Ms. Katie Carney Office of Fiscal Statement Review Legislative Research Commission Capitol Annex, Room 104

Frankfort, KY 40601

RE: BR 1644 SB 151 HCS AA Statement 1 of 4 Required by KRS 6.350

Dear Ms. Carney:

Kentucky Retirement Systems' (KRS) actuary, GRS Retirement Consulting, has reviewed Senate Bill 151 PHS (2018 RS BR 1644). They state the following:

"We have reviewed the proposed legislation in SB 151 and have determined that the proposed changes that apply to retirement systems maintained by KRS will have the same fiscal impact as that determined for SB 1 Sub 1."

Therefore, the Actuarial Analysis of Senate Bill 1 Sub 1, dated March 6, 2018, is applicable to Senate Bill 151 PHS (2018 RS BR 1644).

Please let me know if you have any questions.

Sincerely,

David Eugn

David L. Eager Interim Executive Director Kentucky Retirement Systems

P: 469.524.0000 | F: 469.524.0003 | www.grsconsulting.com

March 6, 2018

Mr. David Eager

Interim Executive Director Kentucky Retirement Systems 1260 Louisville Road Frankfort, KY 40601

Re: BR 427 SB 1 SCS AA Statement 1 of 4 KERS and CERS Non-Hazardous Systems

Dear Mr. Eager:

We have reviewed and analyzed the summary of proposed changes in the proposed pension reform legislation SB 1 Sub 1. The purpose of this letter is to communicate to the fiscal analysis of this proposed legislation on the retirement and insurance funds maintained by the Kentucky Retirement System (KRS) as it applies to the Non-Hazardous Systems (i.e. KERS Non-Hazardous and CERS Non-Hazardous).

The provisions of this legislation are similar to that proposed in SB 1, with a notable difference of resetting the amortization period for financing the unfunded actuarial accrued to a closed 30-year period beginning with the July 1, 2019 actuarial valuation. In addition, compared to the original SB 1, this proposed legislation, SB 1 Sub 1, requires Tier I members who became participating on or after July 1, 2003 (but prior to September 1, 2008) to contribute 1% of pay to the Health Insurance Fund.

Principal Provisions of Proposed Legislation

Exhibit 1 provides a summary of the provisions in the pension reform bill that have a fiscal impact on the retirement system. In summary, the Tier 3 Hybrid Plan will be the default plan for providing benefits to future members, but beginning January 1, 2019 there will be a new optional defined contribution plan that members may make a one-time irrevocable election to earn future retirement benefits in the defined contribution plan, in lieu of the defined benefit plan. The amortization of the unfunded actuarial accrued liability will be determined on a level-dollar basis beginning with the 2019 actuarial valuation, and the funding period will reset to a closed 30-year period. Finally, active Tier I members who became participants on or after July 1, 2003 (but prior to September 1, 2008) will contribute 1% of pay.

Summary of Cost Impact

Section 1 includes exhibits that show a comparison of the fiscal impact of the proposed legislation to the current plan over the next 35 years. Specifically, these exhibits show the projected impact on the:

(1) unfunded actuarial accrued liability, (2) funded ratio, (3) total employer contribution dollars, and (4) projected composite employer contribution rates, for each of the funds (retirement and health insurance). Section 2 provides additional detail regarding each projection under the current plan and Section 3 provides similar information under the proposed legislation. Section 4 provides the fiscal impact under an alternative assumption scenario for the KERS Non-Hazardous System that assumes a decreasing active membership count consistent with recent trends. Below are comments regarding the cost projection for each fund.

KERS Non-Hazardous Retirement Fund

The changes in the benefit provisions have a minimal impact on the actuarial accrued liability (and unfunded actuarial accrued liability) as of June 30, 2017. The savings in the projected employer contributions beginning with FY 20/21 for the retirement fund is due to resetting the amortization period to 30 years for the 2019 actuarial valuation. However, this savings is offset by the fact that the participating employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049 in SB 1 Sub versus 2043 in the current plan).

The change in the interest-crediting rate for the Tier 3 hybrid plan will slightly decrease the ongoing liability and cost for this benefit tier. However, the slight decrease in the employer cost is partially offset by the employer cost for members who elect to earn benefits in the optional defined contribution plan. As described later in this letter, we project the long-term cost of this defined contribution plan to be 3.5% of payroll, which is slightly higher than the cost of providing

benefits in the Tier 3 hybrid plan. As Tier 3 and defined contribution plan members become a larger percentage of the active population, this will gradually have a larger impact on total employer contributions.

KERS Non-Hazardous Insurance Fund

The changes in the benefit provisions have a minimal impact on the projected actuarial accrued liability. The initial savings in the projected employer contributions is attributable to resetting the amortization period to 30 years for the 2019 actuarial valuation. However, this savings is offset by the fact that the participating employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049 in SB 1 Sub versus 2043 in the current plan). There is also some employer savings due to the increase in the member contribution requirement Tier 1 members.

CERS Non-Hazardous Retirement Fund

Similar to the KERS non-hazardous retirement fund, there is minimal change in the actuarial accrued liability (and unfunded actuarial accrued liability) as of June 30, 2017 due to changes in the benefit provisions. The contribution rate for FY 20/21 is slightly higher in the proposed legislation because the increase due to using a level dollar amortization is greater than the saving due to resetting the amortization period to 30 years for the 2019 actuarial valuation, but these methods also results in the projected savings beginning in July 1, 2025 through June 30, 2043. However, the participating employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049 in SB 1 Sub versus 2043 in the current plan).

