Fiscal Impact Statement Office NOTE – SB 169 passed with Senate Committee Substitute and no additional amendments. The impact statements below are applicable to the GA version of SB 169.

March 1, 2021

Ms. Katie Carney
Office of Fiscal Statement Review
Legislative Research Commission
Capitol Annex, Room 104
Frankfort, KY 40601

RE: Senate Bill 169 (2021 RS BR 1172) – SCS Version
AA Statement Required by KRS 6.350
AA Statement 1 of 4

Dear Ms. Carney:

Kentucky Retirement Systems' (KRS) actuary, GRS Retirement Consulting, had previously provided an Actuarial Analysis of Senate Bill 169 (2021 RS BR 1172) via letter dated February 16, 2021. KRS has now examined the SCS Version of Senate Bill 169 (2021 RS BR 1172) and compared it to the existing AA for Senate Bill 169.

We have determined that the SCS Version of Senate Bill 169 (2021 RS BR 1172) would not impact the previous actuarial impact provided for this legislation. Therefore, the Actuarial Analysis of Senate Bill 169 (2021 RS BR 1172), dated February 16, 2021, is applicable to Senate Bill 169 (2021 RS BR 1172) – SCS Version.

We have not requested any further actuarial analysis of Senate Bill 169 (2021 RS BR 1172) – SCS Version by the Systems' independent actuary. Please let me know if you have any questions regarding our analysis of Senate Bill 169 (2021 RS BR 1172) – SCS Version.

Sincerely,

A handwritten signature in black ink that reads "David Eager".

David L. Eager
Executive Director
Kentucky Retirement Systems

Actuarial Analysis Summary

BR or Bill Ref.	SB 169	Actuarial Analysis Conducted For:
Date:	2/16/2021	<input checked="" type="checkbox"/> KERS NH <input checked="" type="checkbox"/> KERS Haz <input checked="" type="checkbox"/> SPRS <input type="checkbox"/> TRS
Actuary:	GRS	<input type="checkbox"/> CERS NH <input type="checkbox"/> CERS Haz <input type="checkbox"/> LRP <input type="checkbox"/> JRP

Section I: Executive Summary

In the opinion of the actuary, this bill would make the affected state-administered retirement system(s) actuarially:

☐ MORE SOUND ☐ LESS SOUND ☒ NO IMPACT

If actuarially MORE SOUND OR LESS SOUND, please summarize the factors leading to the actuary's opinion:

The proposed legislation increases the disability benefits for members who become "totally and permanently disabled" in the line of duty or as a result of a duty-related disability, which will slightly increase the liabilities and contribution requirements of the systems. The actuarially determined contribution requirements increase by 0.06% of pay, 0.01% of pay, and 0.11% of pay for the KERS Non-Hazardous, KERS Hazardous, and SPRS Systems, respectively.

As long as employer contribution rates are increased accordingly, we do not believe this benefit change will impact the current actuarial soundness of the systems.

Does this bill increase or decrease employer costs? ☒ INCREASE ☐ DECREASE ☐ NO IMPACT

Does this bill increase or decrease benefits? ☒ INCREASE ☐ DECREASE ☐ NO IMPACT

Does this bill increase or decrease benefit participation? ☐ INCREASE ☐ DECREASE ☒ NO IMPACT

If the bill impacts employer costs, benefits, or benefit participation, please explain and estimate the impact in Sections II and VI.

Section III: Brief Summary of Bill

The proposed legislation increases the disability benefits for members who become “totally and permanently disabled” in the line of duty or as a result of a duty-related disability. Current benefits for members who qualify for total and permanent in the line of duty or duty-related disability provide a minimum benefit equal to 25% of the member’s monthly final rate of pay plus 10% of the member’s monthly final rate of pay for each dependent child (with the total dependentchild benefit not to exceed 40% of the member’s monthly final rate of pay).

The proposed legislation increases the minimum benefit to be equal to 75% of the member's monthly average pay plus 10% of the member's monthly average pay for each dependent child (with the total benefit payable to both the member and dependent children while the member is alive not to exceed 100% of the member's monthly pay). The insurance premium for the member, the member's spouse, and the member's dependent children shall also be paid in full by the System.

