The aim of this project is to increase access to data from the six traffic record systems, but more especially to increase access to expert resources with a more in-depth knowledge of the databases. Accordingly, KTC will develop and host a free traffic data service to enable users to "access an expert" to conduct small studies and get answers to traffic safety problems. These answers would ordinarily be out of reach due to a) difficulty and expense of contracting, or b) lack of awareness that such expert resources exist and are available to them. The project will also develop a website documenting and publicizing the service.
