such generation, subsequent exclusion from the definition of hazardous or solid waste or exemption from 401 KAR 37:030, and the disposition of the waste, in the facility's file.

(g) Generators shall retain on site a copy of all notices, certifications, demonstrations, waste analysis data, and other documentation produced pursuant to this section for at least five (5) years from the date that the waste that is the subject of the documentation was last sent to on-site or off-site treatment, storage, or disposal. The five (5) year record retention period is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet. The requirements of this paragraph apply to solid wastes even when the hazardous characteristic is removed prior to disposal, or when the waste is excluded from the definition of hazardous or solid waste under Sections 2 to 6 of 401 KAR 31:010, or exempted from 401 KAR 37:030, subsequent to the point of generation.

(h) If a generator is managing a lab pack that contains none of the wastes specified in Appendix IV of 40 CFR Part 268, adopted [identified] in Section 10(2)(a) of this administrative regulation, and wishes to use the alternative treatment standard under Section 3(2) [4] of 401 KAR 37:040 [37:040], with each shipment of waste the generator shall submit a notice to the treatment facility in accordance with paragraph (a) of this subsection, except that underlying hazardous constituents need not be determined. The generator shall also comply with the requirements in paragraphs (e) and (f) of this subsection, and shall submit the following certification, which shall be signed by an authorized representative:

I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack does not contain ~~only the~~ any wastes adopted [specified] in Section 10(2)(a) of this administrative regulation ~~[or solid wastes not subject to administrative regulation under 401 KAR Chapter 34].~~ I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment.

~~[(i) Small quantity generators with tolling agreements pursuant to Section 1(6) of 401 KAR 32:020 shall comply with the applicable notification and certification requirements of this subsection for the initial shipment of the waste subject to the agreement. Such generators shall retain on site a copy of the notification and certification, together with the tolling agreement, for at least three (3) years after termination or expiration of the agreement. The three (3) year record retention period is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet.]~~ [(i) If a generator is managing a lab pack that contains organic wastes specified in Section 10(2)(b) of this administrative regulation and wishes to use the alternate treatment standards under Section 3 of 401 KAR 37:040, with each shipment of waste the generator shall submit a notice to the treatment facility in accordance with paragraph (a) of this subsection. The generator also shall comply with the requirements in paragraphs (e) and (f) of this subsection, and shall submit the following certification which shall be signed by an authorized representative:

I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through

knowledge of the waste and that the lab pack contains only organic waste specified in Section 10(2)(b) of this administrative regulation or solid wastes not subject to regulation under 401 KAR Chapter 31. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisonment.]

(i) Small quantity generators with tolling agreements pursuant to Section 1(5) of 401 KAR 32:020 shall comply with the applicable notification and certification requirements of this subsection for the initial shipment of the waste subject to the agreement. Such generators shall retain on site a copy of the notification and certification, together with the tolling agreement, for at least three (3) years after termination or expiration of the agreement. The three (3) year record retention period is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet.]

(2) Treatment facilities shall test their wastes according to the frequency specified in their waste analysis plans as required by Section 4 of 401 KAR 30:020 or Section 4 of 401 KAR 35:020. The testing shall be performed as provided in paragraphs (a), (b), and (c) of this subsection.

(a) For wastes with treatment standards expressed as concentrations in the waste extract (Section 3 of 401 KAR 37:040), the owner or operator of the treatment facility shall test the treatment residues or an extract of such residues developed using the test method described in 401 KAR 37:100 to assure that the treatment residues or extract meet the applicable treatment standards.

(b) For wastes prohibited under Section 3 of 401 KAR 37:030 or KRS 224.46-520 which are not subject to any treatment standards under 401 KAR 37:040, the owner or operator of the treatment facility shall test the treatment residues according to the generator testing requirements specified in Section 3 of 401 KAR 37:030 to assure that the treatment residues comply with the applicable prohibitions.

(c) For wastes with treatment standards expressed as concentrations in the waste (Section 5 of 401 KAR 37:040) the owner or operator of the treatment facility shall test the treatment residues (not an extract of the residues) to assure that the treatment residues meet the applicable treatment standards.

(d) A notice shall be sent with each waste shipment to the land disposal facility which includes the following information except that debris excluded from the definition of hazardous waste under Section 3(5) of 401 KAR 31:010 (that is, debris treated by an extraction or destruction technology provided by Table 1 of Section 6 of 401 KAR 37:040, or debris that the cabinet has determined does not contain hazardous waste) is subject to the notification and certification requirements of subsection (4) of this section rather than these notification requirements:

1. EPA hazardous waste number;

2. The waste constituents to be monitored, if the monitoring will not include all regulated constituents, for wastes F001-F005, F039, D001, D002, and D012-D043 and in Section 3 of 401 KAR 37:030 or KRS 224.46-520. Generators shall also include whether the waste is a nonwastewater or wastewater, and indicate the subcategory of the waste (such as "D003 reactive cyanide"), if applicable. [The corresponding treatment standards for wastes F001 to F005, F039, and all applicable prohibitions set forth in Section 3 of 401 KAR 37:030 or KRS 224.46-520. Treatment standards for all other restricted wastes shall either be included, or referenced by including on the notification the applicable wastewater (as defined in Section 1(6) of this administrative regulation) or nonwastewater (as defined in Section 1(4) of this administrative regulation) category, the applicable subdivisions made within a waste code based on waste specific criteria (such as D003 reactive cyanides), and the applicable treatment standards of this chapter. Where the applicable treatment standards are expressed as specified technologies in Section 3 of 401 KAR 37:040, the applicable five (5) letter treatment code found in Table 1 of Section 3 of 401 KAR 37:040 also shall be included on the notification;]

3. The manifest number associated with the shipment of waste;

and

4. Waste analysis data, where available.

(e) The treatment facility shall submit a certification with each shipment of waste or treatment residue of a restricted waste to the land disposal facility stating that the waste or treatment residue has been treated in compliance with the applicable performance standards specified in 401 KAR 37:040 and applicable prohibitions set forth in Section 3 of 401 KAR 37:030 or KRS 224.46-520. Debris excluded from the definition of hazardous waste under Section 3(5) of 401 KAR 31:010 (that is, debris treated by an extraction or destruction technology provided by Table 1 of Section 6 of 401 KAR 37:040, or debris that the cabinet has determined does not contain hazardous waste) is subject to the notification and certification requirements of subsection (4) of this administrative regulation rather than the certification requirements of this paragraph.

1. For wastes with treatment standards expressed as concentrations in the waste extract or in the waste (Section 2 of 401 KAR 37:040), or for wastes prohibited under Section 3 of 401 KAR 37:030 or KRS 224.46-520 which are not subject to any treatment standards under 401 KAR 37:040, the certification shall be signed by an authorized representative and shall state the following:

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 401 KAR 37:040 and all applicable prohibitions set forth in 401 KAR 37:030, Section 3, and KRS 224.46-520 without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

2. For wastes with treatment standards expressed as technologies (Section 3 of 401 KAR 37:040), the certification shall be signed by an authorized representative and shall state the following:

I certify under penalty of law that the waste has been treated in accordance with the requirements of Section 3 of 401 KAR 37:040. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

3. For wastes with treatment standards expressed as concentrations in the waste pursuant to Section 5 of 401 KAR 37:040, if compliance with the treatment standards in this administrative regulation is based in part or whole on the analytical detection limit alternative specified in Section 5(3) of 401 KAR 37:040, the certification also shall state the following:

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 401 KAR 34:240 or 401 KAR 35:240, or by combustion in fuel substitution units operating in accordance with applicable technical requirements, and I have been unable to detect the nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

4. For characteristic wastes D001, D002, and D012-D043 that are: subject to the treatment standards in Section 1 of 401 KAR 37:040 (other than those expressed as a required method of treatment); that are reasonably expected to contain underlying hazardous constituents; are treated on site to remove the hazardous characteristic; and are then sent off site for treatment of underlying hazardous constituents, the certification shall state the following:

I certify under penalty of law that the waste has been treated in accordance with the requirements of Section 1 of 401 KAR 37:040 to

remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

(f) If the waste or treatment residue will be further managed at a different treatment or storage facility, the treatment, storage, or disposal facility sending the waste or treatment residue off site shall comply with the notice and certification requirements applicable to generators under this section.

(g) Where the wastes are recyclable materials used in a manner constituting disposal subject to the provisions of Section 1 of 401 KAR 36:030 regarding treatment standards and prohibition levels, the owner or operator of a treatment facility (the recycler) is not required to notify the receiving facility, pursuant to paragraph (d) of this section. With each shipment of the wastes, the owner or operator of the recycling facility shall submit a certification described in paragraph (e) of this section, and a notice which includes the information listed in paragraph (d) of this section (except the manifest number) to the cabinet. The recycling facility also shall keep records of the name and location of each entity receiving the hazardous waste-derived product.

(3) Except where the owner or operator is disposing of any waste that is a recyclable material used in a manner constituting disposal pursuant to 401 KAR 36:030, the owner or operator of any land disposal facility disposing of any waste subject to restrictions under 401 KAR Chapter 37 shall:

(a) Have copies of the notice and certifications specified in subsection (1) or (2) of this section, and the certification specified in Section 8 of 401 KAR 37:010 if applicable.

(b) Test the waste, or an extract of the waste or treatment residue developed using the test method described in Section 1 of 401 KAR 37:100 or using any methods required by generators under Section 3 of 401 KAR 37:030, to assure that the wastes or treatment residues are in compliance with the applicable treatment standards set forth in Section 3 of 401 KAR 38:040 and all applicable prohibitions set forth in Section 3 of 401 KAR 37:030 or in KRS 224.46-520. The testing shall be performed according to the frequency specified in the facility's waste analysis plan as required by Section 4 of 401 KAR 34:020 or Section 4 of 401 KAR 37:020.

(4) Generators or treaters who first claim that hazardous debris is excluded from the definition of hazardous waste under Section 3(6) of 401 KAR 31:010 (that is, debris treated by an extraction or destruction technology provided by Table 1 of Section 7 of 401 KAR 37:040, and debris that the cabinet has determined does not contain hazardous waste) are subject to the following notification and certification requirements:

(a) A one (1) time notification shall be submitted to the cabinet including the following information:

1. The name and address of the solid waste site or facility receiving the treated debris;

2. A description of the hazardous debris as initially generated, including the applicable EPA Hazardous Waste Number(s); and

3. For debris excluded under Section 3(5) of 401 KAR 31:010, the technology from Table 1 of Section 7 of 37:040 used to treat the debris.

(b) The notification shall be updated if the debris is shipped to a different facility, and, for debris excluded under Section 3(5) of 401 KAR 31:010, if a different type of debris is treated or if a different technology is used to treat the debris.

(c) For debris excluded under Section 3(5) of 401 KAR 31:010, the owner or operator of the treatment facility shall document and certify compliance with the treatment standards of Table 1 of Section 7 of 37:040 as follows:

1. Records shall be kept of all inspections, evaluations, and analyses of treated debris that are made to determine compliance with the treatment standards;

2. Records shall be kept of any data or information the treater

obtains during treatment of the debris that identifies key operating parameters of the treatment unit; and

3. For each shipment of treated debris, a certification of compliance with the treatment standards shall be signed by an authorized representative and placed in the facility's files. The certification shall state the following: "I certify under penalty of law that the debris has been treated in accordance with the requirements of Section 6 of 37:040. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment."

Section 8. Landfill and Surface Impoundment Disposal Restrictions. (1) Prior to May 8, 1990, wastes which are otherwise prohibited from land disposal under Section 5(6) of 401 KAR 37:030 may be disposed in a landfill or surface impoundment which is in compliance with the requirements of Section 5(8)(b) of this administrative regulation provided that the requirements of this section are met. As of May 8, 1990, this subsection, including paragraph (a), is no longer in effect.

(a) Prior to the disposal, the generator has made a good faith effort to locate and contract with treatment and recovery facilities practically available which provide the greatest environmental benefit.

(b) If a generator determines that there is no practically available treatment for his waste, he shall fulfill the following requirements:

1. Prior to the initial shipment of waste, the generator shall submit a demonstration to the cabinet that includes: a list of facilities and facility officials contacted, addresses, telephone numbers, and contact dates, as well as written discussion of why he was not able to obtain treatment or recovery for that waste. The generator shall also provide to the cabinet the following certification:

I certify under penalty of law that the requirements of Section 8(1)(a) of 401 KAR 37:010 have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

The generator does not need to wait for the cabinet's approval of the demonstration or certification before shipment of the waste. However, if the cabinet invalidates the demonstration or certification for the reasons outlined in Section 8(2)(b) of this administrative regulation the generator shall immediately cease further shipments of the waste, and immediately inform all facilities that received the waste of such invalidation, and keep records of such communication on-site in his files.