Section IV: Statement of Assumptions and Methods

Did the analysis rely solely upon the same assumptions & methods previously established and utilized by the actuary in the retirement system's most recent actuarial valuation?

☐ YES ☒ NO

If NO, please describe each new assumption or method utilized, the basis for selecting the revised assumption or method, and whether each new assumption or method increased or decreased projected employer costs:

The calculations are based on the same methods and assumptions as the June 30, 2020 Actuarial Valuation, except as described below.

Current hazardous in the line of duty disability provisions do not require a "total and permanent" injury, so future members will still be eligible to receive a disability benefit under the current provisions if the injury is deemed to occur in the line of duty but not be a "total and permanent" disability. While the Actuarial Valuation makes an assumption for the percentage of future disability incidences that are deemed to qualify as in the line of duty, the analysis must make an additional assumption for the hazardous plans as to the percentage of hazardous member disabilities that occur in the line of duty and qualify as a "total and permanent" injury.

Based on data compiled for the June 30, 2018 KRS Experience Study, there were 67 disabilities that were classified as in the line of duty or duty related over the five-year period ending June 30, 2018. Additionally, according to data provided by KRS for this analysis, there were 12 disabilities classified as total and permanent in the line of duty or duty-related disability over the 10-year period from 2010-2019, or approximately 10% of all disabilities classified as in the line of duty or duty related.

Because the current provisions already require "total and permanent" disability for non-hazardous members, the analysis assumes all future non-hazardous duty related disabilities that occur will qualify for the proposed benefit provisions.

Section V: Comment from Actuary

The impact on the actuarial accrued liability across all Funds was relatively minor with the majority of the impact on employer contribution rates being due to increases in the normal cost rate (or the cost of the next year's accrual of benefits). This increase in the employer contribution requirement represents an ultimate increase in the cost of the plan and is expected to be payable indefinitely so long as there are active members accruing benefits in the Fund.

Section VI: Detailed Actuarial Analysis and Projections

(May be attached as Appendix)

Please see attached.

* if necessary or plan administers more than one plan/system.

Section III: Brief Summary of Bill

The proposed legislation increases the disability benefits for members who become “totally and permanently disabled” in the line of duty or as a result of a duty-related disability. Current benefits for members who qualify for total and permanent in the line of duty or duty-related disability provide a minimum benefit equal to 25% of the member’s monthly final rate of pay plus 10% of the member’s monthly final rate of pay for each dependent child (with the total dependentchild benefit not to exceed 40% of the member’s monthly final rate of pay).

The proposed legislation increases the minimum benefit to be equal to 75% of the member's monthly average pay plus 10% of the member's monthly average pay for each dependent child (with the total benefit payable to both the member and dependent children while the member is alive not to exceed 100% of the member's monthly pay). The insurance premium for the member, the member's spouse, and the member's dependent children shall also be paid in full by the System.

Section IV: Statement of Assumptions and Methods

Did the analysis rely solely upon the same assumptions & methods previously established and utilized by the actuary in the retirement system's most recent actuarial valuation?

☐ YES ☒ NO

If NO, please describe each new assumption or method utilized, the basis for selecting the revised assumption or method, and whether each new assumption or method increased or decreased projected employer costs:

The calculations are based on the same methods and assumptions as the June 30, 2020 Actuarial Valuation, except as described below.

Current hazardous in the line of duty disability provisions do not require a "total and permanent" injury, so future members will still be eligible to receive a disability benefit under the current provisions if the injury is deemed to occur in the line of duty but not be a "total and permanent" disability. While the Actuarial Valuation makes an assumption for the percentage of future disability incidences that are deemed to qualify as in the line of duty, the analysis must make an additional assumption for the hazardous plans as to the percentage of hazardous member disabilities that occur in the line of duty and qualify as a "total and permanent" injury.

Based on data compiled for the June 30, 2018 KRS Experience Study, there were 67 disabilities that were classified as in the line of duty or duty related over the five-year period ending June 30, 2018. Additionally, according to data provided by KRS for this analysis, there were 12 disabilities classified as total and permanent in the line of duty or duty-related disability over the 10-year period from 2010-2019, or approximately 10% of all disabilities classified as in the line of duty or duty related.

Because the current provisions already require "total and permanent" disability for non-hazardous members, the analysis assumes all future non-hazardous duty related disabilities that occur will qualify for the proposed benefit provisions.

