The fiscal impact of HB 303 GA on local governments is indeterminable.

Local governments currently participating in one of the above programs may have to integrate administrative changes as a result of HB 303 GA; for instance, occupational tax.

We don’t know the number of film and production companies that might locate in Kentucky in the future nor the number of employees that will work for them in Kentucky.

In regards to the various incentive programs in Sections 7, 21, 22, and 26, we don't know the number of counties with employers that would qualify to participate in the programs.

The wage assessment fee discussed in Section 20 would have an impact on local occupational taxes, but again we don't know what jurisdictions would be affected and to what extent, and whether they would forego any part of their local occupational license fee. Any change in procedures or how the net tax is calculated may require ordinances. If so, according to Kentucky League of Cities, most cities, especially the smaller ones, retain their city attorney on contract and pay on an hourly basis. Time spent drafting an ordinance is influenced by its complexity and the amount of research that is necessary. FY 2020 data reflected the average hourly rate was \$107. Rates for legal notices vary greatly depending on the length of the publication, the number of times it needs to be published and the newspaper in which the publication is placed. Therefore, these costs are unknown.

Part III: Differences to Local Government Mandate Statement from Prior Versions