2. With the initial shipment of waste, the generator shall submit a copy of the demonstration and the certification discussed above in subparagraph 1 of this paragraph to the receiving facility. With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged. Such a generator shall retain on site a copy of the demonstration (if applicable) and certification required for each waste shipment for at least five years from the date that the waste that is subject of such documentation was last sent to on-site or off-site disposal. The five (5) year record retention requirement is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet.

(c) If a generator determines that there are practically available treatments for his waste, he shall contract to use the practically available technology that yields the greatest environmental benefit. He shall also fulfill the following specific requirements:

1. The generator shall submit to the cabinet, prior to the initial shipment of waste, a demonstration that includes: a list of facilities and facility officials contacted, addresses, telephone numbers, and contact dates, as well as a written discussion explaining why the treatment or recovery technology chosen provides the greatest environmental benefit. The generator shall also provide to the cabinet the following certification:

I certify under penalty of law that the requirements of Section 8(1)(a) of 401 KAR 37:010 have been met and that I have contracted to treat my waste (or otherwise provide treatment) by the practically available technology which yields the greatest environmental benefit, as indicated in my demonstration. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

The generator does not need to wait for cabinet approval of the demonstration or certification before shipment of the waste.

2. With the initial shipment of waste, the generator shall submit to the receiving facility a copy of the demonstration and the certification discussed above in subparagraph 1 of this paragraph. With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged. Such a generator shall retain on site a copy of the demonstration (if applicable) and certification required for each waste shipment for at least five (5) years from the date that the waste that is the subject of such documentation was last sent to on-site or off-site disposal. The five (5) year record retention requirement is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet.

(d) Where the generator has determined that there is practically available treatment for his waste prior to disposal, with the initial shipment of waste, the generator shall submit a copy of the demonstration and certification required in paragraph (b)2 of this section to the receiving facility. With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged. The generator shall retain on site a copy of the demonstration (if applicable) and certification required for each waste shipment for at least five (5) years from the date that the waste that is the subject of the documentation was last sent to on-site or off-site disposal. The five (5) year record retention requirement is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the cabinet.

(2) After receiving the demonstration and certification, the cabinet may request any additional information deemed necessary to evaluate the certification, and submit a new demonstration and certification as provided in this section to the receiving facility.

(a) A generator who has submitted a certification under this section shall immediately notify the cabinet when he has knowledge of any change in the conditions which formed the basis of his certification.

(b) If, after review of the certification, the cabinet determines that practically available treatment exists where the generator has certified otherwise, or that there exists some other method of practically available treatment yielding greater environmental benefit than that which the generator has certified, the cabinet may invalidate the certification.

(c) If the cabinet invalidates a certification, the generator shall immediately cease further shipments of the waste, and inform all facilities that received the waste of the invalidation and keep records of the communication on site in his files.

(3) A treatment, recovery, or storage facility receiving wastes subject to a valid certification shall keep copies of the generator's demonstration (if applicable) and certification in his operating record.

(a) The owner or operator of a treatment or recovery facility shall certify that he has treated the waste in accordance with the generator's demonstration. The following certification is required:

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the treatment

as specified in the generator's demonstration. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(b) The owner or operator of a treatment, recovery, or storage facility shall, for each initial shipment of waste, send a copy of the generator's demonstration (if applicable) and certification under subsection (1)(b)1 or (c)1 of this section and certification under paragraph (a) of this subsection (if applicable) to the facility receiving the waste or treatment residues. With each subsequent waste shipment, only the certification shall be required to be submitted provided that the conditions being certified remain unchanged.

(4) The owner or operator of a disposal facility shall ensure that those wastes prohibited under Section 4(6) of 401 KAR 37:030 are subject to a certification according to the requirements of this section prior to disposal in a landfill or surface impoundment, and that the units receiving the wastes will meet the minimum technological requirements of Section 5(8)(b) of this administrative regulation.

(5) Once the certification is received by the cabinet, and provided that the wastes have been treated by the treatment (if any), determined by the generator to yield the greatest environmental benefit practically available, the wastes or treatment residuals may be disposed in a landfill or surface impoundment unit meeting the requirements of Section 5(8)(b) of this administrative regulation, unless otherwise prohibited by the cabinet.

Section 9. Special Rules Regarding Wastes that Exhibit a Characteristic. (1) The initial generator of a solid waste shall determine each EPA hazardous waste number (waste code) applicable to the waste in order to determine the applicable treatment standards under 401 KAR 37:040. For purposes of this chapter, the waste shall carry the waste code for any applicable listing under 401 KAR 31:040. In addition, the waste shall carry one (1) or more of the waste codes under 401 KAR 31:030, where the waste exhibits a characteristic, except in the case when the treatment standard for the waste [eede] listed in 401 KAR 31:040 operates in lieu of the treatment standard for the waste identified [eede] under 401 KAR 31:010 as specified in subsection (2) of this section. If the generator determines that his waste displays the characteristic of ignitability (D001) (and is not in the High TOC Ignitable Liquids Subcategory or is not treated by CMBST, or RORGS), or the characteristic of corrosivity (D002), and is prohibited under Section 8 of 401 KAR 37:040; or that his waste displays the characteristic of toxicity (D012-D043), and is prohibited under Section 9 of 401 KAR 37:030, the generator shall determine the underlying hazardous constituents, in the D001, D002, or D012-D043 wastes.

(2) Where a prohibited waste is both listed under 401 KAR 31:040 and exhibits a characteristic under 401 KAR 31:010, the treatment standard for the waste code listed in 401 KAR 31:040 shall operate in lieu of the standard for the waste identified [eede] under 401 KAR 31:010, provided that the treatment standard for the listed waste includes a treatment standard for the constituent that causes the waste to exhibit the characteristic. Otherwise the waste shall meet the treatment standards for all applicable listed and characteristic waste codes.

(3) In addition to any applicable standards determined from the initial point of generation, no prohibited waste which exhibits a characteristic under 401 KAR 31:010 may be land disposed unless the waste complies with the treatment standards under 401 KAR 37:040.

(4) Wastes that exhibit a characteristic are also subject to Section 7 requirements of this administrative regulation, except that once the waste is no longer hazardous, a one (1) time notification and certification shall be placed in the generator's or treater's file and a copy sent to the cabinet. The notification and certification that is placed in the generator's or treaters file shall be updated if the process or operation generating the waste changes or if the solid waste site or facility receiving the waste changes. However, the

generator or treater need only notify the cabinet on an annual basis if such changes occur. Such notification and certification shall be sent to the cabinet by the end of the calendar year in which the change occurs. ~~[for each shipment of such wastes to a 401 KAR 37:040 facility the initial generator or the treatment facility need not send a notification to such facility in accordance with Section 7 of this administrative regulation. In such circumstances, a notification and certification shall be sent to the cabinet to implement the requirements of this chapter.]~~

(a) The notification shall include the following information:

1. The name and address of the ~~[401 KAR 37:040]~~ facility receiving the waste shipment;

2. A description of the waste as initially generated, including the applicable EPA hazardous waste number~~(s)~~, treatability group, and underlying hazardous constituents in D001 and D002 wastes prohibited under Section 8 of 401 KAR 37:030, or D012-D043 wastes under Section 9 of 401 KAR 37:030, ~~[the applicable wastewater (as defined in Section 2(6) of this administrative regulation) or nonwastewater (as defined in Section 2(4) of this administrative regulation) category, and the subdivisions made within a waste code based on waste specific criteria (such as D003 reactive cyanides).~~

3. ~~The treatment standards applicable to the waste at the initial point of generation.]~~

(b) The certification shall be signed by an authorized representative and shall state the language found in Section 7(2)(e)1 of this administrative regulation. If treatment removes the characteristic but does not treat underlying hazardous constituents, then the certification found in Section 7(2)(e)4 applies.

Section 10. Identification of Wastes to be Evaluated by EPA. (1) 40 CFR 268.10 to 268.12 July 1, 1995 ~~[1994]~~, which identify wastes that are to be evaluated to determine land disposal prohibitions and treatment standards ~~[and] are hereby adopted [incorporated]~~ into this administrative regulation without change. [by reference.]

(2) The following appendices to 40 CFR Part 268 (July 1, 1995 ~~[1996]~~ ~~[1992]~~) are adopted [incorporated] into this administrative regulation without change: [by reference:]

(a) Appendix IV;

(b) ~~[Appendix V;~~

~~(c)]~~ Appendix VI;

(c) ~~(d)]~~ Appendix VII;

(d) ~~(e)]~~ Appendix VIII; and

(e) Appendix X.

~~[(f) Appendix IX.]~~

(3) The appendices specified in subsections (1) and (2) of this section are available for inspection and copying, subject to copyright law, at [from] the Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502)564-6716 between 8 a.m. and 4:30 p.m., local time, Monday through Friday.

Section 11. Surface Impoundment Exemptions. (1) This section defines additional circumstances under which an otherwise prohibited waste may continue to be placed in a surface impoundment.

(2) Wastes that are newly identified or listed under KRS 224.46-510(3) and 401 KAR 31:030 and 31:040 after November 8, 1984, and stored in a surface impoundment that is newly subject to 401 KAR Chapters 31 through 39 as a result of the additional identification or listing, may continue to be stored in the surface impoundment for forty-eight (48) months after the promulgation of the additional listing or characteristic provided that the surface impoundment is in compliance with the requirements of 401 KAR 35:090 within twelve (12) months after promulgation of the new listing or characteristic.

(3) Wastes that are newly identified or listed under KRS 224.46-510(3) and 401 KAR 31:030 and 31:040 after November 8, 1984, and treated in a surface impoundment that is newly subject to 401 KAR Chapters 31 through 39 as a result of the additional identification or listing, may continue to be treated in that surface impoundment

provided that surface impoundment is in compliance with the requirements of 401 KAR 35:060 within twelve (12) months after the promulgation of the new listing or characteristic. In addition, if the surface impoundment continues to treat hazardous waste after forty-eight (48) months from promulgation of the additional listing or characteristic, it shall then be in compliance with Section 4 of this administrative regulation.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments apply to persons who generate or transport hazardous waste and owners and operators of hazardous waste treatment, storage, and disposal facilities.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The existing staff will have an increased workload in order to process the newly regulated entities. The increase in workload will also increase costs.

2. Continuing costs or savings: Once the new entities are processed, there should not be any extra costs.

3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.

b. Reporting and paperwork requirements: There are no additional paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are to be used for the implementation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. These changes are consistent with federal standards.

8. Assessment of expected benefits of the administrative regulation: These amendments provide consistency with current federal standards.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: The public health and environmental welfare will improve across the commonwealth with the implementation of this regulation.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Yes, detrimental effects could occur without the implementation of this regulation.

c. If detrimental effect would result, explain detrimental effect: Improper disposal of hazardous waste could pose a threat to human health and the environment.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of waste generated and managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes to the land disposal restrictions. The changes are necessary to maintain consistency between state and federal programs. A variety of additions and exclusions have been made to clarify the applicability of these changes. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that generate or transport of hazardous waste, and that treats, stores, or disposes of hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. The agencies applicable to this administrative regulation will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 38:005. Definitions related to 401 KAR Chapter 38.

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 40 CFR 260.10, 270.2

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-505, 224.46-520

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-520 and 224.46-530 relating to hazardous waste permits. This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 38 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the begin-

ning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfarm and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for

the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a) 1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.

(26) "Bottoms receiver" means a container or tank used to receive and collect heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(27) "Burn" means burning for energy recovery or destruction, or processing for materials recovery or as an ingredient.

(28) "By-product" is a material that is not one (1) of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a coproduct that is produced for the general public's use and is ordinarily used in the form it is produced by the process.

(29) "Cabinet" shall have the meaning specified in KRS 224.01-010.

(30) "Carbon regeneration unit" means any enclosed thermal treatment device used to regenerate spent activated carbon.

(31) "Cation exchange capacity" means the sum of exchangeable cations a soil can absorb expressed in milliequivalents per 100 grams of soil as determined by sampling the soil to the depth of cultivation or solid waste placement, whichever is greater, and analyzing by the summation method for distinctly acid soils or the sodium acetate method for neutral, calcareous, or saline soils.

(32) "Certificate" shall have the meaning specified in KRS 224.46-810.

(33) "Certification" means a statement of professional opinion based upon knowledge and belief.

(34) "Closed portion" means that portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements.

(35) "Closed-vent system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(36) "Closure plan" means the plan for closure prepared in accordance with the requirements of Section 3 of 401 KAR 34:070 or Section 3 of 401 KAR 35:070.

(37) "Closure" shall have the meaning specified in KRS 224.01-010.

(38) "Component" means either the tank or ancillary equipment of a tank system.

(39) "Condenser" means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(40) "Conditionally exempt small quantity generator" means:

(a) A generator who generates no more than 100 kilograms of hazardous waste in a calendar month; ~~or~~ and

(b) A generator who generates acutely hazardous waste listed in Sections 2, 3, and 4(5) of 401 KAR 31:040 in a calendar month in quantities no greater than one (1) kilogram. All quantities of that acutely hazardous waste are subject to administrative regulation under 401 KAR Chapters 32 through 39, and the notification and permitting requirements of KRS 224.01-400, 224.40-310, 224.46-510, 224.46-580, and 224.50-130 to 224.50-413.