Section V: Comment from Actuary

The impact on the actuarial accrued liability across all Funds was relatively minor with the majority of the impact on employer contribution rates being due to increases in the normal cost rate (or the cost of the next year's accrual of benefits). This increase in the employer contribution requirement represents an ultimate increase in the cost of the plan and is expected to be payable indefinitely so long as there are active members accruing benefits in the Fund.

Section VI: Detailed Actuarial Analysis and Projections *(May be attached as Appendix)*

Please see attached.

Mr. David Eager
Executive Director
Kentucky Retirement Systems1260
Louisville Road
Frankfort, KY 40601

Re: Actuarial Analysis of Proposed Legislation SB 169 and its Financial Impact on the Kentucky Retirement Systems

Dear Mr. Eager:

We have reviewed the proposed legislation SB 169, and the purpose of this letter is to communicate the actuarial analysis of this legislation on the systems maintained by the Kentucky Retirement Systems (KRS). Please note that proposed legislation HB 139 provides similar type provision changes and we have prepared a separate, but identical actuarial analysis for that legislation.

Summary of Fiscal Impact

The proposed legislation increases the disability benefits for members who become “totally and permanently disabled” in the line of duty or as a result of a duty-related disability. The impact of the proposed legislation on the employer contribution requirements are shown in the table below.

Increase in Actuarially Determined Contribution Requirements

Plan	Retirement Fund	Insurance Fund	Retirement and Insurance	Increase in Annual Contribution ¹
KERS Non-Hazardous	0.04%	0.02%	0.06%	\$833,000
KERS Hazardous	0.01%	<0.01%	0.01%	17,000
CERS Non-Hazardous	0.04%	0.02%	0.06%	1,570,000
CERS Hazardous	0.04%	0.06%	0.10%	580,000
SPRS	0.04%	0.07%	0.11%	51,000

¹ Based on estimated FY 21/22 payroll. Future annual increases in contributions will depend on payroll experience.

The majority of the increase in the employer contribution requirement represents an ultimate increase in the cost of the plan (i.e. an increase in the normal cost) and is therefore payable indefinitely so long as there are active members accruing benefits in the Fund. Note, there is no projected increase in employer contributions for FY 21/22 for the CERS Non-Hazardous Fund and for FY21/22 – FY 22/23 for the CERS Hazardous Fund due to the contribution phase-in provisions currently in

Mr. David Eager
February 16,
2021

effect. However, an increase in employer contributions due to the proposed legislation is expected once allowed by the phase-in provisions.

This legislation would also increase disability retirement benefits for four (4) KERS Non-Hazardous disabled retirees with the annual distribution of benefits for these retirees increasing from \$30,000 to \$81,000 per year (\$12,800 increase in average annual benefit). Similarly, there will also be an increase in disability retirement benefits for 13 CERS Non-Hazardous disabled retirees with the total annual distribution for these retirees increasing from \$144,000 to \$292,000 per year (\$11,400 increase in average annual benefit) and an increase in disability retirement benefits for three (3) CERS Hazardous disabled retirees with the total annual distribution for these retirees increasing from \$37,000 to \$50,000 (\$4,200 increase in average annual benefit). This is an approximate \$568,000, \$1,506,000, and \$150,000 increase in the actuarial accrued liability for the KERS Non-Hazardous, CERS Non-Hazardous, and CERS Hazardous Pension Funds, respectively. There is an additional \$867,000 and \$2,250,000 increase in actuarial accrued liability for the KERS Non-Hazardous and CERS Non-Hazardous Insurance Funds, respectively.

Section 1 of the enclosed exhibits provides a 30-year projection of the fiscal impact of the proposed legislation on the unfunded actuarial accrued liability, the funded ratio, and the employer contributions of all the retirement and insurance funds maintained by KRS. Section 2 of the enclosed exhibits provides a 30-year projection of the funds under the current plan provisions and section 3 of the enclosed exhibits provides a 30-year projection of the funds under the proposed plan provisions.

Comments on Proposed Legislation

Current benefits for members who qualify for total and permanent in the line of duty or duty-related disability provide a minimum benefit equal to 25% of the member's monthly final rate of pay plus 10% of the member's monthly final rate of pay for each dependent child (with the total dependent child benefit not to exceed 40% of the member's monthly final rate of pay). In order to be eligible for this benefit, non-hazardous members must become "totally or permanently disabled" due to a duty-related incident. Hazardous members must become "totally or permanently disabled" and the injury must occur in the line of duty.