The change in the interest-crediting rate for the Tier 3 hybrid plan will slightly decrease the ongoing liability and cost for this benefit tier. However, the slight decrease in the employer cost is offset by the employer cost for members who elect to earn benefits in the optional defined contribution plan. As described later in this letter, we project the long-term cost of this defined contribution plan to be 3.5% of payroll, which is slightly higher than the cost of providing benefits in the Tier 3 hybrid plan. As Tier 3 and defined contribution plan members become a larger percentage of the active population, this will gradually have a larger impact on total employer contributions.

CERS Non-Hazardous Insurance Fund

The change in the benefit provisions had a minimal impact on the projected actuarial accrued liability. The contribution rate for FY 20/21 is slightly higher in the proposed legislation because the increase due to using a level dollar amortization is greater than the saving due to resetting the amortization period to 30 years for the 2019 actuarial valuation. However, the proposed method results in savings beginning in July 1, 2022 through June 30, 2043 because the amortization period is reset to a closed 30 years. However, this savings is offset by the fact that the participating

GRS Retirement Consulting

employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2043 in the current plan versus the year 2049 in SB 1 Sub 1). There is also some employer savings due to the increase in the member contribution requirement for certain Tier 1 members.

GRS Comments on Proposed Legislation

Below are comments on certain provisions in the proposed

legislation. <u>New Optional Defined Contribution Plan</u>

The proposed legislation would provide a new optional defined contribution plan to members in the KERS and CERS nonhazardous retirement systems that would allow all current and future members a one-time irrevocable election to earn future retirement benefits in a defined contribution plan that provides a 4.00% of pay employer contribution (the member contribution requirement will remain unchanged at 5.00% of pay). This new defined contribution plan will not decrease the employer cost, but will shift the risks, such as investment risk and longevity risk, from the participating employers to the members with respect to the members earning benefits in the defined contribution plan.

For the fiscal impact analysis, we project the long-term cost of this defined contribution plan to be 3.5% of payroll, after reflecting the effects of forfeitures in the employer matching contributions when employees separate from service prior to becoming vested.

The proposed legislation also allows all current members the opportunity to make a one-time irrevocable election to freeze their benefits earning in the defined benefit plan and earn future benefits in the new defined contribution plan. Please note that the Tier 1 and Tier 2 benefits are more valuable than the benefit provided in the new defined contribution plan. Thus allowing all current members in the KERS and CERS nonhazardous retirement systems to elect to switch to the defined contribution plan provides an opportunity for Tier 1 and Tier 2 members to adversely select against themselves. Limiting the election opportunity to current Tier 3 members hired after January 1, 2014 would limit possible of adverse selection.

The proposed legislation requires employers to make a normal cost contribution as a percentage of pay that is an annual amount sufficient, when combined with employee contributions, to fund benefits earned during the year, including costs for those members who elect to participate in the optional defined contribution plan (Tier IV). Tier I, Tier II, Tier III, and Tier IV have different normal cost rates because the benefits vary by tier. We interpret this provision to require each employer contribute a

single "blended" normal cost rate that will slightly vary year-to-year as the demographics of the plan changes. This method is relatively simple and would reduce possible anti-selection due to differences in the normal cost of the Tier III and Tier IV benefit plans. However, it may be difficult

for the retirement system to administer, as it would require a process of identifying the Tier IV contributions that must be directed to the members' accounts. We suggest the General Assembly seek input from the Retirement System regarding this process and whether it would be preferable to charge employers different normal cost rates depending on the retirement benefit tier of their employee, or an alternative method that is cost neutral and administratively feasible.

Change in the Interest Crediting Rate Formula in the Tier 3 Hybrid Plan

The change in the interest crediting rate formula to 85% of the 10-year geometric average will result in greater "risk-sharing" in the funds actual investment performance. Compared to the current formula, the proposed formula will generally provide a lower interest credit during times when the average return is less than 10.00% and a higher interest credit when the average return is in excess of 10.00%. Over time, we expect the new formula to provide an interest credit that is 0.40% to 0.50% less in annual interest credits compared to the current formula. Increasing the averaging period from 5 years to 10 years is not projected to have a fiscal impact but will reduce the shortterm volatility in the year- to-year change in the interest-crediting rate provided at each June 30.

Allocation of Amortization Payment to Participating Employers in CERS and Agencies Participating in KERS

The employers' (and agencies) allocation percentage will be based on the average covered payroll during the last three fiscal years (FY 14/15, FY 15/16, and FY 16/17) to the average total covered payroll for the system. This allocation percentage would remain unchanged in future years (albeit, minor adjustments if employers cease participating in the system). There are some favorable characteristics with this method as each employer's contribution effort to finance the unfunded actuarial accrued liability will remain relatively constant and eliminates incentives for employers to pursue the use of "contract" employees to reduce their covered payroll (and required contribution).

Employers that are increasing in size will not be burdened to pay a greater share of the unfunded actuarial accrued liability on the covered payroll for those additional employees. Rather, the marginal change in the employer's pension contribution effort will be the normal cost rate on the change in covered payroll.

