A RESOLUTION condemning the President of the United States for issuing an executive order requiring vaccinations for the COVID-19 disease.

WHEREAS, the framers of the Constitution of the United States of America believed in the importance of preserving all states’ power over their own citizens. This was clearly established by granting the new national government only limited and enumerated powers and leaving the regulation of intrastate commerce to the states; and

WHEREAS, the federal vaccine mandate is an abuse of the President’s power and rather than promoting the vaccine and educating the unvaccinated on the safety and science of the vaccine, the President is further dividing the people of the United States with this unprecedented action; and

WHEREAS, the decision to get vaccinated should be made between a health care provider and a patient and not mandated by the President of the United States of America in this unprecedented abuse of power; and

WHEREAS, the President's administrative decision to mandate vaccines for all private businesses that employ more than 100 people not only exceeds his executive power but also blatantly disregards states’ rights;

NOW, THEREFORE,

Be it resolved by the House of Representatives of the General Assembly of the Commonwealth of Kentucky:

➤ Section 1. The House of Representative condemns the action of the President of the United States regarding the requirement for vaccination for the COVID-19 disease of federal employees, health care workers, and millions of private sector workers as a violation of the Constitution of the United States of America.

➤ Section 2. The Clerk of the House of Representatives is hereby directed to transmit a copy of this Resolution to Kentucky's Congressional delegation.