The proposed legislation increases the minimum benefit to be equal to 75% of the member's monthly average pay plus 10% of the member's monthly average pay for each dependent child (with the total benefit payable to both the member and dependent children while the member is alive not to exceed 100% of the member's monthly pay). The insurance premium for the member, the member's spouse, and the member's dependent children shall also be paid in full by the System. In order to be eligible for this benefit, non-hazardous members must become "totally or permanently disabled" due to a duty-related incident. Hazardous members must become "totally or permanently disabled" and the injury must occur in the line of duty.

Comments on Fiscal Analysis

Currently, the Actuarial Valuation makes an assumption for the percentage of future disability incidences that are deemed to qualify for the current benefits payable to non-hazardous members who become totally and permanently disabled due to a duty-related injury. Because the current provisions already require “total and permanent” disability for non-hazardous members, the analysis assumes all future non-hazardous duty related disabilities that occur will qualify for the proposed benefit provisions.

On the other hand, current hazardous in the line of duty disability provisions do not require a “total and permanent” injury, so future members will still be eligible to receive a disability benefit under the current provisions if the injury is deemed to occur in the line of duty but not be a “total and permanent” disability. While the Actuarial Valuation makes an assumption for the percentage of future disability incidences that are deemed to qualify as in the line of duty, the analysis must make an additional assumption for the hazardous plans as to the percentage of hazardous member disabilities that occur in the line of duty and qualify as a “total and permanent” injury.

Based on data compiled for the June 30, 2018 KRS Experience Study, there were 67 disabilities that were classified as in the line of duty or duty related over the five-year period ending June 30, 2018. Additionally, according to data provided by KRS for this analysis, there were 12 disabilities classified as total and permanent in the line of duty or duty-related disability over the 10-year period from 2010-2019, or approximately 10% of all disabilities classified as in the line of duty or duty related.

Line-of-Duty Disability Incidence Assumptions

Plan	Current Assumption for Percentage of Disabilities that Qualify under Current Benefit Provisions for Members who become Disabled in the Line of Duty	Percentage of Disabilities that Occur in the Line of Duty that are Assumed to Qualify as “Total and Permanent” under Proposed Legislation
KERS Non-Hazardous	2%	100%
KERS Hazardous	10%	10%
CERS Non-Hazardous	2%	100%
CERS Hazardous	50%	10%
SPRS	70%	10%

Mr. David Eager
February 16,
2021

Comments on Fiscal Impact

The impact on the actuarial accrued liability across all Funds was relatively minor with the majority of the impact on employer contribution rates being due to increases in the normal cost rate (or the cost of the next year's accrual of benefits). This increase in the employer contribution requirement represents an ultimate increase in the cost of the plan and is expected to be payable indefinitely so long as there are active members accruing benefits in the Fund.

The proposed legislation had the largest impact on the CERS Hazardous and the SPRS Funds as these funds are assumed to have the highest incidence of future disabilities that occur in the line of duty for their active populations.

Basis of Calculations

GRS based the calculations and analysis in this letter on the member and financial data provided by KRS for use in performing the actuarial valuation as of June 30, 2020. The projections assume no actuarial gains or losses will occur in the future, and that members will terminate, retire, become disabled, or die as anticipated by the actuarial assumptions used to perform the June 30, 2020 actuarial valuation. The analysis and projections were performed without regard to HB 1 that was enacted during the 2019 special legislative session (and amended by SB 249 during the 2020 legislative session) as individual employer elections regarding their future cessation from participating in KERS is unknown at this time. Additionally, the projections assume that the changes are effective June 30, 2020, the date of the last actuarial valuation.

Our calculations are based upon assumptions regarding future events, which may or may not materialize. Depending on actual plan experience, actual results could deviate significantly from our projections.

2050	11,503	11,503	-	100%	52	70	1,396	3.75%	3.75%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 5.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to decrease 2% each year for each of the next 30 years.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the full actuarially determined contribution rate.