We have not analyzed the change in covered payroll for the participating employers in the systems or how the average of the fiscal years identified in the proposed legislation compare to the distribution of covered payroll among employers in other years, such as the 12/13 and 13/14 fiscal years. Given the declining covered payroll experienced by some of the systems over the last several years, it is possible that using a 5-year average period or the currently proposed 3-year averaging period using different fiscal years may be more representative of the allocated share of each employer's share of the unfunded actuarial accrued liability. There will not be a fiscal impact to the system if the averaging method is changed, but there would be a cost increase or decrease for

individual participating employers. We recommend the Legislative Research Commission seek input from Kentucky Retirement Systems regarding the fiscal years and the averaging period used in the calculation.

Further to this point, using a static allocation may gradually drift from mirroring the employer participation demographics in future years (some employers are growing and other entities are decreasing their workforce). Also, while this proposed method may be appropriate for allocating the existing unfunded liability, it may not be appropriate for allocating unfunded liabilities that may be incurred in a future year. Note, if this issue does occur, then it could be easily addressed by the General Assembly in a future year by using a layered amortization base.

Modification in the Reemployment after Retirement Provisions

If a member retires after January 1, 2019 and becomes reemployed by a participating employer in KRS or TRS on a full-time basis between a three-month and a twelve-month time period following the

member's initial retirement date, then the member's retirement allowance will be suspended until the first anniversary of the member's initial retirement date. This would be between a one-month and a nine-month suspension of the member's retirement allowance. This provision will result in some reduced financial benefit (when considering their total income from all sources) for members to commence their retirement benefit at an earlier age and seek reemployment. However, we do not believe the reduction in the member's financial benefit due to this suspension is significant enough to change retirement behavior. As a result, we have not adjusted, or delayed, the anticipated age members will commence their retirement due to this modification. However, this modification may still be important and relevant for policy reasons.

Resetting the Amortization Period to a Closed 30 Years for the July 1, 2019 Actuarial Valuation

The recent change in assumptions did materially increase the contribution requirements beginning with the FY 18/19 fiscal year. Resetting the amortization period to a closed 30 years for the July 1, 2019 actuarial valuation will somewhat reduce those contribution requirements for the years 2020 through the year 2043. However, the participating employers will also be required to continue to finance the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049).

Distribution of the Actuarial Accrued Liability Among Membership Status

The proposed legislation would make certain changes to retirement and health insurance benefits to active members after January 1, 2019 as well as future active members in these Non-Hazardous

Retirement Systems. For educational and informational purposes, the actuarial accrued liability attributable to the current retirees and inactive members (vested and non-vested) in the KERS Non-Hazardous Retirement System is approximately 75% of the total actuarial accrued liability. (Similarly, the retiree and inactive member liability is approximately 60% of the total actuarial accrued liability for the CERS Non-Hazardous Retirement System). As a result, while the proposed changes may have a material impact on the actuarial accrued liability attributable to the current active members in the Retirement System, the changes have a much smaller impact as a percentage of the total actuarial accrued liability attributable of the entire Retirement System.

Basis of Calculations

GRS based the calculations and analysis in this letter on the member and financial data provided by KRS and used to perform the actuarial valuation as of June 30, 2017. Except where noted otherwise, the projections assume no actuarial gains or losses will occur in the future, and that members will terminate, retire, become disabled, or die as predicted by the actuarial assumptions documented in the June 30, 2017 actuarial valuation report.

These projections also do not reflect the actual investment experience of the retirement system after the measurement date of June 30, 2017. The projections assume that the participating employers in each Retirement System will maintain the current workforce in each future year and that as current active members terminate or retire from a covered position in the Retirement System, the employer would replace them with a new employee. We have assumed that all current active members earning Tier 1 and Tier 2 retirement benefits will not elect to earn future benefits in the optional defined contribution plan. However, we have assumed that 25% of all active members currently in Tier 3 and 25% of all future members will elect to earn retirement benefits in the defined contribution plan.

We have assumed the new interest credit formula for the Tier 3 hybrid plan will provide 0.50% less in annual interest credits for the KERS (non-hazardous and hazardous) and SPRS systems and 0.40% less in annual interest credits for the CER (non-hazardous and hazardous) systems.

Our calculations are based upon assumptions regarding future events, which may or may not materialize. Depending on actual plan experience, actual results could deviate significantly from our projections.

General Comments

We are not attorneys, and we cannot provide a legal opinion regarding the changes in this proposed legislation. Nothing in this letter should be construed as providing legal, investment or tax advice. It may be prudent to consult with the Retirement System's counsel before enacting any

such changes. Finally, no statement in this letter is intended to be interpreted as a recommendation in favor of or in opposition to the changes studied herein.

Exhibit 1. Summary of Proposed

Changes Section 1. Comparison of

Fiscal Impact

Section 2. Projected Cost of the Retirement and Insurance - Current Plan

Section 3. Projected Cost of the Retirement and Insurance - Proposed

Legislation Section 4. Alternative Projection Scenario for KERS Non-

Hazardous System

Exhibit 1. Summary of Changes in BenefitProvisions and Employer Funding for the KERS and CERS Non-Hazardous Systems

Retirement Formulas

Tier 1:

- No change to the basic formula.
- For retirements on or after January 1, 2019, the highest five years of pay used to determine the member's final average compensation must be complete fiscal years and must contain at least 60 months.

Tier 2:

• No change to the basic formula.

Tier 3:

- Interest credits on or after June 30, 2018 will be 85% of the fund's geometric 10-year net investment return (0% for those not participating in the Hybrid plan).
- Removal of the \$5,000 post-retirement death benefit for all members hired on and after January 1, 2014.

