

AN ACT relating to court-ordered outpatient mental health treatment.

Be it enacted by the General Assembly of the Commonwealth of Kentucky:

➔Section 1. KRS 202A.081 is amended to read as follows:

- (1) Following the preliminary hearing but prior to the completion of the final hearing, the court may order the person held in a hospital approved by the cabinet for such purpose for the committing judicial district, or released, upon application and agreement of the parties, for the purpose of community-based outpatient treatment **through a patient agreed order. At the time an agreement of the parties for a patient agreed order is reached, the attorney for the person shall be present, and a peer support specialist or other person in a support relationship may be present.**

No person held under this section shall be held in jail unless criminal charges are also pending.

- (2) A hospital shall discharge a patient there held and notify the court and attorneys of record if any authorized staff physician determines that the patient no longer meets the criteria for involuntary hospitalization.
- (3) If a patient is discharged by the hospital pursuant to subsection (2) of this section, then the proceedings against the patient shall be dismissed.
- (4) The release of the person pursuant to subsection (1) of this section for the purpose of **a patient agreed order**~~[community-based outpatient treatment]~~ does not terminate the proceedings against the person, and the court ordering such release may order the immediate holding of the person at any time with or without notice if the court believes from an affidavit filed with the court that it is to the best interest of the person or others that the person be held pending the final hearing, which shall be held within twenty-one (21) days of the person's further holding.
- (5) If the person is released pursuant to subsection (1) of this section for the purpose of **a patient agreed order**~~[community-based outpatient treatment]~~, the final hearing may be continued for a period not to exceed sixty (60) days if a provider of

outpatient care accepts the respondent for specified outpatient treatment. Community-based outpatient treatment may be ordered for an additional period not to exceed sixty (60) days upon application and agreement of the parties.

(6) Before a person is considered for a patient agreed order, the court shall appoint a case management provider recognized by the cabinet who shall provide to the court and the respondent a proposed comprehensive written treatment plan. In developing a treatment plan, the case management provider shall:

(a) Provide reasonable opportunities for the person to actively participate in the development of the comprehensive treatment plan and to involve any others the person requests to have participate;

(b) Follow any advanced directive for mental health treatment executed by the person; and

(c) Include evidence-based practices. As used in this paragraph, "evidence-based practices" means intervention programs, policies, procedures, and practices that have been rigorously tested, are proven by scientific research, have yielded consistent, replicable results, and have proven safe, beneficial, and effective for most people diagnosed with mental illness when implemented competently. Evidence-based practices may include but are not limited to psychotropic medications, psychosocial rehabilitation, recovery-oriented therapies, modified assertive community treatment, supported employment, supported housing, and peer support services.

(7) If the court orders community-based outpatient treatment through a patient agreed order:

(a) The order shall incorporate a comprehensive treatment plan, which shall be limited in scope to the recommendations included in the treatment plan provided pursuant to subsection (6) of this section; and

(b) The court shall direct the case management provider appointed pursuant to

subsection (6) of this section to:

1. Regularly monitor the person's adherence to the conditions of the patient agreed order; and
2. Regularly report information descriptive of the person's functioning to the court that ordered the person's release.

(8) A case management provider appointed by the court shall be available twenty-four (24) hours a day and shall be a professional who has training and experience in the human services systems.

(9) (a) A person's substantial failure to comply with a patient agreed order may result in the initiation of procedures under this chapter that may result in involuntary hospitalization, provided the criteria set forth in KRS 202A.026 are met.

(b) Initiation of these procedures shall begin upon recommendation by the case management provider and by a sworn affidavit attesting that the person did not comply with the patient agreed order.

(c) Any mental health examination required for these procedures may be performed at a community mental health center, established pursuant to KRS 210.370 to 210.460.

(10) (a) A patient agreed order may be ordered for additional periods, each of which shall not exceed sixty (60) days.

(b) Prior to the issuance of a patient agreed order for an additional period of community-based outpatient treatment, the court shall hold a hearing at which the attorney for the person shall be present, and a peer support specialist or other person in a support relationship may be present. At the hearing, the court must find that:

1. The person has failed to adhere to one (1) or more of the conditions of the prior patient agreed order;

2. Continued outpatient treatment is appropriate and necessary, based on recommendations of the case management provider appointed under subsection (6) of this section; and

3. The parties continue to be in agreement with the patient agreed order.

(11) For persons who are Medicaid-eligible, services for a patient agreed order shall be authorized by the Department for Medicaid Services and its contractors as Medicaid-eligible services and shall be subject to the same medical necessity criteria and reimbursement methodology as for all other covered behavioral health services.

(12) A court shall report every patient agreed order for community-based outpatient treatment to the Kentucky Commission on Services and Supports for Individuals with Mental Illness, Alcohol and Other Drug Abuse Disorders, and Dual Diagnoses, established pursuant to KRS 210.502.