(41) "Confined aquifer" means an aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(42) "Connector" means flanged, screwed, welded, or other joined fitting used to connect two (2) pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(43) "Consignee" means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste is sent.

(44) "Constituent" shall have the same meaning as "hazardous waste constituent."

(45) "Container" means any portable device in which hazardous waste is transported, stored, treated, or otherwise handled, and includes transport vehicles that are containers themselves (for example, tank trucks, tanker-trailers, and rail tank cars), and containers placed on or in a transport vehicle.

(46) "Containment building" means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of 401 KAR 34:245 or 35:245.

(47) "Contaminate" means introduce a substance that would cause:

(a) The concentration of that substance in the groundwater to exceed the maximum contaminant level specified in 401 KAR 30:031, Sections 5 and 6 of 401 KAR 47:030, or Section 8 of 401 KAR

34:060;

(b) An increase in the concentration of that substance in the groundwater where the existing concentration of that substance exceeds the maximum contaminant level specified in 401 KAR 30:031, 401 KAR 47:030, or Section 8 of 401 KAR 34:060; or

(c) A significant increase above established background levels, for substances that do not have an established maximum contamination level.

(48) "Contamination" means the degradation of naturally occurring water, air, or soil quality either directly or indirectly as a result of human activities.

(49) "Contingency plan" means a document setting out an organized, planned, and coordinated course of action to be followed in the event of a fire, explosion, or release of waste or waste constituents into the environment which has the potential for endangering human health and the environment. Financial planning to identify resources for initiation of such action is a part of contingency plan development.

(50) "Continuous recorder" means a data recording device recording an instantaneous data value at least once every 15 minutes.

(51) "Control device shutdown" means the cessation of operation of a control device for any purpose.

(52) "Control device" means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale (for example, a primary condenser on a solvent recovery unit) is not a control device.

(53) "Corrective action management unit" or "CAMU" means an area within a facility that is designated by the cabinet under 401 KAR 34:287, for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. A CAMU shall only be used for the management of remediation wastes pursuant to implementing such corrective action requirements at the facility.

(54) "Cover" means a device or system which is placed on or over a hazardous waste such that the entire hazardous waste surface area is enclosed and sealed to reduce air emissions to the atmosphere. A cover may have openings such as access hatches, sampling ports, and gauge wells that are necessary for operation, inspection, maintenance, or repair of the unit on which the cover is installed provided that each opening is closed and sealed when not in use. Examples of covers include a fixed roof installed on a tank, a floating membrane cover installed on a surface impoundment, a lid installed on a drum, and an enclosure in which an open container is placed during waste treatment.

(55) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

(56) "Current closure ~~and postclosure~~ cost estimates" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:090 or Section 1(1), (2) and (3) of 401 KAR 35:090.

(57) "Current liabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other current liabilities.

(58) ~~["Current plugging and abandonment cost estimates" as used in subsection (1) of this section refers to the cost estimates required to be shown in paragraphs 1 to 4 of the letter from the owner's or operator's chief financial officer (see 40 CFR 144.70(f)).~~

~~(59)~~ "Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with 40 CFR 144.62(a), (b), and (c).

~~(59)~~ ~~(60)~~ "Current postclosure cost estimate" means the most recent of the estimates prepared in accordance with Section 1(1), (2) and (3) of 401 KAR 34:100 or Section 1(1), (2) and (3) of 401 KAR

35:100.

(60) [(64)] "Debris" means solid material exceeding a 60mm particle size that is intended for disposal and that is: a manufactured object; plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in 401 KAR 37:040, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and Intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by Section 6 of 401 KAR 37:040 and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

(61) [(62)] "Designated facility" means a hazardous waste treatment, storage, or disposal facility which:

(a) Has received a hazardous waste site or facility permit (or a facility with interim status) in accordance with the requirements of 401 KAR Chapter 38;

(b) Has received a permit from a state authorized in accordance with 40 CFR Part 271, and EPA permit (or a facility with interim status) in accordance with 40 CFR Parts 270 and 124; or

(c) Is regulated under Section 6(3)(b) of 401 KAR 31:010 or 401 KAR Chapter 36, 40 CFR 261.6(c)(2) or 40 CFR Part 266; and

(d) That has been designated on the manifest by the generator pursuant to Section 1 of 401 KAR 32:020. If a waste is destined to a hazardous waste site or facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility shall be a facility allowed by the receiving state to accept that waste.

(62) [(63)] "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Section 4(1) and (3) of 401 KAR 43:020 and Section 4(1) and (3) of 401 KAR 43:030. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(63) [(64)] "Destruction or adverse modification" means an alteration of critical habitat which appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(64) [(65)] "Dike" means an embankment or ridge of either natural or manmade materials used to prevent the movement of liquids, sludges, solids, or other materials.

(65) [(66)] "Direct transfer equipment" means any device (including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps) that is used to distribute, meter, or control the flow of hazardous waste between a container (for example, transport vehicle) and a boiler or industrial furnace.

(66) "Disposal" shall have the meaning specified in KRS 224.01-010.

(67) "Disposal facility" means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

(68) ["Disposal" shall have the meaning specified in KRS 224.01-010.

(69) "Distillate receiver" means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(69) [(70)] "Distillation operation" means an operation, either batch or continuous, separating one (1) or more feed stream(s) into two (2) or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The

separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(70) [(71)] "Domestic sewage" means untreated sanitary wastes that pass through a sewer system.

(71) [(72)] "Double block and bleed system" means two (2) block valves connected in series with a bleed valve or line that can vent the line between the two (2) block valves.

(72) [(73)] "Draft permit" shall have the same meaning as "proposed permit".

(73) [(74)] "Drip pad" means an engineered structure consisting of a curbed, free-draining base, constructed of nonearthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(74) [(75)] "Effluent Limitations" shall have the same meaning as KRS 224.01-010.

(75) [(76)] "Elementary neutralization unit" means a device which:

(a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in Section 3 of 401 KAR 31:030, or they are listed in 401 KAR 31:040 only for this reason; and

(b) Meets the definition of tank, tank system, container, transport vehicle, or vessel in this section.

(76) [(77)] "Emergency permit" means a permit issued by the cabinet to temporarily store, treat or dispose of hazardous waste in accordance with the provisions of Section 2 of 401 KAR 38:060, to temporarily manage, process, or dispose of a solid waste in accordance with the provisions of Section 2 of 401 KAR 47:150 or to temporarily store, treat, or dispose of special waste in accordance with the provisions of Section 1 of 401 KAR 45:135.

(77) [(78)] "Endangered or threatened species" means any species listed as such pursuant to Section 4 of the Endangered Species Act, as amended, 16 USC 1536.

(78) [(79)] "Engineer" shall have the meaning specified in KRS 322.010. An independent, professional engineer shall be registered in Kentucky pursuant to KRS 322.040 and shall be qualified to engage in waste management engineering practices.

(79) [(80)] "EPA acknowledgment of consent" means the cable sent to EPA from the U.S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(80) [(81)] "EPA hazardous waste number" means the number assigned by EPA and the cabinet to each hazardous waste listed in 401 KAR 31:040, and to each characteristic identified in 401 KAR 31:030.

(81) [(82)] "EPA identification number" means the number assigned by EPA or the cabinet to each generator; transporter; or treatment, storage, or disposal facility.

(82) [(83)] "Ephemeral stream" means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice and which has a channel bottom that is always above the local water table.

(83) [(84)] "Equipment" means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange, and any control devices or systems required by **401 KAR 34:275. [this administrative regulation.]**

(84) [(85)] "Equivalent method" means any testing or analytical method, approved jointly by the administrator and the secretary under 401 KAR Chapter 31, or methods in 401 KAR Chapters 47 and 48, approved by the secretary of the cabinet.

(85) [(86)] "Existing" indicates a boiler or industrial furnace that on or before August 21, 1991 is either in operation burning, or processing hazardous waste or for which construction (including the ancillary facilities to burn or to process the hazardous waste) has commenced.

(86) [(87)] "Existing component" shall have the same meaning as "existing tank system."

(87) [(88)] "Existing facility" shall have the same meaning as "existing hazardous waste site or facility".

(88) [(89)] "Existing hazardous waste site or facility" means a hazardous waste facility which was in operation, or for which continuous construction had commenced, on or before November 19, 1980. A facility has commenced construction if:

(a) The owner or operator had obtained the federal, state and local approvals or permits necessary to begin physical construction; and

(b) Either:

1. A continuous on-site, physical construction program has begun; or

2. The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the facility to be completed within a reasonable time.

(89) [(90)] "Existing portion" means that land surface area of an existing hazardous waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(90) [(91)] "Existing tank system" means a tank system or component that is used for the storage or treatment of hazardous waste and that is in operation, or for which installation commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(a) A continuous on-site physical construction or installation program has begun; or

(b) The owner or operator has entered into contractual obligations, which cannot be canceled or modified without substantial loss, for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(91) [(92)] "External floating roof" means a pontoon or double-deck type floating roof that rests on the surface of a hazardous waste being managed in a tank that has no fixed roof.

(92) [(93)] "Face amount" means the total amount the insurer is obligated to pay under the policy.

(93) [(94)] "Facility" means:

(a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (for example [e.g.], one (1) or more landfills, surface impoundments, or combinations of them).

(b) For the purpose of implementing corrective action under Section 12 of 401 KAR 34:060, all contiguous property under the control of the owner or operator seeking a hazardous waste permit. This definition also applies to facilities implementing corrective action under KRS 224.46-520.

(94) "Facility mailing list" means the mailing list for a facility maintained in accordance with Section 7(3)(a)4c of 401 KAR 38:050.

(95) "Federal agency" means any department, agency, or other instrumentality of the federal government, any independent agency or establishment of the federal government including any government corporation, and the United States Government Printing Office.

(96) "Federal, state, and local approvals or permits necessary to begin physical construction" means permits and approvals required under federal, state, or local hazardous waste control statutes, administrative regulations, or ordinances.

(97) "Final closure" of a hazardous waste site or facility means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under 401 KAR Chapters 34 and 35 are no longer conducted at the facility unless subject to the provisions

in Section 5 of 401 KAR 32:030.

(98) "First attempt at repair" means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(99) "Fiscal year" means a twelve (12) month period for accounting and other financial purposes.

(100) "Fixed roof" means a rigid cover that is installed in a stationary position so that it does not move with fluctuations in the level of the hazardous waste placed in a tank.

(101) "Flame zone" means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(102) "Floating membrane cover" means a cover consisting of a synthetic flexible membrane material that rests upon and is supported by the hazardous waste being managed in a surface impoundment.

(103) "Floating roof" means a pontoon-type or double-deck type cover that rests upon and is supported by the hazardous waste being managed in a tank, and is equipped with a closure seal or seals to close the space between the cover edge and the tank wall.

(104) "Flood plain" means areas adjoining inland waters which are inundated by the base flood, unless otherwise specified in 401 KAR 30:031 or 401 KAR 47:030, and includes: 100-year floodplain and floodway.

(105) "Floodway" means the channel of the waterway, stream or river and that portion of the adjoining floodplain which provides for passage of the 100-year flood flow without increasing the floodwater depth across the 100-year floodplain by more than one (1) foot.

(106) "Flow indicator" means a device that indicates whether gas flow is present in a vent stream.

(107) "Food chain crops" means tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(108) "Fractionation operation" means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(109) "Free liquids" means liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(110) "Freeboard" means the vertical distance between the top of a tank or surface impoundment dike and the surface of the waste contained therein.

(111) "Generator" shall have the meaning specified in KRS 224.01-010.

(112) "Governing body" shall have the same meaning as KRS 224.01-010.

(113) ~~"Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.~~

~~(114)~~ **"Groundwater"** means the subsurface water occurring in the zone of saturation beneath the water table, and perched water zones below the B-soil horizon, including water circulating through fractures, bedding planes, and solution conduits.

(114) "Groundwater table" means the upper boundary of the saturated zone in which the hydrostatic pressure of the groundwater is equal to the atmospheric pressure.

(115) "Halogenated organic compounds" or "HOCs" means those compounds having a carbon-halogen bond that are listed under 401 KAR 37:110.

(116) "Hazardous constituent" shall have the meaning specified in KRS 224.01.010.

(117) "Hazardous debris" means debris that contains a hazardous waste listed in 401 KAR 31:040 or that exhibits a characteristic of hazardous waste identified in 401 KAR 31:030.

(118) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.

(119) "Hazardous waste constituent" means a constituent which caused the cabinet to list the hazardous waste in 401 KAR 31:040, or a constituent listed in Section 5(3) of 401 KAR 31:030.