Optional 401(a) Defined Contribution Plan:

- Future employees can elect participate in the new defined contribution plan that requires 5.00% of pay contributions from the member and 4.00% of pay contributions from the employer rather than the Tier 3 hybrid defined benefit plan. The members become 100% vested in the employer provided benefit upon attaining 5 years of service.
- Tier 1, 2, and 3 members can make a one-time election by January 1, 2021 to prospectively earn future benefits in the new optional 401(a) defined contribution plan.

Member Contribution Rates

- Member contribution rates to the retirement fund for Tier 1, Tier 2, and Tier 3 members remain unchanged at 5.00% of pay. Contributions to the health insurance funds for Tier 1 members who began participation on or after July 1, 2003 (but prior to September 1, 2008) will increase to 1.00% of pay.
 - The contributions to the health insurance funds are classified as 401(h) contributions and are not refundable to the member.

Pension Anti-Spiking Provisions

Compensatory time payments upon termination for Tier I members

• The payment of compensatory time upon termination of employment will be excluded in creditable compensation (which is used in the calculation of the member's final average compensation) for TierI members retiring after July 1, 2023.

Equipment and Other Expense Allowances:

cluded from creditable compensation earned on or after January 1, 2019.

Exhibit 1. Summary of Changes in Benefit Provisions and Employer Funding for the KERS and CERS Non-Hazardous Systems (Continued)

Sick Leave

- Converted sick service cannot exceed amount for accumulated sick leave as of January 1, 2019.
- Sick leave service credit does not count towards retirement eligibility for those retiring on or after January 1, 2019.

Retiree Health Accessibility

• No change.

Line of Duty Death

• The surviving spouse (if any) shall supersede all previous beneficiary designations for members that die in the line of duty.

Reemployment After Retirement

The following reemployment after retirement provisions apply to members who retire on or after January 1, 2019 in order to continue to receive their retirement allowance during their reemployment:

- Must have a three (3) month break in employment and no prearranged reemployment agreement.
- After required employment break, the retired member can return to work in a part-time or full-time position.
 - Monthly pension will not be suspended for the duration of reemployment in a part-time position or for the duration of reemployment in a full-time position if the member has not returned to reemployment for at least a twelve (12) month period following initial retirement.
 - If a member returns to full-time reemployment prior to the twelve-month period, the monthly pension will be suspended until twelve months have passed following initial retirement.
 - The retiree will not earn additional retirement benefits.
- Employer required to make normal cost contributions (both pension and retiree health) on the payroll of the reemployed retiree.

Exhibit 1. Summary of Changes in Benefit Provisions and Employer Funding for the KERS and CERS Non-Hazardous Systems (Continued)

Employer Funding

The Board will continue to have the authority to change the contribution rates for CERS on an annual basis and will have the authority to change contribution rates for KERS on an annual basis after the fiscal year ending June 30, 2020.

Actuarially Determined Contributions (ADC) for actuarial valuations performed on and after June 30, 2019 are based on normal cost plus an amortization payment to finance the unfunded actuarial accrued liability:

- Normal cost determined using entry age normal cost method paid as a percentage of payroll.
- Unfunded liability payment determined in the June 30, 2019 actuarial valuation will be based on a closed 30-year amortization period.
- Allocation of amortization payment for the unfunded liability to participating employers in KERS, and CERS is based on a level-dollar amortization
 - The dollar amount of the amortization payment will be allocated to each participating employer in proportion to their average percentage of the total compensation for years (FY 14/15, FY 15/16, and FY 16/17), adjusted for any employers who cease participation in the System.
 - Each employer's proportionate share of the amortization payment will remain a relatively constant percentage each future year.

Notes and assumptions:

It is assumed that the employer cost of defined contribution plan is 3.50% of pay, after reflecting the effects of forfeitures attributable to nonvested members, and

that 25% of current Tier 3 members and 25% of future member elect to enter the DC plan.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation and assumes constant active membership count in all future years.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$87 million additional contribution budgeted to be paid in fiscal year beginning 2017.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation and assumes constant active membership count in all future years.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation.

The actuarial determined contribution is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$87 million additional contribution budgeted to be paid in fiscal year beginning 2017.

It is assumed that the employer cost of defined contribution plan is 3.50% of pay, after reflecting the effects of forfeitures attributable to nonvested members, and

that 25% of current Tier 3 members and 25% of future member elect to enter the DC plan.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

Notes and assumptions:

The active membership population count is assumed to decrease by 2% per year each future year.

It is assumed that the employer cost of defined contribution plan is 3.50% of pay, after reflecting the effects of forfeitures attributable to nonvested members, and

that 25% of current Tier 3 members and 25% of future member elect to enter the DC plan.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation. The active membership population count is assumed to decrease by 2% per year each future year.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$87 million additional contribution budgeted to be paid in fiscal year beginning 2017.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation. The active membership population count is assumed to decrease by 2% per year each future year.

The actuarial determined contribution is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$87 million additional contribution budgeted to be paid in fiscal year beginning 2017.

It is assumed that the employer cost of defined contribution plan is 3.50% of pay, after reflecting the effects of forfeitures attributable to nonvested members, and

that 25% of current Tier 3 members and 25% of future member elect to enter the DC plan.

March 6, 2018

Mr. David Eager Interim Executive Director Kentucky Retirement Systems 1260 Louisville Road Frankfort, KY 40601

Re: BR 427 SB 1 SCS AA Statement 1 of 4 KERS Hazardous, CERS Hazardous, and SPRS Retirement Systems

Dear Mr. Eager:

We have reviewed and analyzed the proposed changes in the proposed pension reform legislation SB 1 Sub 1. The purpose of this letter is to communicate the fiscal analysis of this proposed legislation on the retirement and insurance funds maintained by the Kentucky Retirement System (KRS) as it applies to the Hazardous Systems (i.e. KERS Hazardous, CERS Hazardous, and SPRS).