The 2020 legislative session did not set the employer contribution rates for FYE 2022. Employer contribution rates for FYE 2022 are assumed to be based on the June 30, 2020 actuarial valuation.

The 66.51% employer contribution rate for FYE 2021 is the effective contribution rate after reflecting HB 352 (passed during the 2020 legislative session) which allowed Regional Mental Health/Mental Retardation Boards, Local and District Health Departments, State Universities, Community Colleges and any other agency eligible to voluntarily cease participating in KERS to contribute 41.06% of pay to the pension fund for FY 2021. Collectively these entities reflect approximately 21% of the covered payroll in the System.

2050	21,991	21,991	-	100%	178	252	5,034	3.54%	3.54%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to remain constant through the entire projection.

The Board certified contribution rate paid by employers is assumed to be equal to the full actuarially determined contribution rate, except as allowed by SB 249 (passed during the 2020 legislative session), which set the employer contribution rates for FYE 2021 equal to the rates for FYE 2020, and House Bill 362 (passed during the 2018 legislative session), which limits the certified contribution rate to a 12% increase from the prior year for the period of July 1, 2018 to June 30, 2028.

2050		801	801	-	100%	3	4	45	6.69%	6.69%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 5.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to decrease 2% each year for each of the next 30 years.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the full actuarially determined contribution rate.

The employer contribution amount shown does not include the \$384,000 additional contribution budgeted to be paid in fiscal year ending 2021.

The 2020 legislative session did not set the employer contribution rates for FYE 2022. Employer contribution rates for FYE 2022 are assumed to be based on the June 30, 2020 actuarial valuation.

2050		2,701	2,701	-	100%	3	14	1,376	0.24%	0.24%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to decrease 2% each year for each of the next 30 years.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the full actuarially determined contribution rate.

The 2020 legislative session did not set the employer contribution rates for FYE 2022. Employer contribution rates for FYE 2022 are assumed to be based on the June 30, 2020 actuarial valuation.

The 10.57% employer contribution rate for FYE 2021 is the effective contribution rate after reflecting HB 352 (passed during the 2020 legislative session) which allowed Regional Mental Health/Mental Retardation Boards, Local and District Health Departments, State Universities, Community Colleges and any other agency eligible to voluntarily cease participating in KERS to contribute 8.41% of pay to the insurance fund for FY 2021. Collectively these entities reflect approximately 21% of the covered payroll in the System.

2049	596	789	(193)	132%	-	2	193	0.00%	0.00%
2050	601	804	(203)	134%	-	2	193	0.00%	0.00%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to decrease 2% each year for each of the next 30 years.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the full actuarially determined contribution rate.

The 2020 legislative session did not set the employer contribution rates for FYE 2022. Employer contribution rates for FYE 2022 are assumed to be based on the June 30, 2020 actuarial valuation.

2050		6,405	6,405	-	100%	41	50	4,990	0.82%	0.82%

Notes and assumptions:

The projection is based on the results of the June 30, 2020 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.25%.

New active members are assumed to be hired to replace the current active members as they are assumed to terminate employment or retire at a rate such that the total active population is assumed to remain constant through the entire projection.

The Board certified contribution rate paid by employers is assumed to be equal to the full actuarially determined contribution rate, except as allowed by SB 249 (passed during the 2020 legislative session), which set the employer contribution rates for FYE 2021 equal to the rates for FYE 2020, and House Bill 362 (passed during the 2018 legislative session), which limits the certified contribution rate to a 12% increase from the prior year for the period of July 1, 2018 to June 30, 2028.

Notes and assumptions:

The analysis above is based on the same methods, assumptions, and benefit provisions as the analysis under the Current Plan, except for the changes to disability benefits proposed in SB 169. The June 30, 2020 Actuarial Valuation and this analysis assumes that 2% of future disabilities qualify for benefit provisions for duty-related disabilities.

Of those disabilities that are assumed to be duty-related, all are assumed to qualify as "Total and Permanent", as defined under the proposed legislation, as current non-hazardous disability provisions already require an injury to be "total and permanent".

Notes and assumptions:

The analysis above is based on the same methods, assumptions, and benefit provisions as the analysis under the Current Plan, except for the changes to disability benefits proposed in SB 169. The June 30, 2020 Actuarial Valuation and this analysis assumes that 2% of future disabilities qualify for benefit provisions for duty-related disabilities.