~~[(118) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~[(119) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.]~~

~~[(120) "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.~~

~~[(121) "Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed. Hazardous waste management units include: aboveground tank; component; existing tank system or existing component; in-ground tank; new tank system or new tank component; on-ground tank; tank system; underground tank; or unfit-for-use tank system.~~

~~[(122) "Hazardous waste management unit shutdown" means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than twenty-four (24) hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.~~

~~[(123) "Hazardous waste site or facility" means any place at which hazardous waste is treated, stored, or disposed of by landfilling, incineration, or any other method. Hazardous waste site or facility includes: boiler; disposal facility; elementary neutralization unit; incinerator; industrial furnace; hazardous waste transfer facility; injection well; landfill; land treatment facility; miscellaneous unit; pile or waste pile; replacement unit; storage facility; sludge dryer; surface impoundment; tank; thermal treatment facility; totally enclosed treatment facility; treatment facility; or wastewater treatment unit.~~

~~[(124) [(122)] "Hazardous waste transfer facility" means any transportation related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous waste are held during the normal course of transportation.~~

~~[(125) "Hazardous waste" shall have the meaning specified in KRS 224.01-010.]~~

~~[(125) [(124)] "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene to the~~

present.

~~[(126) [(125)] "Hot well" means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.~~

~~[(127) [(126)] "Household waste" means any waste material (including garbage, trash, and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).~~

~~[(128) [(127)] "In existence" shall have the same meaning as "existing."~~

~~[(129) [(128)] "In gas service" means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.~~

~~[(130) [(129)] "In heavy liquid service" means that the piece of equipment is not in gas service or in vapor service or in light liquid service.~~

~~[(131) [(130)] "In light liquid service" means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one (1) or more of the components in the stream is greater than three-tenths (0.3) kilopascals (kPa) at twenty (20) degrees Centigrade, the total concentration of the pure components having a vapor pressure greater than three-tenths (0.3) kPa at twenty (20) degrees Centigrade is equal to or greater than twenty (20) percent by weight, and the fluid is a liquid at operating conditions.~~

~~[(132) [(131)] "In operation" refers to a facility which is treating, storing, or disposing of hazardous waste.~~

~~[(133) [(132)] "In situ sampling systems" means nonextractive samplers or in-line samplers.~~

~~[(134) [(133)] "In vacuum service" means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.~~

~~[(135) [(134)] "In vapor service" shall have the same meaning as "in gas service."~~

~~[(136) [(135)] "In-ground tank" means a device meeting the definition of "tank" in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.~~

~~[(137) [(136)] "Inactive portion" means that portion of a hazardous waste site or facility which was not operated after November 19, 1980.~~

~~[(138) [(137)] "Incinerator" means any enclosed device that:~~

~~(a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or~~

~~(b) Meets the definition of infrared incinerator or plasma arc incinerator.~~

~~[(139) [(138)] "Incompatible waste" means a hazardous waste which is unsuitable for placement in a particular device or facility because it may cause corrosion or decay of containment materials, or unsuitable for commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.~~

~~[(140) [(139)] "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.~~

~~[(141) [(140)] "Individual generation site" means the contiguous site at or on which one (1) or more hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one (1) or more sources of hazardous waste but is considered a single or individual generation site if the site or property is contiguous.~~

~~[(142) [(141)] "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of~~

materials or energy:

- (a) Cement kilns;
- (b) Lime kilns;
- (c) Aggregate kilns;
- (d) Phosphate kilns;
- (e) Coke ovens;
- (f) Blast furnaces;
- (g) Smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);
- (h) Titanium dioxide chloride process oxidation reactors;
- (i) Methane reforming furnaces;
- (j) Pulping liquor recovery furnaces;
- (k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;
- (l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three (3) percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty (20) percent as generated; or
- (m) Other devices as the cabinet may, after notice and comment, add to this list on the basis of criteria and Section 5 of 401 KAR 30:080.

(143) [(142)] "Infrared incinerator" means any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(144) [(143)] "Injection well" means a well into which fluids are injected to achieve subsurface emplacement.

(145) [(144)] "Inner liner" means a continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained hazardous waste or reagents used to treat the hazardous waste.

(146) [(145)] "Installation inspector" means a person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of a hazardous waste management unit including tank systems.

(147) [(146)] "Interim status" means the designation of a hazardous waste site or facility which was in existence on November 19, 1980, and has submitted a Part A application under 401 KAR Chapter 38 or under 40 CFR Part 270 and is treated as having a permit until final administrative disposition of the application is made.

(148) [(147)] "Intermittent stream" means a stream or reach of stream that drains a watershed of one (1) square mile or more but does not flow continuously during the calendar year.

(149) [(148)] "International shipment" means the transportation of hazardous waste into or out of the jurisdiction of the United States.

(150) [(149)] "Internal floating roof" means a floating roof that rests or floats on the surface (but not necessarily in complete contact with it) of a hazardous waste being managed in a tank that has a fixed roof.

[(150)] "IUC well" means a ~~underground injection control well as provided in 40 CFR Part 144.~~

(151) "Karst terrain" means a type of topography where limestone, dolomite or gypsum is present and is characterized by naturally occurring closed topographic depressions or sinkholes, caves, disrupted surface drainage, and well developed underground solution channels formed by dissolution of these rocks by water moving underground.

(152) "Key personnel" shall have the meaning specified in KRS 224.01-010.

(153) "Lab pack" means any large container equal to or smaller than fifty-five (55) gallons that holds many smaller containers of

various content tightly secured with packing material.

(154) "Lamp" means the bulb or tube portion of a lighting device specifically designed to produce radiant energy, most often in the ultraviolet (UV), visible, and infrared (IR) regions of the electromagnetic spectrum. Examples of common lamps include, but is not limited to, incandescent, fluorescent, high pressure sodium, mercury vapor, metal halide, high intensity discharge, and neon lamps.

(155) "Land disposal" shall have the meaning specified in KRS 224.01-010.

(156) "Land treatment facility" means a facility or part of a facility at which hazardous waste is applied onto or incorporated into the soil surface. These facilities are disposal facilities if the waste will remain after closure.

(157) "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(158) "Landfill cell" means a discrete volume of a hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

~~[(158)] "Landfill" means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, or an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.]~~

(159) "Large quantity handler of universal waste" means a universal waste handler who accumulates 5,000 kilograms or more total universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which 5,000 kilograms or more total of universal waste is accumulated.

(160) "Leachate" means any liquid including any suspended components in the liquid, that has percolated through or drained from waste.

(161) "Leak-detection system" means a system capable of detecting the failure of either the primary or secondary containment system or the presence of a release of hazardous waste, hazardous waste constituents or accumulated liquid in the secondary containment system. Such a system shall employ operational controls (daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment system or the presence of a release of hazardous waste constituents or accumulated liquids into the secondary containment system.

(162) "Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

(163) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(164) "Liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(165) "Liquid-mounted seal" means a foam or liquid-filled primary seal mounted in contact with the hazardous waste between the tank wall and the floating roof continuously around the circumference of the tank.

(166) "Local government" means the fiscal court of the county,

ADMINISTRATIVE REGISTER - 2120

urban-county government, or governing body of an incorporated municipality wherein a hazardous waste landfill or other site or facility for the land disposal of hazardous waste is proposed.

(167) "Major modification" means for hazardous waste sites or facilities, a change in ownership where the cabinet determines that other changes in the permit are necessary as a result of the change in ownership or operational control, area occupied, disposal method, or other significant change in the operation of a waste site or facility (Note: Minor modifications are described in Section 3 of 401 KAR 38:040).

(168) "Malfunction" means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(169) **"Manifest" shall have the meaning specified in KRS 224.01-010.**

(170) "Manifest document number" means the EPA twelve (12) digit identification number assigned to the generator plus a unique, serially increasing, five (5) digit document number assigned to the manifest by the generator for recordkeeping and reporting purposes.

~~[(170) "Manifest" shall have the meaning specified in KRS 224.01-010.]~~

(171) "Maximum organic vapor pressure" means the equilibrium partial pressure exerted by the hazardous waste contained in a tank determined at the temperature equal to either:

(a) The local maximum monthly average temperature as reported by the National Weather Service when the hazardous waste is stored or treated at ambient temperature; or

(b) The highest calendar-month average temperature of the hazardous waste when the hazardous waste is stored at temperatures above the ambient temperature or when the hazardous waste is stored or treated at temperatures below the ambient temperature.

(172) "Mining overburden returned to the mine site" means any material overlying an economic mineral deposit which is removed to gain access to that deposit and is then used for reclamation of a surface mine.

(173) "Miscellaneous unit" means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of, and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under 40 CFR Part 146, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration permit under Section 6 of 401 KAR 38:060.

(174) **"Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.**

(175) "Monitoring well" means a well used to obtain water samples for water quality and quantity analysis and groundwater levels.

~~[(175) "Monitoring" means the act of systematically inspecting and collecting data on operational parameters or on the quality of the air, soil, groundwater, or surface water.]~~

(176) "Movement" means that hazardous waste transported to a facility in an individual vehicle.

(177) "Net working capital" means current assets minus current liabilities.

(178) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.

(179) **"New facility" means any hazardous waste site or facility that commenced construction after November 19, 1980.**

(180) "New tank component" shall have the same meaning as "new tank system."

(181) ~~[(180)]~~ "New tank system" means a tank system or component that will be used for the storage or treatment of hazardous waste and for which installation commenced after July 14, 1986; however, for purposes of Section 4(7)(b) of 401 KAR 34:190 and Section

4(7)(b) of 401 KAR 35:190, a new tank system is one for which construction commenced after July 14, 1986.

~~[(181) "New" means any hazardous waste site or facility that commenced construction after November 19, 1980.]~~

(182) "No detectable organic emissions" means no escape of organics from a device or system to the atmosphere as determined by an instrument reading less than 500 parts per million by volume (ppmv) above the background level at each joint, fitting, and seal when measured in accordance with the requirements of Method 21 in 40 CFR Part 60, Appendix A, and by no visible openings or defects in the device or system such as rips, tears, or gaps.

(183) "Nonsudden accidental occurrence" means an occurrence that takes place over time and involves continuous or repeated exposure.

(184) "Nonwastewaters" means wastes that do not meet the criteria for wastewaters found in the definition for wastewaters.

(185) "Not detected" means at or below the lower method calibration limit (MCL) in SW-846, Method 8290, Table 1.

(186) "Off-site" means properties noncontiguous to the site.

(187) "On-site" means on the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing, as opposed to going along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access is also considered on-site property.

(188) "Onground tank" means a device meeting the definition of tank that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(189) "Open burning" means the combustion of any material or solid waste without:

(a) Control of combustion air to maintain adequate temperature for efficient combustion;

(b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(c) Control of emission of the gaseous combustion products.

(190) "Open-ended valve or line" means any valve, except pressure relief valves, having one (1) side of the valve seat in contact with process fluid and one (1) side open to the atmosphere, either directly or through open piping.

(191) "Operational plan" means the approved plan of operations filed with the cabinet which describes the method of operation that the permittee will use in the treatment, storage, or disposal of wastes.

(192) "Operator" means any person responsible for overall operation of an on-site or off-site waste facility, including any private contractor conducting operational activities at a federal facility.

(193) "Other site or facility for the land disposal of hazardous waste" means a disposal facility but shall not include a storage facility or a treatment facility.

(194) "Owner" means any person who owns an on-site or off-site waste facility, or any part of a facility.

(195) "Parent corporation" means a corporation which directly owns at least fifty (50) percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(196) "Part A of the application" or "Part A" means the standard forms or format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:080.

(197) "Part B of the application" or "Part B" means the standard format for applying for a hazardous waste site or facility permit as required in 401 KAR 38:090 to 401 KAR 38:210.

(198) "Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of 401 KAR Chapters 34 and 35 at a facility that contains other

active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(199) "Perennial stream" means a stream or that part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface run-off. The term does not include "intermittent stream" or "ephemeral stream".

(200) **"Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit-by-rule, registered permit-by-rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.**

(201) "Permit by rule" means authorization allowing certain classes of sites or facilities to manage waste consistent with 401 KAR Chapters 30 to 49, without submission of a registration or permit application to the cabinet. Examples of hazardous waste sites or facilities which are permitted by rule include facilities operating under an interim status permit and facilities identified in Section 1 of 401 KAR 38:060.

~~[(201) "Permit" means the authorization or other control document issued by the cabinet to implement the requirements of the waste management administrative regulations. The term permit includes permit by rule, registered permit by rule, research, development, and demonstration permit, and emergency permit. However, the term permit does not include draft permit or proposed permit.]~~

(202) "Permittee" means any person holding a valid permit issued by the cabinet to manage, treat, store, or dispose of waste.

(203) "Person" shall have the meaning specified in KRS 224.01-010.

(204) "Personnel" or "facility personnel" means all persons who work at or oversee the operations of a waste facility, and whose actions or failure to act may result in noncompliance with the requirements of the waste management administrative regulations.

(205) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(a) Is a new animal drug under FFDCA section 201(w), or

(b) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(c) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by paragraph (a) or (b) of this subsection.