The provisions of this legislation are similar to that proposed in SB 1, with a notable difference of resetting the amortization period for financing the unfunded actuarial accrued to a closed 30 year period beginning with the July 1, 2019 actuarial valuation. Also, compared to the original SB 1, this proposed legislation, SB 1 Sub 1, the employee contribution requirement for the Health Insurance funds for active Tier I members who became participating on or after July 1, 2003 (but prior to September 1, 2008) is 1% of pay.

Provisions of Proposed Legislation

Exhibit 1 provides a summary of the principle provisions in the pension reform bill that have a fiscal impact on the retirement system. In summary, the current Tier 3 Hybrid Plan Benefit will continue to be provided to future members. The amortization of the unfunded actuarial accrued liability will be determined on a level-dollar basis beginning with the 2019 actuarial valuation and the funding period will reset to a closed 30-year period. Finally, active Tier I members who

became participants on or after July 1, 2003 (but prior to September 1, 2008) will contribute 1% of pay.

Summary of Cost Impact

Section 1 includes exhibits that show a comparison of the fiscal impact of the proposed legislation to the current plan over the next 35 years. Specifically, these exhibits show the projected impact on the:

(1) unfunded actuarial accrued liability, (2) funded ratio, (3) total employer contribution dollars, and (4) projected composite employer contribution rates, for each of the funds (retirement and health insurance). Section 2 provides additional detail regarding each projection under the current plan and Section 3 provides similar information under the proposed legislation. Below are comments regarding the cost projection for each fund.

KERS Hazardous and SPRS Retirement and Insurance Funds

The change in the benefit provisions had a minimal impact on the projected actuarial accrued liability for both retirement and health insurance funds.

The initial savings in the projected employer contributions for the retirement and insurance funds is due to resetting the amortization period to 30 years for the 2019 actuarial valuation. However, these initial savings is offset by the fact that the participating employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2043 in the current plan versus the year 2049 in SB 1 Sub 1).

There is also some employer savings in the insurance fund due to the increase in the member contribution requirement for certain Tier 1 members.

CERS Hazardous Retirement and Insurance Funds

Similar to the KERS hazardous and SPRS retirement funds, there is minimal change in the projected actuarial accrued liability due to the provision changes.

The contribution rate for FY 20/21 for the retirement fund is slightly higher in the proposed legislation because the increase due to using a level dollar amortization is greater than the saving due to resetting the amortization period to 30 years for the 2019 actuarial valuation. However, the proposed method results in savings beginning in July 1, 2025 through June 30, 2043 because of the use of a level dollar amortization and the longer amortization period. However, the participating employers will be financing the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049 in SB 1 Sub versus 2043 in the current plan).

The fiscal impact to the projected cost of the CERS health insurance fund is similar as the retirement fund, but of a different magnitude and different cross-over years. There is also initial savings for the employers for the insurance fund is due to the increase in the Tier I member contribution requirement.

GRS Comments on Proposed Legislation

<u>Allocation of Amortization Payment to Participating Employers in CERS, and Agencies</u> <u>Participating in KERS, and SPRS</u>

The employers' (and agencies) allocation percentage will be based on the average covered payroll during the last three fiscal years (FY 14/15, FY 15/16, and FY 16/17) to the average total covered payroll for the system. This allocation percentage would remain unchanged in future years (albeit, minor adjustments if employers cease participating in the system). There are some favorable characteristics with this method as each employer's contribution effort to finance the unfunded actuarial accrued liability will remain relatively constant and eliminates incentives for employers to pursue the use of "contract" employees to reduce their covered payroll (and required contribution). Employers that are increasing in size will not be burdened to pay a greater share of the unfunded actuarial accrued liability on the covered payroll for those additional employees. Rather, the marginal change in the employer's pension contribution effort will be the normal cost rate on the change in covered payroll.

We have not analyzed the change in covered payroll for the participating employers in the systems or how the average of the fiscal years identified in the proposed legislation compare to the distribution of covered payroll among employers in other years, such as the 12/13 and 13/14 fiscal years. Given the declining covered payroll experienced by some of the systems over the last several years, it is possible that using a 5-year average period or the currently proposed 3-year averaging period using different fiscal years may be more representative of the allocated share of each employer's share of the unfunded actuarial accrued liability. There will not be a fiscal impact to the system if the averaging method is changed, but there would be a cost increase or decrease for individual participating employers. We recommend the Legislative Research Commission seek input from Kentucky Retirement Systems regarding the fiscal years and the averaging period used in the calculation.

Further to this point, using a static allocation may gradually drift from mirroring the employer participation demographics in future years (some employers are growing and other entities are decreasing their workforce). Also, while this proposed method may be appropriate for allocating the existing unfunded liability, it may not be appropriate for allocating unfunded liabilities that may be incurred in a future year. Note, if this issue does occur, then it could be easily addressed by the General Assembly in a future year by using a layered amortization base.

Resetting the Amortization Period to a Closed 30 Years for the July 1, 2019 Actuarial Valuation

The recent change in assumptions did materially increase the contribution requirements beginning with the FY 18/19 fiscal year. Resetting the amortization period to a closed 30 years for the July 1, 2019 actuarial valuation will somewhat reduce those contribution requirements for the years 2020 through the year 2043. However, the participating employers will also be required to continue to finance the unfunded actuarial accrued liability an additional six years (i.e. to the year 2049).

