<b>FISCAL ESTIMATES</b>	<b>2022-2023</b>	<b>2023-2024</b>	<b>ANNUAL IMPACT AT FULL IMPLEMENTATION</b>
<b>REVENUES</b>			
<b>EXPENDITURES</b>		\$117,800 GF \$274,800 FF	\$117,800 GF \$274,800 FF
<b>NET EFFECT</b>		(\$117,800) GF (\$274,800) FF	(\$117,800) GF (\$274,800) FF

( ) indicates a decrease/negative

**PURPOSE OF MEASURE:** The purpose of the measure is to require Medicaid coverage for certified midwifery services.

**FISCAL EXPLANATION:** The Cabinet for Health and Family Services (CHFS) estimates that the provisions of the legislation would result in increased Medicaid expenditures related to emergency transportation and neonatal intensive care costs. CHFS notes that, currently, there are an average of 24,000 births per year in Kentucky, and 1.6 percent of those are home births. Taking into account the current home birth rate and the average number of births per year, the Department for Medicaid Services (DMS) estimates there would be at least 384 home births per year.

Based on available data on intrapartum transport rates, DMS estimates that approximately 130 of the home births, or about one-third, would require emergency transport to a hospital at a later stage in delivery at a cost of \$20,000 per year. DMS further estimates that approximately 32, or about 25 percent, of the infants born after the intrapartum transport would need additional care in the Neonatal Intensive Care Unit (NICU) at an average per stay cost of \$11,643, for a total of \$372,576 in NICU costs. Given the anticipated costs for emergency transports and NICU stays,

DMS estimates total expenditures of \$392,600 per year due to the provisions of the legislation with \$117,800 coming from General Fund and \$274,800 coming from Federal Funds.
