Part II: Bill Provisions and the Estimated Fiscal Impact Relating to Local Government

The purpose of the measure is to specify the distribution formula for funds in the existing Regional Development Agency Assistance Fund, to prevent those funds from being used for operational expenses by recipient counties, and to eliminate duplicative reporting requirements related to expenditures from the fund.

The Regional Development Agency Assistance Fund (RDAAF) currently receives $6,000,000 per year from the General Fund via in-lieu of tax payments received by the Tennessee Valley Authority (TVA). Under this measure, the General Fund moneys would be distributed to the same fund-eligible counties, but the measure explicitly specifies that the amount must be evenly distributed among those counties. This new distribution may have an impact on the amount of funds received by each fund-eligible county. Some counties may receive more moneys, while others may receive less monies.
Similarly, the measure would also prohibit recipient counties from using funds for operational costs, and any fiscal impact from that prohibition would be borne by the county if the county had previously been using these funds for operational costs.