(206) "Pile" or "waste pile" means any noncontainerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

(207) "Plasma arc incinerator" means any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(208) "Point of compliance" means for **hazardous [solid]** waste site and facilities, groundwater monitoring wells located within 250 feet of the waste boundary as approved by the cabinet.

(209) "Point of waste origination" means as follows:

(a) When the facility owner or operator is the generator of the hazardous waste, the point of waste origination means the point where a solid waste produced by a system, process, or waste management unit is determined to be a hazardous waste as identified in **401 KAR Chapter 31 [40 CFR Part 264]**.

(b) When the facility owner and operator are not the generator of the hazardous waste, point of waste origination means the point where the owner or operator accepts delivery or takes possession of

the hazardous waste.

(210) "Point of waste treatment" means the point where a hazardous waste exits a waste management unit used to destroy, degrade, or remove organics in the hazardous waste.

(211) "Point source" means any discernible, confined, and discrete conveyance including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

(212) "Pollutant" shall have the same meaning as KRS 224.01-010.

(213) "Polychlorinated biphenyls" or "PCB" means halogenated organic compounds defined in accordance with 40 CFR 761.2 as of July 1989.

(214) "Postclosure care" means the manner in which a facility shall be maintained when it no longer accepts waste for disposal.

(215) "Postclosure monitoring and maintenance" shall have the meaning specified in KRS 224.01-010.

(216) "Postclosure plan" means the plan for postclosure care prepared in accordance with the requirements of Sections 8 to 11 of 401 KAR 34:070 or Sections 8 to 11 of 401 KAR 35:070.

(217) "Pressure release" means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(218) "Primary exporter" means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with Section 1 of 401 KAR 32:020 which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(219) "Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(220) "Process vent" means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(221) "Property damage" shall have the meaning given by applicable Kentucky statutes. Property damage does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for property damage.

(222) "Proposed permit" means a document prepared by the cabinet indicating the cabinet's tentative decision to issue or deny, modify, revoke or terminate a permit.

(223) "Publicly owned treatment works" or "POTW" shall have the meaning specified in KRS 224.01-010.

(224) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

(225) "Qualified groundwater scientist" means a geologist registered in Kentucky who has received a baccalaureate or postgraduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields to enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(226) "Receiving country" means a foreign country to which a hazardous waste is sent for the purpose of treatment, storage or disposal (except short-term storage incidental to transportation).

(227) "Recharge zone" means an area supplying the water which enters an underground drinking water source.

(228) "Reclaimed" means a material that is processed to recover a usable product, or that is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

(229) "Recovered material" shall have the meaning specified in KRS 224.01-010.

(230) "Recyclable materials" means hazardous wastes that are recycled.

(231) "Recycled" means a material that is used, reused, or reclaimed.

(232) "Recycling" shall have the meaning specified in KRS 224.01-010.

(233) "Regional integrated waste treatment and disposal demonstration facility" shall have the meaning specified in KRS 224.01-010.

(234) "Regulated unit" means hazardous waste land disposal sites or facilities, or portions of existing hazardous waste land disposal sites or facilities that continued to receive waste after January 26, 1983.

(235) "Remediation waste" means all solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under Section 12 of 401 KAR 34:060 and KRS 224.46-520. For a given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing KRS 224.46-520 for releases beyond the facility boundary.

(236) "Repaired" means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(237) "Replacement unit" means a landfill, surface impoundment, or waste pile unit from which all or substantially all of the waste is removed, and that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or approved corrective action.

(238) "Representative sample" means a sample of a universe or whole (for example, waste pile, lagoon, or groundwater) which can be expected to exhibit the average properties of the universe or whole.

(239) "Research, development, and demonstration permit" means a permit issued by the cabinet for a hazardous waste treatment facility that utilizes an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under 401 KAR Chapters 34 through 36.

(240) "Resource recovery" means the recovery of material or energy from waste.

(241) "Run-off" means any rainwater, leachate, or other liquid that drains overland from any part of a facility.

(242) "Run-on" means any rainwater, leachate, or other liquid that drains overland onto any part of a facility.

(243) "Saturated zone" shall have the same meaning as "zone of saturation".

(244) "Schedule of compliance" means a schedule of remedial measures included in a permit or cabinet order, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with KRS Chapter 224 and 401 KAR Chapters 30 to 49.

(245) "Scrap metal" is bits and pieces of metal parts (for example, bars, turnings, rods, sheets, or wire) or metal pieces that may be combined together with bolts or soldering (for example, radiators, scrap automobiles, or railroad boxcars), which when worn or superfluous can be recycled.

(246) "Secretary" shall have the meaning specified in KRS 224.01-010.

(247) "Sensor" means a device that measures a physical quantity or the change in a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(248) "Separator tank" means a device used for separation of two immiscible liquids.

(249) "Sewage system" shall have the meaning specified in KRS 224.01-010.

(250) "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the waste facility or activity.

(251) **"Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.**

(252) "Sludge dryer" means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 BTU per pound of sludge treated on a wet-weight basis.

~~[(252) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant or any other waste having similar characteristics and effects.]~~

(253) "Small quantity generator" means a generator who generates more than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month.

(254) "Small quantity handler of universal waste" means a universal waste handler who does not accumulate more than 5,000 kilograms of universal waste (batteries, lamps, pesticides, or thermostats, calculated collectively) at any time.

(255) "Solid waste management unit" shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.

(256) "Solvent extraction operation" means an operation or method of separation in which a solid or solution is contacted with a liquid solvent (the two (2) being mutually insoluble) to preferentially dissolve and transfer one (1) or more components into the solvent.

(257) "Sorb" means to either adsorb, absorb, or both.

(258) "Sorbent" means a material that is used to soak up free liquids by either adsorption or absorption, or both.

(259) "Spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without processing.

(260) "Spill" means any accidental spilling, leaking, pumping, pouring, emitting, or dumping of hazardous wastes or materials which, when spilled, become hazardous wastes into or on any land or water.

(261) "Start-up" means the setting in operation of a hazardous waste management unit or control device for any purpose.

(262) "State" means any of the fifty (50) states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands or Guam but does not include any foreign country.

(263) "Steam stripping operation" means a distillation operation in which vaporization of a volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(264) **"Storage" shall have the meaning specified in KRS 224.01-010.**

(265) "Storage facility" means a facility or part of a facility at which hazardous waste is held for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere. A generator who accumulates his own hazardous wastes in an approved manner for less than ninety (90) days for subsequent transport on site or off site is not operating or maintaining a storage facility.

(266) ~~[(265)]~~ "Storage of hazardous waste" means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.

~~[(266) "Storage" shall have the meaning specified in KRS 224.01-~~

040.]

(267) "Substantial business relationship" means the extent of a business relationship necessary to make a guarantee contract issued incident to that relationship valid and enforceable. A "substantial business relationship" shall arise from a pattern of recent or ongoing business transactions, in addition to the guarantee itself, such that a currently existing business relationship between the guarantor and the owner or operator is demonstrated to the satisfaction of the cabinet.

(268) "Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(269) "Sump" means any pit or reservoir that meets the definition of tank, and those troughs and trenches connected to it, that serves to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile administrative regulations, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(270) "Surface impoundment" means a facility or part of a facility which is a natural topographic depression, manmade excavation, or diked area formed primarily of earthen materials (although it may be lined with manmade materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(271) "Surge control tank" means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(272) "Tangible net worth" means the tangible assets that remain after deducting liabilities; these assets would not include intangibles such as goodwill and rights to patents or royalties.

(273) "Tank" means a stationary device designed to contain an accumulation of hazardous waste that is constructed primarily of nonearthen materials (for example, wood, concrete, steel, or plastic) which provide structural support and which does not meet the definition of any other unit.

(274) "Tank system" means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

(275) "Termination" shall have the meaning specified in KRS 224.01-010.

(276) "The full amount of the liability coverage to be provided" means the amount of coverage for sudden and nonsudden occurrences required to be provided by the owner or operator, less the amount of financial assurance for liability coverage that is being provided by other financial assurance mechanisms being used to demonstrate financial assurance by the owner or operator.

(277) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").

(278) "Thermal treatment facility" means a facility or part of a facility which uses elevated temperatures as the primary means to change the chemical, physical or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge.

~~[(278) "Thermal treatment" means the treatment of hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the hazardous waste. Examples of thermal treatment processes are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge (see also "incinerator" and "open burning").]~~

(279) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Section 4(3)(b) of 401 KAR 43:020 or Section 4(3)(b) of 401 KAR 43:030.

(280) "Thin-film evaporation operation" means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(281) "Totally enclosed treatment facility" means a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during treatment. An example is a pipe in which acid is neutralized.

(282) "Transit country" means any foreign country, other than a receiving country, through which a hazardous waste is transported.

(283) "Transport vehicle" means a motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body is a separate transport vehicle.

(284) "Transportation" shall have the meaning specified in KRS 224.01-010.

(285) "Transporter" means a person engaged in the off-site transportation of hazardous waste by air, rail, highway or water.

(286) "Treatability study" means:

(a) A study in which a hazardous waste is subjected to a treatment process to determine:

1. Whether the waste is amenable to the treatment process;
2. What pretreatment, if any, is required;
3. The optimal process conditions needed to achieve the desired treatment;
4. The efficiency of a treatment process for a specific waste or wastes; or
5. The characteristics and volumes of residuals from a particular treatment process.

(b) For the purpose of 401 KAR 31:010, Section 4(5) and (6), exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies.

(c) A "treatability study" is not a means to commercially treat or dispose of hazardous waste.

(287) "Treatment" shall have the meaning specified in KRS 224.01-010.

(288) "Treatment facility" means a facility or part of a facility using any method, technique or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste nonhazardous or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, amenable for storage, or reduced in volume.

~~[(289) "Treatment zone" means a soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transformed, or immobilized.~~

~~[(289) "Treatment" shall have the meaning specified in KRS 224.01-010.]~~

(290) "Underground drinking water source" means:

(a) An aquifer supplying drinking water for human consumption; or

(b) An aquifer in which the groundwater contains less than 10,000 mg/l total dissolved solids.

(291) "UIC well" means an underground injection control well as provided in 40 CFR Part 144.

(292) "Underground injection" means the subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug

well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well".)

(293) [(292)] "Underground tank" means a device meeting the definition of "tank" in this section whose entire surface area is totally below the surface of and covered by the ground.

(294) [(293)] "Underlying hazardous constituent" means any constituent listed in Section 1 of 401 KAR 37:040, Table - Treatment Standards for Hazardous Wastes, except vanadium and zinc, which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific treatment standards.

(295) [(294)] "Unfit-for-use tank system" means a tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or treating hazardous waste without posing a threat of release of hazardous waste to the environment.

(296) [(295)] "Universal waste" means any of the following hazardous wastes that are subject to the universal waste requirements of 401 KAR Chapter 43:

- (a) Batteries as described in Section 2 of 401 KAR 43:010;
- (b) Pesticides as described in Section 3 of 401 KAR 43:010;
- (c) Thermostats as described in Section 4 of 401 KAR 43:010;

and

- (d) Spent lamps as described in Section 5 of 401 KAR 43:010.

(297) [(296)] "Universal waste handler":

(a) Means:

- 1. A generator of universal waste; or
- 2. The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(b) Does not mean:

- 1. A person who treats (except under the provisions of Sections 4(1) or (3) of 401 KAR 43:020 or Sections 4(1) or (3) of 401 KAR 43:030), disposes of, or recycles universal waste; or
- 2. A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(298) [(297)] "Universal waste transfer facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(299) [(298)] "Universal waste transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

(300) [(299)] "Unsaturated zone" shall have the same meaning as "Zone of aeration".

(301) [(300)] "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

(302) [(301)] "Used oil" shall have the same meaning as KRS 224.50-545.

(303) [(302)] "Used or reused" means a material that is either:

- (a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one (1) process used as feedstock in another process). However, a material shall not satisfy this condition if distinct components of the material are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

- (b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

(304) [(303)] "Vapor incinerator" means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(305) [(304)] "Vapor recovery system" means that equipment, device, or apparatus capable of collecting vapors and gases discharged from a storage tank, and a vapor processing system capable of affecting such vapors and gases so as to prevent their emission into the atmosphere.

(306) [(305)] "Vapor-mounted seal" means a foam-filled primary seal mounted continuously around the circumference of the tank so that there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the hazardous waste surface, and the floating roof.

(307) [(306)] "Vented" means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading (work losses) or by natural means such as diurnal temperature changes.

(308) [(307)] "Vessel" means any watercraft used or capable of being used as a means of transportation on the water.

(309) [(308)] "Volatile organic concentration" or "VO concentration" means the fraction by weight of organic compounds in a hazardous waste expressed in terms of parts per million (ppmw) as determined by direct measurement using Method 25D or by knowledge of the waste in accordance with the requirements of Section 4 of 401 KAR 35:281.