Distribution of the Actuarial Accrued Liability among Membership Status

The proposed legislation would make certain changes to retirement and health insurance benefits to active members after July 1, 2018 as well as future active members in these Hazardous Retirement Systems. For educational and informational purposes, the actuarial accrued liability attributable to the current retirees and inactive members (vested and non-vested) in the KERS Hazardous Retirement System is approximately 66% of the total actuarial accrued liability (Similarly, the retiree and inactive member liability is approximately 63% and 80% of the total actuarial accrued liability for the CERS Hazardous Retirement System and SPRS Retirement System, respectively). As a result, while the proposed changes may have a material impact on the actuarial accrued liability attributable to the current active members in the Retirement System, the changes have a much smaller impact as a percentage of the total actuarial accrued liability attributable of the entire Retirement System.

Basis of Calculations

GRS based the calculations and analysis in this letter on the member and financial data provided by KRS and used to perform the actuarial valuation as of June 30, 2017. Except where noted otherwise, the projections assume no actuarial gains or losses will occur in the future, and that members will terminate, retire, become disabled, or die as predicted by the actuarial assumptions documented in the June 30, 2017 actuarial valuation report.

These projections also do not reflect the actual investment experience of the retirement system after the measurement date of June 30, 2017. The projections assume that the participating employers in each Retirement System will maintain the current workforce in each future year and that as current active members terminate or retire from a covered position in the Retirement System, the employer would replace them with a new employee.

Our calculations are based upon assumptions regarding future events, which may or may not materialize. Depending on actual plan experience, actual results could deviate significantly from

General Comments

We are not attorneys, and we cannot provide a legal opinion regarding the changes in this proposed legislation. Nothing in this letter should be construed as providing legal, investment or tax advice. It may be prudent to consult with the Retirement System's counsel before enacting any such changes. Finally, no statement in this letter is intended to be interpreted as a recommendation in favor of or in opposition to the changes studied herein.

Mr. White and Mr. Newton are Enrolled Actuaries. All the of the undersigned are also members of the American Academy of Actuaries and that we meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. In addition, all of the undersigned are experienced in performing valuations for large public retirement systems. Exhibit 1. Summary of Proposed

Changes Section 1. Comparison of

Fiscal Impact

Section 2. Projected Cost of the Retirement and Insurance - Current Plan

GRS Section 3. Projected Cost of the Retirement and Insurance – Proposed Legislation

Exhibit 1. Summary of Changes in Benefit Provisions and Employer Funding for the KERS and CERS Hazardous Systems & SPRS

Retirement Formulas

Tier 1:

- No change to the basic formula.
- For retirements on or after January 1, 2019, the highest three years of pay used to determine the member's final average compensation must be complete fiscal years and must contain at least 36 months.

Tier 2:

• No change to the basic formula.

Tier 3:

- No change to the interest crediting formula.
- Removal of the \$5,000 post-retirement death benefit for all members hired on and after January 1,2014.

Future Hires:

• Future employees will participate in the hybrid cash balance plan. Participants do not have an option to earn retirement benefits in the defined contribution plan

Member Contribution Rates

- Member contribution rates to the retirement fund for Tier 1, Tier 2, and Tier 3 members remain unchanged at 8% of pay. Contributions to the health insurance funds for Tier 1 members who began participation on or after July 1, 2003 (but prior to September 1, 2008) will increase to 1.00% of pay.
 - The contributions to the health insurance funds are classified as 401(h) contributions and are not refundable to the member.

Pension Anti-Spiking Provisions

Equipment and Other Expense Allowances:

• Excluded from creditable compensation earned on or after January 1, 2019.

Sick Leave

- Converted sick service cannot exceed amount for accumulated sick leave as of January 1, 2019.
- Tier 1 sick leave service credit does not count towards retirement eligibility for those retiring on or after January 1, 2019.

Exhibit 1. Summary of Changes in Benefit Provisions and Employer Funding for the KERS and CERS Hazardous Systems & SPRS (Continued)

Retiree Health Accessibility

• No change.

Line of Duty Death

• The surviving spouse (if any) shall supersede all previous beneficiary designations for members that die in the line of duty.

Reemployment After Retirement

The following reemployment after retirement provisions apply to members who retire on or after January 1, 2019 in order to continue to receive their retirement allowance during their reemployment with a participating employer in KERS, CERS, SPRS, or TRS:

- Must have a one (1) month break in employment and no prearranged reemployment agreement.
- After required employment break, the retired member can return to work in part-time or full-time position, but does not earn additional retirement benefit accruals.
 - Monthly pension will <u>not</u> be suspended for the duration of reemployment and the retiree will not earn additional retirement benefits.
- Employer required to make normal cost contributions (both pension and retiree health) on the payroll of the reemployed retiree.

Employer Funding

The Board will continue to have the authority to change the contribution rates for CERS on an annual basis and will have the authority to change contribution rates for KERS and SPRS on an annual basis after the fiscal year ending June 30, 2020.

