Part II: Bill Provisions and the Estimated Fiscal Impact Relating to Local Government

Section 1 (4) would amend KRS 224.40-315 to except from the term "municipal solid waste disposal facility" a solid waste site or facility that disposes exclusively of industrial solid waste it generated from its own industrial activity on the same, contiguous, or adjacent property. This exception would apply if the property is separated by a roadway, and would apply to additional industrial solid waste generated by and received from the generator's affiliate at property owned by the generator, or generated at another facility owned by the generator.

The bill would clarify that a solid waste disposal facility described in Section 1 (4) is not subject to the same fees and regulation as other residual or contained landfills or incinerators disposing of industrial solid waste.

HB 108/GA would have a neutral to positive fiscal impact on local governments. The bill would improve and make more authoritative Area Solid Waste Management Plans. Its provisions would lessen the ability of those industrial solid waste generators who may attempt to "get around" disposal limits by clarifying who is entitled to a disposal limit exemption and who is not.