(310) [(309)] "Washout" means the carrying away of waste by waters as a result of flooding.

(311) "Waste" shall have the meaning specified in KRS 224.01-010.

(312) [(310)] "Waste boundary" means the outermost perimeter of the waste (projected in the horizontal plane) as it would exist at completion of the disposal activity.

(313) [(311)] "Waste determination" means performing all applicable procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine whether a hazardous waste meets standards specified in 401 KAR Chapter 35. Examples of a waste determination include performing the procedures in accordance with the requirements of Section 4 of 401 KAR 35:281 to determine the average VO concentration of a hazardous waste at the point of waste origination; the average VO concentration of a hazardous waste at the point of waste treatment and comparing the results to the exit concentration limit specified for the process used to treat the hazardous waste; determining the organic reduction efficiency and the organic biodegradation efficiency for a biological process used to treat a hazardous waste and comparing the results to the applicable standards; or the maximum volatile organic vapor pressure for a hazardous waste in a tank and comparing the results to the applicable standards.

(314) [(312)] "Waste pile" shall have the same meaning as "pile".

(315) [(313)] "Waste stabilization process" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquids as determined by Test Method 9095 (Paint Filter Liquids Test) in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication No. SW-846, (incorporated in 40 CFR 260.11, which is adopted in Section 3 of 401 KAR 30:010) [Third Edition, September 1986, as amended by Update I, November 15, 1992 (incorporated by reference refer to § 260.11 of this chapter)]. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "waste fixation" or "waste solidification."

(314) "Waste" shall have the meaning specified in KRS 224.01-

040.]

(316) [(315)] "Wastewaters" means wastes that contain less than one (1) percent by weight total organic carbon (TOC) and less than one (1) percent by weight total suspended solids (TSS), with the following exceptions:

(a) F001, F002, F003, F004, F005, wastewaters are solvent-water mixtures that contain less than one (1) percent by weight TOC or less than one (1) percent by weight total F001, F002, F003, F004, F005 solvent constituents listed in Section 1 of 401 KAR 37:040 in Table Treatment Standards for Hazardous Waste;

(b) K011, K013, K014 wastewaters contain less than five (5) percent by weight TOC and less than one (1) percent by weight TSS, as generated; and

(c) K103 and K104 wastewaters contain less than four (4) percent by weight TOC and less than one (1) percent by weight TSS.

(317) [(316)] "Wastewater treatment unit" means a device that:

(a) is part of a wastewater treatment facility that is subject to administrative regulation under either section 402 or 307(b) of the CWA;

(b) Receives and treats or stores an influent wastewater which is a hazardous waste as defined in 401 KAR 31:010, Section 3; or generates and accumulates a wastewater treatment sludge that is a hazardous waste as defined in 401 KAR 31:010, Section 3; or treats or stores a wastewater treatment sludge which is a hazardous waste as defined in Section 3 of 401 KAR 31:010; and

(c) Meets the definition of tank or tank system in this administrative regulation.

(318) "Water" or "waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.

(319) [(317)] "Water (bulk shipment)" means the bulk transportation of hazardous waste which is loaded or carried on board a vessel without containers or labels.

[(318) "Water" or "Waters of the Commonwealth" shall have the meaning specified in KRS 224.01-010.]

(320) [(319)] "Well" means any shaft or pit dug or bored into the earth, generally of cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(321) [(320)] "Wetlands" means land that has a predominance of hydric soils and is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(322) [(321)] "Zone of aeration" means that region of the soil or rock between the land surface and the nearest saturated zone in which the interstices are occupied partially by air.

(323) [(322)] "Zone of engineering control" means an area under the control of the owner or operator that upon detection of a hazardous waste release, can be readily cleaned up prior to the release of hazardous waste or hazardous constituents to waters of the Commonwealth.

(324) [(323)] "Zone of saturation" means that part of the earth's crust containing groundwater in which all voids, large and small, are filled with liquid.

Section 2. Acronyms and Abbreviations. Unless otherwise specifically indicated by context, acronyms and abbreviations used in 401 KAR Chapter 31 shall have the meaning as identified in Table 1 of this administrative regulation.

Table 1. Acronyms and Abbreviations.

| | |

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Manage-

ment, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: This regulation does not affect any entities, because it only defines terms used in the chapter. The regulation was promulgated to comply with KRS 13A.222.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The cabinet will experience no additional costs or savings by promulgating the amendments to this regulation.

2. Continuing costs or savings: None

3. Additional factors increasing or decreasing costs: There will be no additional factors affecting costs.

b. Reporting and paperwork requirements: There will be no extra paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on the state and local revenue with the promulgation of this regulation.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: No costs are imposed with the promulgation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: There were no other alternatives that would achieve compliance with KRS 13A.222.

8. Assessment of expected benefits of the administrative regulation: The benefit is having the definitions clearly stated at the beginning of each chapter.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: Not applicable since no requirements are imposed.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? Tiering is applied to all of Kentucky's waste regulations, based on type and quantity of waste generated and managed and type of management activities performed by the owner or operator.

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments establish definitions of hazardous waste terms and the clarification of certain definitions. This regulation is necessary to maintain consistency between state and federal programs. In addition, the regulation has been modified to reflect regulation construction specified in KRS 13A.222.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. This administrative regulation establishes definitions for all terms within 401 KAR Chapter 38. These terms are assimilated from existing state and federal regulatory definitions and existing statutory definitions where applicable.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): Because this administrative regulation only establishes definitions for 401 KAR Chapter 38, this administrative regulation will not affect state, county, or local expenditures.

Other Explanation: None

**NATURAL RESOURCES AND
ENVIRONMENTAL PROTECTION CABINET**
Department for Environmental Protection
Division of Waste Management
(Amended After Hearing)

401 KAR 38:040. Changes to permits; expiration of permits.

RELATES TO: KRS 224.01, 224.10, 224.40, 224.43, 224.46, 224.99, 40 CFR 270 Subparts D, E

STATUTORY AUTHORITY: KRS 224.10-100, 224.46-520, 224.46-530

NECESSITY, FUNCTION, AND CONFORMITY: To implement provisions of KRS 224.46-520 and 224.46-530 relative to changes and expiration of hazardous waste permits. This administrative regulation is equivalent to federal standards established in 40 CFR 270 Subparts D and E except for: Section 1(2) of this administrative regulation, which adds a reference to applicable statutory requirements contained in KRS 224.40-330; Section 4(1)(d) of this administrative regulation, which is added to allow the Cabinet to revoke a permit upon violation of KRS Chapter 224 and applicable state regulations; Section 5(5) of this administrative regulation, which is added to address nerve and blister agents as identified by KRS 224.50-130; and Section 6(1)(a) of this administrative regulation, which clarifies fee requirements for continuance of an expired permit. In Sections 2 and 3 of this administrative regulation, Kentucky has chosen to adopt previous federal permit modification procedures, rather than current federal procedures. U.S. EPA has approved states to use either method. Use of this previous permit modification procedure provides consistency with other Kentucky environmental programs.

Section 1. Transfer of Permits. (1) A permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued (under subsection (2) of this section or Section 2(2)(b) of this administrative regulation) to identify the new permittee and incorporate such other requirements as may be necessary under KRS Chapter 224 and the waste management administrative regulations.

(2) Changes in ownership or operational control of a facility may be made as a major modification with prior written approval of the cabinet in accordance with Section 2 of this administrative regulation. The new owner or operator shall submit a revised permit application no later than ninety (90) days prior to the scheduled change. Among other demonstrations, this application shall comply with KRS 224.40-330. A written agreement containing a specific date for transfer of permit responsibility between the current and new permittees shall also be submitted to the cabinet. When a transfer of ownership or operational control occurs, the old owner or operator shall comply with the requirements of 401 KAR Chapter 34 until the cabinet approves transfer to the new owner or operator. The new owner or operator shall demonstrate compliance with Section 2 of this administrative regulation and 401 KAR Chapter 34 within six (6) months of the date of the change of ownership or operational control of the facility. Upon demonstration to the cabinet by the new owner or operator of compliance with 401 KAR Chapter 34, the cabinet shall notify the old owner or operator that he no longer needs to comply with 401 KAR Chapter 34 as of the date of demonstration.

Section 2. Major Modification or Revocation and Reissuance of Permits. When the cabinet receives any information (for example, if the cabinet inspects the facility, receives information submitted by the permittee as required in the permit under Section 1 of 401 KAR 38:030, receives a request for modification or revocation and reissuance under Section 2 of 401 KAR 38:050, or conducts a review of permit file), the cabinet may determine whether one (1) or more of

the causes listed in subsections (1) and (2) of this section for modification or revocation and reissuance or both exist. If cause exists, the cabinet may modify or revoke and reissue the permit accordingly, subject to the limitations of subsection (3) of this section and may request an updated application if necessary. When a permit is modified, only the conditions subject to modification are reopened. If a permit is revoked and reissued, the entire permit is reopened and subject to revision and the permit is reissued for a new term (see Section 2(4) of 401 KAR 38:050). If cause does not exist under this section or Section 3 of this administrative regulation, the cabinet shall not modify or revoke and reissue the permit. If a permit modification satisfies the criteria in Section 3 of this administrative regulation for "minor modifications," the permit may be modified without a draft permit or public review. Otherwise, a draft permit shall be prepared and other procedures in 401 KAR 38:050 and, if applicable, 401 KAR 38:500 followed.

(1) Causes for modification. Paragraphs (a) to (d) of this subsection are causes for modification but not revocation and reissuance of permits. Paragraphs (a) to (d) of this subsection may be causes for revocation and reissuance as well as modification, when the permittee requests or agrees.

(a) Alterations. There are material and substantial alterations or additions to the permitted hazardous waste site or facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.

(b) Information. The cabinet has received new information. Permits may be modified during their terms for this cause only if the information was not available at the time of permit issuance (other than revised administrative regulations, guidance, or test methods) and would have justified the application of different permit conditions at the time of issuance.

(c) New statutory requirements or administrative regulations. The standards or administrative regulations on which the permit was based have been changed by statute, through promulgation of new or amended standards or administrative regulations, or by judicial decision after the permit was issued. Except as provided in paragraph (e) of this subsection, permits may be modified during their terms for this cause as follows:

1. The cabinet may modify the permit when the standards or administrative regulations on which the permit was based have been changed by statute or amended standards or administrative regulations.

2. Permittee may request modification when:

a. The permit condition to be modified was based on a promulgated administrative regulation in 401 KAR Chapters 30 to 38; and
b. The cabinet has revised, withdrawn, or modified that portion of the administrative regulation on which the permit condition was based; or

c. A permittee requests modification in accordance with Section 2 of 401 KAR 38:050 within ninety (90) days after notice of the action on which the request is based.

3. For judicial decisions, a court of competent jurisdiction has remanded and stayed cabinet promulgated administrative regulations, if the remand and stay concern that portion of the administrative regulations on which the permit condition was based or if a request is filed by the permittee in accordance with Section 2 of 401 KAR 38:050 within ninety (90) days of judicial remand.

(d) Compliance schedules. The cabinet determines good cause exists for modification of a compliance schedule, such as an act of God, strike, flood, materials shortage, or other events over which the permittee has little or no control and for which there is no reasonably available remedy (see also Section 3 of this administrative regulation on minor modifications).

(e) The cabinet may modify a permit:

1. When modification of a closure plan is required under Section 3(2) or 4(2) of 401 KAR 34:070.

2. When the cabinet receives notification of expected closure

under Section 4 of 401 KAR 34:070 and finds that any of the following previously granted permit conditions are no longer warranted:

a. Extension of the ninety (90) or 180 day periods under Section 4 of 401 KAR 34:070;

b. Modification of an extended postclosure care period under Section 7 of 401 KAR 34:070;

c. Continuation of security requirements under Section 7(2) of 401 KAR 34:070; or

d. Permission to disturb the integrity of the containment system under Section 7(3) of 401 KAR 34:070.

3. When the permittee has filed a request under Section 4 of 401 KAR 34:120 for a variance to the level of financial responsibility or when the cabinet demonstrates under Section 5 of 401 KAR 34:120 that an upward adjustment of the level of financial responsibility is required.

4. When the corrective action program specified in the permit under Section 11 of 401 KAR 34:060 has not brought the regulated unit into compliance with the groundwater protection standard within a reasonable period of time.

5. To include a detection monitoring program meeting the requirements of Section 9 of 401 KAR 34:060, when the owner or operator has been conducting a compliance monitoring program under Section 10 of 401 KAR 34:060 or a corrective action program under Section 11 of 401 KAR 34:060 and the compliance period ends before the end of the postclosure care period for the unit.

6. When a permit requires a compliance monitoring program under Section 10 of 401 KAR 34:060, but monitoring data collected prior to permit issuance indicate that the facility is exceeding the groundwater protection standard.

7. To include the conditions applicable to units at a facility that were not previously included in the site or facility's permit.