Actuarially Determined Contributions (ADC) for actuarial valuations performed on and after June 30, 2019 are based on normal cost plus an amortization payment to finance the unfunded actuarial accrued liability:

- Normal cost determined using entry age normal cost method paid as a percentage of payroll.
- Unfunded liability payment determined in the January 1, 2019 actuarial valuation will be based on a closed 30-year amortization period.
- Allocation of amortization payment for the unfunded liability to participating employers in KERS, CERS, and SPRS is based on a level-dollar amortization
 - The dollar amount of the amortization payment will be allocated to each participating employer in proportion to their average percentage of the total compensation for years (FY 14/15, FY 15/16, and FY 16/17), adjusted for any employers who ceases participation in the System.

o Each employer's proportionate share of the amortization payment will remain a relatively constant

Exhibit 1. Summary of Changes in Benefit Provisions and Employer Funding for the KERS and CERS Hazardous Systems & SPRS

percentage each future year.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation and assumes constant active membership count in all future years.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$10 million additional contribution budgeted to be paid in fiscal year beginning 2017.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation and assumes constant active membership count in all future years.

The employer actuarially determined contribution rate for a particular year is determined by the prior year's actuarial valuation.

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation.

The actuarial determined contribution is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$10 million additional contribution budgeted to be paid in fiscal year beginning 2017.

Kentucky Retirement Systems Exhibit 3-3 SPRS Retirement Fund Proposed Legislation (\$ in Millions)

Notes and assumptions:

The projection is based on the results of the June 30, 2017 actuarial valuation.

The actuarial determined contribution is determined by the prior year's actuarial valuation.

The employer contribution amount shown does not include the \$10 million additional contribution budgeted to be paid in fiscal year beginning 2017.

Mr. Robert B. Barnes Deputy Executive Secretary and General Counsel Kentucky Teachers' Retirement System 479 Versailles Road Frankfort, KY 40601-3800

Actuarial Impact - 18 RS SB 151/HCS 1 - Impact on Pension Plan

Dear Beau:

We have prepared an actuarial analysis of the impact of 18 RS SB 151/HCS 1 (HCS 1) on the Teachers' Retirement System of the State of Kentucky (TRS). This actuarial analysis relates to the pension plan only. HCS 1 introduces a new tier of benefits for active members hired on or after January 1, 2019 and changes actuarial funding, participation requirements and actuarial assumptions. The major provisions of HCS 1, based on our interpretation without a summary of changes, are summarized below and the estimated cost impacts are provided in the attached Exhibits.

Section | - Benefit Provisions for New Members on or after January 1, 2019

All new members hired on or after January **1**, 2019 will accrue retirement benefits based on a hybrid cash balance plan under a new tier within TRS.

The retirement benefit determined in the hybrid cash balance plan will be based upon a member's accumulated account balance calculated as follows:

- 1. Non-University members shall contribute 9.105% of monthly salary and University members shall contribute 7.625% of monthly salary.
- **2.** An employer pay credit equal to 8.00% for Non-University members and 4.00% for University members, for each month the employee is contributing, will be credited to the member's notional account balance.
- **3.** Regular interest will be added annually as of June 30 to the contributing member's accumulated account balance.

3550 Bus bee Pkwy, Suite 250, Kennesaw, G A 30 144 Phone (678) 388-1 700 • Fax (678) 388-1 730 www.Cav MacCo nsultin g.co m Offices in Kennesa w. GA • Be llevue, NE Mr. Robert B. April 13, 2018 Page 2

- a) Regular interest shall be determined by multiplying the member's accumulated account balance on June 30 of the <u>preceding</u> fiscal year by a percentage equal to 85% of system's geometric average net investment return over the last 10 fiscal years, but in no case less than0%.
- b) System's geometric average net investment return shall be the annual average geometric investment return, net of administrative and investment fees and expenses, over the last I O fiscal years as of the date of regular interest.
- 4. Once a member meets the service retirement eligibilities (age 65 with 5 years of service or age 57 with age and service total of at least 87), the member may elect to receive a monthly lifetime retirement allowance by annuitizing the accumulated account balance based on the actuarial assumptions and methods adopted by the TRS Board in effect on the member's retirement date.
 - a) The member may elect to receive an actuarial equivalent benefit under one of the optional forms of payment as established by the TRS Board,
 - b) Or the member may instead take a refund of the accumulated account balance.
- 5.' Upon termination of employment with less than five years of service, the member shall forfeit the accumulated employer credit and shall only receive a refund of his or her accumulated contributions with regular interest.
- 6. Upon termination of employment with five or more years of service, the member shall receive a full refund of his or her accumulated account balance.

For new members after January 1, 2019, there will be no sick leave credit for retirement purposes, and no service purchases unless the member is called to active duty deployment while working. However, under this new plan, some disability and death benefits will continue to new members hired on or after January 1, 2019 in a similar manner as current members.

Section II - Benefit Provisions for Current Members as of January 1, 2019

<u>Sick Leave</u>

For all members, the level of sick leave for retirement purposes will be frozen at December 31, 2018.

Hvbrid Cash Balance Options

For active members with less than 5 years of service as of January 1, 2019, the member will have an option to participate in the DB Plan or the new Hybrid Cash Balance plan. If the member opts into the hybrid cash balance, their accumulated employee contributions will be transferred to the new plan.

Mr. Robert B. **April 13, 2018** Page 3

Section III - Contribution Requirements

Employee Contribution Rates

Active members will continue to contribute the same percentage of salary to the pension and retiree health plans. The table below shows the contribution requirements:

Item	Non-University	University
Pension	9.105%	7.625%
relision	9.103%	
Retiree Health	<u>3.750%</u>	<u>2.775%</u>
Total	12.855%	10.400%

Employer Contributions

According to HCS 1, for all members, employers will pay a fixed base statutory contribution rate of 16.105% of pay for non-university employers and 13.650% of pay for universities to fund pension, retiree health benefits and life insurance. The table below shows the statutory contribution rates.

