**(a) Estimate the following for the first year:**

**Expenditures:**The contract for reviewing and updating the physicians fee schedule is \$85,010.00.

**(b) How will expenditures, revenues, or cost savings differ in subsequent years?**

There will be no continuing expenditures related to the 2024 Workers' Compensation Medical Fee Schedule for Physicians; however, the Department is statutorily required to reevaluate the fee schedule every two years and additional expenditures will be required to perform these subsequent evaluations. While there is no direct cost savings, ensuring that charges and fees are fair, current, and reasonable for similar treatment of injured persons in the same community for like services where treatment is paid for by general health insurers, helps ensure injured employees receive treatment by qualified medical providers while maintaining premium costs. This administrative regulation does not generate revenue.

There may be increased medical costs for self-insured employers; however, without knowing what medical services will be required, it is not possible to estimate any increase. Employers that have obtained a workers' compensation insurance policy will not experience expenditures outside of insurance premiums.

**Revenues:None**

**(b) How will expenditures, revenues, or cost savings differ in subsequent years?**

There will be no change in expenditures, revenues, or cost savings in the second year; however, the Department is statutorily required to reevaluate the fee schedule every two years and additional expenditures may be required following subsequent evaluations.

There will be no change in expenditures, revenues, or cost savings in the second year; however, the Department is statutorily required to reevaluate the fee schedule every two years and additional expenditures may be required following subsequent evaluations.

**(5) Provide a narrative to explain the:**

**(a) Fiscal impact of this administrative regulation:**

There is no direct fiscal impact on state or local government because the fee schedule governs the cost of medical services between medical treatment providers and payment obligors. Where an employer is self-insured and directly paying workers’ compensation benefits, there may be some increased costs for medical services; however, without knowing what medical services will be required, it is not possible to estimate the fiscal impact. Employers that have obtained a workers’ compensation insurance policy will not experience expenditures outside of insurance premiums.

**(b) Methodology and resources used to determine the fiscal impact:**

This administrative regulation governs the charges and reimbursement for medical treatment provided to injured employees. The CPT codes used in the Fee Schedule were updated to 2024 standards. The Fee Schedule is based on Fair Health Commercial Database Values at the 45th percentile with no fees in the 2024 version being reduced from those in the 2022 Fee Schedule and there was a 7.5% cap on any increase in rates over those in the 2022 Fee Schedule for the same procedure code,

with the exception of home health, which is designated By Report, and dental codes, which have no cap. Radiology rates were retained at the 2022 Fee Schedule rates. Fair Health benchmarks are based on actual charge data as reported on claims, which are collected and aggregated from over 60 national and regional insurers across the country. After the data is run through a vigorous validation process, charges are organized by procedure code and geographic areas. The charges are arrayed from lowest to highest and assigned a percentile. In a case where the frequency of collected data for a particular procedure code/geographic area combination is not sufficient to produce a benchmark based on the actual data for that code, a benchmark is derived for that code using a relative value and conversion factor methodology applied to charges for codes in a related procedure code group. When necessary, usual and customary rates may also be obtained from a nationally recognized source that accounts for the rural areas of Kentucky. The conversion factor for Anesthesia is \$78.53. Increases to transportation fees are based upon current CMS values. Ground transportation is assigned 145% of Medicare and air transportation is assigned 210% of Medicare. Codes were added to this fee schedule at the request of the stakeholders for ease of billing and reimbursement purposes. There are 9,137 codes in the 2024 Kentucky Workers' Compensation Schedule of Fees for Physicians. Employers that have obtained a workers' compensation insurance policy will not experience expenditures outside of insurance premiums.

**(6) Explain:**

**(a) Whether this administrative regulation will have an overall negative or adverse major economic impact to the entities identified in questions (2) - (4). (\$500,000 or more, in aggregate)**

It is not anticipated that this administrative regulation will create an overall negative or adverse major economic impact to the entities identified in questions (2) - (4).

**(b) The methodology and resources used to reach this conclusion:**

The National Council on Compensation Insurance (NCCI) has reported a loss cost decrease in the voluntary market and a favorable loss experience for Kentucky over the last three years. This NCCI report reflects the result of prior fee schedules which were created using the same methodology used to establish in the 2024 Workers' Compensation Medical Fee Schedule for Physicians.