8. When a land treatment unit is not achieving complete treatment of hazardous constituents under its current permit conditions.

9. To include conditions applicable in new or amended standards or administrative regulations.

10. When modification is necessary to protect the public health or the environment.

11. To include conditions applicable as the result of a hearing or enforcement action as specified in 401 KAR Chapter 40.

(f) Notwithstanding any other provision in this section, when a permit for a land disposal facility is reviewed by the cabinet under Section 5(4) of this administrative regulation, the cabinet shall modify the permit as necessary to assure that the facility continues to comply with the currently applicable requirements in 401 KAR Chapters 30 to 39.

(2) Causes for modification or revocation and reissuance. The following are causes to modify or, alternatively, revoke and reissue a permit:

(a) Cause exists for termination under Section 4 of this administrative regulation and the cabinet determines that modification or revocation and reissuance is appropriate.

(b) The cabinet has received notification (as required in the permit in Section 1(12)(c) of 401 KAR 38:030) of a proposed transfer of the permit.

(c) Cause exists for termination under Subsection 2(1)(e) and (f) of this Section, and the cabinet determines that modification or revocation and reissuance is appropriate.

(3) Facility siting. Suitability of the facility location will not be considered at the time of permit modification or revocation and reissuance unless new information or standards indicate that a threat to human health or the environment exists which was unknown at the time of permit issuance.

(4) Major modifications that include changes in ownership and operational control of a facility may be made if the new owner or operator submits a revised permit application no later than ninety (90) days prior to the scheduled change. A change in ownership or operational control includes a transfer of twenty-five (25) or more

percent interest in the corporation, joint venture, partnership, proprietorship, or entity designated to own or operate the hazardous waste site or facility. When a transfer of ownership or operational control of a site or facility occurs, the old owner or operator shall comply with the requirements of 401 KAR 34:080 to 401 KAR 34:176 (financial requirements), until the new owner or operator has demonstrated to the cabinet that he is complying with the requirements in 401 KAR 34:080 to 401 KAR 34:176. The new owner or operator shall demonstrate compliance with the requirements in 401 KAR 34:080 to 401 KAR 34:176 within six (6) months of the date of the change in the ownership or operational control of the site or facility. Upon demonstration to the cabinet by the new owner or operator of compliance with the requirements in 401 KAR 34:080 to 401 KAR 37:176, the cabinet shall notify the old owner or operator in writing that he no longer needs to comply with the requirements in 401 KAR 34:080 to 401 KAR 34:176 as of the date of demonstration. Past performance as specified in Section 2(20) of 401 KAR 38:090 shall be considered. The provisions set forth in Section 3 of this administrative regulation as amended on March 10, 1988, shall apply to requests for modification received by the cabinet prior to November 14, 1990, and including all additional information and documentation submitted subsequent to November 14, 1990, as requested by the cabinet.

Section 3. Minor Modifications of Permits. Upon consent of the permittee, the cabinet may modify a permit to make the corrections or allowances for changes in the permitted activity listed in this section, without following the procedures of 401 KAR 38:050. Any permit modification not processed as a minor modification under this section shall be made for cause and with a 401 KAR 38:050 draft permit, public notice as required in Section 2 of this administrative regulation and, if applicable, compliance with 401 KAR 38:500 shall be demonstrated.

(1) The permittee shall put into effect minor modifications listed in subsection (3) of this section under the following conditions:

(a) The permittee shall inform the cabinet concerning the modification by certified mail or other means that establish proof of delivery within seven (7) calendar days after the change is put into effect. This notice shall specify the changes being made to permit conditions or supporting documents referenced by the permit, and shall explain why they are necessary. Along with the notice, the permittee shall provide a completed notification of minor modifications to hazardous waste permits not requiring prior approval of the cabinet, as incorporated by reference in subsection (2) of this section. The permittee shall also provide the applicable information from Parts A and B of the Kentucky Hazardous Waste Permit Application as it relates to the specific type of facility.

(b) The permittee shall send a notice of the modification to all persons on the facility mailing list and the appropriate units of local government. This notification shall be made within ninety (90) calendar days after the cabinet approves the request.

(c) Any person may request that the cabinet review, and the cabinet may, for cause, reject any minor modification. The cabinet shall inform the permittee by certified mail that a minor modification has been rejected, explaining the reasons for the rejection. If a minor modification has been rejected, the permittee shall comply with the original permit conditions.

(d) Minor modifications listed in subsection (3) of this section requiring "Prior Approval" shall be made only with the prior written approval of the cabinet.

(e) For a minor modification, the permittee may elect to follow the procedures for major modifications instead of the minor modifications procedures. The permittee shall inform the cabinet of this decision in the notice required in Section 2 of this administrative regulation.

(2) Form DEP 7092 entitled "Notification of Minor Modifications to Hazardous Waste Permits Not Requiring Prior Approval of the Cabinet" (July 1996) is hereby incorporated by reference. This form

ADMINISTRATIVE REGISTER - 2129

[application] is available at the Hazardous Waste Branch, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-6716, between 8 a.m. and 4:30 p.m., eastern time, Monday through Friday, except on state holidays.

(3) The following shall be used to determine whether prior approval is required for a minor modification:

CLASSIFICATION OF PERMIT MINOR MODIFICATION (1 OF 6)

| TYPE OF MINOR MODIFICATION | PRIOR APPROVAL | NOTIFICATION |
|---|----------------|--------------|
| (a) General Permit Provisions: | | |
| 1. Administrative and informative changes. | | X |
| 2. Correction of typographical errors. | | X |
| 3. Equipment replacement or upgrading with functionally equivalent components (e.g. pipes, valves, pumps, conveyors, controls). | | X |
| 4. Changes to provide for more frequent monitoring, reporting, sampling, or maintenance activities by the permittee. | | X |
| 5. Changes in interim compliance dates. | X | |
| (b) General Facility Standards: | | |
| 1. Changes to waste sampling or analysis methods to conform with agency guidelines or administrative regulations. | X | |
| 2. Changes associated with F039 (multisource leachate) sampling or analysis methods. | X | |
| 3. <u>To incorporate changes associated with underlying hazardous constituents in ignitable or corrosive waste.</u> | X | |
| 4. Changes to analytical quality assurance or the quality control plan to conform with agency administrative regulations. | X | |
| 5. [4-] Changes in the training plan, except to decrease the amount of training or type of training. | X | |
| 6. [5-] Changes in names, address or phone number of coordinators or other persons or agencies identified in the contingency plan. | X | |
| 7. [6-] Changes that the construction quality assurance officer certifies in the operating record will provide equivalent or better certainty that the unit components meet the design standards. | | X |
| 8. [7-] Other construction quality assurance changes. | X | |
| (c) Groundwater Protection: | | |
| 1. Replacement of an existing well that has been damaged or rendered inoperable, without change to location, design, or depth of the well. | | X |
| 2. Changes in groundwater sampling | X | |

| | |
|--|---|
| or analysis procedures or monitoring schedule. | |
| 3. Changes in statistical procedure for determining whether a statistically significant change in groundwater quality between upgradient and downgradient wells has occurred. | X |
| (d) Closure: | |
| 1. Changes to the closure plan in estimate of maximum extent of operations or maximum inventory of waste on-site at any time during the active life of the facility. | X |
| 2. Changes in the closure schedule for any unit, changes in the final closure schedule for the facility, or extension of the closure period. | X |
| 3. Changes in the expected year of final closure, where other permit conditions are not changed. | X |
| 4. Changes in procedures for decontamination of facility equipment or structures. | X |
| 5. Changes in approved closure plan resulting from unexpected events occurring during partial or final closure, unless otherwise specified in this section. | X |
| 6. Extension of the closure period to allow a landfill, surface impoundment or land treatment unit to receive non-hazardous wastes after final receipt of hazardous wastes under Section 4(4) and (5) of 401 KAR 34:070. | X |
| (e) Postclosure: | |
| 1. Changes in name, address, or phone number of contact in post-closure plan. | X |
| 2. Changes to the expected year of final closure, where other permit conditions are not changed. | X |
| (f) Containers: | |
| 1. Addition of a roof to a container unit without alteration of the containment system. | X |
| (g) Tanks: | |
| 1. Addition of a new tank that will operate for up to ninety (90) days using any of the following physical or chemical treatment technologies: neutralization, dewaterizing, phase separation, or component separation. | X |
| 2. Replacement of a tank with a tank that meets the same design standards and has a capacity within +/- ten (10) percent of the replaced tank provided: | X |
| a. The capacity difference is no more than 1500 gallons. | |
| b. The facility's permitted tank | |

ADMINISTRATIVE REGISTER - 2130

| | | | | | | |
|-----|--|---|---|--|---|---|
| | capacity is not increased. | | | | eration during the shutdown period for determining operational readiness after construction. | |
| c. | The replacement tank meets the same conditions in the permit. | | | | | |
| (h) | Surface Impoundments: | | | | | |
| 1. | Modifications of unconstructed units to comply with 401 KAR 34:200. | X | | | 2. Minor changes in the operating requirements set in the permit for conducting a trial burn. | X |
| 2. | Changes in response action plan. | X | | | 3. Minor changes in the ranges of the operating requirements set in the permit to reflect the results of the trial burn. | X |
| a. | Increase in action leakage rate. | X | | | (m) <u>Containment Buildings:</u> | |
| b. | Changes in specific response reducing its frequency or effectiveness. | X | | | <u>Modification or addition of containment building units resulting in up to 25% increase in the facility's containment building storage or treatment capacity.</u> | X |
| c. | Other changes. | X | | | 2. <u>Modification of a containment building unit or secondary containment system without increasing the capacity of the unit.</u> | X |
| 3. | Other changes. | X | | | 3. <u>Replacement of a containment building that meets the same design standards provided:</u> | |
| (i) | Enclosed Waste Piles: | | | | a. <u>The unit capacity is not increased;</u> | X |
| 1. | Replacement of a waste pile unit with another waste pile unit of the same design and capacity and meeting all waste pile conditions in the permit. | X | | | or | |
| 2. | <u>Conversion of an enclosed waste pile to a containment building unit.</u> | X | | | b. <u>The replacement containment building meets the same conditions in the permit.</u> | X |
| (j) | Landfills and Unenclosed Waste Piles: | | | | 4. <u>Modification of a containment building management practice.</u> | X |
| 1. | Modifications of unconstructed units to comply with 401 KAR 34:210. | X | | | 5. <u>Storage or treatment of different wastes in containment buildings that do not require additional or different management practices.</u> | X |
| 2. | Changes in response action plan. | X | | | (n) <u>Corrective Action:</u> | |
| a. | Increase in action leakage rate. | X | | | 1. <u>Approval of a corrective action management unit pursuant to Section 1 of 401 KAR 34:287</u> | X |
| b. | Change in a specific response reducing its frequency or effectiveness. | X | | | 2. <u>Approval of a temporary unit or time extension for a temporary unit pursuant to Section 2 of 401 KAR 34:287.</u> | X |
| c. | Other changes in response action plan. | X | | | | |
| 3. | Other changes. | X | | | | |
| (k) | Land Treatment: | | | | | |
| 1. | Modification of a land treatment unit management practice to decrease rate of waste application. | | X | | | |
| 2. | Changes in any condition specified in the permit for a land treatment unit to reflect results of the land treatment demonstration, provided performance standards are met. | X | | | | |
| 3. | Changes to allow a second land treatment demonstration to be conducted when the results of the first demonstration conducted have not shown the conditions under which the wastes can be treated completely, provided the conditions for the second demonstration are substantially the same as the conditions for the first demonstration. In addition, the land treatment waste application rate cannot exceed previously established waste application rates. | X | | | | |
| (l) | Incinerators - Shutdown and Trial Burn: | | | | | |
| 1. | Authorization of up to an additional 720 hours of waste incin- | X | | | | |

Section 4. Termination of Permits. (1) The cabinet may terminate a permit during its term or deny a permit renewal application for the following causes:

(a) Noncompliance by the permittee with any condition of the permit;

(b) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time;

(c) A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or

(d) A violation of any requirement of KRS Chapter 224 or the respective administrative regulations promulgated pursuant thereto (including 401 KAR 40:040).

(2) The cabinet shall follow the applicable procedures in this administrative regulation and in 401 KAR 38:050 and 401 KAR Chapter 40 in terminating any permit under this section.

Section 5. Duration of Permit. (1) Term of permit. Hazardous waste site or facility permits shall be effective for a fixed term not to exceed ten (10) years. (See also Section 5 of 401 KAR 38:060.)

(2) Modification of term of permit. Except as provided in Section 6 of this administrative regulation, the term of a permit shall not be

extended by modification beyond the maximum duration specified in subsection (1) of this section.

(3) Reduced term of permit. The cabinet may issue any permit for a duration that is less than the full allowable term under subsection (1) of this section.

(4) Each permit for a land disposal facility shall be reviewed by the cabinet five (5) years after the date of permit issuance or reissuance and shall be modified as necessary, as provided in Section 2 of this administrative regulation.