Item	Non-University	University
Pension	12.305%	10.825%
Retiree Health	3.750%	2.775%
Life Insurance	<u>0.050%</u>	0.050%
Total	16.105%	13.650%

Effective January 1, 2019, school districts will pay an additional 2% of pay for new members participating in the Hybrid Cash Balance Plan.

Since the school districts will be making direct contributions to the pension fund, the school districts will be required, similar to Universities, under Government Accounting Standards Board No. 68, to recognize its portion of the plan's net pension liability on their financial statements.

The State will continue to make direct contributions to TRS for amortization payments for past benefit improvements, such as ad hoc COLAs, the cost for including sick leave payments in pension 1:1 calculations and its portion of the "shared solution" for retiree health funding.

Mr. Robert B. April 13, 2018

Page 4

Section IV - Actuarial Funding

Beginning July 1, 2020, each employer shall pay the additional contribution required to fund TRS on an actuarially sound basis. While fixed based statutory employer contribution rates will still be provided by employers and/or the State, the determination of the Actuarially Determined Contribution (ADC) will be calculated as follows:

Normal cost plus an amortization payment for the Unfunded Accrued Liability (UAL),

Normal cost determined using the Entry Age Normal cost method as a percentage of

payroll,

UAL payment methodology will be as follows:

- o Closed 30-year period beginning June 30, 2018
- o Phase into level dollar amortization asfollows:
 - The level percentage of payroll amortization method in the 2018 actuarial valuation with a payroll growth assumption of two and six hundred twenty-five thousandths percent (2.625%);
 - The level percentage of payroll amortization method in the 2019 actuarial valuation with a payroll growth assumption of one and seventy-five hundredths percent (1.75%);
 - The level percentage of payroll amortization method in the 2020 actuarial valuation with a payroll growth assumption of eight hundred seventy-five thousandth percent (0.875%); and
 - The level dollar amortization method in the 2021 actuarial valuation and for each valuation occurring thereafter.
- The UAL payment above the fixed base statutory employer rate will be set as a dollar amount and will be prorated to each employer based upon the employer's share of the total payroll for fiscal years 2015-2017. The state will pay this cost for local school districts.

► 5-year smoothing of assets

Section V - Actuarial Assumptions

The projections for the proposed legislation use the June 30, 2017 actuarial valuation of TRS as a baseline. Below are additional or alternative actuarial assumptions that are used in the determination of this legislation:

We have assumed a Regular Interest Credit assumption of 6.50%, approximately 85% (as set by HCS **1**) of the assumed investment return assumption of 7.50% for all years for the Hybrid Cash Balance Plan.

Mr. Robert B. April 13, 2018

Page 5

We have revised assumed retirement rates for members of the new tier based on the new retirement eligibility requirements. We have not revised assumed retirement rates due to freezing sick leave accruals. Actual retirement patterns occurring in the future that are different from those assumed, will impact the ultimate cost of HCS 1. In addition, other assumptions, such as rates of termination and disability that were determined based on actual experience under the current plan would likely change under HCS 1 further impacting the ultimate cost of disability significantly.

For those active members who have 2 years of service or less as of January 1, 2019, we have assumed they will make an election to participate in the Hybrid Cash Balance Plan. This assumption is our estimate of the number of active members with less than five years of service who may opt into the hybrid cash balance Plan and not remain in the current DB plan. The difference in liability for active members with low service is negligible, so we believe this is a reasonable assumption.

The benefit provisions proposed in HCS 1 will no longer be subject to the inviolable contract rules of the current plan, and will be subject to future changes. This actuarial analysis has been prepared assuming that no future changes will occur. Any changes to benefits or underlying assumptions will impact the ultimate cost of the legislation.

Section VII - Conclusion

In the upcoming June 30, 2018 actuarial valuation before HCS 1, there will be 26 years remaining on the amortization period to pay off the Unfunded Accrued Liability. HCS 1 resets this amortization period from 26 years to 30 years as of June 30, 2018, providing an annual savings of approximately \$65 million per year during the twenty-year projection period shown in Exhibits 1 and 2. There will be a subsequent cost associated with adding four years of amortization payments not shown in Exhibit 2.

As shown in Exhibit 2, after the first year, there is a cost for the next nine years of the twenty- year projection due to the phase in to the level dollar amortization methodology, but long-term generates subsequent savings. The decrease in benefits for current and new active members eventually leads to savings in the employer contributions after the first ten years.

Projections are designed to identify anticipated trends rather than predicting some future state of events. The projections are based on TRS' estimated financial status on June 30, 2017, and project future events using one set of assumptions out of a range of many possibilities. The projections do not predict TRS' financial condition or its ability to pay

Mr. Robert B.

benefits in the future and do not provide any guarantee of future financial soundness of the DB Plan. Over time, a defined benefit plan's total cost will depend on a number of factors, including the amount of benefits paid, the number of people paid benefits, the duration of the benefit payments, plan expenses, and the amount of earnings on assets invested to pay benefits. These amounts and other variables are uncertain at the time the projections were made. Because actual experience will not unfold

Mr. Robert B. April 13, 2018

Page 6

exactly as expected, actual results can be expected to differ from the projections. To the extent that actual experience deviates significantly from the assumptions, results could be significantly better or significantly worse that indicated in this study.