Of those disabilities that are assumed to be duty-related, all are assumed to qualify as "Total and Permanent", as defined under the proposed legislation, as current non-hazardous disability provisions already require an injury to be "total and permanent".

Notes and assumptions:

The analysis above is based on the same methods, assumptions, and benefit provisions as the analysis under the Current Plan, except for the changes to disability benefits proposed in SB 169. The June 30, 2020 Actuarial Valuation and this analysis assumes that 70% of future disabilities qualify for benefit provisions related to disabilities that occur in the line of duty. Of those disabilities that are assumed to occur in the line of duty, 10% are assumed to qualify as "Total and Permanent", as defined under the proposed legislation.

RE: SB 169 SCS/BR 1172
AA Statement 2 of 4

Dear Ms. Carney:

SB 169 SCS, AN ACT relating to duty-related disability benefits, in part amends KRS 61.621 to increase the disability benefit payable under that statute from 25% of the member's final rate of pay, to 75% of the member's monthly average pay. SB 169 SCS provides that in the event of a duty related disability, payments to the member and dependent child payments shall not exceed 100% of the member's monthly average pay, and that total dependent child benefits shall not exceed 25% of the member's pay while the member is living, and that payments to dependent children shall be divided equally among them. SB 169 SCS also amends KRS 61.720 to provide that in the event that a member becomes disabled as a result of a duty-related injury as defined under KRS 61.621 that the health insurance premium for the member, the member's spouse, and the dependent children as long as they remain eligible, will be paid.

TRS has examined SB 169 SCS and determined that it could increase retirement benefits for members who suffer a disabling condition from a "duty-related" injury. However, since KRS 61.621 first became effective on June 1, 2000, TRS has had no members suffer a duty-related injury resulting in a disabling condition, and, therefore, no members have qualified for this benefit. TRS has spoken with its actuary and, given this history with TRS members, SB 169 SCS would have no material impact on the funded liability of the pension fund.

Accordingly, in compliance with KRS 6.350(2)(c), TRS certifies as follows:

1. There were approximately 133,000 participants in TRS as of June 30, 2020. No members have qualified for disability benefits under this statute since its effective date.
2. The change in benefits would be to increase the disability benefit payable under the statute from 25% of the member's final rate of pay, to 75% of the member's monthly average pay. SB 169 SCS further provides that in the event of a duty-related disability, payments to the member and dependent child payments shall not exceed 100% of the member's monthly average pay, and that total dependent child benefits shall not exceed 25% of the member's pay while the member is living, and that payments to dependent children shall be divided

equally among them. There is also a change that in the event that a member becomes disabled as a result of a duty-related injury as defined under KRS 61.621 that the health insurance premium for the member, the member's spouse, and the dependent children as long as they remain eligible, will be paid.

3. There is no change in employer costs for TRS.
4. There would be no change in administrative expenses.

Accordingly, TRS has not requested any further actuarial analysis of this bill by its independent actuary.

Please let me know if you have any questions regarding this analysis.

Sincerely,

Robert B. Barnes
Deputy Executive Secretary of Operations and
General Counsel

Frankfort, KY 40601

SB 169 SCS
AA Statement 3 and 4 of 4

Dear Ms. Carney:

JFRS has examined **SB 169 SCS 1(BR 1172)**, which amends KRS 16.582 and 61.621 to increase minimum total and permanent in line of duty or duty-related disability benefits payable to a member.

We have determined that the bill would increase retirement benefits for members who become disabled from a "duty-related" incident. However, as of this date, JFRS has not had any members receive benefits under this statute as a result of a line of duty or duty-related injury. Therefore, given the unlikely nature of incidence, JFRS believes the proposals included in SB 169 SCS 1 would not materially impact the funding, payment of benefits, or participation in either plan administered by JFRS. Therefore, requested any further actuarial analysis of SB 169 by the Systems' independent actuary.

In compliance with KRS 6.350(2)(c), the Judicial Form Retirement Systems (the agency in charge with the administration of JRP and LRP) certifies the following:

1. There has no individuals affected.
2. There is no change in benefits.
3. There is no change to employer costs.
4. There is no change to administrative expenses

Please let me know if you have any questions regarding this analysis.

Sincerely,

Bo Cracraft
Executive Director