(5) A permit for the nerve agents specified in KRS 224.50-130 shall be reviewed by the cabinet five (5) years after the date of permit issuance or reissuance and shall be modified as necessary, as provided in Section 2 of this administrative regulation.

Section 6. Continuation of Expiring Permits. (1) The conditions of an expired permit continue in force until the effective date of a new permit if:

(a) The permittee has submitted a timely application under 401 KAR 38:090 and 401 KAR 38:100 and the applicable requirements in 401 KAR 38:150 to 401 KAR 38:210 and which is a complete (under Section 1(3) of 401 KAR 38:070) application for a new permit, paid the appropriate fees due (under 401 KAR Chapter 39 and KRS 224.46-016 through 224.46-018); and

(b) The cabinet, through no fault of the permittee, does not issue a new permit with an effective date on or before the expiration date of the previous permit (for example, when issuance is impracticable due to time or resources constraints).

(2) Effect. Permits continued under this section remain fully effective and enforceable.

(3) Enforcement. When the permittee is not in compliance with the conditions of the expiring or expired permit, the cabinet may choose to do any or all of the following:

(a) Initiate enforcement action based upon the permit which has been continued;

(b) Issue a notice of intent to deny the new permit under Section 3 of 401 KAR 38:050. If the permit is denied, the owner or operator would then be required to cease the activities authorized by the continued permit or be subject to enforcement action for operating without a permit;

(c) Issue a new permit under 401 KAR 38:050 with appropriate conditions; or

(d) Take other actions authorized by 401 KAR Chapters 30 to 40.

(4) State continuation. As provided in 40 CFR 270.51(d), an EPA issued permit shall not continue in force beyond its expiration date under federal law if at that time the cabinet is the RCRA permitting authority.

JAMES E. BICKFORD, Secretary

APPROVED BY AGENCY: October 9, 1996

FILED WITH LRC: October 10, 1996 at 4 p.m.

CONTACT PERSON: James Hale, Division of Waste Management, 14 Reilly Road, Frankfort, Kentucky 40601, (502) 564-2225, ext. 221.

REGULATORY IMPACT ANALYSIS

CONTACT PERSON: James Hale

1. Type and number of entities affected: The proposed amendments affect owners and operators of hazardous waste facilities that change hands, or whose permits expire.

2. Direct and indirect costs or savings on the affected entities:

a. Effect on the cost of living and employment in the geographical area in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

b. Effect on the cost of doing business in the geographical area

in which the administrative regulation will be implemented, to the extent available from the public comments received: No public comments were received.

c. Effect on the compliance, reporting, and paperwork requirements, including factors increasing or decreasing costs (note any effects upon completion), to the extent available from the public comments received, for the:

1. First year following implementation: No public comments were received.

2. Second and subsequent years: No public comments were received.

3. Effects on the promulgating administrative body:

a. Direct and indirect costs or savings:

1. First year: The existing staff will have an increased workload in order to process the newly regulated entities. The increase in workload will also increase costs.

2. Continuing costs or savings: Once the new entities are processed, there should not be any extra costs.

3. Additional factors increasing or decreasing costs: There are no additional factors affecting costs.

b. Reporting and paperwork requirements: There are no additional paperwork requirements.

4. Assessment of anticipated effect on state and local revenues: There are no anticipated effects on state and local revenues.

5. Source of revenue to be used for implementation and enforcement of administrative regulation: EPA grants are to be used for the implementation of this regulation.

6. To the extent available from the public comments received, the economic impact, including effects of economic activities arising from the administrative regulation, on:

a. Geographical area in which administrative regulation will be implemented: No public comments were received.

b. Kentucky: No public comments were received.

7. Assessment of alternative methods; reasons why alternatives were rejected: Alternatives were not considered. These changes are consistent with federal changes.

8. Assessment of expected benefits of the administrative regulation: These amendments provide consistency with current federal standards.

9.a. Identify effects on public health and environmental welfare of the geographical area in which implemented and Kentucky: There will be no effects on public health or the environmental welfare without the implementation of this administrative regulation.

b. State whether a detrimental effect on the environment and public health would result if not implemented: Not applicable.

c. If detrimental effect would result, explain detrimental effect: Not applicable.

10. Identify any statute, administrative regulation, or government policy which may be in conflict, overlapping, or duplication: There are no statutes, regulations, or policies that conflict, overlap, or duplicate this regulation.

a. Necessity of proposed regulation if in conflict: Not applicable.

b. If in conflict, was the effort made to harmonize the proposed administrative regulation with conflicting provisions: Not applicable.

11. Any additional information or comments: No additional comments.

12. TIERING: Is tiering applied? (Explain why tiering was or was not used): Yes, tiering was used. This administrative regulation applies to owners and operators of hazardous waste facilities that change hands or whose permits expire. Tiering is applied to all of Kentucky's hazardous waste regulations, based on type and quantity of waste generated and managed and type of management activities performed by the owner or operator.

ADMINISTRATIVE REGISTER - 2132

FEDERAL MANDATE ANALYSIS COMPARISON

1. Federal statute or regulation constituting the federal mandate: There is no federal mandate for this administrative regulation. KRS Chapter 224 is a state mandate that requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution.

2. State compliance standards: The proposed amendments adopt changes to provisions governing expiration of hazardous waste permits. These changes are necessary to maintain consistency between state and federal programs. The additions have been made to clarify the applicability of these standards. In addition, the regulation has been modified to reflect the requirements of regulation construction specified in KRS Chapter 13A.

3. Minimum or uniform standards contained in the federal mandate: There is no federal mandate for this administrative regulation.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? There is no federal mandate for this administrative regulation.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements: Not applicable.

FISCAL NOTE ON LOCAL GOVERNMENT

1. Does this administrative regulation relate to any aspect of a local government, including any service provided by that local government? Yes

2. State what unit, part, or division of local government this administrative regulation will affect. This administrative regulation will affect any state, county, or local office of government that manages hazardous waste facilities that change hands, or whose permits expire.

3. State the aspect or service of local government to which this administrative regulation relates. KRS Chapter 224 requires the cabinet to promulgate administrative regulations establishing a comprehensive program for the prevention, abatement, and control of all water, land, and air pollution. KRS 224 Subchapter 46 requires that the cabinet to establish a comprehensive program for the proper management of hazardous waste. Any state, county, or local government office that manages hazardous waste facilities will be subject to these requirements.

4. Estimate the effect of this administrative regulation on the expenditures and revenues of a local government for the first full year the regulation is to be in effect. If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impacts of the administrative regulation.

Revenues (+/-): This administrative regulation will not affect state, county, or local revenue.

Expenditures (+/-): The only expenditures to a state, county, or local office of government will be those expenditures related to compliance with this administrative regulation. If this administrative regulation does not apply to a state, county, or local office of government, there will be no expenditures.

Other Explanation: None

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION CABINET Department for Environmental Protection Division of Waste Management (Amended After Hearing)

401 KAR 39:005. Definitions related to 401 KAR Chapter 39.

RELATES TO: KRS 224.01, 224.10, 224.46, 40 CFR 260.10

STATUTORY AUTHORITY: KRS 224.10-100

NECESSITY, FUNCTION, AND CONFORMITY: This chapter implements provisions of KRS 224.46-510 and establishes the general provisions applicable to generators of hazardous waste. [KRS 224.10-100(29) states that the cabinet may provide by administrative regulations for a reasonable schedule of fees for the cost of processing applications for permits, exemptions, and partial exemptions. This chapter establishes a fee schedule for hazardous waste management.] This administrative regulation defines essential terms that are used in this chapter. The majority of terms defined in this administrative regulation are equivalent to federal terms contained in 40 CFR Parts 260 through 299. Some terms have been clarified to eliminate federal ambiguities and to conform to Kentucky statutory mandates. Definitions contained in KRS Chapter 224 have been referenced to the appropriate statutory citation. Some terms do not have a federal counterpart. These terms have been added to clarify requirements and provisions of KRS Chapter 224 and this chapter.

Section 1. Definitions. Unless otherwise specifically defined in KRS Chapter 224 or otherwise specifically indicated by context, terms in 401 KAR Chapter 39 shall have the meanings given in this Section.

(1) "100-year floodplain" means any land area which is subject to a one (1) percent or greater chance of flooding in any given year from any source.

(2) "100-year flood" means a flood that has a one (1) percent chance of being equaled or exceeded in any given year.

(3) "Aboveground tank" means a device meeting the definition of "tank" and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(4) "Accidental occurrence" means an accident, including continuous or repeated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

(5) "Accumulated speculatively" means that a material is accumulated before being recycled.

(a) A material is not accumulated speculatively, if the person accumulating it can show:

1. That the material is potentially recyclable and has a feasible means of being recycled; and

2. That - during the calendar year (commencing on January 1) - the amount of material that is recycled, or transferred to a different site for recycling, equals at least seventy-five (75) percent by weight or volume of the amount of that material accumulated at the beginning of the calendar year (including any material accumulated from previous years).

(b) In calculating the percentage of turnover, the seventy-five (75) percent requirement is to be applied to each material of the same type that is recycled in the same way. Materials accumulating in units that would be exempt from administrative regulation under Section 4(3) of 401 KAR 31:010 are not to be included in making the calculation. (Materials that are already defined as wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling.

(6) "Active fault" means a land area which, according to the weight of geological evidence, has a reasonable probability of being

affected by movement along a fault to the extent that a waste site or facility would be damaged and thereby pose a threat to human health and the environment.

(7) "Active life" of a facility means the period from the initial receipt of waste at a waste site or facility until the cabinet receives certification of final closure.

(8) "Active portion" means any area of a facility where treatment, storage, or disposal operations are being or have been conducted and which have not been closed. It includes the treated area of a landfill and the active face of a landfill. Covered, closed, or inactive portions of landfills, building roofs, and roads are excluded unless designated as "active portions" by the cabinet.

(9) "Admixed liner" means a liner made from a mixture of any of a multitude of materials, often asphalt or cement, with widely varying physical and chemical properties. Admixed liners shall be demonstrated to be structurally sound and chemically resistant to the waste placed in it so as to be capable of supporting the waste without cracking or disintegrating or allowing waste or leachate to escape.

(10) "Agricultural waste" means any nonhazardous waste resulting from the production and processing of on-the-farm agricultural products, including manures, prunings and crop residues.

(11) "Air stripping operation" is a desorption operation employed to transfer one (1) or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are among the process configurations used for contacting the air and a liquid.

(12) "Ampule" means a small sealed glass container for one (1) dose of sterile medicine.

(13) "Ancillary equipment" means any device including, but not limited to, such devices as piping, fittings, flanges, valves, and pumps, that is used to distribute, meter, or control the flow of hazardous waste from its point of generation to hazardous waste management units including tanks between hazardous waste storage and treatment tanks to a point of disposal on site, or to a point of shipment for disposal off site.

(14) "Application" means the form approved by the cabinet for applying for a permit, including any additions, revisions or modifications and any narrative and drawings required by 401 KAR Chapters 30 to 48. The term includes: Part A of the application (Part A); Part B of the application (Part B); notice of intent; administration application; special waste application; or technical application.

(15) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(16) "As received waste" refers to the waste as received in the shipment from the generator or sample collector.

(17) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.

(18) "Attenuation" means any decrease in the maximum concentration or total quantity of an applied chemical or biological constituent in a fixed time or distance traveled resulting from a physical, chemical, or biological reaction or transformation occurring in the zone of aeration or zone of saturation.

(19) "Authorized representative" means the person responsible for the overall operation of a facility or an operational unit or part of a facility, such as the plant manager, superintendent, or person of equivalent responsibility.

(20) "Average volatile organic concentration" or "average VO concentration" means the mass-weighted average volatile organic concentration of a hazardous waste as determined in accordance with the requirements of Section 4 of 401 KAR 35:281.

(21) "Base flood" means a flood that has a one (1) percent or greater chance of recurring in any year, or a flood of a magnitude equaled or exceeded once in 100 years on the average over a significantly long period.

(22) "Battery" means a device consisting of one or more electri-

cally connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(23) "Board" shall have the meaning specified in KRS 224.46-810.

(24) "Bodily injury" shall have the meaning given by applicable Kentucky statutes. Bodily injury does not include those liabilities which, consistent with the standard industry practices, are excluded from coverage in liability policies for bodily injury.

(25) "Boiler" means an enclosed device using control flame combustion and having the following characteristics:

(a)1. The unit shall have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and

2. The unit's combustion chamber and primary energy recovery section(s) shall be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section (such as water walls and superheaters) shall be physically formed into one (1) manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design: process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units; and

3. While in operation, the unit shall maintain a thermal energy recovery efficiency of at least sixty (60) percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

4. The unit shall export and utilize at least seventy-five (75) percent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(b) The unit is one (1) which the cabinet has determined, on a case-by-case basis, to be a boiler, after considering the standards in 401 KAR 30:080.
