

177.986 Directory of extended weight unrefined petroleum products haul road system -- Publication -- Reporting system. (Repealed - Effective until June 30, 2028) (Effective until June 30, 2028)

- (1) The provisions of this section shall be in effect until June 30, 2028.
- (2) The Transportation Cabinet shall publish a directory, including supporting maps and other documents, designating the extended weight unrefined petroleum products haul road system, which shall include all state-maintained highways and bridges over which quantities of unrefined petroleum products in excess of the amount identified in KRS 177.985(2) have been transported in the immediately preceding year. The cabinet shall further publish the total county mileage of the extended weight unrefined petroleum products haul road system for that preceding year. Publication of the information in this subsection may be by electronic means.
- (3) Beginning January 1, 2022, every person, producer, or processor shipping or transporting unrefined petroleum products over any state-maintained highway or bridge shall file with the Transportation Cabinet information for the purpose of identifying those state-maintained highways comprising the extended weight unrefined petroleum products haul road system and the quantities of unrefined petroleum products transported thereon, in order that the cabinet can accurately calculate total ton-miles within each county.
- (4) The Transportation Cabinet shall promulgate administrative regulations pursuant to KRS Chapter 13A to carry out the requirements of this section, including publication of the information outlined in subsection (2) of this section and establishment of a reporting system for transporters of unrefined petroleum products.

Effective: June 27, 2019

History: Created 2019 Ky. Acts ch. 126, sec. 2, effective June 27, 2019.
