

- autocycle at all times vehicle is on a highway
- an autocycle is considered to be a motorcycle for titling and registration purposes
- the operator must comply with all KRS Chapter 189 and 189A traffic regulations
- the operator is not required to wear protective headgear

SB 73 prohibits an applicant from using an autocycle for road skills testing.

SB 73 allows used motor vehicle dealers and motorcycle dealers to sell autocycles, but not new motor vehicle dealers.

SB 73 requires autocycles be a distinct category for reporting and statistical purposes. Furthermore, autocycles shall not be considered to be a motor vehicle or a motorcycle for vehicle accident reporting purposes.

SB 73 SCS retains the major provisions of the measure as introduced and makes the following change in the bill:

Under Section 1(15), while keeping the definition for “motorcycle”, it clarifies the term motorcycle shall be used for autocycle registration purposes.

Part III: Fiscal Explanation, Bill Provisions, and Estimated Cost

The fiscal impact of SB 73 SCS on local governments is expected to be nil.

The number of autocycles on Kentucky roads is very small but is expected to grow.

The accident report completed by an officer would have to be updated by the Kentucky State Police (KSP) to include the new classification in the pull down menu. The civilian form is generic and the type of vehicle may be written or typed in.

Accident reports are available to local law enforcement agencies online through the Kentucky Open Portal Solutions System (KYOPS). This includes both the Civilian Collision Report for accidents resulting in damage of less than \$500 and to be completed by the individual(s) involved in the mishap, and the formal report to be completed by an officer for accidents over \$500. **KYOPS is provided to local agencies at no cost to the agency.**

Albeit the great majority of local agencies are computer based, a number still prefer using paper forms. Paper forms will also be updated by KSP and made available to local agencies through a requisition process.

County clerk offices would have a new classification for registrations and titles as part of the statewide registration system. Whereas the computer system is maintained by the state, this would **not** be a local government expense.
